Product overview

IBM® Maximo® Enterprise Adapter for Oracle Applications manages asset and work management processes and integrates the Oracle E-Business Suite with the rest of the enterprise. The adapter exchanges data by using enterprise services and publish channels, each of which acts as a communication channel between the adapter and one or more integration points in Maximo Asset Management. The adapter also updates the systems when you change data on either side of the integration, depending on how you configure and customize the integration points.

1 Step 1: Access the software and documentation

Access the product software from IBM Passport Advantage®. To download your product from Passport Advantage, follow the instructions in the Maximo Enterprise Adapter for Oracle Applications Download Document (<http://www.ibm.com/support/docview.wss?uid=swg24039569>).
