

IBM Security Directory Server

Version 6.3.1

Quick Start Guide

The Quick Start Guide describes a quick and easy way to install the product.

National Language Version: To obtain the Quick Start Guide in other languages, print the language-specific PDF from the installation media.

Product overview

IBM® Security Directory Server, previously known as IBM Tivoli® Directory Server, is the IBM implementation of the Lightweight Directory Access Protocol (LDAP) for Microsoft Windows, AIX®, Linux (System x®, System z®, System p®, and System i®), Solaris, and Hewlett-Packard UNIX (HP-UX) (Itanium) operating systems.

IBM Security Directory Server provides a server that stores directory information by using a DB2® database, a proxy server for routing LDAP operations to an appropriate directory server, client utilities, and graphical user interfaces (GUI) for managing servers and users.

1 Step 1: Access the software and documentation

You can download the product from the IBM Passport Advantage® website at http://www.ibm.com/software/howtobuy/passportadvantage/pao_customers.htm. Use the information in the download document, <http://www.ibm.com/support/docview.wss?uid=swg24035827>, to access the product installation image details.

The product offering includes the following components:

- IBM Installation Manager
- IBM Security Directory Server
- IBM DB2 Universal Database™ (Enterprise Server Edition/Workgroup Server Edition)
- Embedded WebSphere® Application Server
- IBM Global Security Kit (GSKit)

You can access the IBM Security Directory Server documentation at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDS.doc_6.3.1/welcome.htm.

2 Step 2: Evaluate the hardware and system configuration

For information about the hardware and system configuration for your operating system, see the Software Product Compatibility Reports website at <http://pic.dhe.ibm.com/infocenter/prodguid/v1r0/clarity/index.html> website. For more information, see *IBM Security Directory Server Version 6.3.1 Product Overview*.

3 Step 3: Review the product architecture

4 Step 4: Installing the product on a server

You can use IBM Installation Manager or the operating system utilities to complete the installation of IBM Security Directory Server on a computer. You can use IBM Installation Manager for the installation of IBM Security Directory Server on the following operating system:

- IBM AIX on POWER[®] architecture (ppc 64-bit)
- Linux on AMD64/EM64T architecture
- Microsoft Windows on IA32/x86 and AMD64/EM64T architectures

See *IBM Security Directory Server Version 6.3.1 Installation and Configuration Guide* on the IBM Security Directory Server documentation website at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDS.doc_6.3.1/welcome.htm.

5 Step 5: Installing a database

You can use IBM Installation Manager or the DB2 commands to complete the installation of IBM DB2 on a computer. See *IBM Security Directory Server Version 6.3.1 Installation and Configuration Guide* on the IBM Security Directory Server documentation website at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDS.doc_6.3.1/welcome.htm.

6 Step 6: Get started

After the installation of IBM Security Directory Server and corequisite software, create a directory serve instance. See *IBM Security Directory Server Version 6.3.1 Installation and Configuration Guide* on the IBM Security Directory Server documentation website at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDS.doc_6.3.1/welcome.htm.
