

Quick Start Guide

This guide describes a quick and easy way to install the products in the solution.

Solution overview

IBM Telco Network Cloud Manager offers an automated, AI-driven, agile approach for operations management. With comprehensive anomaly detection, and automatic grouping of events, you can identify patterns to isolate problems quickly. The solution consists of IBM Netcool® Operations Insight® with Cloud Native Analytics, the IBM Agile Service Manager and IBM Cloud™ Event Management extensions, IBM Operations Analytics - Predictive Insights, and IBM Agile Lifecycle Manager.

1 Step 1: Access the software and documentation

Follow the instructions in the IBM Knowledge Centers and the download document to download the product:
