CAD Mapping Limitations

The IBM TRIRIGA platform currently allows one type of CAD mapping per business object (BO). If you have multiple mappings associated to a particular BO, then only one of them will be selected in a Batch Association process. Below, you can see a case where there are two different mappings (Space Group Mapping and Space Mapping) pointing to the same triSpace - BO. Currently, only one CAD mapping is allowed per business object.

The drop-down list shows only one value in this case. In order to see Space Mapping, the user would need to remove the Space Group Mapping.
