### 过滤说明

- 过滤物料提供一种渐近式密度，具有较高的容尘量和低风阻的优点。
- 过滤物料符合 UL900 认证标准，不燃自熄。
- 过滤器物料采用打褶结构。
- 过滤器放置于金属插槽内，防止过滤器因碰撞影响过滤效能。
- 过滤效率符合EN-1822 标准下 Jafaenda 级别，对PM0.3或以上的空气悬浮物，过滤效率95%。
- 对PM2.5或以上的空气悬浮物，过滤效率为100%。
- 可针对极高浓度污染及需要洁净度极高的地方使用。

### Jafaenda AFU-11 产品规格

#### 产品规格

|                      |   |
|----------------------|---|
| 产品尺寸                 | 300mmx300mmx700mm   |
| 重量                   | 15KG  |
| 过滤效率                 | PM0.3 或以上微粒子效率为≥95%@0.3um-5.33cm/s风速下测定<br>PM2.5 或以上微粒子效率为100%  |
| 过滤网等级                | MERV 16   |
| 过滤纸面积吸               | >9.5m <sup>2</sup> (单块滤网面积x4块)                                  |
| 附介质重量                |   |
| 风量                   | 最高推荐风量1000m <sup>3</sup> /h                                     |
| 隔温                   | 配备了高效隔温的EPE发泡隔温板（符合欧洲防火标准BS476第6部，等级为最严格的Class 2 级别）提供优秀的隔温防火功能 |
| 工作环境                 | 工作环境温度在-20°C至60°C之间   |
| 风阻                   |   |
| 300m <sup>3</sup> /h | 16pa±5%   |

## Jafaenda AFU系列产品特点

### 易安装

- 超薄机身设计
- 无需电气连接
- 配备吊装件，可挂墙  
可挂天花
- 可以安装在HVAC管道  
上的任何位置

### 低维护

- 滤网易于更换，只需拧开  
螺扣，即可以打开机身板  
并更换滤网
- 高过滤效能，减少HVAC的  
维护及清洁费用

### 很安全

- 坚固的内部结构提供高密  
封性能及高效可靠表现
- 全机的内部结构和表面处  
理均采用市面上最好之物  
料，符合最高防火要求

## Jafaenda AFU-01产品规格

### 框架材质

- 框架支撑角采用德国  
BASF高 强 度 工 程 塑 胶  
Nylon+30%GF，通过模具  
注塑成型，框架支撑杆采  
用高品质航空铝材通过模  
具冲压折弯成型，表面采  
用美国杜邦涂层以增强防  
锈抗腐能力。

### 外壳面板

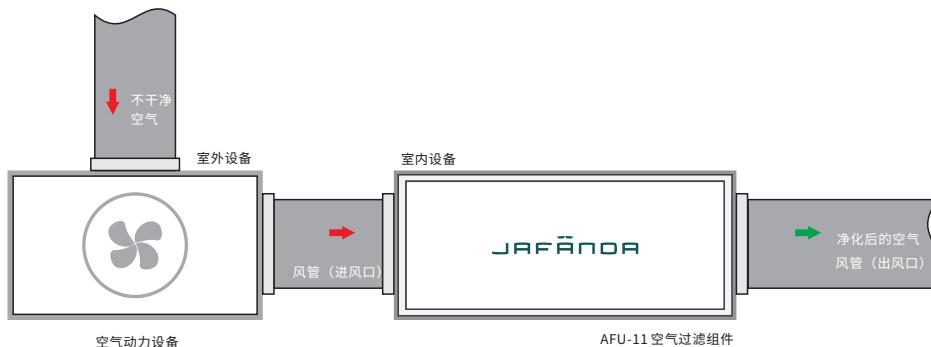

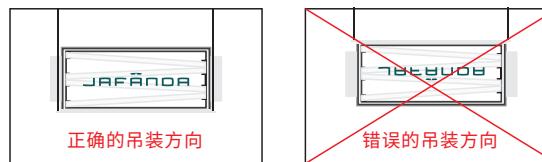

- 外壳面板为1.0mm镀锌  
钢板构造，可拆除式，只  
须拧紧或松脱外壳面板的  
机械螺扣即可，可装或拆  
除面板以增加使用的灵活  
性，侧面板带法兰结构，  
方便施工安装。

### 外壳内壁

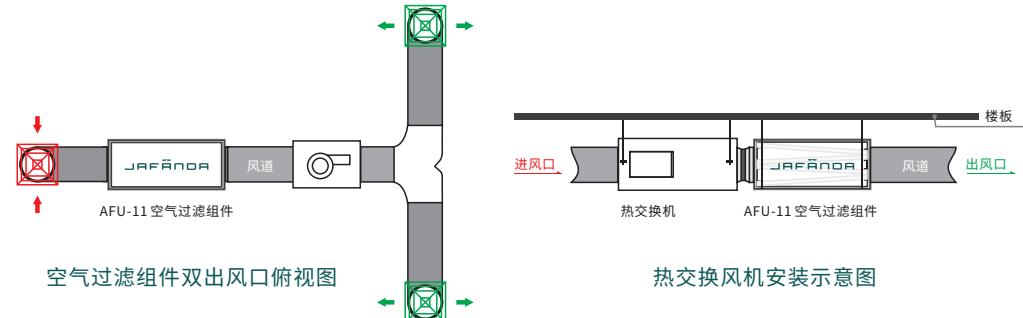

- 外壳内壁是采用10mm厚  
优质双面覆铝箔的EPE无  
氟泡沫保温板，提供优良  
的保温隔热和声音衰减特  
性，同时可以消除空气泄  
漏的可能性。

## 使用方法

可安装于任何风管道与风管道之间及可安装在中央空调的回风或新风入口，其高效低风阻的过滤器，在不用额外增加中央空调的风压下提供高效过滤功能。

## 过滤器更换、组装示意图

1、拧开机身盖板上的螺扣。

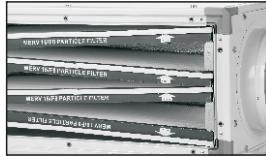

2、打开机身盖板。

3、抽出过滤器组件

4、插入更换后的过滤组件。

5、核对机身边框上提示箭头与过滤器上提示箭头是否一致。

6、合上机身盖板，拧紧螺扣固定。

## Filter Description

- The filter material has the progressive particle capture system, which features larger dust-holding capacity and smaller wind resistance.
- The filter media comply with UL900 standard.
- The filtering efficiency complies with EN-1822 standard, which reaches up to 95% for 0.3 micrometer particle.
- The filtering efficiency achieves 100% when filtering PM2.5.
- Suit in the area that has high concentration of pollution and high air quality requirements.

## Jafaenda AFU-11 Specifications

### Specifications

|                       |  |
|-----------------------|--|
| Size                  | 300mmx300mmx700mm  |
| Weight                | 15KG   |
| Filter efficiency     | PM0.3 or above ≥95%@0.3um -5.33cm/s<br>PM2.5 or above =100%  |
| Filter class          | MERV 16  |
| The filter media area | >9.5m <sup>2</sup> (single filter area multiply by 4)  |
| Air volume            | 1000m <sup>3</sup> /h (Maximum recommended)  |
| Insulation            | Equipped with EPE foam insulation board (qualify as European fireproofing standard BS476, No.2, Class 2) |
| Working environment   | Temperature between -20°C and 60°C   |

### Wind resistance

|----------------------|---------|
| 300m <sup>3</sup> /h | 16pa±5% |
|----------------------|---------|

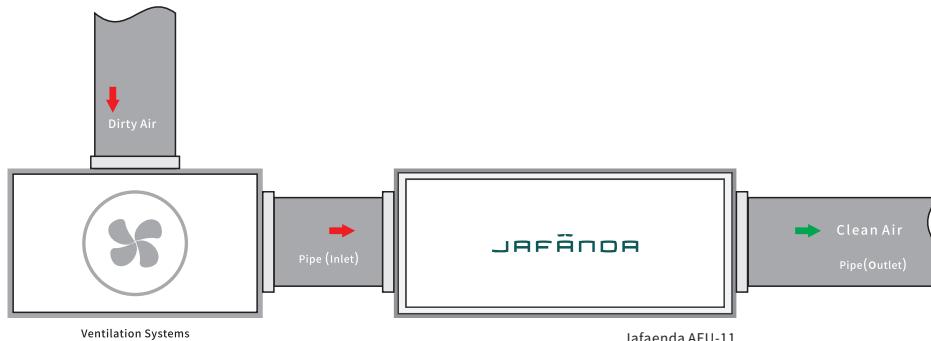

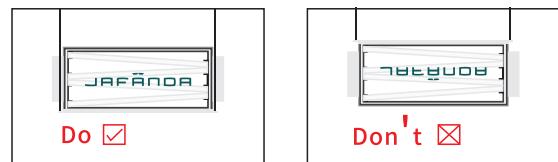

## Features of Jafaenda AFU-11

| Easy to be mounted   | Low maintenance cost   | Absolutely safe   |
|--|--|---|
| <ul style="list-style-type: none"> <li>· Ultra-slim body design</li> <li>· No electrical connection</li> <li>· Equipped with lifting hook, can be amounted on ceiling easily</li> <li>· Can be mounted in any position of the HVAC pipe</li> </ul> | <ul style="list-style-type: none"> <li>· Filters are easy to be replaced by unscrew manually</li> <li>· High filtering efficiency reduce the maintenance cost of HVAC</li> </ul> | <ul style="list-style-type: none"> <li>· Solid inner structure enhances efficiency and reliable performance.</li> <li>· The material used complies with the highest fireproofing requirements.</li> </ul> |

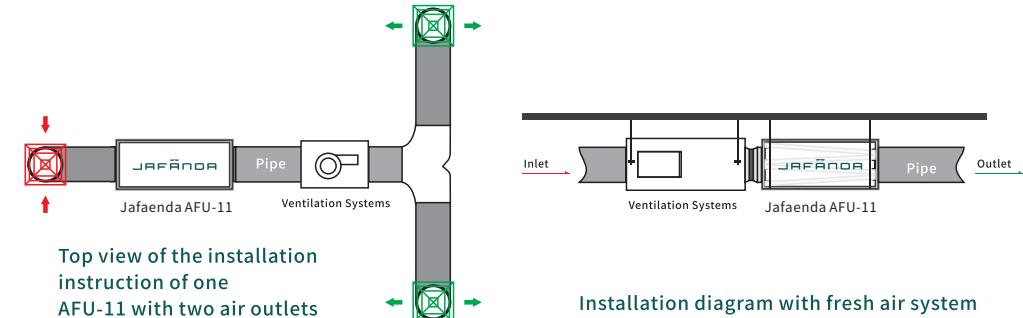

## Product structure of Jafaenda AFU-11

| Frame material   | Panel  | Inner wall of the panel  |
|--|--|--|
| <ul style="list-style-type: none"> <li>· The frame is made of BASF high strength industry plastic Nylon+30%GF. The support bars are made of aviation aluminum through stamping process. The DuPont coating material enhances the performance in antirust and anticorrosive.</li> </ul> | <ul style="list-style-type: none"> <li>· The panel is made of 1.0mm zincificated steel, which can be removed through twisting the screw manually or by using the special screw driver. The flange pipe designed for the convenience of construction and installation.</li> </ul> | <ul style="list-style-type: none"> <li>· The inner wall of panel is made of 10mm EPE non-CFC foam insulation, which has advantages in heat-insulating and sound-absorbing. In the meantime, reduces the possibility of air leakage.</li> </ul> |

**Usage** Jafaenda AFU-11 can be mounted in any position of the HVAC pipe and the Fresh air inlet. The low air resistance and high efficiency filters will not increase the pressure of central Air Conditioning system.

Location diagram of ceiling drilling

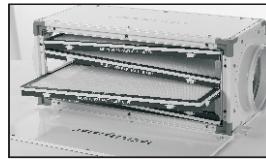

## Filter Replacing Instruction

Step1.Unscrew

Step2.Open the cover plate

Step3.Pull out the filter units

Step4.Replace the filter units

Step5.Check the installing direction as shown in the diagram.

Step6.Close the cover plate and screw.
