BMJ 出版簡介

BMJ-British Medical Journal 《英國醫學雜誌》是由英國醫學會（British Medical Association）、英國 BMJ 出版集團出版的一種綜合醫學、臨床醫學學會刊物。該刊初創於 1840 年，1857 年改為現名，每年出版 51 期，每週五出刊，主要刊載醫學科學原始研究論文、綜述、教育性論文以及對人類健康有影響的臨床、科學、社會、政治與經濟因素等方面的評論性文章，也刊登相關書評、新聞等類型文章並介紹醫學新發展、討論醫學道德問題，每週也用較大的篇幅刊登編輯者述評（Editorials）、新聞（News）和讀者來信（Letters）等類型的文獻。

BMJ 每年收到的投稿文章將近 6,000 篇，但錄用率只有 9%。BMJ 現發行量達到 108,500 份，其中有 13,500 份在國外發行。BMJ 的紙本出版有四個版本：General Practice、Clinical research、International、Compact。其中 International edition 達到將近 173,000 個讀者。每週出版的期刊內容將會同時呈現在這四個版本中、和在 Student BMJ 與線上 BMJ。BMJ 2004 年影響指數（IF 值）為 7.038。

BMJ Journals Online

BMJ 結合各領域的專業團體提供約 25 種專業期刊電子版。

BMJ Journal Online 收錄清單如下：

1. ADC Fetal and Neonatal
2. Annals of Rheumatic Diseases
3. Archives of Disease in Childhood
4. British Journal of Ophthalmology
5. British Journal of Sports Medicine
6. BMJ – British Medical Journal
7. Emergency Medicine Journal
8. Evidence Based Medicine
9. Evidence Based Mental Health
10. Evidence Based Nursing
11. Gut
12. Heart
13. Injury Prevention
14. Journal of Clinical Pathology
15. Journal of Epidemiology & Community Health
16. Journal of Medical Ethics
17. Journal of Medical Genetics
18. Journal of Neurology, Neurosurgery and Psychiatry
19. Medical Humanities

20. Occupational and Environmental Medicine
21. Postgraduate Medical Journal
22. Quality & Safety in Health Care
23. Sexually Transmitted Infections
24. Thorax
25. Tobacco Control

最新期刊清單請參考BMJ Journal Online官方網站。BMJ Journal Online的期刊清單可以到<http://www.bmjournals.com>取得。

Series

在 Series 這項功能下，使用者可以瀏覽從 1994 年以來 BMJ 出版社所出版的叢書。這項功能仍在進行中，如果使用者有看到任何叢書或在叢書中文章有缺的情況都可以跟出版社聯絡。在此項目下主要分成：

- ABCs
- Other series (Statistics notes, Drug points...等叢書)
- Reviews (書籍、影片、網站...等評論)
- Fillers

Theme issues

BMJ 每年會出版幾個論題性期刊，使用者可以在 Theme issues 中瀏覽即將出版或已經出版的 Theme issues。Theme issues 原始論文出版後都經過一般的同儕評論過程。這些 Theme issue 都經由內部和外部的編輯評選為適當的 Theme issue。如果您想投稿到 Theme issues，請在您的說明書中提及。

Interaction 互動

1. Rapid responses

Rapid responses 提供使用者可以瀏覽 British Medical Journal 的使用者對於 British Medical Journal 文章的意見留言。

2. Q & A

所有在 British Medical Journal 中的 Q & A 都是來自讀者和非 BMJ Publishing

Group Limited 或 British Medical Association 的觀點。在 Q & A 中提供的問題和解答只供指導用，它不能取代專業醫生的建議。BMJ Publishing Group Limited 和 British Medical Association 對於以下行為不負任何責任：

- (A) 任何發表在此區的資料
- (B) 使用者相信任何發表在 Q & A 上的資料

3. Past polls and debates

使用者可以在此瀏覽過去的民意調查和討論。

4. Webchats + Blogs

使用者可以在此瀏覽相關的 Webchats 和 Blogs。

Services 服務

Search

提供使用者 British Medical Journal 的進階查詢功能。

Email alerts

提供使用者 Journal issues、Online First articles、particular article、search terms、UK Health News Stories 這幾項的 Email Alert。

UK health news

提供每日在英國全國性報紙有關健康新聞的摘要，由 Presswatch Media（一個國際性媒體監控服務）幫 bmj.com 準備。使用者可以瀏覽每日最新的健康新聞或是查詢、瀏覽過期的新聞。也可以建立 Email Alert。

Gene screening helps put an end to haemophilia
Source: [Daily Telegraph](#)
Date: 11/07/2005
Following last weeks London bombings the nationals continue with light coverage of other stories. The Daily Telegraph reports that the Clinical Sciences Centre in Hammersmith and Queen Charlotte's Hospital has developed a way of screening embryos for haemophilia, and successfully targeted the mutation in a test case on an IVF mother, Debbie Hunter, who now has a three month old baby free from the condition. The new technique will also be able to screen out genes that raise the risk of cancer.

Abstract

Objective: To assess the effects of oral mucolytics in adults with stable **chronic** bronchitis and **chronic obstructive pulmonary** disease.

Design: Systematic review of randomised controlled trials that compared at least two months of regular oral mucolytic drugs with placebo.

Studies: Twenty three randomised controlled trials in outpatients in Europe and United States.

Main outcome measures: Exacerbations, days of illness, lung function, adverse events.

Results: Compared with placebo, the number of exacerbations was significantly reduced in subjects taking oral mucolytics (weighted mean difference -0.07 per month, 95% confidence interval -0.08 to -0.05, $P<0.0001$). Based on the annualised rate of exacerbations in the control subjects of 2.7 a year, this is a 29% reduction. The number needed to treat for one subject to have no exacerbation in the study period would be 6. Days of illness also fell (weighted mean difference -0.56, -0.77 to -0.35, $P<0.0001$). The number of subjects who had no exacerbations in the study period was greater in the mucolytic group (odds ratio 2.22, 95% confidence interval 1.93 to 2.54, $P<0.0001$). There was no difference in lung function or in adverse events reported between treatments.

Conclusions: In **chronic** bronchitis and **chronic obstructive pulmonary** disease, treatment with mucolytics is associated with a reduction in acute exacerbations and days of illness. As these drugs have to be taken long term, they could be most useful in patients who have repeated, prolonged, or severe exacerbations of **chronic obstructive pulmonary** disease.

An unusual cause of soft tissue infection

An Unusual Case of Soft Tissue Infection 4 July 2005 ▼

Jeffrey P Garner, Specialist Registrar in General Surgery, Chesterfield and North Derbyshire Royal Hospital, Nick Everitt

Dear Editor,

The case presented in the Editor's Quiz raises several issues regarding compartment syndromes and the timing of interventions and the nomenclature of necrotising infections and their surgical treatment.

Gas within the muscle compartments on plain radiography not only suggests a gas forming myonecrotic infection, particularly in a diabetic patient, but also a high probability of a compartment syndrome developing. The elevated creatine phosphokinase confirms significant muscle injury but is unnecessary as the clinical presentation and radiological findings are sufficient to require immediate exclusion of a compartment syndrome by surgical exploration. Loss of pulses is a late sign of raised intra-compartmental pressure and delay in fasciotomy increases the degree of sepsis, rate of limb loss and extent of reperfusion injury after the pressure within the compartment is released. This may have contributed to this patient 'not surviving the procedure'. If at fasciotomy there is myonecrosis the choice of procedure lies between either aggressive debridement or, in this case with a probable systemic gas forming

Guidelines for authors and reviewers

Welcome to **GUT's** guidelines for authors and reviewers. These guidelines have been compiled to provide maximum support and assistance for authors and reviewers throughout all stages of the publication process.

Authors: please follow the journal and manuscript preparation guidelines closely. The Editors reserve the right to return papers if submitted incorrectly.

GUT uses an [online submission and review system \(Bench>Press\)](#) to track the peer review process, all manuscripts must now be submitted via [Bench>Press](#). Please [contact the editorial office](#) for guidance if you are unable to submit in this way.
