Safety Precautions
CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING: To reduce the risk of electric shock, do not remove cover or back.
No user-serviceable parts inside. Refer servicing to qualified service personnel.

The lightning flash with arrowhead within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

WARNING: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.
Do not place liquid containers (flower vase, cups, cosmetics, etc.) above the set (including on shelves above, etc.).

Important Safety Instructions

1) Read these instructions.
2) Keep these instructions.
3) Heed all warnings.
4) Follow all instructions.
5) Do not use this apparatus near water.
6) Clean only with dry cloth.
7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11) Only use attachments / accessories specified by the manufacturer.
12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over.

13) Unplug this apparatus during lightning storms or when unused for long periods of time.
14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected.

WARNING/CAUTION (TV set)

⚠ WARNING

Small parts can present choking hazard if accidentally swallowed.
Keep small parts away from young children.
Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

■ Set up

This Plasma TV may fall and can cause personal injury or even death if not installed correctly. To prevent personal injury or death, follow these warnings:

● **Install the Plasma TV in accordance with the manufacturer's recommended pedestal or stand, corresponding hardware and installation instructions.**
  This Plasma TV is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability. The following accessories are manufactured by Panasonic Corporation.
  • Wall-hanging bracket (Angled)
    TY-WK4P1RW

● **Be sure to ask a qualified technician to carry out the installation and set-up.**
  Two or more people are required to install or remove the television.
● **Some wall mounts (wall-hanging brackets) are not designed to be mounted to walls with steel studs or old cinder block constructions.**
  Ask your dealer or licensed contractor to properly secure the wall-hanging bracket.
● **Do not route the TV's power cord inside the wall.**
  The power cord was not designed for in-wall mounting. Doing so can lead to fire hazard.
● **Do not place the Plasma TV or its stand on a sloped or unstable surface.**
  The Plasma TV may fall or tip over.
● **Do not support the Plasma TV on a non-specified pedestal.**
● **Do not place the Plasma TV on furniture that can easily be used as steps, such as a chest of drawers.**
● **Do not climb or allow children to climb on the Plasma TV**
● **Place or install the Plasma TV where it cannot be pushed, pulled over or knocked down.**
● **Route all cords and cables such that they cannot be tripped over or pulled by curious children.**

- **Do not place any objects on top of the Plasma TV.**
  If water spills onto the Plasma TV or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma TV, please consult an Authorized Service Center. In the unlikely event that you receive a shock from this product it is possible that your household outlet may be wired improperly. Have an electrician verify that the TV's outlet is properly wired. If the symptom persists, have the TV serviced by a qualified authorized technician.

■ AC Power Supply Cord
To prevent fire or electric shock:
- **The Plasma TV is designed to operate on a 120 V AC, 60 Hz service. Insert the power cord plug as far as it will go into the wall socket.**
  If the plug is not fully inserted, heat may generate, which could cause a fire.
- **The included power cord is for use with this unit only.**
- **Do not use any power cord other than that provided with this TV.**
- **Do not handle the power cord plug with wet hands.**
- **Do not do anything that might damage the power supply cord.**
- **When disconnecting the power supply cord, hold the plug, not the cord.**
- **Do not use the power supply cord if the plug or cord is damaged.**
  Replace the cord or contact your Authorized Service Center.
- **Do not use a 3-prong to 2-prong AC plug adaptors to connect your TV's plug to the wall outlet.**
  Doing so will defeat the TV plug's safety feature, which can lead to a shock hazard. If the wall outlet does not accommodate a 3-prong plug, have a qualified electrician replace your outlet and check the associated wiring.

■ Handling the power supply cord
- **Insert the power plug fully into the socket outlet. (If the power plug is loose, it could generate heat and cause fire.)**
- **Ensure that the power plug is easily accessible.**
- **Ensure the earth pin on the power plug is securely connected to prevent electrical shock.**
  • An apparatus with CLASS I construction shall be connected to a power socket outlet with a protective earthing connection.
- **Do not touch the power plug with a wet hand. (This may cause electrical shock.)**
- **Do not use any power cord other than that provided with this TV. (This may cause fire or electrical shock.)**
- **Do not damage the power cord. (A damaged cord may cause fire or electrical shock.)**
  • Do not move the TV with the cord plugged in the socket outlet.
  • Do not place a heavy object on the cord or place the cord near a high-temperature object.
  • Do not twist the cord, bend it excessively, or stretch it.
  • Do not pull on the cord. Hold onto the power plug body when disconnecting cord.
  • Do not use a damaged power plug or socket outlet.
- **If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odor is detected from the Plasma TV, unplug the power supply cord immediately.**
  Continued use of the TV under these conditions might cause a fire or permanent damage to the TV. Have the TV evaluated by an Authorized Service Center. Servicing of the TV by unauthorized personnel is strongly discouraged due to its high voltage.

- **If water or an object gets inside the Plasma TV, if the Plasma TV is dropped, or if the enclosure becomes damaged, unplug the power supply cord immediately.**
  A short-circuit may occur, which could cause a fire. Contact an Authorized Service Center for an evaluation.

⚠ CAUTION

- **Do not cover the ventilation holes.**
  Doing so may cause the Plasma TV to overheat, which can cause a fire or damage to the Plasma TV.
- **Leave a space of 3 15/16" (10 cm) or more at the top, left and right, and 2 3/4" (7 cm) or more at the rear.**
- **When using the pedestal, keep the space between the bottom of the TV and the pedestal or stand surface clear from objects that may obstruct ventilation.**

■ When Moving the Plasma TV
- **Be sure to disconnect all cables before moving the Plasma TV.**
  Moving the TV with its cables attached might damage the cables which, in turn, can cause fire or electric shock.
- **To prevent an electric shock, disconnect the power plug from the wall outlet as a safety precaution before carrying out any cleaning.**
- **Transport only in upright position.**
  Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.
- **Using a dry cloth, clean any dust from the power supply cord and plug regularly.**
  Build-up of dust on the power cord plug can increase humidity, which might damage the insulation and cause a fire.
- **This Plasma TV radiates infrared rays;**
  therefore, it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma TV.
- **The TV will still consume some power as long as the power supply cord is connected to the wall outlet.**

- **Display panel is made of glass. Do not apply strong force or impact to the display panel.**
  This may cause damage resulting in injury.
- **The TV is heavy. TV should be handled by 2 or more people. Support as shown to avoid injury by the TV tipping or falling.**
Safety Precautions (Continued)

⚠ WARNING

■ About Prevention of Accidental Ingestion
● **Do not store batteries, the band accessory or nose pads in places where small children can reach.**
   There is a danger small children could swallow such parts by mistake.
   • If a child accidentally swallows such parts, seek immediate medical attention.

■ About Prohibition of Disassembly
● **Do not disassemble or modify the 3D Eyewear.**

■ About lithium battery
● **Batteries must not be exposed to excessive heat such as sunshine, fire or the like.**

⚠ CAUTION

■ About 3D Eyewear
● **Do not drop, exert pressure on, or step on the 3D Eyewear.**
   Doing so may damage the glass section, which may result in injury.
   • Always store the 3D Eyewear in the case provided when not in use.
● **Be careful of the tips of the frame when putting on the 3D Eyewear.**
   Accidentally inserting the tip of the frame into the eye may cause injury.

● **Be careful not to trap a finger in the hinge section of the 3D Eyewear.**
   Doing so may result in injury.
   • Pay special attention when children are using this product.

■ About Use of 3D Eyewear
● **Parents/guardians should monitor children's viewing habits to avoid their prolonged use without rest periods.**
● **Use only the 3D Eyewear recommended for this TV.**
● **Only use the 3D Eyewear for the specified purpose.**
● **Do not move around while wearing the 3D Eyewear.**
   The surrounding area appears dark, which may result in falling or other accidents that may cause injury.

■ About Viewing of 3D Images
● **In the event that you experience dizziness, nausea, or other discomfort while viewing 3D images, discontinue use and rest your eyes.**
● **Do not use if the 3D Eyewear is cracked or broken.**

■ About lithium battery
● **Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.**

⚠ WARNING

CEA CHILD SAFETY NOTICES: Flat panel displays are not always supported on the proper stands or installed according to the manufacturer's recommendations. Flat panel displays that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests or carts may fall over and may cause personal injury or even death.

The consumer electronics industry (of which Panasonic is a member) is committed to making home entertainment enjoyable and safe. To prevent personal injury or death, be sure to follow the following safety guidelines:

TUNE INTO SAFETY:
• One size does NOT fit all. Follow the manufacturer's recommendations for the safe installation and use of your flat panel display.
• Carefully read and understand all enclosed instructions for proper use of this product.
• Don't allow children to climb on or play with furniture and television sets.
• Don't place flat panel displays on furniture that can easily be used as steps, such as a chest of drawers.
• Remember that children can become excited while watching a program, especially on "larger than life" flat panel displays. Care should be taken to install the display where it cannot be pushed, pulled over, or knocked down.
• Care should be taken to route all cords and cables connected to the flat panel display so that they cannot be pulled or grabbed by curious children.

WALL MOUNTING: IF YOU DECIDE TO WALL MOUNT YOUR FLAT PANEL DISPLAY, ALWAYS:
• Use a mount that has been recommended by the display manufacturer and/or listed by an independent laboratory (such as UL, CSA, ETL).
• Follow all instructions supplied by the display and wall mount manufacturers.
• If you have any doubts about your ability to safely install your flat panel display, contact your retailer about professional installation.
• Make sure the wall where you are mounting the display is appropriate. Some wall mounts are not designed to be mounted to walls with steel studs or old cinder block construction. If you are unsure, contact a professional installer.
• A minimum of two people are required for installation. Flat panel displays can be heavy.

Panasonic recommends that a qualified installer perform the wall-mount installation. See page 4.

> **The American Academy of Pediatrics discourages television viewing for children younger than two years of age.**

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution:
To assure continued compliance, follow the attached installation instructions and use only shielded interface cables when connecting to computer or peripheral devices. Any changes or modifications not expressly approved by Panasonic Corp. of North America could void the user's authority to operate this device.

CANADIAN NOTICE:
For Model TC-46PGT24
This Class B digital apparatus complies with Canadian ICES-003.

Notes

■ Do not display a still picture for a long time
This causes the image to remain on the plasma screen ("Image retention"). This is not considered a malfunction and is not covered by the warranty.

To prevent the "Image retention", the screen saver is automatically activated after a few minutes if no signals are sent or no operations are performed. (p. 65)

Typical still images
- Channel number and other logos
- Image displayed in 4:3 mode
- SD Card photo ● Video game ● Computer image

■ Set up
- Do not place the unit where it's exposed to sunlight or other bright light (including reflections).
- Use of some types of fluorescent lighting may reduce the remote control's transmission range.

Warning

● In order to maintain the TV's performance and safety, be absolutely sure to ask your dealer or a licensed contractor to secure the wall-hanging brackets.
● Carefully read the instructions accompanying optional accessories, and be absolutely sure to take steps to prevent the TV from tipping over.
● Handle the TV carefully during installation since subjecting it to impact or other forces may cause product damage.
● Take care when fixing wall brackets to the wall. Always ensure that there are no electrical cables or pipes in the wall before hanging bracket.
● When using the angled-type wall hanging bracket, please ensure that there is sufficient space for the connecting cables not to press against the wall when the TV is tilted forward.
● For safety reasons, remove units no longer being used from their wall-mounted locations.

Installing the remote's batteries

❶ Pull open

Hook

❷ Close
Note the correct
polarity (+ or -).

Caution

● Incorrect installation may cause battery leakage and corrosion, resulting in damage to the remote control.
 ● Do not mix old and new batteries.
 ● Do not mix different battery types (such as alkaline and manganese batteries).
 ● Do not use rechargeable (Ni-Cd) batteries.
● Do not burn or break batteries.

■Assembling the pedestal

● Fix securely with assembly screws Ⓐ . (Total 3 screws)
● Tighten screws firmly.

Removing the pedestal from the TV
Be sure to remove the pedestal in the following way when using the wall hanging bracket or repacking the TV.
① Remove the assembly screws Ⓑ from the TV.
② Pull out the TV from the pedestal.
③ Remove the assembly screws Ⓐ from the pole.

Warning

Do not disassemble or modify the pedestal.
● Otherwise the TV may fall over and become damaged, and personal injury may result.

Caution

Do not use any other TV and displays.
● Otherwise the TV may fall over and become damaged, and personal injury may result.
Do not use the pedestal if it becomes warped or physically damaged.
● If you use the pedestal when it is physically damaged, personal injury may result. Contact your nearest Panasonic Dealer immediately.
During set-up, make sure that all screws are securely tightened.
● If sufficient care is not taken to ensure screws are properly tightened during assembly, the pedestal will not be strong enough to support the TV, and it might fall over and become damaged, and personal injury may result.
When removing the pedestal, do not remove the pedestal by any methods other than the specified procedure. (see above)
● Otherwise the TV and/or pedestal may fall over and become damaged, and personal injury may result.

3 Auto channel setup (ANT/Cable setup)

① Select the connected Antenna in terminal
Not used: Go to ④ (Label inputs)

① select
② OK

Select "Not used" when no wire is connected to the "Antenna/Cable" terminal.
● Typical when a Cable/Satellite box is connected to a TV input.
● Prevents accidental tuning to an unavailable signal.

② Select "Start"
Skip: Go to ④ (Label inputs)

① select
② OK

Start scanning the channels
(Available channels are automatically set.)

Auto program	
Progress	8%
Number of analog channels	10
Number of digital channels	0
Press RETURN to quit	
③ Complete the Auto program setup
Completion message is displayed when the Auto program scan is successfully completed.

Auto program	
Number of analog channels	10
Number of digital channels	0

Auto program completed.
Press OK to continue.

OK
If there is no available channel, return to ③ - ① (ANT/ Cable setup). "Not used" will be selected.

4 Select the Input labels (Label inputs)
Select NEXT then press OK to go to the next step.

■ About wireless LAN

● Wireless LAN adapter and Access point need to be obtained separately.
  For the latest information on applicable LAN adapters, check the following website:
  http://panasonic.jp/support/global/cs/tv/
● Check that the Access point supports WPS*.
  (If it does not support WPS, the encryption key of the Access point is required when configuring settings.)
● Follow the instructions on the Access point setup screen and configure the appropriate security settings.
  For more details on setting of Access point, please refer to operating manual for the Access point.
● We recommend using 11n (5 GHz) for the wireless system between the wireless LAN adapter and Access point.
  Communication is also possible with 11a, 11b, and 11g (2.4 GHz), but the communication speed may be slower.
● If the wireless system of the Access point is changed, devices that could connect by wireless LAN may no longer be able to connect.
● When VIERA CAST, Network camera, or other device is using the network, do not disconnect the wireless LAN adapter.
● Keep the TV away from the following devices as much as possible:
  Wireless LAN, Microwaves, and other devices that use 2.4 GHz and 5 GHz signals.
  Otherwise, the TV failures such as malfunction may occur due to the radio wave interference.
* WPS: Wi-Fi Protected Setup

Viewing 3D images on TV

You can enjoy 3D images by wearing the 3D Eyewear supplied with this TV and to view 3D broadcasts and 3D image software.
● Optional Accessories (p.8)

Basic features of 3D Eyewear

This product cannot be used as sunglasses.
This product can be worn over vision correction glasses.

■ Part names and functions

Infra-red receiver
Receives infra-red signals from the television.
The liquid crystal shutter open/close timing is controlled by receiving infra-red signals from the television, which provide 3D expression of the images.

Battery case
● Fitting the batteries (p. 23)
When using for the first time, remove the insulating sheet. (p. 23)

Nose pad installation section
3D Eyewear inner section (p. 23)

Specialized band can be attached here. (p. 23)
Liquid Crystal Shutter
Controls the images for 3D viewing.
The left and right liquid crystal shutters are alternately opened and closed in time with the left side and right side images that are alternately displayed on the television to achieve the 3D effect.

Power button (bottom side of 3D Eyewear)
Switches on the 3D Eyewear power.

Power button

Indicator lamp

Press and hold the power button for approximately 1 second to switch the power on, and the Indicator lamp lights for approximately 2 seconds. To switch the power off, press and hold the power button for approximately 1 second. (The Indicator lamp flashes 3 times, then the power switches off.)

Accessories

3D Eyewear (1)

3D Eyewear case (1)

3D
FULL HD

Specialized band (1)

①
②
● If the end of the specialized band is loosened, make a loop at the end as shown in the above figure and smooth the twisted rubber before using.

Nose pad (1 of each)

A   B

● Use either nose pad A or B for your preference.
● If you put the 3D Eyewear on vision correction glasses, the nose pad is recommended to be removed.

■ Specifications

Lens type	Liquid Crystal Shutter type	**Dimensions**	Width: 6.97" (177 mm) Height: 1.82" (46 mm) Overall length: 6.86" (174 mm)
Batteries (duration)	Coin-shaped lithium battery CR2032 (approx. 75 hours in continuous use)		
Usage temperature range	32 °F – 104 °F (0 °C – 40 °C)	**Power supply**	DC 3 V
		Mass (including batteries)	0.14 lb (63 g)
Viewing range*	Transmitter for 3D Eyewear Within 3.2m from front surface (Within ±35° horizontal, ±20° vertical)	**Materials**	Main body: resin Lens section: Liquid crystal glass

* Viewing range: The location of the 3D Eyewear transmitter (p.13)

Using for the first time

■ Remove the insulating sheet

insulating sheet
■ Attach the specialized band
If the 3D Eyewear slips out of place, use the specialized band included to hold it in place.

Specialized band
● Attach the band to the left and right tips of the frame, and adjust the length.

■ Attach the nose pad   If required, use the included nose pad.
Nose pad A

● Nose pad A adjusts the attachment position of the 3D Eyewear between 2 vertical levels.
  (Slot 2 of the 3 protrusions on the 3D Eyewear deeply into the holes on nose pad A.)
● When using nose pad B, ensure that all 3 protrusions on the 3D Eyewear are inserted deeply into the 3 holes on nose pad B.

Replacing the batteries

When the remaining battery level is low, the Indicator lamp flashes 5 times upon turning the 3D Eyewear power ON.
(Early battery replacement is recommended.)

① **Loosen the screw from the cover using the screwdriver (included).**

screwdriver

Note

● Use the specified type of battery (coin-shaped lithium battery CR2032).
● Do not insert the battery with the polarity (plus $\oplus$ and minus $\ominus$) backwards.
● Dispose of the old batteries as non-burnable garbage, or in line with the garbage regulations in your local area.

② **Replace the battery, and then replace the cover.**

CR2032 H

● Always tighten the screw to hold the battery case cover in place.

Viewing 3D images on TV (Continued)

Viewing 3D images

Using the television menu controls, set so that 3D images are shown.
- You can watch 3D images in the following cases: (2D->3D (Simulated 3D) p. 62)
  - When a 3D image supporting Blu-ray Disc is played on a 3D image supporting player/recorder connected using a HDMI cable to a 3D image supporting television.
  - 3D image supported broadcast (program)
  - 3D Photo, 3D Movie taken by LUMIX / Camcorder. (available in autumn 2010)

1 Wearing the 3D Eyewear
① Press and hold the power button on the 3D Eyewear for approximately 1 second.
   (The Indicator lamp lights for approximately 2 seconds.)
② Put on the 3D Eyewear.
   If the 3D Eyewear slips out of place, hold it in place using the specialized band, and adjust the length of the band. (p. 23)

■ **Press to exit from a menu screen**
EXIT

■ **Press to return to the previous screen**
RETURN

If the 3D images are not displayed correctly or the images cause discomfort, the images can be adjusted by following this procedure.
* The perceived three dimensional effects of the 3D Eyewear differ from person to person.

① **Display the VIERA TOOLS screen and select "3D"**
- Using Setup menu (p. 39)
  ① select
  ② next
② **Select the item and set**
- 3D settings (see below)

3D settings	
3D Eyewear	On
3D format	Auto detect
2D->3D depth	Medium
Left / Right swap	Swapped
Diagonal line filter	Off
Safety precautions	

① select
② change

2 After Use
Press and hold the power button on the 3D Eyewear for approximately 1 second.
(The Indicator lamp on the 3D Eyewear flashes 3 times, then the power switches off.)
After using the 3D Eyewear, store it in the case provided.

3D settings

If the images cause discomfort, they can be adjusted with the following settings.
- These settings are reset by switching inputs or selecting channel. (Settings will not be retained.)

■ **3D Eyewear (On/Off)**
`3D Eyewear     On`

Off: 3D images can be deactivated by turning "Off" while viewing. (When 3D Eyewear is not worn)

■ **3D format**
(Auto detect/Side by side/Top and bottom/2D->3D/Native)
`3D format     Auto detect`

Auto detect: (Default) When the HDMI receives information in which 3D mode is detected, 3D images are automatically displayed according to the signal. (Switching may not occur depending on the signal.)
Side by side/Top and bottom:
Allows you to set this setting to match the image state.
2D->3D: Allows you to transform normal 2D image to 3D image (p. 62).
   You can also adjust 3D depth in "2D->3D depth" menu. (see right)
   "Left / Right swap" and "Diagonal line filter" are not available.
Native: Displays the input signals as is on the screen.

When the HDMI receives information in which Full HD (Frame Sequential Method) is detected, the image is automatically displayed regardless of "3D format" settings.

■ **2D->3D depth (Minimum/Medium/Maximum)**
`2D->3D depth     Medium`

Adjusts 3D depth. Available only when "2D->3D" is selected in "3D format".

■ **Left / Right swap (Normal/Swapped)**
`Left / Right swap     Swapped`

Change this to "Swapped" when the phases are reversed (when there is an unusual sense of depth).

■ **Diagonal line filter (On/Off)**
(Switch "Side by side" and "Top and bottom" types)
`Diagonal line filter     Off`

On: Resolves discomfort caused by receiving a quincunx matrix signal.

■ **Safety precautions**
Displays message for viewing 3D images.

* If a signal received from an external device is different from the 3D setting of the TV, such as 2D signal when the TV is set to 3D mode, the images may not be displayed correctly.

Using Precautions

■ Liquid Crystal Shutter
● Do not apply pressure to the liquid crystal shutter. Also, do not drop or bend the 3D Eyewear.
● Do not scratch the surface of the liquid crystal shutter with a pointed instrument etc.
　Doing so may cause damage to the 3D Eyewear, and reduce the quality of the 3D image.

■ Infra-red receiver section
● Do not soil the infra-red receiver section or attach stickers etc. to it.
　• Doing so may prevent the receiver from receiving signals from the television, which may prevent the 3D Eyewear from operating normally.
● If the 3D Eyewear is affected by other infra-red data communication equipment, the 3D images may not be displayed correctly.

■ Cautions During Viewing
● Do not use devices that emit strong electromagnetic waves (such as cellular phones or personal transceivers) near the 3D Eyewear. Doing so may cause the 3D Eyewear to malfunction.
● The 3D Eyewear cannot operate fully at high or low temperatures.
　Please use within the specified usage temperature range (p. 22).
● If the 3D Eyewear is used in a room in which fluorescent lights (50 Hz) are used, the light within the room may appear to be flickering. In this case, either darken or switch off the fluorescent lights when using the 3D Eyewear.
● Wear the 3D Eyewear correctly. 3D images will not be correctly visible if the 3D Eyewear is worn upside down or back-to-front.
● Liquid crystal displays (such as computer screens, digital clocks, or calculators etc.) may be difficult to see while wearing the 3D Eyewear. (The polarizing axis does not match, causing the displays to appear black.)
　Do not wear the 3D Eyewear when watching anything other than 3D images.
● Individual differences may occur in which the 3D images are difficult to see, or cannot be seen, especially in users that have a different level of eyesight between the left and right eyes. Take the necessary steps (wearing glasses etc.) to correct your eyesight before use.

■ For comfortable viewing
● View the screen at a distance at least 3 times further than the effective height of the screen.
　Recommended distance:
　　　For a 46-inch television, 5'6" (1.7 m) or more.
　Using the 3D Eyewear at a distance closer than the recommended distance may cause eyesight fatigue.
　When the top and bottom area of the screen is blackened, such as during some movies, view the screen at a distance 3 times further than the height of the actual image. (That makes the distance closer than above recommended figure.)

Storage and Cleaning

● Clean using a soft, dry cloth.
　Wiping the 3D Eyewear with a soft cloth that is covered in dust or dirt may scratch the eyewear. Shake off any dust from the cloth before use.
　Do not use benzene, thinner, or wax on the 3D Eyewear, as doing so may cause the paint to peel off.
● Do not submerge the 3D Eyewear in liquid such as water when cleaning.
● Avoid storing the 3D Eyewear in hot or highly humid locations.

Troubleshooting/Q&A

Images are not 3D	• Is "3D Eyewear" set to "On"?
	  Switch "3D Eyewear" set to "On".
	• Is "3D input format" set correctly?
	  When the HDMI receives information in which 3D mode is not detected, 3D images are not automatically displayed.
	  Adjust "3D input format" according to the 3D images.
	• Is there a sticker or other such item blocking the infra-red reception section on the 3D Eyewear?
	  The 3D Eyewear operates by receiving signals from the television.
	  Check that there are no objects blocking the path between the television and 3D Eyewear.

The power of the 3D Eyewear turns off by itself	• Are there any objects between the eyewear and television?
	• Is there a sticker or other such item blocking the infra-red reception section on the 3D Eyewear?
	  The 3D Eyewear operates by receiving signals from the television.
	  Check that there are no objects blocking the path between the television and 3D Eyewear.
	• If the eyewear stops receiving infra-red signals from the television, the power automatically switches off after 5 minutes.

There is something wrong with the 3D images	• Are the left and right sides of the 3D image reversed? Switch "Left / Right swap" setting. (p. 24)
Indicator lamp does not light when the 3D Eyewear power button is pressed	• Is the battery level low? Battery is run out if the Indicator lamp does not light when the power button is held down more than 1 second. Please replace the battery.

1 **Contact your Broadband service provider**
NOTICE: If you don't have Internet service by your local provider, please order a high-speed Internet service at no less than the following connection speed. If you already have such service, make sure that the connection speed exceeds the following.
● Required speed (effective): at least 1.5 Mbps for SD and 6Mbps for HD picture quality, respectively.
● Dial-up Internet service cannot be used for VIERA CAST.

2 **Select wired or wireless connection**
If the Cable/DSL modem is close to the TV and you have only one TV set, you may choose a wired connection. If the Cable/DSL modem is far from the TV and/or you have more TVs in the house, you may want to use a wireless network.

3 **Connecting to the Internet**
Ⓐ **Basic connection**
If you are not using the network for connecting anything else but the TV, you could just connect the TV directly to the Cable/DSL Ethernet connection (see schematic below).

Ⓑ **Advanced wired connection**
If you are using the network for connecting various PCs/Laptops and want to connect the TV, you should use a router to connect the TV to the Internet (see schematic below).

Ⓒ **Advanced wireless connection 1**
If you are using the network for connecting various PCs/Laptops and want to connect the TV, you could also use a wireless router to connect the TV to the Internet (see schematic below).

Ⓓ **Advanced wireless connection 2**
If you are using the network for connecting various PCs/Laptops and want to connect the TV, you could also use a wireless LAN adapter and Access point to connect the TV to the Internet (see schematic below).

VIERA Link™ "HDAVI Control™"*

Simultaneously control all Panasonic "HDAVI Control" equipped components using one button on the TV remote.
Enjoy additional HDMI Inter-Operability with Panasonic products which have the "HDAVI Control" function.
This TV supports "HDAVI Control 5" function.
Connections to the equipment (DVD recorder DIGA, HD Camcorder, Home theater system, Amplifier, etc.) with HDMI cables allow you to interface with them automatically.

Equipment with the "HDAVI Control" function enables the following operations:

Version	Operations
HDAVI Control or later	● Automatic Input Switching (p. 43) ● Power on link (p. 43) ● Power off link (p. 43) ● Default speakers (p. 43) ● One-touch theater playback (p. 43) ● Speaker control (p. 45)
HDAVI Control 2 or later	● VIERA Link control only with the TV's remote control (p. 45) ● Unselected device energy save (for available equipment only) (p. 43)
HDAVI Control 3 or later	● Provides setting information (p. 43) ● Automatic lip-sync function (p. 43) ● Direct TV recording (p. 45)
HDAVI Control 4 or later	● Energy saving mode (with Quick Start mode) (p. 43)
HDAVI Control 5	● Audio Return Channel Audio Return Channel (ARC) is a function that enables digital sound signals to be sent via an HDMI cable.

■ For the first time/When adding new equipment, reconnecting equipment or changing the setup after the connection, turn the equipment on and then switch the TV on. Set the input mode to HDMI1, HDMI2 or HDMI3 (p. 34), and make sure that the image is displayed correctly.

VIERA Link "HDAVI Control", based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers' equipment that supports HDMI CEC cannot be guaranteed.
Please refer to the individual manuals for other manufacturers' equipment supporting the VIERA Link function.

■ HDMI cable

This function needs an HDMI compliant (fully wired) cable. Non-HDMI-compliant cables cannot be utilized.
It is recommended that you use Panasonic's HDMI cable. Recommended part number:
RP-CDHS15 (4.9 ft/1.5 m), RP-CDHS30 (9.8 ft/3.0 m), RP-CDHS50 (16.4 ft/5.0 m)
 * For more details on the external equipment's connections, please refer to the operating manuals for the equipment.

VIERA Link™ Connections

Follow the connection diagrams below for HDAVI control of a single piece of AV equipment such as a DVD recorder (DIGA), Home theater system.
Refer to page 42-45 for Setup Menu settings and additional control information.
● Optional HDMI and/or optical cables are not included.

If connection (or setting) of equipment compatible with HDAVI control is changed, switch the power of this unit Off and On again while the power of all equipment is On (so that the unit can correctly recognize the connected equipment) and check that the DVD recorder (DIGA), Home theater system playback operates.

Note

● HDMI 1 is recommended.
  When connecting to HDMI 2/HDMI 3 set the input mode to HDMI 2/HDMI 3 (p. 34) initially before connecting to HDMI 2/HDMI 3. After connection, confirm the HDMI control functions (p. 42-45).

■ **Connecting this unit to the DVD recorder (DIGA), Home theater system**
● For DVD recorder (DIGA): Connect with HDMI cable
● For Home theater system
  Connect with the HDMI and audio cables.
  If audio cable is not connected, you cannot listen to the TV program through the theater system.
 * No optical cable is necessary for the equipment that has "HDAVI control 5" and is connected with an HDMI cable. (HDMI 1 only)

■ **Connecting this unit to a DVD recorder (DIGA) and AV amp**
  When using a "VIERA Link" audio-video amplifier and a compatible DVD recorder (DIGA) use a daisy chain connection as shown below.

Back of the TV

HDMI cable

HDMI (AV IN) — DVD recorder (DIGA) with VIERA Link function

HDMI (AV OUT) — AV amp with VIERA Link function

Digital Audio out

HDMI (AV OUT) — Home theater systems with VIERA Link function

HDMI (AV OUT) — HD Camcorder with VIERA Link function

HDMI (AV OUT) — LUMIX with VIERA Link function

HDMI (AV OUT) — DVD recorder (DIGA) with VIERA Link function
● One AV amp and one DVD recorder (DIGA) can be operated with this unit.
● Be sure to connect the AV amp between this unit and the DVD recorder (DIGA).

■ **Setting of this unit after connection**
  After making connections as shown above, set "VIERA Link" (under "VIERA Link settings") to "On" using the Setup menu. (p. 35, 42-45).

Note

● Individual HDMI equipment may require additional menu settings specific to each model. Please refer to their respective operating instruction manuals.
● When audio from other equipment connected to this unit via HDMI is output using "DIGITAL AUDIO OUT" of this unit, the system switches to 2CH audio.
  (When connecting to an AV amp via HDMI, you can enjoy higher sound quality.)
● For details about HDMI cables for connecting a Panasonic HD camcorder, read the manual for the equipment.

Unselected device energy save (for "HDAVI Control 2 or later")

Default speakers

One-touch theater playback

Provides setting information (for "HDAVI Control 3 or later")

Automatic lip-sync function (for "HDAVI Control 3 or later")

(Continued)

When using a Blu-ray Disc player, DVD player/recorder or Home theater system, the TV will automatically change to the appropriate input, when playback begins on one of those devices.
● For a Home theater system the speakers automatically switch to the theater system.

When "Yes" is selected (p. 39), the TV is turned on automatically and switches to the appropriate HDMI input whenever VIERA Link compatible equipment is initially turned on and the Play mode is selected.

When "Yes" is selected (p. 39) and the TV is turned off, all connected VIERA Link compatible equipment is also automatically turned off.
● A Panasonic DVD Recorder will not turn off if it is still in Rec mode.
Caution: The TV remains on even if the VIERA Link compatible equipment is turned off.

● Condition
  Power off link: Yes; Energy saving mode: Quick start
  The equipment has "HDAVI Control 4 or later (with Quick Start mode)" connected with an HDMI cable.
When TV is turned off, all connected VIERA Link compatible equipment is moved to ECO Standby mode* automatically under above conditions.
 * Minimum power consumption of Standby condition for the equipment.

● Condition
  Unselected device energy save: Yes
  The equipment has "HDAVI Control 2 or later" (for available equipment only) connected with an HDMI cable.
  [Examples of timing for operation]
  • When the input is switched from the HDMI.
  • When the "Speaker output" is changed from "Home theater" to "TV".

The connected VIERA Link compatible equipment will be turned off automatically when not in use.

"TV" is the default setting. To set the Home theater system as Default speakers, change the Default speakers setting from "TV" to "Theater". Sound will be output from the Home theater whenever the TV is powered on.

If the "ONE TOUCH PLAY" key is pressed on the remote control for a Panasonic Home theater system, the following sequence of operations is performed automatically:
① Home theater power switches On, and playback begins.
② TV power switches On, and the playback screen is displayed.
③ Audio is muted on the TV and switches to the theater system.

The following information about the TV settings can be transmitted to each piece of equipment (Recorder/Home theater/Player) that has "HDAVI Control 3 or later" function connected to a TV with an HDMI cable.

Transmittable data	Recorder	Home theater	Player
① On Screen Display Language setting (English/Español/Français)	○	○	○
② Panel Aspect Ratio (16:9 fixed)	○	○	○
③ Closed caption information (Mode/CC type/Digital setting)	○	---	---
④ Channel information (Input signal/Channel list/Caption information)	○	---	---

> **Note**

● There is a possibility that all the GUI language information might be set from the equipment, that has an HDMI CEC function connected to the TV with an HDMI cable. Depending on the operating conditions or the specification for each piece of equipment the setting may or may not be applied.
● For more details on the external equipment's operation, please refer to the operating manuals for the equipment.

[For Recorder]
● You cannot operate other functions while transmitting the TV's information above except the Power On/Off key operation. When you turn off this unit, the transmission will be interrupted (only when you are transmitting ④ Channel information).
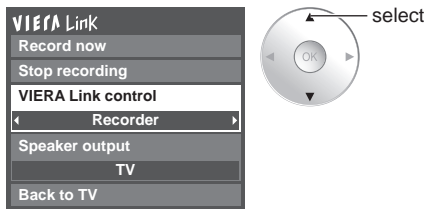

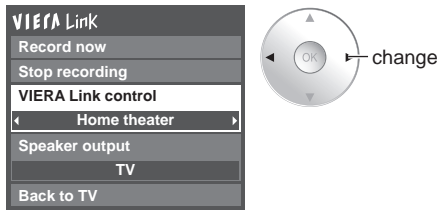

Minimizes lip-sync delays between the picture and audio when you connect to a Panasonic theater system or Amplifier.

* DCF (Design rule for camera file system): A Japan Electronics and Information Technology Industries Association's standard
** EXIF (Exchangeable Image File Format

> **Note**

- Format the card with the recording equipment.
- The picture may not appear correctly on this TV depending on the recording equipment used.
- Display may take some time when there are many files and folders.
- The function (VIERA Image Viewer/Media player) cannot display Motion JPEG and still image not DCF formatted (i.e. TIFF, BMP).
- Data modified with a PC may not be displayed.
- Images imported from a PC must be compatible with EXIF 2.0, 2.1 and 2.2.
- Partly degraded files might be displayed at a reduced resolution.
- All ".JPG" extension data in the card and USB flash memory will be read in Photo viewer Mode.
- The folder and file names may be different depending on the digital camera used.
- Do not use two-byte characters or other special codes.
- The card may become unusable with this TV if file or folder names are changed.
- For the suitable SD Memory Cards, please confirm the latest information on the following website.
http://panasonic.jp/support/global/cs (This site is in English only)

Cautions in handling SD Card

- Use an SD Card which meets SD standards. If not, it may cause the TV to malfunction.
- Do not remove the card while the unit is accessing data (this can damage card or unit).
- Do not touch the terminals on the back of the card.
- Do not subject the card to high pressure or impact.
- Insert the card in the correct direction (otherwise, card or unit may be damaged).
- Electrical interference, static electricity or erroneous operation may damage the data or card.
- Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation
of the unit. (Panasonic is not liable for any deterioration or damage of recorded data.)

VIERA Link™ "HDAVI Control™"

HDMI connections to some Panasonic equipment allow you to interface automatically. (p. 40)
● This function may not work normally depending on the equipment condition.
● The equipment can be operated by other remote controls with this function on even if the TV is in Standby mode.
● Image or sound may not be available for the first few seconds when playback starts.
● Image or sound may not be available for the first few seconds when input mode is switched.
● Volume function will be displayed when adjusting the volume of the equipment.
● If you connect equipment that has "HDAVI Control 2 or later" function to the TV with an HDMI cable, the sound from the DIGITAL AUDIO OUT terminal can be output as multi-channel surround.
● "HDAVI Control 5" is the newest standard (current as of December, 2009) for the HDAVI Control compatible equipment. This standard is compatible with the conventional HDAVI equipment.

HDMI connection

HDMI (high-definition multimedia interface) allows you to enjoy high-definition digital images and high-quality sound by connecting the TV unit and the devices.
HDMI-compatible equipment (*1) with an HDMI or DVI output terminal, such as a set-top box or a DVD player, can be connected to the HDMI connector using an HDMI compliant (fully wired) cable.

● HDMI is the world's first complete digital consumer AV interface complying with a non-compression standard.
● If the external equipment has only a DVI output, connect to the HDMI terminal via a DVI to HDMI adapter cable (*2).
● When the DVI to HDMI adapter cable is used, connect the audio cable to the audio input terminal.
● Audio settings can be made on the "HDMI 1 in", "HDMI 2 in" or "HDMI 3 in" menu screen. (p. 38)
  Applicable audio signal sampling frequencies (L.PCM): 48 kHz, 44.1 kHz, 32 kHz
                              (*1): The HDMI logo is displayed on an HDMI-compliant device.
                                (*2): Enquire at your local digital equipment retailer shop.

──────── Caution ────────

● Use with a PC is not assumed.
● All signals are reformatted before being displayed on the screen.
● If the connected device has an aspect adjustment function, set the aspect ratio to "16:9".
● These HDMI connectors are "type A".
● These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
● A device having no digital output terminal may be connected to the input terminal of either "COMPONENT", or "VIDEO" to receive analog signals.
● The HDMI input terminal can be used with only the following image signals: 480i, 480p, 720p, 1080i and 1080p.
  Match the output setting of the digital device.
● For details of the applicable HDMI signals, see p. 63.

DIGITAL AUDIO OUT terminals

You can enjoy your Home theater by connecting a Dolby Digital (5.1 channel) decoder and "Multi Channel" amplifier to the DIGITAL AUDIO OUT terminals.

──────── Caution ────────

● Depending on your DVD player and DVD-Audio software the copyright protection function may operate and disable optical output.
● When an ATSC channel is selected, the output from the DIGITAL AUDIO OUT jack will be Dolby Digital. When an NTSC channel is selected, the output will be PCM.
● When playing a movie on SD Card Movie player, when the sound has been recorded in Dolby Digital, the output from the DIGITAL AUDIO OUT terminal will be Dolby Digital. When the sound is recorded in other formats, the output will be PCM.

Picture mode

● Vivid: Provides enhanced picture contrast and sharpness for viewing in a well-lit room.
● Standard: Recommended for normal viewing conditions with subdued room lighting.
● THX (2D mode): Faithfully reproduces the image quality that the movie makers intended in order to provide the ultimate cinematic experience at home.
● Cinema (3D mode): For watching movies in a darkened room. It provides a soft, film-like picture.
● Game: For playing video games. This mode will be set automatically if "GAME" is selected from the Input label setting (p. 55)
● Custom (Photo): Customizes each item according to your taste.
                     Photo is displayed in JPEG menu.

──────── Note ────────

● Picture mode will be automatically set to "Standard" if you change the Input label from "GAME" to other labels.
● Picture mode will be automatically set to "Game" if you change from an Input label other than "GAME" to "GAME" label.

● Technical Information

FAQs, etc.

Technical Information (Continued)

Pro settings

- Reset to defaults: Resets all Pro setting adjustments to factory default settings.
- W/B high R: Adjusts the white balance for light red areas.
- W/B high B: Adjusts the white balance for light blue areas.
- W/B low R: Adjusts the white balance for dark red areas.
- W/B low B: Adjusts the white balance for dark blue areas.
- Black extension: Adjusts the dark shades of the image in gradation.
- Gamma adjustment: Gamma correction. Adjusts the intermediate brightness of the image. (S-curve/1.8/2.0/2.2/2.4/2.6)
- Panel brightness: Selects the display panel brightness. (High/Mid/Low)
- Contour emphasis: Adjusts the contour emphasis of the image. (0-15)
- AGC: Increases the brightness of dark signal automatically. (On/Off)
- Save as default: Save all "Picture" (when "Picture mode" is "Custom") and "Pro settings" adjustments.

H size

- Aspect Ratio: 4:3
- The width will be decreased on both sides to reduce noise.

- Aspect Ratio: FULL/JUST(H-FILL/ZOOM)
- The width will be increased on both sides to reduce noise.

See page 38 for more information

4:3 side bars

Do not display a picture in 4:3 mode for an extended period, as this can cause "Image retention" to remain on either or both sides of the display field.
To reduce the risk of such "Image retention", change the brightness of the side bars.
See page 39 for more information
- The side bar may flash (alternate black/white) depending on the picture.
Scrolling bar

Scrolling bar: To prevent "Image retention", scrolls white vertical bar from left to right on a black screen.
- Press any key except the POWER key to return to previous screen.
- You will return to the previous screen if no key operation has been performed for 15 minutes.
  See page 39 for more information

[Scrolling bar]
2D→3D (Simulated 3D)

- You can watch content in simulated 3D from photo and all video sources except the PC input.
- This function converts standard 2D images and displays them in 3D. For this reason, the 3D images appear slightly different from the originals. Please bear this in mind when using this function.
- Using this function for profit-making purposes, or publically showing images converted from 2D to 3D in places such as coffee shops or hotels etc. may infringe on the rights of the copyright holder protected under the Copyright Act.

PC Input Terminals Connection

● Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
● Some PC models cannot be connected to the set.
● There is no need to use an adapter for computers with IBM PC/AT compatible D-sub 15P terminal.
● The maximum resolution: 1,280 × 1,024
  If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
● Signal Names for D-sub 15P Connector

FAQ

Before requesting service or assistance, please follow these simple guides to resolve the problem.
If the problem still persists, please contact your local Panasonic dealer or Panasonic Service Center for assistance. For details (p. 69, 70)
For additional assistance, please contact us via the website at:
www.panasonic.com/contactinfo
www.panasonic.ca

White spots or shadow images (noise)
● Check the position, direction, and connection of the antenna.

Interference or frozen digital channels (intermittent sound)
● Change the direction of antenna for digital channels.
● Check "Signal meter" (p. 53). If the signal is weak, check the antenna and consult your local dealer.

The remote control does not work

● Are the batteries installed correctly? (p. 8)
● Are the batteries new?
Pictures from external equipment are distorted when the unit is connected via HDMI

● Is the HDMI cable connected properly? (p. 41, 57)
● Turn Off the TV unit and equipment, then turn them On again.
● Check an input signal from the equipment. (p. 63)
● Use equipment compliant with EIA/CEA-861/861B.

When the channel is changed on an STB that is connected with HDMI, "HDMI" may be displayed on the top left of the screen

● This is not a malfunction.

Recording does not start immediately

● Check the settings of the recorder. For details, read the manual of the recorder.

64

If there is a problem with your TV, please refer to the table below to determine the symptoms, then carry out the suggested check. If this does not solve the problem, please contact your local Panasonic dealer, quoting the model number and serial number (both found on the rear of the TV).

Problem	Actions
Screen	

"VIERA" logo moves on the screen	● The function to prevent "Image retention" is activated. (Not a faulty symptom)
	  ● The screen saver is activated if the TV unit is not operated for a certain time in SD mode.
	  ● "Image retention". (p. 7)

Some spots remain bright or dark	● The Plasma panel is made up of a few million pixels and is produced with advanced technology through an intricate process. Sometimes a few pixels may be bright or dark. These pixels do not indicate a defective panel and will have no impact on the performance of the TV.
Chaotic image, noisy	● Check nearby electrical products. (car or motorcycle ignition systems, fluorescent lamp, etc.)
No image is displayed on screen	● Check Picture menu. (p. 38) ● Check the cable connections. (p. 11-12) ● Check that the correct input has been selected. (p. 34)
Only spots are displayed instead of images	● Check the channel settings. (p. 52) ● Check the antenna cables.
Neither image nor sound is produced	● Is the AC power cord plugged into the outlet? ● Is the TV unit turned On? ● Check Picture menu (p. 38) and volume. ● Check the AV cable connections. (p. 11-12) ● Check that the correct input has been selected. (p. 34)
Black Box appears	● Change settings of Closed Caption (CC). (p. 54)
Sound	
No sound is produced	● Are the speaker cables connected correctly? (p. 57) ● Is "Sound Mute" active? (p. 13) ● Is the volume set to the minimum? ● Is "TV speakers" set to "Off"? (p. 38) ● Change "SAP" settings. (p. 18) ● Check "HDMI 1 in", "HDMI 2 in" or "HDMI 3 in" settings. (p. 38)
Sound is unusual	● Set "SAP" setting to "Stereo" or "Mono". ● Check the HDMI device connected to the unit. ● Set the Audio setting of the HDMI device to "Linear PCM". ● If digital sound connection has a problem, select analog sound connection.
Unknown sound heard **1- Sounds from TV cabinet** **2- Whirring sound** **3- Tick/Click sound** **4- Buzzing sound**	1- Changes in the temperature and humidity of the room may cause the TV's cabinet to expand or contract and produce metallic sounds. This is not a sign of faulty operation or a malfunction. 2- The TV may have a cooling fan that makes a soft whir. This is not a sign of faulty operation or a malfunction. 3- When the TV is powered on, an electrical component in the TV activates producing a tick/click sound. This is not a sign of faulty operation or a malfunction. 4- Electrical circuits are active while the TV set is on. This is not a sign of faulty operation or a malfunction.
TV set	
Parts of the TV set become hot	● Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality.

● Frequently Asked Questions

FAQs, etc.

65

Care and Cleaning

First, unplug the Power cord plug from the wall outlet.

Display panel

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface is particularly dirty, soak a soft, lint-free cloth in diluted mild liquid dish soap (1 part mild liquid dish soap diluted by 100 times the amount of water) and then wring the cloth to remove excess liquid. Use this cloth to wipe the surface of the display panel, then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects. Furthermore, avoid contact with volatile substances such as insect sprays, solvents, and thinner; otherwise, the quality of the surface may be adversely affected.

Cabinet

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
- If the cabinet is particularly dirty, soak the cloth in a weak mild liquid dish soap and then wring the cloth dry.
  Use this cloth to wipe the cabinet and then wipe it dry with a dry cloth.
- Do not allow any mild liquid dish soap to come into direct contact with the surface of the Plasma TV.
  If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents, and thinner; otherwise, the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

Pedestal

- Cleaning
  Wipe the surfaces with a soft, dry cloth. If the unit is particularly dirty, clean it using a cloth soaked with water to which a small amount of mild liquid dish soap has been added and then wipe with a dry cloth.
 Do not use products such as solvents, thinner, or household wax for cleaning, as they can damage the surface coating. (If using a chemically-treated cloth, follow the instructions supplied with the cloth.)
- Do not attach sticky tape or labels, as they can make the surface of the pedestal dirty. Do not allow long-term contact with rubber, vinyl products, or the like. (Doing so will cause deterioration.)

Limited Warranty (for U.S.A. and Puerto Rico only)

PANASONIC CONSUMER ELECTRONICS COMPANY,
DIVISION OF
PANASONIC CORPORATION OF NORTH AMERICA
One Panasonic Way
Secaucus, New Jersey 07094

Panasonic Plasma Television
Limited Warranty

Limited Warranty Coverage
If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company (referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("Limited Warranty period"), at its option either (a) repair your product with new or refurbished parts, (b) replace it with a new or a refurbished equivalent value product, or (c) refund your purchase price. The decision to repair, replace or refund will be made by the warrantor.

PLASMA TV CATEGORIES	PARTS	LABOR	SERVICE
Up to 42" (diagonal)	1 (ONE) YEAR	1 (ONE) YEAR	Carry-In
46" (diagonal) and larger			On-Site
3D Eyewear		Not Applicable	Mail In

During the "Labor" Limited Warranty period there will be no charge for labor. During the "Parts" Limited Warranty period, there will be no charge for parts.
You must carry-in your product or arrange for on-site service during the Limited Warranty period. If non-rechargeable batteries are included, they are not warranted. This Limited Warranty only applies to products purchased and serviced in the United States or Puerto Rico. This Limited Warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for Limited Warranty service.

On-Site or Carry-In Service
For On-Site or Carry-In Service in the United States and Puerto Rico call 1-877-95-VIERA (1-877-958-4372).

On-site service where applicable requires clear, complete and easy access to the product by the authorized servicer and does not include removal or re-installation of an installed product. It is possible that certain on-site repairs will not be completed on-site, but will require that the product or parts of the product, at the servicer's discretion be removed for shop diagnosis and/or repair and then returned.

Mail-In Service
For assistance in the U.S.A. and Puerto Rico in obtaining replacement, please ship the product prepaid to:

Panasonic Exchange Center
 4900 George McVay Drive
 Suite B
 McAllen, TX 78503

panacare@us.panasonic.com

When shipping the unit, carefully pack, include all accessories, and send it prepaid, adequately insured and preferably in the original carton. If Lithium Ion batteries are shipped by air the package must be labeled "Contains Lithium Ion Battery (No lithium metal)". Damaged batteries are prohibited from shipment by US Mail. Batteries must be securely packed in a manner to prevent short-circuiting and a package cannot contain more than 3 Lithium Ion batteries. Include a letter detailing the complaint, a return address and provide a daytime phone number where you can be reached. A valid registered receipt is required under the Limited Warranty.

Limited Warranty Limits And Exclusions
This Limited Warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage, nor does it cover markings or retained images on the glass panel resulting from viewing fixed images (including, among other things, non-expanded standard 4:3 pictures on wide screen TVs, or onscreen data in a stationary and fixed location). The Limited Warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, bug infestation, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Service Center or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS LIMITED WARRANTY. (As examples, this excludes damages for lost time, cost of having someone remove or re-install an installed unit if applicable, or travel to and from the servicer. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE LIMITED WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied Limited Warranty lasts, so the exclusions may not apply to you.

This Limited Warranty gives you specific legal rights and you may also have others rights which vary from state to state. If a problem with this product develops during or after the Limited Warranty period, you may contact your dealer or Service Center. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

PARTS AND SERVICE (INCLUDING COST OF AN ON-SITE SERVICE CALL, WHERE APPLICABLE) WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.

Limited Warranty (for Canada)

Panasonic Canada Inc.
5770 Ambler Drive, Mississauga, Ontario L4W 2T3
PANASONIC PRODUCT – LIMITED WARRANTY

Panasonic Canada Inc. warrants this product to be free from defects in material and workmanship under normal use and for a period as stated below from the date of original purchase agrees to, at its option either (a) repair your product with new or refurbished parts, (b) replace it with a new or a refurbished equivalent value product, or (c) refund your purchase price. The decision to repair, replace or refund will be made by Panasonic Canada Inc.

Viera TV (42" & over)	In-home service	One (1) year, parts (including panel) and labour.
Viera TV (under 42")	Carry-in service	One (1) year, parts (including panel) and labour.

In-home Service will be carried out only to locations accessible by roads and within 50 km of an authorized Panasonic service facility.

In-home service requires clear, complete and easy access to the product by the Authorized Servicer and does not include removal or re-installation of an installed product. If removal is required to service the product, it will be at the discretion of the Servicer and in no event will Panasonic Canada Inc. or the Servicer be liable for any special, indirect or consequential damages.

This warranty is given only to the original purchaser, or the person for whom it was purchased as a gift, of a Panasonic brand product mentioned above sold by an authorized Panasonic dealer in Canada and purchased and used in Canada, which product was not sold "as is", and which product was delivered to you in new condition in the original packaging.

IN ORDER TO BE ELIGIBLE TO RECEIVE WARRANTY SERVICE HEREUNDER, A PURCHASE RECEIPT OR OTHER PROOF OF DATE OF ORIGINAL PURCHASE, SHOWING <u>AMOUNT PAID AND PLACE OF PURCHASE</u> IS REQUIRED

<u>**LIMITATIONS AND EXCLUSIONS**</u>
This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by Panasonic Canada Inc., or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, introduction of sand, humidity or liquids, commercial use such as hotel, office, restaurant, or other business or rental use of the product, or service by anyone other than a Authorized Servicer, or damage that is attributable to acts of God. Dry cell batteries are also excluded from coverage under this warranty.

THIS EXPRESS, LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL PANASONIC CANADA INC. BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT OR ARISING OUT OF ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY. (As examples, this warranty excludes damages for lost time, travel to and from the Authorized Servicer, loss of or damage to media or images, data or other memory or recorded content. This list of items is not exhaustive, but for illustration only.)

In certain instances, some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, or the exclusion of implied warranties, so the above limitations and exclusions may not be applicable. This warranty gives you specific legal rights and you may have other rights which vary depending on your province or territory.

<u>**WARRANTY SERVICE**</u>

For product operation and information assistance, please contact:
Our Customer Care Centre: 1-800 #:   1-866-330-0014
                        Email link: "Contact us → email" on www.vieraconcierge.ca
