- ➤ Single channel sound effect controller, available to connect external stereo earphone + MIC.
- ➤ Built-in 20KHz bandwidth loudspeaker
- > LCD backlight four rows display

# **Operation system**

➤ Windows 2000/XP

## Certificate

> FCC: Part 15 B

> CE: EN55022/EN55024

# **Operating environment**

➤ Operation temperature: 0 to 40° C (32° to 104° F)

> Storage temperature: -30° to 65° C (-22° to 149° F)

➤ Humidity: 10 to 90% no dew

#### Size

> 130mm x 47mm x 25mm

# **Packing list**

- ➤ USB phone X 1
- > CD X 1
- > Earphone X 1(option)

# 2 Installation and Settings

## Installation

- 1. Start up the computer and plug USB Phone in the USB port of the computer.
- 2. Insert the Installation CD into the CD-ROM Drive.
- 3. Locate the installation file on the CD and double-click on it to install the USB Phone software. The InstallShield Wizard will guide you through the installation process.
- 4. Click on the Finish button after the installation is over.
- 5. (make sure that the Skype software is running before proceeding) Run the USB phone software by clicking on the "USB Phone Controller" icon in the Windows Start Menu.

When Skype alerts you that the USB Phone Controller is trying to use it, choose the "Allow this program to use Skype" option and click on the OK button.

The USB Phone Status icon will appear in the System Tray, located on the bottom right corner of the screen. If you hover the mouse pointer over the icon, you should be able to see the following:

"USB Phone Disconnected" status means that USB Phone doesn't connect you're your computer. Please check the connection to make sure it works.

"USB Phone Controller" status means USB Phone is set up correctly and is good to go.
