Copyright and Trademark Information

This document and all its contents herein are subject to and protected by international copyright and other intellectual property rights and are the property of Nero AG and its subsidiaries, affiliates or licensors. All rights reserved. No part of this document may be reproduced, transmitted or transcribed without the express written permission of Nero AG. All trade names and trademarks and/or service marks are the property of their respective owners. The trademarks mentioned are expressly named for information purposes only. Nero AG rejects any claims that transcend the clauses of the guarantee rights to the fullest extent. Nero AG does not undertake any liability for the correctness of the content of this document. The contents of the software supplied, as well as of this document, may be changed without prior warning. Some applications of the Nero Suites require technologies developed by third-party manufacturers. Some of these are included as a trial version in this suite. These technologies need to be activated online (free of charge) or by sending an activation fax to have unlimited use of the version. Nero will then undertake to release the data necessary to activate technologies licensed by third-party manufacturers for unlimited use with Nero 2014 or Nero 2014 Platinum. It is therefore necessary to have an Internet connection or a fax machine. Unless you own the copyright or have permission from the copyright owner, you may be violating national or international copyright laws and be subject to payment of damages and other remedies, if you duplicate, reproduce, modify, or distribute copyrighted material. If you are unsure of your rights you should contact your legal advisor.

1 Starting the Program

There are several ways to open Nero MediaBrowser, depending on various factors such as the product you have installed and the operating system you are using.

On Windows 7 and earlier versions of Windows, you can start Nero MediaBrowser via:

- **Start** (the start icon) > (**All**) **Programs** > **Nero** > Nero MediaBrowser
- Nero 2014 desktop icon

On Windows 8, you can start Nero MediaBrowser via:

- Nero 2014 tile (Windows 8 **Start** screen) or Nero 2014 desktop icon (Windows 8 desktop) if you use Nero 2014

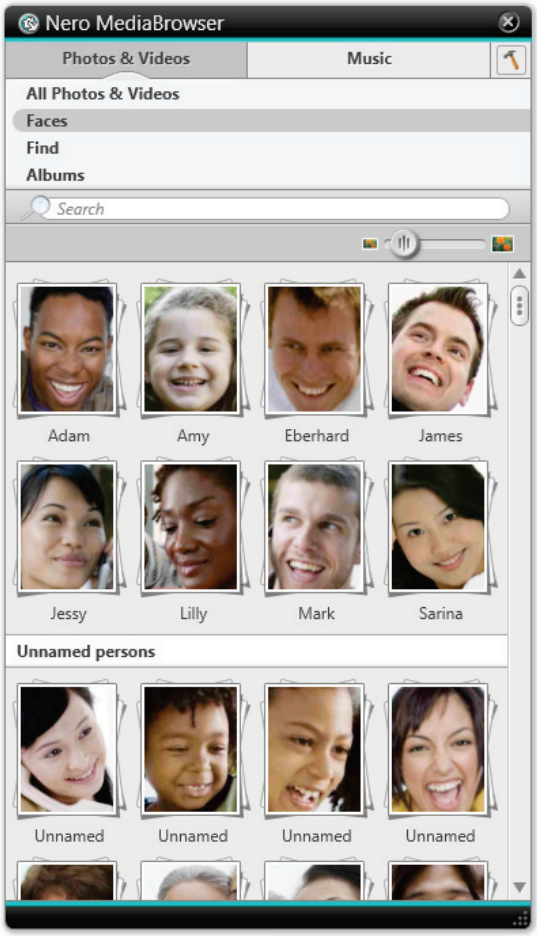

2 Nero MediaBrowser

Nero MediaBrowser is a tool which you can use to easily find, view and access media files and add them to your project. More precisely, with Nero MediaBrowser you can access a media library which contains all your media files that were indexed by Nero MediaHome.

Nero MediaBrowser is designed to be accessed in several Nero applications, but is also available as a standalone application.

To use Nero MediaBrowser within a Nero application, open Nero MediaBrowser via the  button. When you double-click a media file or select it and click the **Add** button in Nero MediaBrowser, the media file will be added to your current project.

To use Nero MediaBrowser with a non-Nero application, open Nero MediaBrowser via the Windows start menu or its tile, depending on your operating system. You will then be able to add media files to any active application by dragging the desired media file onto the application. When you double-click a media file in Nero MediaBrowser, it is opened in its default program.

Nero MediaBrowser

Nero MediaBrowser features the same categories (**Photos & Videos**, and **Music**) as Nero MediaHome. There are different views available for each category: Clicking one of the entries in the upper part of the list (for example **Faces**) displays the same view as when clicking the corresponding tabs in Nero MediaHome. Also, the same scroll bar as in Nero MediaHome is used. This is either the **standard scroll bar** or the **dynamic scroll bar**.

The following views are available for the **Photos & Videos** category, referring to the corresponding views in Nero MediaHome:

All Photos & Videos	Displays all photos and videos sorted in chronological order by creation date.
Faces	Displays all photos in which faces of persons have been detected and named listed in alphabetical order. Faces are grouped into stacks; you can access one of the stacks by double clicking it.
Find	Displays all existing tags enabling you to create a query.
Album	Displays the content of smart albums (e.g. **Recently added**) and user generated albums.

The following views are available for the **Music** category, referring to the corresponding views in Nero MediaHome:

Albums	Displays all audio tracks sorted in alphabetical order by album.
Artists	Displays all audio tracks sorted in alphabetical order by artist.
Genres	Displays all audio tracks sorted in alphabetical order by genre.
Titles	Displays all audio tracks sorted in alphabetical order by title.
Playlist	Displays the content of smart playlists (e.g. **Recently played**) and user generated playlists.

The **Options** window is opened when you click the  button on the upper task bar. The options refer directly to Nero MediaHome.

Library	Displays the **Library** settings area. All monitored folders are displayed in the respective **Watched folders or drives** area. If you want to add additional media folders, click the **Add Manually** button and select the desired folder from the navigation tree. Click the **Add Automatically** button to have Nero MediaHome perform a search for new me-

	dia folders on your computer. To exclude certain media types (music, videos, or photos) from a folder, click the respective button to the right of the folder. To delete a folder from the application's watchlist, hover your cursor over the listed folder and click the ✕ button. You can also just drag files or folders to Nero MediaHome. A window automatically opens and asks if you want to add the folder(s) to the library. In the **General** area you can select to list your external playlists (such as iTunes) as entries in the navigation tree of Nero MediaHome.
