Installation instructions for Mac®OS X drivers

Introduction

This procedure describes how to install the printer driver on a system with Mac® OS X.

Note: *Check that the extension of the saved file in step 1 of the procedure is .dmg. If you see another extension, change the extension into .dmg. Then continue with step 1.*

How to install the printer driver for Mac® OS X

1. Double-click the .dmg file.
2. Open the installed (mounted) disk. Double-click the 'Installer' file.
3. Enter your name and password.

   Note: *System administrator rights are required to install the printer driver.*
4. Click 'OK'.
   You now see two options, 'Easy install' and 'Uninstall' .
5. Check that 'Easy install' is selected and click 'Continue'.
6. Click 'Install'.
7. Click 'OK'.
8. Click 'Close'.
9. Start the 'Printer Setup Utility'.
10. Click 'Add'.
11. You now see a list of the connection types that you can use to print. Ask your system administrator which connection type and settings you must use.
12. Enter the settings for your connection type. If you select for example 'IP Printing', you must enter the printer type, the IP address of the printer, the queue name and the printer model.
13. Click 'Add'.
    The printer driver is installed and ready to use.
