Looking for a highly-flexible control panel for your security system?

This allows you to easily monitor and manage your security system from anywhere, at any time. With the ability to accept multiple wired and wireless expanders, the Premier Elite 88 is a true hybrid system, capable of supporting up to 8 wired expanders. This means you can easily incorporate motion detectors, contacts, shock sensors, and external sounders into your security system. So if you’re looking for a highly-flexible, reliable, and secure control panel for your security system, the Texecom Premier Elite 88 is the perfect choice.
