Catalog Products

Automated and Manual Solutions

Have a project in mind?

Antibodies and Proteins

- Wide range of antibodies available, including Epitope Tag, Anti-Idiotype, Anti-VHH and IVD antibodies
- High-quality Cytokines, Growth Factors and Peptides

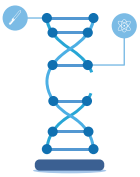

Plasmid Purification

- Fully automated plasmid purification system, the AmMag™ Quatro

Up to 24 midi or maxi samples in 2.5 hours

Cell Isolation and CRISPR

- Cell isolation and activation
- Cas nuclease: Cas9, Cas12, Cas13
- CRISPR kits and antibodies

Western Blotting

- 20-minute protein electrophoresis
- 9-17 minute WET transfer system

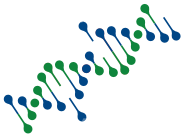

Full coverage from large to small proteins

- 10-minute protein staining
- Fully automated western blots

Molecular Biology

- Lentivirus titer p24 ELISA kit
- PCR and RNA reagents
- DNA assembly cloning kits

Protein and Antibody Purification

- Automated purification system, the AmMag™ SA Plus

Up to 12 samples in 50 minutes

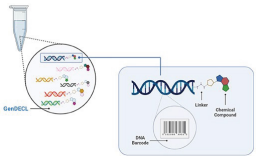

- Magnetic beads and purification resins

Protein A, G, A/G, Ni-Charged MagBeads, flag resin, and more

- Endotoxin detection & removal system

DNA-Encoded Chemical Library Kit

- Ready-to-use diverse chemical library with over 400 million drug-like small molecules to screen your protein of interest

Stable Cell Lines

- Ready to use single-clone derived
- Fc receptor, GPCR, ACE2 and spike protein, immune checkpoints, and Claudin 18.2
- Custom cell lines available
