This article provides information about the features of the Alesis Surge Mesh kit. Key Features: - Includes Surge Drum Module and various mesh pads and cymbals - Comes with 385 drum, cymbal, and percussion sounds - USB/MIDI connection for computer use - Expandable with additional pads - Headphone port and 1/4" outputs for listening - Practice modes available with and without scoring For more details, refer to the Surge Mesh Kit user manual. To practice beats, rhythms, or patterns on the Surge Mesh Kit, press Start/Stop to begin. The beat, rhythm, or pattern will play once without the drum part, allowing you to play along and receive a score based on your accuracy. To improve your score, practice without being scored and try again. In Learning Mode, you can access 60 play-along tracks to practice with. Adjust the tempo and volume of the tracks by pressing Tempo or Song and using the < and > buttons. You can also connect an audio device to play along with your favorite tunes. The Surge Mesh module allows you to record your playing for playback and review. The Hi-hat pedal included is a continuous variable type, allowing for various hi-hat sounds. Learn how to set up your Alesis Surge or Alesis Nitro Mesh kit for optimal performance without any issues.

The video guide covers assembling the drum rack, mounting drum and cymbal pads, tightening drum heads, setting up the kick pedal, adjusting rack and pad positioning, connecting cables, and final thoughts.
