Four satellite speakers 7. 6-channel direct input cable 2. Subwoofer 8. Three AAA alkaline batteries (remote control) 3. Center satellite speaker 9. User documentation 4. Remote control 5. Control console 6. Five lengths of standard 18-guage speaker wire: • Two 7.6-meter lengths for rear satellite speakers • Three 4.6-meter lengths for front and center satellite speakers 4 English Logitech® Surround Sound Speakers Z906 Speaker placement Before you position your speakers, take a look around your room and figure out the best setup (see diagram to the right).

It's easiest to place all your speakers in the desired locations before attaching any cables. Subwoofer Satellite speakers – Place the two front satellite speakers on either side of your computer monitor or television, about the same distance from each other as they are from your listening position (e.g., the couch).

Angle them to face you. Place the two rear speakers behind you and about the same distance apart as the front speakers. You may want to mount these speakers on the wall (see Wall mounting). Couch Center satellite speaker – Place your center satellite speaker on your desk, or in front of your monitor or television; you may also wall-mount it. Subwoofer – You can place the subwoofer anywhere in relation to the other speakers. To get the strongest bass, place your subwoofer near a wall or corner, or under a desk.
Make sure that nothing is closer than 16 cm to the driver or the bass port because it will affect your sound. It's also important to have adequate ventilation around the subwoofer. Control console – Place the control console where it's easy to reach. And make sure the IR window is in plain view so the remote control can communicate with it.
