INSTALLING THE LEGEND 970 SSD ON A DESKTOP PC

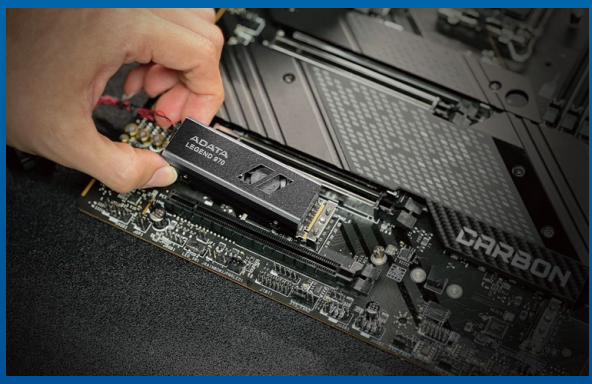

INSTALLATION STEPS

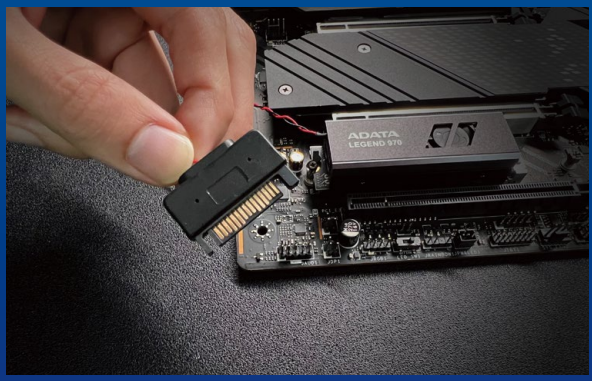

1.Remove blister pack along with the product from the outer box.

2.Insert fingers into the cutouts, grip the product firmly, and pull firmly. Slide left side of product out of the blister pack first (to prevent damage to the power cable), then remove the entire product.

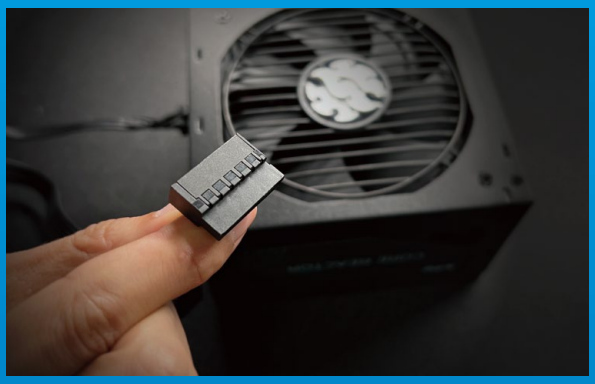

3.Insert the product into the M.2 slot on the motherboard.

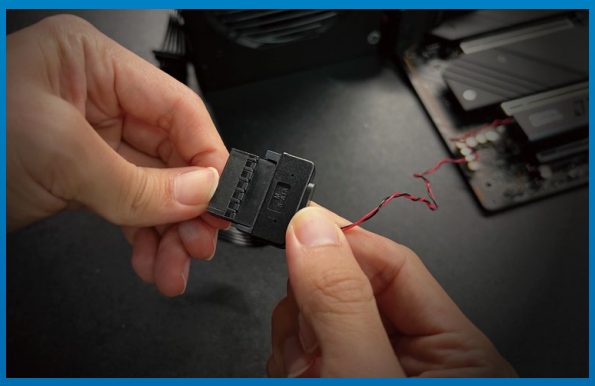

4.Locate the SATA power cable(SATA pin) on the left side of the product.

INSTALLATION STEPS

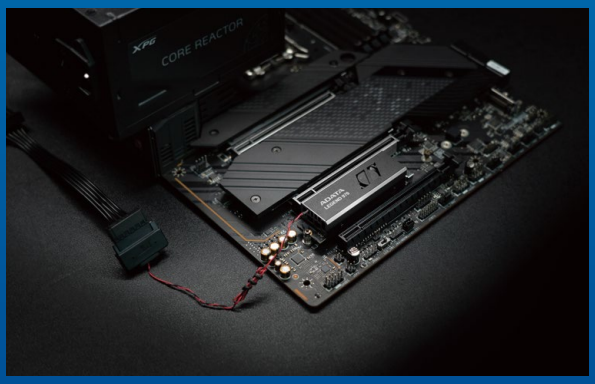

5.Locate a SATA cable(SATA socket) from PC power supply unit.

Note: This cable can be found in the cable bundle of the power supply unit.

6.Connect the two SATA cables.

Note: The direction of power cable connectors to ensure a smooth connection.

7.Installation is now complete.
