YOUR PARTNER ON THE PATH TO A MORE SUSTAINABLE FUTURE

We have adopted a practical and holistic approach to sustainability because it's not just about that one product, one project or one course of action. This stance is reflected in the way we set goals or make decisions and is embedded in our corporate philosophy. „Sustainable manufacturing, due respect for humans and the environment and space for innovation are the key to a motivated workforce, quality products and long-term partnerships".

Suedlohn Site I, Manufacturing and Administration

Halberstadt Site II, Manufacturing

The Company

Bauer GmbH is a successful family-run business that has been on the market for more than 55 years and today, employs almost 400 people. The company has been certified according to DIN EN 9001 since 1993 and is a specialist company according to the German Federal Water Act or WHG and has been since 1985. In 2022, the Seal of Approval for Commitment to Sustainability was re-issued and we also qualified for a silver CSR rating awarded by the trusted rating platform EcoVadis.

Thanks to our rooftop PV systems we can make an important contribution to climate protection by reducing our CO2 emissions and saving approximately 990 metric tons per year. A whole range of measures has been undertaken to improve energy efficiency. In the old administration building all lights have been replaced by LED lighting. In the new building the LED lighting system works with presence detectors. There is also a modern HVAC system that ensures comfortable room temperatures whilst using less energy.

Manufacturing Environment

At Bauer a lot of welding is done. Consequently, a substantial amount of heat is recovered from our welding fume extractor systems. Waste heat recovered from the paint shop is used for the paint-drying ovens. As in the offices, all production halls now have LED lighting systems; these work with presence detectors and sensors that react to light and automatically switch the lights on or off. Investments in modern manufacturing technologies help save energy and secure competitive jobs in Germany. A new hall covering 2,700 m^2 is planned for the Final Assembly Department and will be built according to energy performance level E55.

Products

Today, we live in a society that has adopted a throw-away culture and so it is particularly important to remember that our products are almost exclusively made of steel which means they are 100% recyclable - in fact, they can be recycled over and over again. Most of our products do not require any form of packaging, so waste packaging is not an issue. The first „carbon neutral" products are available and they have been certified as such.

We also manufacture a range of products that guarantee the sustainable use of resources, for example our Underground Recycling and Waste Materials Containers. Recycling systems depend on clear-cut pre-separation of materials to be efficient, so BAUER-Underground Systems are first choice for large volumes of waste

Employees and Social Aspects

Vocational training is extremely important to us. We took on our first apprentices in 1970 and today, we provide training for young people in various areas of work, in both the administration section and manufacturing. We set high standards and understand how important it is for these young professionals to learn practical skills - that's why we have built a special training centre.

We encourage our employees to stay fit and healthy by taking advantage of the special programmes we offer. Sport and exercise classes in local health centres are open to all employees and the Cycle to Work scheme has obvious benefits – and helps the environment at the same time. We also take workplace ergonomics seriously thus helping to prevent workplace-related disorders. Flexitime helps to resolve the work-family conflict. It's also important to us to help protect the ecosystem and to support disadvantaged persons. We are active in both respects; we planted a wildflower meadow for bees and of course, there is the Dieter Bauer Foundation, founded in 2003 that supports cancer and MPS research.

EMPTYING MECHANISMS

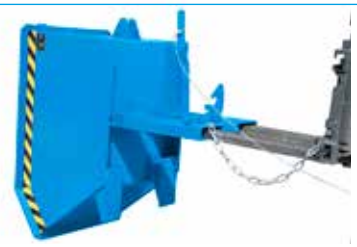

These Tilting Containers roll gently forward to discharge, are easy on the forklift and the skip body automatically rolls back into the loading position. An optimised load centre facilitates maximum utilisation of the forklift load capacity. The release lever activated by a pull cable is operated from the driver's seat so containers can also be emptied at height.

Roll forward mechanism - manually activated

As well as a rolling mechanism these Tilting Containers also have an automatic release feature, activated when contact is made with the receiving skip - the container can either be set down on the rim of the skip or driven against the side wall. No pull cable is required.

Roll forward mechanism - automatically activated

These Tilting Containers have a low overall height but are high capacity units thanks to the compact design. An ideal dumping angle ensures the load is always fully discharged. One pull on the cable and the container is emptied in the blink of an eye! However, if a more gentle method is preferred, the container can be set down on the edge of the skip before operating the pull cable. The load is discharged by slowly raising the mast.

Dumping mechanism

Containers emptied via a trap door are compact in design but also high capacity. An optimised load centre means maximum utilisation of the forklift load capacity. A pull cable operates the base which opens wide; thanks to the large aperture the load is fully discharged every time - even bulky materials.

Bottom emptying - trap door

These containers are an economical alternative as they do not have a built-in emptying mechanism. Any number of containers - providing they are the same width - can be picked up by one and the same traverse. Containers without pins must be discharged using a forklift rotator.

Containers emptied using a traverse or forklift rotator

Tipping Skips and Barrow Tippers are a good choice in confined spaces or when no forklift truck is available. However, there are some limitations: this Typee of construction is only suitable for light-weight materials as the load is discharged manually at ground level.

SWARF STACKING TIPPERS TYPE BSL / BSS

BSL

Swarf stacking tippers made of distortion proof steel sheet for heavy duty use

- smooth floor (3 mm)
- welding, oil and watertight
- emptied by cable operated from the driver's seat using the traverse
- can be stacked when full (3 high)

Types available

BSL

- perforated intermediate screen and 1" drain-cock fitted to the inclined wall

BSS

- perforated sieve and 1" drain-cock fitted to the inclined wall

Perforated intermediate screen (BSL)

Perforated corner sieve (BSS)

1" drain-cock

Accessories

- 2 swivel + 2 fixed polyamide castors Ø 180 mm, one swivel castor with brake – construction height 225 mm (stacking NOT possible)
- galvanized 2-part lid, can be opened from one side (stacking NOT possible)
- traverses Type BST and BKT for emptying Stacking Tippers (see page 25)

TRAVERSES FOR STACKING TIPPERS TYPE BST / BKT

BST (with Stacking Tipper BSK)

BST-U (with Stacking Tipper BSK)

BST-H (with Stacking Tipper BSK)

BKT (with Stacking Tipper BSK)

Traverses for emptying Stacking Tippers

- can be emptied at any height by cable operated from the driver's seat
- can be secured to prevent slipping
- for Types BSK, BSK-G, BSS, BSL (see pages 23-24)

Types available

BST

- fork pockets for pick-up by a forklift
- pick-up arm engages with cones on the Stacking Tipper

BST-H

- similar to the type BST but hydraulic

BST-U

- fork sleeves at the base of the traverse ensure optimal use of the truck's lifting range
- for use with a forklift truck or crane, stacking tipper is picked up using the cones

BKT

- for use with a forklift truck or crane, stacking tipper is picked up using the cones

UNIVERSAL CONTAINERS TYPE UC

Ideal for collection and transport of bulk goods, production waste and materials to be recycled

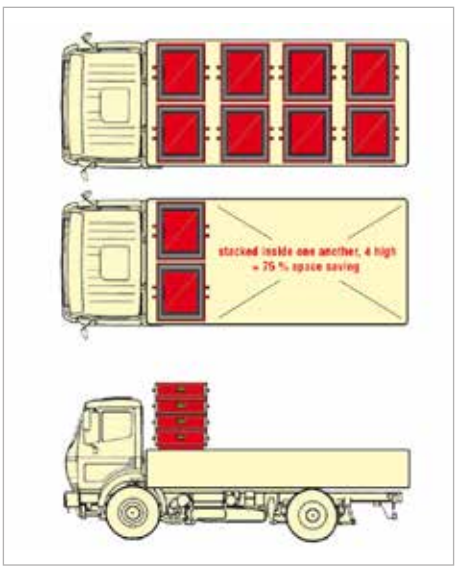

- conical construction
- can be stacked inside one another
- economical logistics thanks to space-saving transport
- can be transported on a pallet truck, by forklift, site dumper or crane

Accessories

- pick-up profile for Hydraulic Traverse type UCT
- 2 swivel + 2 fixed polyamide castors Ø 180 mm, one swivel castor with brake - construction height 225 mm
- galvanized lid, can be opened from both sides (stacking NOT possible)

BINS TYPE C / CS

C 30 and CS 30

CS 80

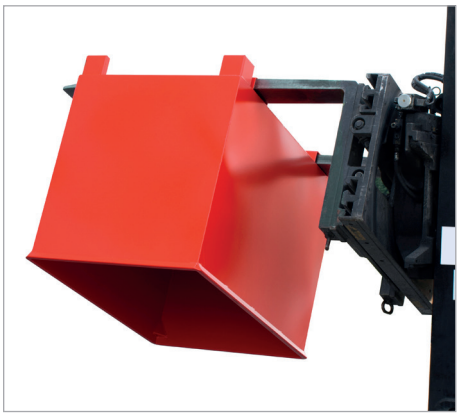

CS 30 stacked

Perforated sieve (CS)

1" drain cock (CS)

Emptying using a forklift rotator

An economic choice - collect and transport bulk goods, production waste and materials to be recycled

- sturdy steel construction, smooth inside surface
- 100 mm ground leeway, also suitable for pallet trucks (C 80 / CS 80)
- fork pockets for fork rotator
- welding, oil and watertight
- 4 stacking corners, can be stacked 3 high

Types available

Type C

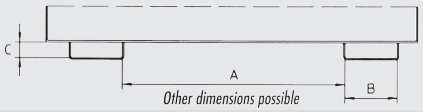

- Ideal for solids

Type CS

- especially designed to separate fluids from solids and collect them
- perforated sieve, perforation Ø 3 mm, separation 6 mm

COLLECTING SYSTEMS TYPE SBS

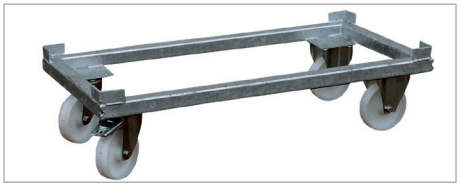

Collection and transport system

- sturdy steel sheet construction
- suitable for pick-up by a forklift or crane
- even different sizes can be stacked (max. 3 high)
- optimised stacking dimensions mean the whole loading surface of the truck can be used - stacking supports 600 mm apart, height 850 mm

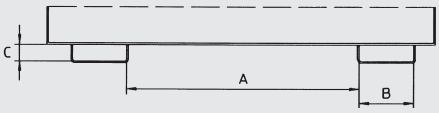

Accessories

TIPPING SKIPS TYPE KS / SKS

KS

Highly versatile - used to transport and empty bulk materials

- castors and handle facilitate manual handling
- fork sleeves - can be driven by a forklift
- is emptied at ground level or over a large volume skip when driven by a forklift
- sturdy steel construction
- sturdy frame with fork sleeves
- tiltable skip
- can be secured to prevent slipping and unintentional emptying
- 2 swivel + 2 fixed polyamide castors Ø 180 mm, one swivel castor with brake
  - construction height 225 mm

TIPPING SKIPS TYPE KN / SKN

KN

Very low profile skip. Ideal for collection and disposal of bulk solids and industrial waste

- sturdy steel sheet construction with reinforced edging
- tiltable skip with handle
- sturdy frame with fork sleeves
- easy to transport using a forklift truck
- welding, oil and watertight
- can be secured to prevent slipping and unintentional emptying
- wheels can be fitted later

TRAVERSES FOR BIG BAGS TYPE TBB / TBB-E / TBB-W

TBB

The simple and safe way to transport filled big bags using a forklift or crane

TBB

- sturdy steel tube construction
- pick-up for cranes
- pick-up for the bag's lifting loops

TBB-E

- sturdy steel construction
- suitable for forklifts
- full-length fork sleeves
- can be secured to prevent slipping from the forks
- with bag stops to prevent the loops from slipping

TBB-E

TBB-W

- sturdy steel construction
- suitable for forklifts
- full-length fork sleeves
- 4 swivel hooks for the bag's lifting loops
- can be secured to prevent slipping from the forks

FILLING HOPPERS TYPE SBT / BTS / BTM

SBT

The simple and safe way to discharge bulk solids in BIG-BAGS and containers

SBT

- hopper made of steel sheet with all-round reinforced edging
- sturdy frame with full-length fork sleeves
- can be secured to prevent slipping
- with support legs
- with 4 hooks under the fork sleeves

BTS

- similar to the SBT but with supporting stand
- prepared for anchoring to the ground
- ground leeway 1190 mm

BTM

- similar to the BTS but mobile

FORKLIFT TENDER SYSTEM TYPE STS

STS with anti-slip "Betosieb" boards

Optimises material handling with a forklift. Routes can be better organised, more efficient use, i.e. higher load capacity per route

- sturdy frame made of steel tubing
- loading surface: either wooden or "Betosieb" boards
- slewing ring with fork sleeves and anti-slip feature
- 2 supporting feet
- 2 heavy duty wheels Ø 300 x 100 mm

Individual constructions on request

Forklift Safety Cages ensure safety for repairs and maintenance work

- sturdy construction made of steel tubing
- non-slip working platform
- number of persons permitted: 2
- galvanized tool deposit
- with automatic door latch
- PPE anchor points (personal protective equipment)
- full-length fork sleeves with safety mechanism to prevent slipping
- plate to guard against incorrect pick-up; ensures the forks are driven into the fork sleeves
- "DGUV" compliant (German Use of Work Equipment Directive) and approved by the German

Types available

SIKO

- picked up broadside by a forklift truck

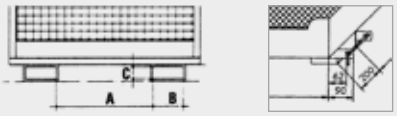

SIKO/L

- picked up lengthwise by a forklift truck (narrow base)

Accessories

CORRECT STORAGE OF WATER-POLLUTING SUBSTANCES

German Legislation

WHG (Federal Water Act) / **AwSV** (Ordinance for facilities that handle substances hazardous to water)
The **WHG** states that facilities that work with water-polluting substances or use them (i.e. filling, storage, manufacturing, treatment etc.) must be designed and operated in such a manner as to ensure that groundwater is not contaminated. Any such facilities may only be built and operated after a positive evaluation of a suitability assessment carried out by the authority responsible.
AwSV (federal legislation; came into force 01.08.2017) Ordinance for facilities that handle substances hazardous to water
This is the first standardized ruling for Germany; it replaces all 16 individual state regulations (VawS) previously implemented.

Approvals That Underline Quality and Expertise

Our Sump Trays are manufactured in compliance with StawaR (technical requirements for sump trays made of steel and with a capacity of up to 1000 litres) or have a National Technical Approval granted by the German approval body DIBt when sump trays deviate from StawaR. Every unit is tested for leakage.

GROUND PROTECTION SPILL TRAY FOR USE UNDER MACHINES BSW

For use under machines, bespoke design, according to the customer's specification

GROUND PROTECTION FLOOR ELEMENTS

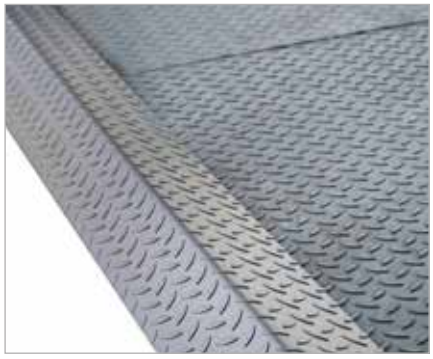

Ground protection floor elements with a recess for a column and with a threshold ramp

German legislation (VAwS and WHG) stipulates that facilities that handle waterpolluting substances i.e. loading or unloading operations etc. must be equipped with adequate containment protection. Ground Protection Floor Elements fulfil these requirements and also help prevent mechanical damage to the floor.

- bespoke design to suit the location
- short lead times mean short downtimes
- steel or stainless steel elements
- various material strengths
- steel plates are welded together on site and fixed to the ground using dowels
- layed and fitted to a firm, level surface
- non-slip surface that can be walked on
- adequate load capacity for pallet trucks; suitably designed, floor elements can also be driven on by a truck or forklift

Accessories

- threshold ramps
- folded or curved thresholds that can be driven on
- drain channel with grate
- a layer of impact sound insulation material or thermal insulation material between the Ground Protection Floor Elements and the original floor surface
- metal skirting to connect to the wall
- emergency showers, exhaust systems
- grid gratings

Folded threshold, can be driven on

Drain channel with grate

Painted finish according to your choice from the RAL colour code chart

HEATING CHAMBERS TYPE WK

Field of Application

- heat substances, temperature range from frost free to 150° C
- melt materials
- "temper" material i.e. modify properties
- maintain a constant material temperature

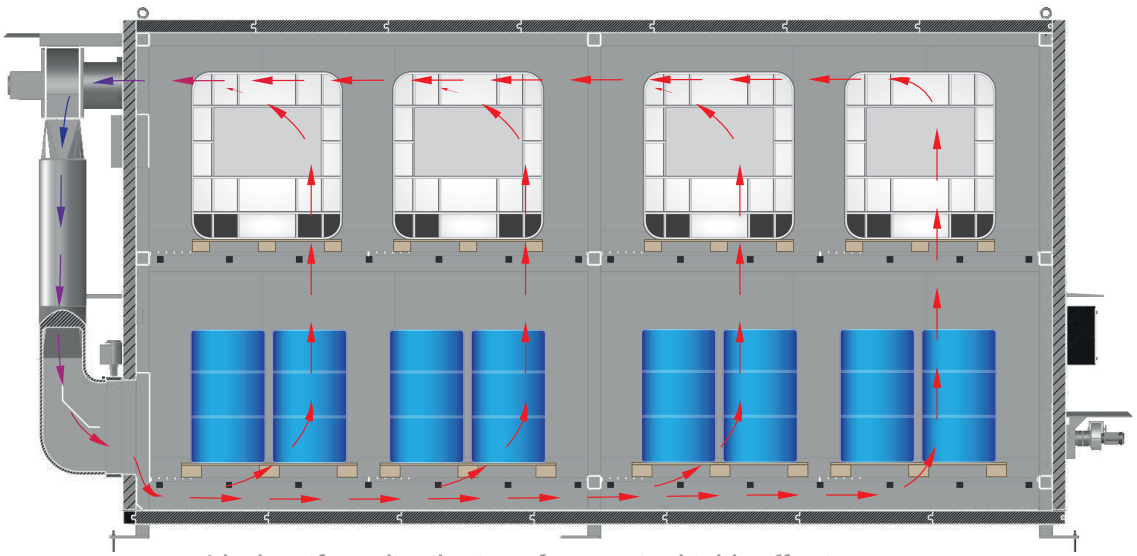

A Variety of Designs

- various heating systems (electric / steam / warm water / thermal fluid etc.)
- control systems: fault sensor, temperature display, time switch, systems that use lost heat
- approved sumps, made of various materials (steel, stainless steel, PE)
- special coating inside/outside
- wing doors / sliding doors
- suitable for: Euro or chemical pallets, IBCs, 60/200 litre drums, canisters and small cans
- the max. storage capacity for Heating Chambers is: 18 pcs IBC or 18 pcs CP3 (each 4 x 200 l drum) or 24 pcs EP (each 2 x 200 l drum).
- two-part construction available where there are height restrictions (access to the building or during transportation). The two parts must be fitted together on site.

Salient Features

- DIBt National Approval Z-38.5-103 (German Approval Authority)
- energy-efficient thanks to customized insulation
- highly effective -> low operating costs
- bespoke chamber dimensions (w/h/d)
- optimal, uniform warm air distribution - warm air is blown into the chamber through the air ducts and baffle plates (across the entire width of the container)
- sturdy locking mechanisms, e.g. double wing door with cam lock
- heating chambers are easy to transport (non-stationary) and can be positioned to deliver maximum benefit to an existing manufacturing process

- **"Our standard is made to measure"**
  - individual constructions according to customer requirements

Ideal, uniform distribution of warm air - highly effective

HEATING CHAMBERS TYPE WK

Switch cabinet with digital temperature display

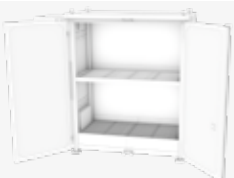

Electric power unit

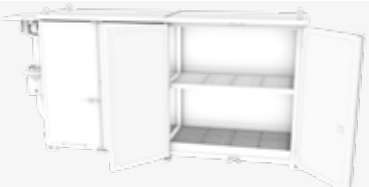

Design

- sturdy steel frame construction with a sump tray and galvanized grids
- sump tray: material strength 5 mm
- 100 mm ground leeway
- non-combustible insulation, fire classification A1 DIN 13501-1 compliant, insulation 100 mm thick
- with double wing doors
- prepared for anchoring to the ground
- crane lifting eyes to facilitate loading/unloading and securing loads
- electric heating, achieves max. 65°C (not ex) alternatively achieves max. 85°C
- switch cabinet with digital temperature display

Also available on request: other sizes, designs suitable for flammable materials, other RAL colours and individual project engineering.

HEATING CHAMBERS TYPE WK INDIVIDUAL CONSTRUCTIONS

COLLECTION POINTS TRGS 520 COMPLIANT (German legislation, Technical Rules for Hazardous Substances)

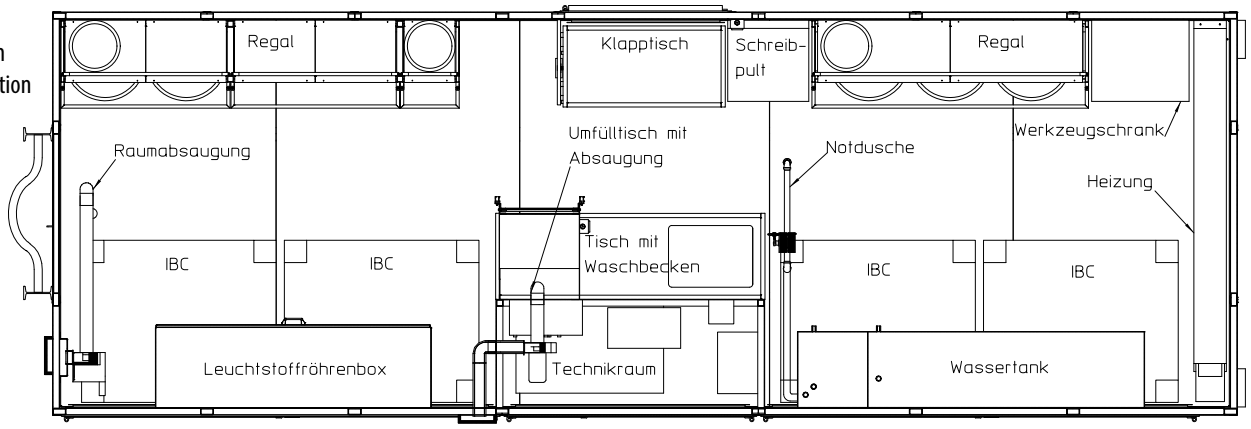

Collection of hazardous materials produced by households, TRGS 520 compliant.

- mobile or stationary unit
- size of reception area and workspace can be varied
- can be infinitely extended
- equipped according to the given requirement
- insulated reception area; workspace not insulated
- exterior fireproof walls (90 minutes) where safety clearance is not given
- retention capacity according to the relevant legal requirement and stipulations for the location in question

Complete solutions from one source

- cost-effective planning
- negotiations with authorities/approvals
- supply and assembly

Example: basic configuration for a mobile collection point

HAZARDOUS MATERIALS STORAGE FACILITIES

Painted finish according to your choice from the RAL colour code chart

Safe storage of materials that pose a threat to the environment (e.g. flammable or poisonous materials, oxidising agents, acids, alkalis etc.) – in compliance with the relevant legislation

- mobile, can be extended
- covered area for loading and unloading
- insulated to protect from frost
- with fire compartments
- integrated decanting/transfer workspace
- trapezoidal roofing sheets, translucent roof panels etc.
- wide range of fire fighting water containment systems
- storage areas for skips
- various types of sump tray available:
  - steel / stainless steel
  - PE inlays
  - coatings
- steel or concrete construction depending on the conditions on site and monies available

Accessories

- gangways with sealed floor
- integrated doors close the gangways
- heating / air conditioning
- lighting for gangways (explosion proof systems available)
- fire extinguishing systems according to the given specification / fire warning systems
- emergency shower / emergency cabinet
- fire-fighting water containment barriers
- gas detector
- other safety equipment according to the given specification
- earthing / potential equalisation

- every unit tested for leakage
- flammable liquids, GHS categories 1 - 3
- hazardous to aquatic environment, GHS categories 1 - 4

CARRIAGE OF DANGEROUS GOODS

Among others, the following laws, regulations and guidelines must be observed when transporting materials that pose a threat to the environment.

ADR European Agreement concerning the International Carriage of Dangerous Goods by Road

RID Regulations concerning the International Transport of Dangerous Goods by Rail

IMDG-Code International Maritime Dangerous Goods Code

GGVSEB German Regulations concerning the International Carriage of Dangerous Goods by Road, Rail and Inland Waterways

DIBt German Centre of Competence for Construction

Did you know that...?

Large Packaging i.e. IBCs are subject to periodic inspection and testing at intervals of not more than two and a half years and five years. Stipulations are laid out in ADR 6.5.4.4 and BAM GGR 002.

We are an officially recognised inspection body, designated by BAM (Senior Scientific and Technical Federal Institute).
