SUSPENSION/CARRY

AIRSCAPE™ SUSPENSION

+ Atilon foam framesheet allows dynamic body movement and distributes load across entire backpanel

AIRSCAPE BACKPANEL

+ Ridged airmesh-covered foam with center air channel for excellent ventilation

BIOSTRETCH HARNESS

+ Lightweight, ridged airmesh harness provides ventilated comfort
+ Rolled, soft-edged harness provides comfort and stability

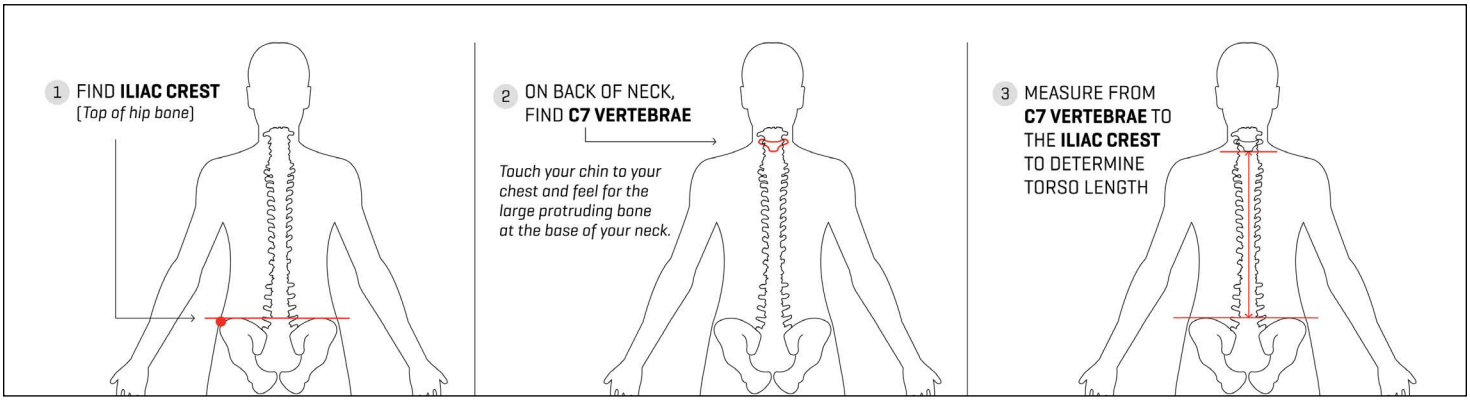

HIPBELT

+ Removable 20 mm ride-stabilizing webbing hipbelt (7L)

SIZING / FIT

HOW TO MEASURE YOUR TORSO FOR YOUR PACK

KATARI – MEN'S SIZING

TORSO O/S 17-21" / 43-53 cm

KITSUMA – WOMEN'S SIZING

TORSO O/S 14-18" / 33.5-46 cm

WOMEN'S-SPECIFIC FIT

+ Shorter torso length
+ Narrower, shorter harness with curves designed to accommodate most women's necks, shoulders and chests

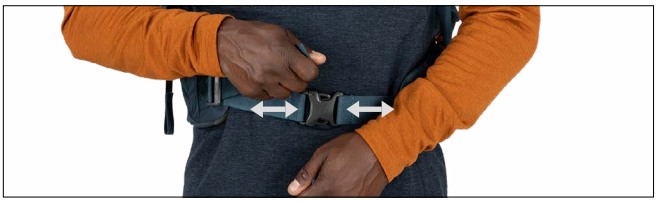

PACK FIT INSTRUCTIONS

SIZING/FIT DISCLAIMER: *Pack depicted in images may not be the pack represented in this owner's manual.*

1 POSITION THE PACK

Completely loosen the pack's hipbelt, harness and load-lifter straps (if applicable). Load the pack with 10-20 lb/4-9 kg of gear. Put the pack on and make sure the hipbelt is centered and rests over the hipbone. The hipbelt padding should sit halfway above/below the hipbone.

2 BUCKLE HIPBELT

Buckle and tighten the hipbelt evenly using Osprey's cross-body ErgoPull. The padding of the hipbelt should wrap around the hips with approximately 1-3 in/2.5-6 cm of webbing between the buckle and the hipbelt when tightened.

3 HIPBELT ADJUSTMENT

If the hipbelt is too large and "tops out" or does not offer the preferred amount of coverage, the customer may need a different pack size, model or adjustment.

4 TIGHTEN SHOULDER STRAP

Tighten the shoulder harness straps by pulling them down and back.

5 TIGHTEN LOAD LIFTERS (IF APPLICABLE)

Tightening the load lifters will pull the pack close to the body and help stabilize the load. If the torso length on the pack is adjusted correctly, the load lifters will sit between a 30- to 60-degree angle and align naturally with the shoulder straps.

6 CHECK TORSO LENGTH

Locate the harness yoke – this is where the harness straps come together near the base of the user's neck. Locate the C7 vertebra – the large protruding bone at the base of the neck. The yoke should be 1 in/2.5 cm - 2 in/5 cm below the C7 vertebra.

7 CHECK HARNESS FIT

The harness straps should wrap fully around the shoulders with no gaps between the pack and back. The padded part of the shoulder straps should end at 2 in/5 cm or more below the armpits without topping out.

8 HARNESS/SHOULDER STRAP ADJUSTMENT

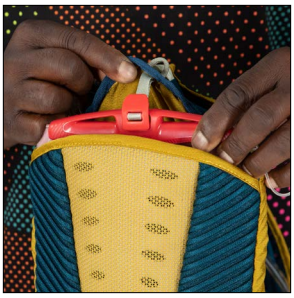

If the harness is too small or large, but the torso length of the pack is correct, the customer may need a different pack size, model or adjustment.

9 BUCKLE THE STERNUM STRAP

The sternum strap should be adjusted to approximately 2 in/5 cm below the collarbone.

FEATURE DETAILS

RESERVOIR SLEEVE

7L / 3L / 1.5L

The dedicated reservoir sleeve is compatible with reservoirs up to 3L.

+ An internal hanging loop with buckle ensures proper vertical orientation and stability
+ The backpanel hydration exit port is centered, allowing routing to the right or left side of the harness
+ Elasticized routing straps on the pack's harness hold the reservoir hose in place

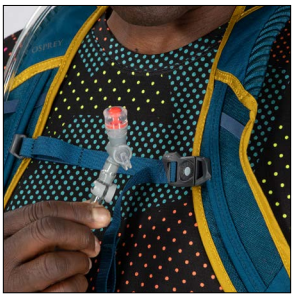

7L / 3L

+ Compatible with any reservoir up to

3L / 1.5L

+ Compatible with any reservoir up to 1.5L

For more information on Osprey's full line of reservoirs and reservoir care, visit osprey.com.

RESERVOIR BITE VALVE MAGNET

7L / 3L / 1.5L

The sternum strap magnet allows for quick access to the reservoir bite valve.

BLINKER LIGHT ATTACHMENT

14L / 10L

Blinker light attachment and reflective patch for safety.

SLASH POCKET

7L / 3L / 1.5L

Zippered slash pocket for sunglasses or electronics.

DUAL STRETCH MESH SIDE POCKETS

7L / 3L

Dual stretch mesh side pockets for quickly stashing gear.
