Pack Care

Osprey recommends Nikwax® products for pack care. For complete instructions on cleaning your pack, visit **www.ospreypacks.com/PackTech/PackCare**

Your pack is an extremely durable product built for years of use and abuse. However, some basic procedures will ensure that your pack holds up optimally.

- After each trip be sure to clean out your pack thoroughly.
- If it's wet, hang it to dry.
- Loosen all the straps.
- Wash your pack every now and then. (Do not immerse travel packs with our High Road™ Wheeled Chassis.)

Pack Your Pack

Loading your pack correctly optimizes comfort while you are carrying it. For complete information visit: **www.ospreypacks.com/PackTech/HowToPackYourPack**

Heavy Light

Guarantee

At Osprey, sustainability is designed into our packs, which are built to last a lifetime and backed by a superb guarantee, no matter how hard you are on your gear. Visit **www.ospreypacks.com** for details.

SHARED FEATURES

AirScape™ Backpanel

Every Talon Series pack features the AirScape™ backpanel, a mesh covered, 4MM HDPE ridge molded foam backpanel with integrated channels and central air chimney.

Torso Adjustable Harness

The Talon 44, 33 and 22 feature two torso adjustable sizes. To adjust, **A** loosen load lifter straps at top of harness, **B** slide hand between backpanel and harness to release hook and loop closure, **C** slide harness into position using arrows to guide.

Front/Dual Side Stretch Woven Pockets

The Talon 44, 33 and 22 feature a stretch woven front pocket with integrated blinker patch and dual stretch woven side pockets with InsideOut™ Compression allowing you to tension and secure your load easily even when the pockets are in use. To route the InsideOut™ compression straps as desired, **A** locate the duckbill to the top and side of the stretch woven side pocket and unthread the webbing through this buckle and the corresponding slider buckle near the back panel of the pack. **B** Now route the webbing for inner or outer compression by positioning the slider buckle inside or outside of the side pocket and reversing the process above.

HydraForm™ Reservoir

Add an Osprey HydraForm™ 2 or 3 liter hydration reservoir to your pack for stable, efficient, on-the-go water management. For more information, please visit your local Osprey retailer or visit www.ospreypacks.com.

Strap Retention

The harness/hipbelt straps feature strap keepers that secure excess webbing. The retention system features sewn-on C-clips which can be easily slotted over the hipbelt/harness webbing **A** to prevent strap flap.

Tow Loop

Every Talon pack (except the Talon 4/8 lumbars) features an integrated tow loop sewn in near the base of the pack.

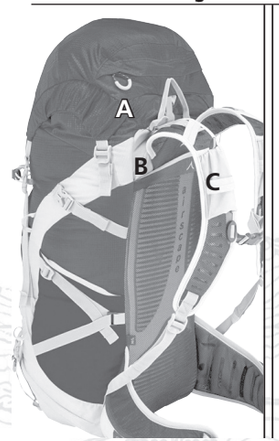

BioStretch™ Harness

Every harnessed Talon pack features the Talon BioStretch™ harness consisting of mesh-covered, slotted foam, dual stretch woven energy gel pockets and an adjustable sternum strap with rescue whistle buckle.

External Hydration Compartment

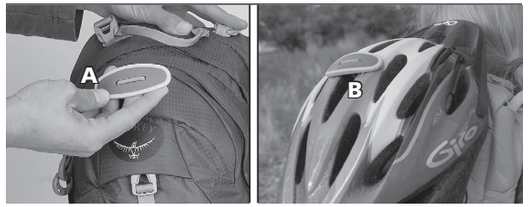

Located between the backpanel and main pack body is an exterior hydration compartment. (Talon 4 and 8 have bottle sleeves.) **A** Locate the H20 icon and loosen load lifter straps at the top of the pack. **B** Place the reservoir in the compartment using the sewn-in hanger to hold it upright. **C** Route the hose left/right through elastic routers on the harness as preferred, close compartment and re-tension load lifter straps.

ErgoPull™ Hipbelt

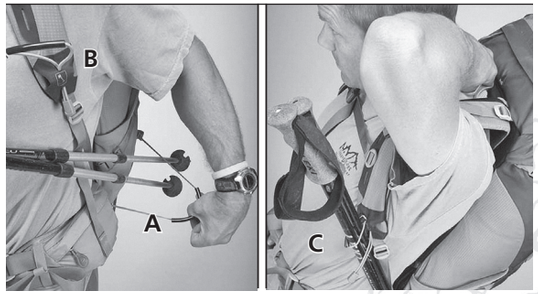

The Talon Series uses our exclusive ErgoPull™ hipbelt closure design. (Talon 11, 8 and 4 use a modified, single ErgoPull™ System.) To operate the ErgoPull™, loosen the webbing enough so you can connect the center buckle. Then grasp the loose ends of the webbing on both side, and pull in and across evenly with both hands at the same time.

LidLock™ Helmet Clip (Talon 11, 22 only)

The Talon 22 and 11 feature a LidLock™ helmet clip with elasticized load control system providing quick and secure helmet carry. To use **A** Locate LidLock™ clip near the top of the pack's front panel and pull away from the pack. **B** In the vertical position, pass LidLock™ through helmet vent from the bottom and engage in horizontal position. On the right outside panel of the pack find a cord loop to increase or decrease tension. Reverse to remove helmet.

Stow On The Go™ Attachment System

(Talon 44, 33 only)

To operate: shorten trekking poles to a safe, manageable size, **A** locate the elasticized cord loop on the lower left side of pack and pull loop away from the side pocket, inserting the basket end of your poles. **B** On the left harness strap locate the trekking pole icon, **C** grasp the cord lock beneath the fabric patch and pull up on the cord to open the bungee loop. Place pole handles in the loop and tighten to secure. Reverse to remove.

UNIQUE FEATURES

Talon 44

The Talon 44 is a top loading technical backpack with a removable top pocket ideal for light backpacking, thru-hiking and trekking.

1 Removable zippered top pocket with internal stash pouch, key clip and under lid mesh map pocket
2 External closure/front pocket compression
