Note: if you have 450X Lynx frame, you will have 2 antirotation guide, we require to use antirotation guide in LX0837 DFC Ultra Head Combo

Aseembly note

Note A:
Extra Shims Spacer use:
Into 450x Main Grip bag you can find 6 pieces of Brass Shims 4.05x5x0.1.
Use those Shims and install it like shown the manual assembly pictures.
Install the same quantity in left and right to remove any side way play.
Lynx suggest to start with 2 shims per side and check the assembly, if you feel any side way play add 3 shims per side, or in case with 2 shims per side you feel the assembly notch, remove one shims per side and try with one per side.
Those shims are extra shims over the one normally used with ultra dampeners or STD dampeners.
Is your responsibility to play with those shims and get perfect assembly based of your used parts.
