EHEIM – Made in Germany.

High quality, sustainability, reliability, and innovation shape the image of the EHEIM brand internationally.

EHEIM is one of the world's leading suppliers of aquarium technology, aquariums, equipment, and accessories as well as pond products. It represents the concept "Made in Germany", a shorthand for quality.

In fact, around 80% of all EHEIM products are developed and manu-factured entirely in Germany. Only a small part comes from other EU countries but all parts of EHEIM products are meticulously tested and monitored down to the last detail in Germany. EHEIM guarantees the best materials, flawless workmanship, and the highest level of precision. The product guarantee is usually valid for 2 to 3 years. There is also a delivery guarantee for spare parts of 10 years from the date of purchase. And don't forget EHEIM's social commitment "Made with inclusion": Ensuring EHEIM aquarium furniture is manufactured in workshops for people with disabilities in Germany.

Your aquarium – smart controlled.

Our EHEIM Digital Family products enable smart networking of your aquarium. Whether you need lighting, filtration or climate control, EHEIM Digital offers you everything you need for convenient control and monitoring.

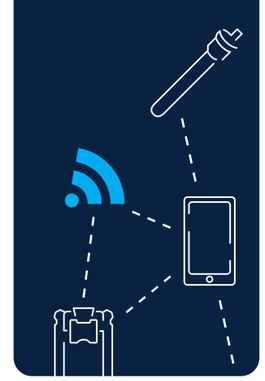

But not only that – The EHEIM Digital Family products communicate with each other, and can be synchronized and co-ordinated to achieve full control to achieve optimal results in your aquatic environment. With our EHEIM Digital Family products, you can conveniently control your lighting via your computer, tablet, or smartphone, as well as create individual lighting scenarios and share them with others. As a product of the EHEIM Digital Family, your filter is also enabled for smart control of the flow rate or alternating flow, among other things.

Through networking and dynamic controls, you can achieve full control over your aquarium, and create your ideal image of nature – with dynamic lighting, changing flow rates, temperature adjustment and much more.

Whether it's the pH value, CO2 supply, climate or even feeding rate – with EHEIM Digital you leave nothing to chance.
Find out how you benefit from the smart features of the EHEIM Digital Family when you visit us at **www.eheim.com**!

EHEIM

More and more people are turning to fish keeping these days. In Germany alone, 85 million fish are swimming around in 3 million aquariums.

There are many reasons why people love aquariums. The bold and fascinating colours of an underwater world help you get lost in a calm and relaxing environment and, for the adults, it makes a statement in a home. Children love aquariums because it brings them a little closer to nature. If you look closely, aquarium life is exciting – a lot is happening in there.

Aquariums

Highest quality combined with good design, simple convenience and reliable safety.

Decades of experience in the production of aquariums and aquarium furniture, forward-looking innovations and a wide product range make EHEIM one of the outstanding brands in the aquatics world. Quality made by EHEIM.

- High quality float glass, flaw free with diamond cut edges
- Extra thick glass with secure joints to withstand high water pressure
- Hidden crosspiece strengthens the upper area; the full volume of the aquarium can be utilised
- Bottom trims and aquarium hoods are manufactured using the new EHEIM thermo-bonding process; a further technical innovation
- Hermetic sealing and precise production according to ISO standard and DIN 32622 guarantees the highest security
- VARILUX aquarium hoods with sliding light units, “Air-flow”-technology, wider access to the aquarium and many more advantages
- Specially adapted lighting concept
- Customised Tech Packs, furniture and Starter Sets complete the range

EHEIM MADE IN GERMANY

EHEIM aquaclass

aquaclass

NEW Product EHEIM

The EHEIM aquaclass gives you a high-quality starter aquarium complete with first-class technology.
Like all complete EHEIM sets, the aquaclass offers you everything you need for a starter aquarium, letting you get “up and running“ with your aquarium immediately. The aquaclass means a class-above: excellent workmanship (e.g., diamond-cut, polished glass edges), high-quality technology (corner filter, heater, thermometer) and LED lighting. The major innovation is the design of the cover. On the cover, you can switch the LED on and off and dim it using a touchpad. There is even ambient lighting that shimmers through a light strip and an integrated night light. Other advantages include a feed opening with lid in the cover (suitable for automatic feeders) and an included base frame.

all inclusive | 30-66 l (8-17 US gal) | touch | dimmable | ambient light | freshwater | 3 year guarantee EHEIM

EHEIM classcab

NEW Product EHEIM

classcab

marine freshwater · 3 year guarantee EHEIM · MADE WITH INCLUSION MADE IN GERMANY

EHEIM classcab is the ideal cabinet for your EHEIM aquaclass aquarium set. Easy to mount, with precise fitting dimensions. Practical, modern, and stable.

- Optimally matched to the dimensions of the aquaclass 66 and aquaclass 30 aquarium sets and can be used for both models
- Modular, attachable additional plate for aquaclass 30
- Handleless doors with dampened „push to open“ door hinge technology
- Plenty of space for aquarium accessories
- The height of 101 cm offers a pleasant view into the aquarium
- The surface in modern wood look (legno) works in harmony with both aquaclass in white and black
- The design blends inconspicuously into the living/work space
- High quality, best workmanship, strong and stable construction

EHEIM clearTank

clearTank

Transparency in its purest form.

73-300 l
19-79 US gal

white glass

marine
freshwater

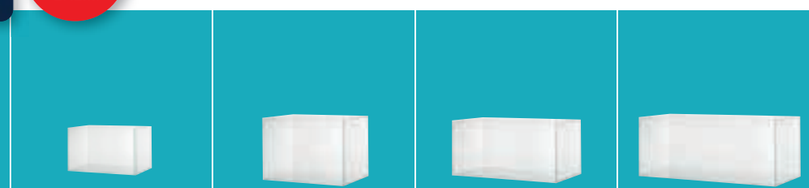

3 year guarantee EHEIM

With the EHEIM clearTank you can enjoy the unobscured, naturally vibrant colours in the aquarium.

If you enjoy creating fascinating underwater landscapes then the EHEIM clearTank is the perfect aquarium for you. Instead of the usual float glass, the panes are made of high-quality, pure white glass. The white glass is absolutely clear and, with the addition of transparent silicone, offers a natural view of the shapes and colours in your aquarium.

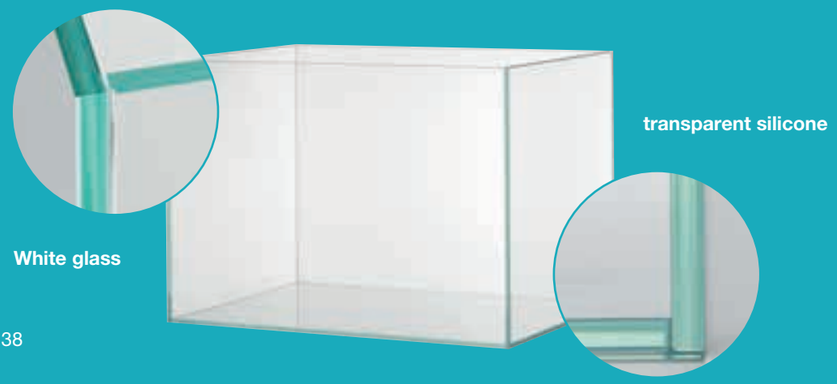

Advantages of EHEIM clearTank

- Open aquarium without cover and lighting
- Tanks with 73, 175, 200 and 300 litres volume
- Ideal for creating underwater landscapes (aquascaping)
- Purest white glass for clear, unobscured transparency
- No inconvenient struts in the aquarium
- Diamond cut and high gloss polished edges
- Aquarium sealed with transparent silicone
- High quality, invisible seams
- Lighting, filter technology, heaters etc. are available from EHEIM's extensive product range
- Also available as an aquarium combination – EHEIM proxima scape (tank volume 175 l) / EHEIM clearscape

EHEIM MADE IN GERMANY

EHEIM clearscape perfectly sets the scene for your underwater world.

EHEIM clearscape 300

clearscape

The EHEIM clearscape offers the ultimate aquascaping experience! Available with two styles of elegant cabinets.

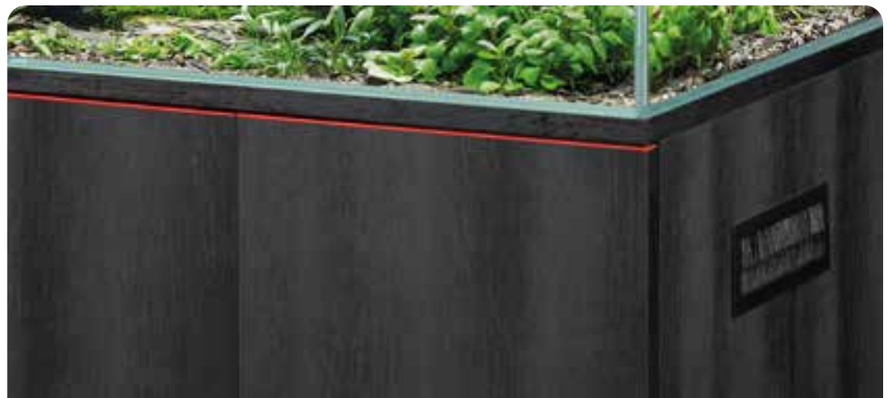

With EHEIM clearscape you will create an elegant eye-catching centrepiece within your living area. The tank is made of the purest white glass with transparent silicone joints. It gives you a clear view of the underwater landscape in the tank and allows you to enjoy the full undistorted spectrum of colours of the animals and plants.

The striking cabinet comes in black, has handle less doors and additional openings on the sides for cables and hoses. This elegant design comes in two distinct styles: You decide whether you want red highlighted edges on the cabinet doors as a striking statement or the more elegant plain version. With the ability to turn the doors, you can place the highlighted edge either at the top or at the bottom. Nothing stands in the way of your individual style.

Red highlighted edge can be placed by turning the doors.

Side surface with concealed openings for cables and hoses (alternatively to passage through the rear wall).

EHEIM MADE IN GERMANY

EHEIM vivalineLED.
Individual living worlds.
Perfectly coordinated.

EHEIM vivalineLED 126

vivalineLED

Whether 126, 150, 180 or 240 liters volume, all is perfectly coordinated for this „all inclusive program“ consisting of aquarium with –EHEIM LED lighting, cabinet, filter, heater and biological filter media. You only have to think about fish and plants. In addition, the EHEIM vivalineLED series can be perfectly coordinated with your interior due to the fact that the new decorative board is replaceable. And therefore your aquarium will become as individual as you are. You will get a little bit of variety and the guarantee that your durable aquarium will also fit to your interior with a new wallpaper or new curtains after some years.

Sliding panes made of high quality aluminium composite panels (black/white).

Including EHEIM classicLED lighting.

vivalineLED

Individual home environments.

all inclusive | 126-240 l 33-63 US gal | changable panel design | freshwater | MADE WITH INCLUSION MADE IN GERMANY | 3 year guarantee EHEIM

EHEIM vivalineLED is the fresh water aquarium combination in four different sizes and countless colour combinations.

- Trendy cabinet – in three different basic colours (white, anthracite, oak grey)
- Including energy efficient and high performance EHEIM classic LED lighting
- Interchangeable decorative panel in different trendy colours
- Sliding LED lights for easy access
- Glued frame with cut outs for all pipework and cables
- Sliding panes made of high quality aluminum composite panels (black/white)
- Fully equipped with high quality EHEIM technical equipment and biological filter media

Product details

All vivalineLED cabinets are supplied with matching decorative boards in oak grey, white, anthracite or pine. As well as these four standard colours, the interchangeable panels are also available in bordeaux, candy, lemon, sky and urban (light grey). The panels are simple to replace and can be screwed onto the cabinet even when the aquarium is full.

EHEIM MADE IN GERMANY

Filters

From the classic to the newest high-tech models with electronic control. With or without a heater.

EHEIM internal filters
Versatile, functional and made with exceptional quality. Whether for breeding, quarantine tanks or simply for typically smaller “home” aquariums: internal filters are ideal. They take up little room and are extremely flexible. EHEIM offers various options for aquariums from 10 up to 260 litres: all of them (apart from the pickup) are modular and can be extended or reduced to suit all requirements. They can all be filled with various types of filter media. Technically perfect filters of outstanding quality, with reliable performance and guaranteed durability.

EHEIM external canister filters
With our large range of external filters you are sure to find exactly the right filter to suit your needs – for the smallest breeding tanks to aquariums up to 1500 lt. All EHEIM aquariums have one thing in common: QUALITY. We work with the best materials, precise engineering and, with over 60 years of experience, we guarantee the highest quality products. Our canister filters are consistent, reliable and offer a long service life. Furthermore, you can be sure that the filters, accessories and filter media are tailored to complement each other.

EHEIM High Performance Ceramics
The impeller shafts and bushings (axles and bearings) (ecco pro, eXperience, professionel 3/4+ and professionel 5e) are made of high performance ceramics. This means exceptionally smooth and quiet running, maximum resilience and an extremely long service life.

aquaball

Spherical head provides all round flexibility.

With EHEIM aquaball we offer you an award-winning internal filter concept with all-round benefits. The ball is the trick. The round pump head sits in a ball joint. This enables adjustment of the outflow direction as required. The flow rate is set by the output regulator. And the power-diffusor adjusts the air flow.

Due to its modular system the filter volume can be customised as required. The filter baskets are easy to clip in and remove and can be filled with a variety of filter media.

There are 3 models for small, medium and large aquarium (up to 180 l).

Directly under the pumphead is a mediabox. It can be filled with:
- a filter pad for mechanical-biological filtration,
- a fine filter pad for fine filtration/polishing,
- bioMECH or SUBSTRATpro for biological filtration or
- EHEIM AKTIV for adsorptive filtration.

EHEIM

The aquaball concept with external filter technology. External filter technology and multi-layer filtration – that means: the water at the bottom is pumped to the top through the various filter layers and after filtration directed back into the tank.

The closed filter baskets come prefilled with EHEIM SUBSTRATpro. Other filter media can also be used. The inlet basket contains a filter cartridge for the mechanical-biological prefiltration. In the pumphead holder a filter pad provides additional filtration.

By adding or removing filter modules (filter baskets) you can adjust the filter volume as necessary.

- The filter baskets can be easily clipped together and released (Easy-click locking system)
- Due to the modular construction the filter cartridges or media can be cleaned at different intervals thus preserving bacteria cultures.

The ball shaped pumphead sits in a ball socket and can be turned right round. Thus the outflow of the filtered water can be aimed in any direction.

The pump output and throughflow can be set by the control knob on the outflow nozzle.

The power-diffusor is adjusted to regulate the air intake and thus the oxygen enrichment in the aquarium.

The holder for biopower is simply fixed to the glass with suction cups. For cleaning, exchanging modules or filling with filter media, the filter is simply removed from its holder.

EHEIM aqua

aqua

The modular internal corner filter with click together filter containers.

The EHEIM aqua corner is a multi-functional internal filter with compact dimensions and a clever modular design.

- Modular internal corner filter for small and medium-sized aquariums from 30 to 200 litres
- Ideal for beginners
- Compact and space-saving
- Practical suction cup attachment (4 suction cups)
- Powerful pump
- Simple adjustable output
- Large suction area to utilise the full filter volume
- Mediabox for different filter media (e.g. EHEIM AKTIV carbon, SUBSTRATpro, phosphateout etc.)
- Clip-in filter containers (cartridges) for easy cleaning and expansion if necessary
- Includes diffuser and hose
- Supplied complete with filter cartridges for mechanical-biological filtration
- Including EHEIM AKTIV carbon (20 g) for the Mediabox
- Suitable for fresh and marine water

MADE IN ITALY

EHEIM aquaCorner

aquaCorner

The corner internal filter for open top aquariums.

Powerful corner internal filter for aquariums of 10-60 litres (glass thick max. 5 mm)

The EHEIM aquaCorner 60, specially designed for small aquariums is the heartbeat of your aquarium (up to 60l) and is specifically designed for use with a small volume of water. It maintains the balance of the eco-system, ensures constant water movement, prevents differing temperature layers. As a corner filter it takes up little space in the aquarium and therefore leaves more room for plants and other decoration. Its suction power is precisely regulated, so that small livestock (e.g. young shrimps) are not sucked in.

- Simple assembly
- Easy cleaning
- Easy to hang onto the glass, filter easy to flip open for cleaning
- Suitable for up to 5 mm glass thickness
- Pre-Filter cartridge integrated in the head
- Motor unit remains in tank during cleaning

❶ Dosage chamber for fertiliser etc.

❷ Mediabox for the bio-filter media, EHEIM AKTIV carbon, phosphate remover, etc.

EHEIM pickup

pickup

Fully equipped and ready to use. Ideal for beginners.

The EHEIM pickup is a small practical filter with a special concept.

A special feature of the pickup is that the filter canister and the cartridge can be removed from above but the pump unit remains in the water. This is a practical solution for cleaning or changing the filter cartridge and impeller without having to remove the entire filter.

- Water inlet is in the bottom of the filter
- Outlet nozzle rotates so that you can adjust the direction of the flow
- Filter canister and cartridge are easy to remove from above
- **Easy fit media+**

EHEIM miniUP

miniUP

Designed for the smallest tanks. Attractive, slim design.

<30 l <8 US gal | 5 Watt | 300 l/h adjustable | marine freshwater | 3 year guarantee EHEIM

The micro-internal filter for the smallest of aquariums (nano tanks) 25 to 30 l

It is small, attractive, gives excellent performance and is easy to attach to the tank with suction cups. The filter draws in the water from the front through vents, pumps it through the Filter cartridge and directs it, filtered, back into the tank. You can also attach an outflow hose to enable you to adjust the outlet direction.

- Attractive, slim design
- Front water intake
- Connector for outlet hose
- Comes fully equipped with Filter cartridge, ready for immediate use
- Only 5 Watt power consumption

EHEIM miniFLAT

miniFLAT

For frogs, amphibians & co. Simple to install, connect and start up.

5 Watt | 300 l/h adjustable | for terrarium paludarium | marine freshwater | 3 year guarantee EHEIM

Micro internal filter for terrariums and paludariums with a shallow water area or water bowls (e.g. for frogs, semi-aquatic reptiles, cray fish etc.)

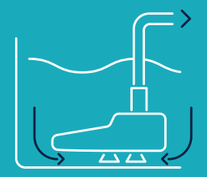

This unique little flat water filter is designed differently to an internal aquarium filter: It doesn't hang on to anything, but rather sits horizontally in the water. It is fixed to the tank/bowl with suction cups. It draws the water in from below, pumps it through the Filter cartridge and directs it out, filtered, at the top. The surface water movement makes the reptiles drinking water visible. If you want to adjust the outflow direction, you can attach an outlet hose.

- Water intake from below
- Connection for water outlet hose
- Completely equipped with original EHEIM filter pad and ready to use
- Only 5 Watt power consumption

EHEIM classic

classic

Outstanding quality and economically priced.

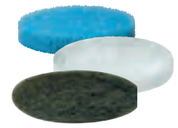

With EHEIM classic you have everything that makes up a good external filter.

By choosing a classic you won't go wrong. Because you have chosen a reliable, millionfold tried and tested piece of equipment. All models perform to the highest quality standards. First class components and carefully matched features ensure perfect pump and filter performance. Additionally, you have the proverbial EHEIM quiet running, robust durability and low energy consumption. You will be very satisfied.

There are 5 models for aquariums from 50 up to 1500 litres – with various equipment.

- Millionfold tried and tested
- Exceptional value for money
- Very quiet running
- Low energy consumption
- Long-lasting flexible silicon sealing ring in pumphead (for easy and safe replacement after cleaning)
- Can be filled with filter pads and/or loose filter media
- Comes with spraybar, inlet pipe, hose and installation accessories
- Versatile accessories

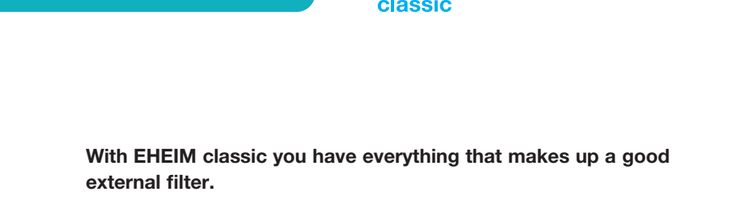

Accessories included
Filter basket (only classic 250), spray bar, inlet pipe, hose and installation accessories (further accessories on page 92-105)

- classic 1500XL with practical drain tap

classic 150

ecco *pro*

Less energy consumption with more power.

EHEIM ecco pro offers you an extraordinary combination of energy economy, performance and convenience.

Only 5 Watt power consumption at a pump output of 600 l/h and 8 Watt at 750 l/h. That is simply extraordinary. And also extraordinary is its characteristic multifunction handle – it combines three functions: carrying + opening/closing + priming. Added to this are rotatable shut-off taps, practical filter baskets and – extremely quiet running due to ceramic components. ecco pro comes fully equipped – including accessories and filter media. You are ready to go. There are 3 models for aquariums from 60 up to 300 litres.

Excellent mechanical and biological filtration is achieved by optimum water throughflow. An additional prefilter captures dirt particles right at the beginning. In this way, the subsequent filter material is protected and cleaning intervals are longer.

The characteristic multifunction handle is a singular beneficial feature. It fulfils 3 functions and is, depending on its position, a carrying handle or a lever for opening/closing or priming. Wrong use is rendered impossible due to the red safety catch.

The supplied shut-off taps are rotatable. You can thus turn them to make them more easily accessible. Water throughflow is adjusted by the outlet tap. And these taps can be closed and disconnected from the pump-head very easily before opening the filter.

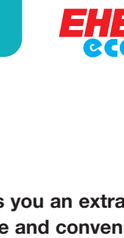

EHEIM High Performance Ceramics, that is components made of high quality ceramics (axles and sleeves of the impeller), ensure very quiet running, high resilience and extremely long service life.

60-300 l / 16-79 US gal | 5–8 Watt | 500–750 l/h | self priming | energy saving | marine freshwater | 3 year guarantee EHEIM

ecco pro 200

- Low energy consumption with high performance
- Excellent biological and mechanical filtration due to optimum water throughflow

1 Multi-function handle (for carrying + opening/closing + priming)

- Large volume self-priming

2 Rotating shut off taps (more convenient handling)

- Runs extremely quietly due to ceramic axles and sleeves

3 Practical filter baskets, can be filled according to individual requirements

4 Additional prefilter (giving longer cleaning intervals for the other filter media)

- Long-life elastic silicon sealing ring in pumphead

5 **media+:** Completely equipped with original EHEIM filter media (pre-filled baskets)

Accessories included
2 x shut-off taps, outlet elbow, suction pipe, EHEIM quality hose, set-up accessories
(further accessories on page 92-105)

EHEIM eXperience

eXperience

The sturdy basic model in our external filter generation with a square shape.

80-350 l
21-92 US gal

8 – 24 Watt

500 – 1050 l/h

marine freshwater

3 year guarantee EHEIM

With EHEIM eXperience you have the fundamental benefits of our top external filter generation.

With its predecessor, the professionel range, EHEIM launched the first ever external filter range with a square basic shape. Benefits: space saver (because the filter fits into corners), high stability and large filter volume.

Additionally, this sturdy basic filter offers special advantages: for instance, a complete hose adapter unit with integrated shut-off taps, individually removable filter baskets with fold-away handles, very low energy consumption, very quiet running due to ceramic components and much more.

eXperience comes completely equipped – including accessories and filter media. You can start immediately.

- Very good, reliable external filter for aquariums up to 250 litres
- Square basic shape for large filter volume and high stability
- Detachable hose adapter with integrated shut-off taps and locking clamp as complete unit
- Individually removable filter media containers with fold-away handles for easy handling and convenient full or intermediate cleaning
- Low energy consumption
- Extremely quiet running due to ceramic axle and sleeve
- Equipment: coarse filter pads, fine filter pad and filter baskets
- **media+:** complete with filter media (EHEIM SUBSTRAT)
- Accessories included: spray bar, inlet pipe, outlet elbow, EHEIM quality hose, installation accessories
- A basic model for innovative upgrading right up to hightech models with electronic controls: professionel 4+ und 5e

thermo

professionel 3 Thermo

External thermofilters Filtration plus heating.

only for fresh water!

The powerful and very convenient EHEIM thermofilters are not only equipped with the full range of features of the professionel filter range, but also with a high quality heating element. They heat and filter your tank easily and simply.

- An easy to read and precise LED display shows the exact water temperature
- With a simple press of a button, the desired temperature can be precisely and easily set
- The integrated temperature control gives an accurate setting of 18-34°C or 65-93°F
- 2+1 safety hose adapter - 2 inlet connections and 1 outlet connection ensure optimum water circulation throughout the aquarium
- Output display – easily visible in the adapter – shows the filter's performance
- Heater element protected under the pump-head of the filter
- Supplied with 1x coarse filter pad, 1x fine filter pad and filter baskets

MEDIA SET: Perfectly matched

These complete media sets are perfectly matched to our EHEIM filters. Your customers can have the correct media for their filter in one convenient pack.

The porous material becomes evenly soaked with water and traps large and small dirt particles. After a short start-up period purification bacteria, which provide intensive biological decomposition of harmful substances, colonise the specially structured foam.

The coarse filter pads are reusable many times over. To clean them simply rinse and squeeze out, so that the bacteria cultures are not completely destroyed.

- Porous material traps large and small dirt particles
- Good colonisation conditions for bacteria cultures
- Reusable several times over
- To clean just rinse and squeeze out

EHEIM professionel4+

professionel 4+

High quality filtration technology with integrated features.

The EHEIM professionel 4+ – our best external filter but now with an integrated 'emergency' button. We have adopted the many advantages of the professional 3 series – powerful performance, optimal energy efficiency, quiet operation, priming aid, safety hose adapter – but we have also improved the technology by incorporating the new 'Xtender' button.

In the event the output is reduced due to the fine filter media blocking, the button can be adjusted to redirect the flow. The biological filtration is maintained and the service interval can be extended by a few days.

There are 3 sizes available for aquariums up to 250, 350 and 600 litres. The models 250 and 350 are also available with an integrated heater as thermo filter (T).

- Control knob to extend the service life of dirty filter media
- Completely equipped with original EHEIM filter media and installation accessories

EHEIM professionel 5e: High intelligence combined with high quality.

professionel 5e

The EHEIM professionel 5e is our best external filter to date, offering everything an aquarium enthusiast could wish for.

Each function can be individually programmed and controlled wirelessly. The electronic system monitors all functions and keeps the flow constant as well as delivering strong performance due to the large filter volume. The clever design and the regulation of the electronic flow extend the maintenance intervals for the biological filter material considerably and, in addition, there is the acclaimed smooth EHEIM performance.

The skilled workmanship, the high quality materials and the renowned „Made in Germany“ reliability, combined with the 3 year warranty, leave nothing to be desired.

3 year guarantee EHEIM

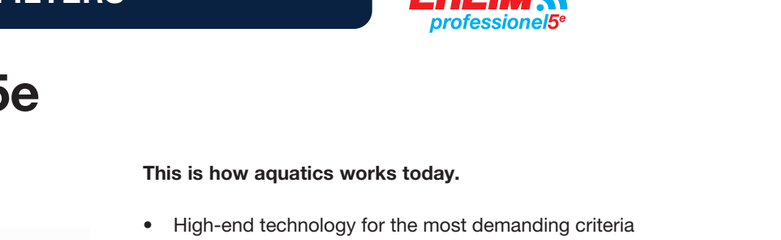

This is how aquatics works today.

- High-end technology for the most demanding criteria
- Electronic professional filter with integrated Wifi function and wireless control via smartphone, tablet or PC/Mac
- No extra app is required for control
- Individual program settings: Constant flow, bio mode, pulse mode and manual mode
- Linking with other devices possible (e.g. lighting control LEDcontrol+e)
- Constant monitoring of the maintenance interval; cleaning instructions are automatically sent to the stored e-mail address
- Permanent electronic system monitoring (including automatic air removal; fault elimination)
- Wifi function can be deactivated after configuration
- Large pre-filter easily accessible (directly under the pump head) for quick removal of mechanical contamination without having to disturb the sensitive bio-filter material
- Large canister and filter volume
- The filter canister fills quickly due to the integrated self priming
- High-quality wear-free ceramic axle and bearings guarantee quiet performance
- Safety hose adapter with easy-to-operate locking device; the adapter can only be released when the hose valves are closed
- Large safety closure clips for a tight and safe connection between the pump head and filter canister
- Easy Clean – easy and safe cleaning of the filter media with the help of the cleaning cover
- Comes with installation accessories
- Suitable for fresh and marine water (except thermofilter – for freshwater only)

There are four filter versions available, including a thermofilter (600T) with integrated heater, developed for aquariums ranging from 180 to 700 litres

WiFi 2.4GHz – IEEE802.11 b/g/n
Security keys: **WPA, WPA2, WPA/WPA2**

multi screen
Use by various Wifi compatible devices: Smartphone, tablet, PC, laptop, etc.

pulse mode
The electronically controlled alternating current ensures natural flow conditions in the aquarium.

auto air out
Accumulated air under the filter head are detected and automatically discharged by an electronic program.

output control
Gradual increase of the water flow rate – the maximum capacity exceeds the performance of conventional filters.

bio mode
(sun/moon):
Changes between 2 adjustable flow rates.

electronic error indicator
Permanent electronic system monitoring. This starts a program that automatically attempts to eliminate the cause of any errors.

constant flow
Increased pollution in the filter is electronically detected and automatically adjusted to your programmed output. This guarantees a constant flow rate and extended maintenance intervals.

service indicator
Constant monitoring of the maintenance interval. Cleaning notification is automatically sent to a stored e-mail address.

EHEIM reeflexUV

reeflexUV

The UV-steriliser with a new kind of reflector technology.

- Quickly and effectively reduces or eliminates harmful germs (bacteria, fungi, viruses, other pathogens) and infectious swarmers of fish parasites as well as suspended algae in the water
- Patented reflector technology: The unique arrangement of the UV-C light source and the aquarium water flowing past it, in conjunction with a special reflector, ensures unparalleled efficiency with a low energy input
- Almost no power loss, as the water is not deflected due to the clarifiers innovative design
- Excellent results: twice as effective compared to conventional UV clarifiers
- Also ideal for rearing tanks, as it reduces the risk of infection
- Bound cleaning bacteria in the filter are preserved, as only floating germs are captured
- Easy and safe handling and cleaning
- AUTO-OFF: Automatic safety shut-off when changing lamps
- Easy mounting due to supplied bracket
- Variable installation, no defined installation position or flow direction

EHEIM MADE IN GERMANY

EHEIM reeflexUV+e

reeflexUV+e

NEW Product EHEIM

The smart UV clarifier with WiFi control.

With EHEIM reeflexUV+e you reduce or eliminate germ contamination and eliminate turbidity in the water. Now with WiFi controls:

- Can be coupled with other products in the EHEIM Digital family (e.g. synchronisation with the aquarium lighting)
- Controlled via WLAN-enabled devices (smartphone, tablet, notebook, etc.)
- Easy and intuitive operation
- Three different modes: "constant", "daily cycle", "smart coupling"
- Configurable burning duration, time, pauses, etc.
- Booster mode for combating acute parasite infestations
- Notification by e-mail when the lamp replacement is due
- Made in Germany
- 3 years warranty
- Suitable for both fresh and marine water

300-2000 l / 79-528 US gal | 11-24 Watt | best clarity | against bacteria | marine freshwater | multiscreen | Digital Family product | 3 year guarantee EHEIM

Filter media

EHEIM Filter media – The Original

EHEIM filter media – highly efficient, developed in our own laboratory, produced from only the best raw materials, continuously checked and guaranteed free from pollutants.

Even the best internal and external filters are ineffective if they are not filled with the correct filter media. Filter media are made from various materials which perform multiple functions: they trap dirt and fine particles, provide biological decomposition of harmful substances, remove contaminants or effect a chemical change.

Depending on the size and stocking levels of the aquarium, the type of filter used and the local water quality – appropriate filter media needs to be used and combined. The correct layering of the filter media is also critical to the water quality.

Coarse and fine filter pads
Coarse and fine filter pads perform different functions in the media layering in EHEIM filters and, depending on the model, combine mechanical, biological and adsorptive filtration.

Filter cartridge for internal filters
The cartridges consist of special foam material, fit the appropriate internal filters and clean both mechanically and biologically. Adsorptive filter cartridges can be used to remove phosphate.

Media Sets
Filter Media Sets are customised to suit the different EHEIM filters. This means that all the medias necessary for the filtration of any particular filter, are in a single all-in-one pack.

- **Mechanical filter media**
  Mechanical filter media trap dirt and fine particles. This takes place before the water flows through the rest of the cleaning process and also at later stages in the filtration.

- **Biological filter media**
  The main task of biological filter media is to offer the best colonisation conditions for bacteria cultures. The purification bacteria convert harmful substances in a natural way.

- **Mechanical-biological filter media**
  Dirt-trapping pockets in the media capture particles but at the same time the pore structure provides colonisation for purification bacteria.

- **Adsorptive filter media**
  Adsorptive filter media remove and retain harmful substances from the water – for example; chlorine, remains of cleaning agents, water treatments, colouring agents and so on.

- **Chemical filter media**
  Depending on which type, these filter media control the ph-value and the water hardness – or lower the phosphate content and inhibit the growth of algae.

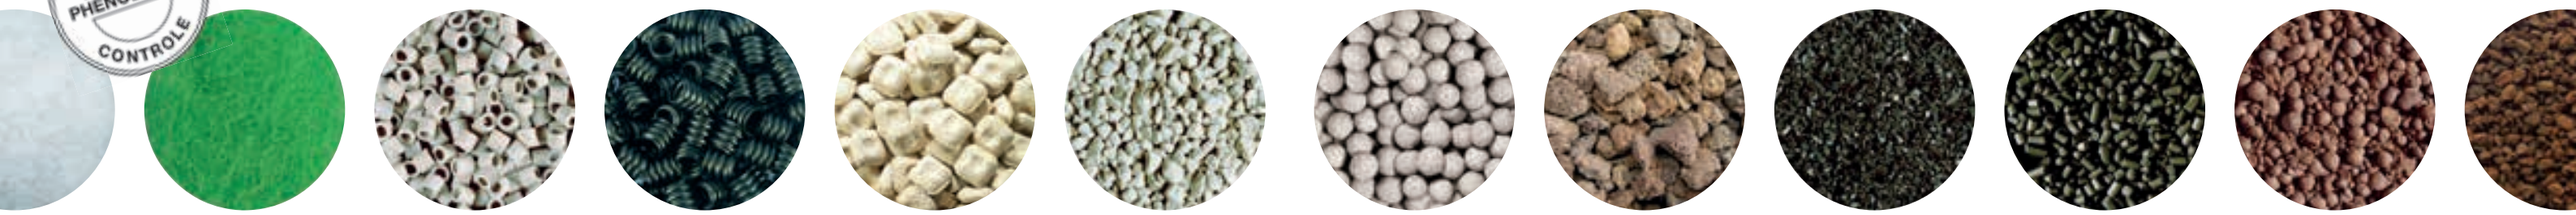

Filter media

EHEIM filter media
for the best water in the world

Filter media have various functions.
They trap dirt and floating matter and perform the biological conversion or chemical alteration of the water. They are therefore divided into the following types: mechanical, biological, adsorptive and chemical filter media.

• Mechanical filter media

Coarse material works directly where the filtration process begins. The water is swirled around and larger dirt particles become trapped. The water then flows through the rest of the filtering process. Various media perform this function. Particularly effective are EHEIM MECH and EHEIM bioMECH.

• Biological filter media

After the initial mechanical media treatment, biological media begin the most important task in the filter. With the colonisation of important purification bacteria, a kind of bacterial lawn is formed, which feeds on and transforms all kinds of dirt particles harmful to the aquarium. The main role of the biomedia is to offer the best colonisation conditions for the purification bacteria. EHEIM biological media ensure stabile conditions in the tank due to the best possible surface structure (eg. EHEIM SUBSTRATpro).

TIP: Never wash or change all the biomedia at the same time. This would destroy the colonies and hinder re-colonisation. The filter baskets in the external filter and the filter module in aqua/aquaball/biopower are ideal for partial cleaning.

• reusable

• Adsorptive filter media

This type of filter material draws out and retains pollutants from the water. These can be chemical compounds, such as chlorine from tap water used when setting up your tank or chemical remains after the treatment of livestock.

TIP: Since adsorptive filter media retain pollutants but do not really convert them, they need to be changed regularly.

• Chemical filtration

EHEIM TORFpellets chemically influence the pH value and water hardness.

TIP: TORF expands in water, therefore lightly rinse, not wash, before use. TORF must be changed after 3-6 weeks. Do not use TORF with activated carbon.

EHEIM phosphate*out* binds phosphate to iron and extracts it from the water circulation – hindering the growth of algae in the aquarium. Free from harmful substances and suitable for both fresh and marine water.

Filter media

Original EHEIM cartridges and filter pads

- **EHEIM filter cartridges for internal filters**

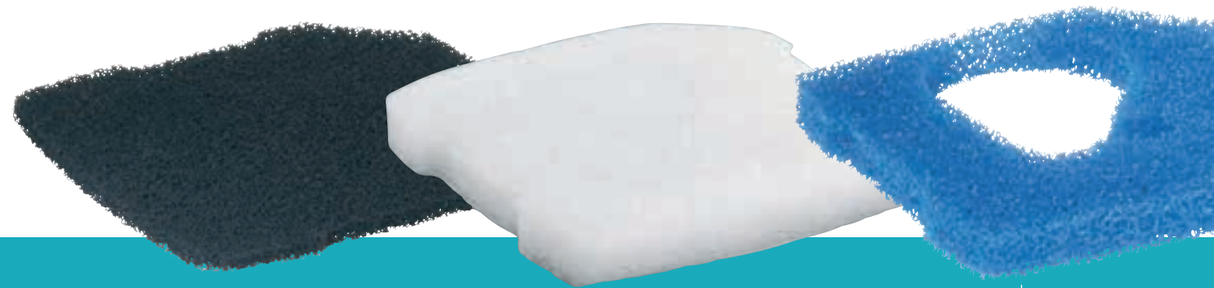

These are made of phenol-free foam materials and offer a large colonisation area. They can be easily changed and after a short run-in period they provide biological decomposition of harmful pollutants in addition to mechanical water cleaning. Specially treated activated carbon cartridges are also available, which are excellent for adsorptive filtration.

- **EHEIM filter pads / coarse filter pads**

Specially structured materials provide outstanding purification. Water permeates them evenly, coarse particles and even the finest particle residues are trapped mechanically. After a short run-in period, purification bacteria lodge in the special foam material and ensure the intensive, biological decomposition of toxins. In addition, Activated carbon pads have an adsorptive effect: dissolved pollutants are trapped on their surface and therefore removed from the water cycle.

All filter cartridges and pads can be found on: www.eheim.com

Zubehör Accessories ORIGINAL EHEIM Accessoires

EHEIM media set-up

Most EHEIM filters come pre-filled with the correct filter media. For after sales or for customised filtration we offer you a variety of media in complete filter media sets or single packs.

EHEIM classic
- EHEIM coarse and fine filter pads
  These guarantee the basic mechanical and biological filtration.

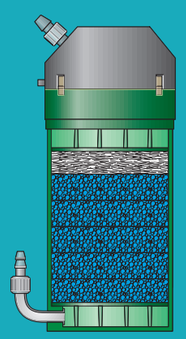

EHEIM eXperience
- EHEIM fine filter pads – for additional mechanical and biological filtration.
- EHEIM SUBSTRAT – Standard biofilter medium with a large colonisation area for bacterial cultures
- EHEIM coarse filter pads – for mechanical (and biological) filtration

EHEIM ecco pro
- EHEIM filter pad – for additional mechanical and biological filtration.
- EHEIM fine filter pad - for fine filtration
- EHEIM SUBSTRATpro – bio-filter medium with perfect volume utilisation, longer cleaning intervals and high decomposition performance
- EHEIM bioMECH – mechanical-biological filter medium for combined water treatment
- EHEIM MECHpro – mechanical prefilter medium which although is mainly for trapping dirt particles, also encourages the colonisation of purification bacteria.

EHEIM professionel 3 / professionel 4+ / professionel 5e
- EHEIM coarse filter pads – for additional mechanical and biological filtration and longer intervals between cleaning

InstallationsSET 1
Modular inlet kit for easy connection to all external filters.

Diffuser
Precisely dosed supply of oxygen into the aquarium.

Wide-jet pipe
Ensures high surface movement.

InstallationsSET 2
Modular outflow kit for easy connection to all external filters – to customise the water flow

Cleaning brush
For thorough cleaning – different sizes for different hose diameters

Quick release joint
With a flick of the wrist, you can disconnect the hose.

Lighting

New dimensions of light

EHEIM LED lights – the new generation of aquarium lighting. Perfectly desig-ned, individual light requirements for both fresh and marine aquariums. More efficient, long lasting and flexible than any other technology.

LED lights by EHEIM are the perfect lighting for your aquarium.

You cannot find anything better: from the full spectrum of sunlight to white and/or actinic light. All the specifications are designed for the maximum support and development of either plant growth or corals and also highlight the natural colours and brightness in the aquarium.

The LEDs consume 30 % less energy than efficient T5 fluorescent tubes and their service life is 150 % longer. They can be adapted to fit most aquar-iums: extending brackets allow the lights to be adjusted to the aquarium width. All fluorescent tubes can be replaced with the correct adapter.

Lighting

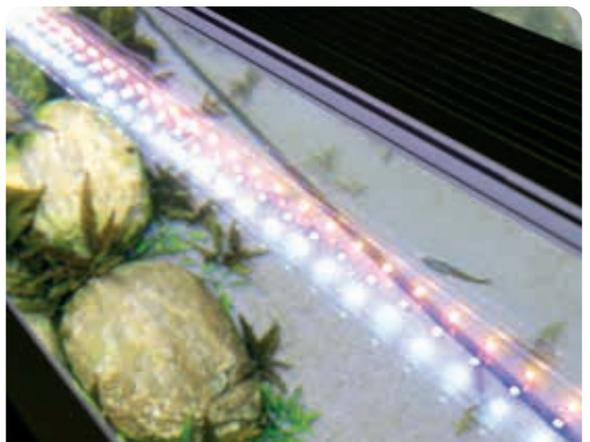

LED lighting

EHEIM LED lights. For healthy plants and an even more intensive color experience.

NEW EHEIM

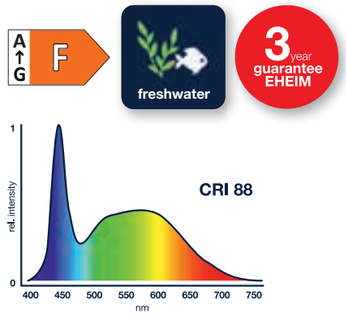

EHEIM classicLED

classicLED daylight

Natural colours – freshwater LED lights

Colour spectrum classicLED daylight

For fresh water aquariums
EHEIM classicLED daylight

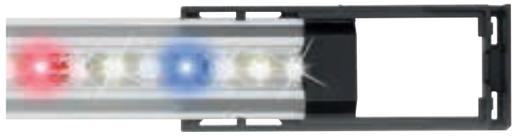

- Including safety power supply
- Various fitting options
- Waterproof (IPx7)
- Cost effective LED for beginners
- High energy efficiency and light output (approx. 105 lm/W)
- 6 lengths for aquariums from 55 - 130 cm
- Easy to fit using the extendable brackets
- Can be used to replace T5/T8 fluorescent tubes
- Enables the exchange of high energy fluorescent tubes to energysaving, environmentally friendly LED lighting
- Beam angle 120°

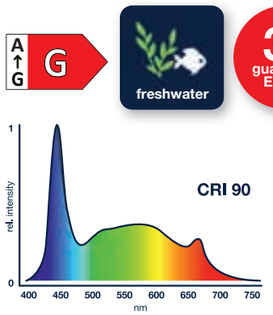

Original EHEIM accessories: classicLED adapter-set T5/T8
Art. No. 4200130

classicLED plants

Lighting for plants

Colour spectrum classicLED plants

For fresh water aquariums
EHEIM classicLED plants

- 6 lengths for aquariums from 55 - 130 cm width (continuously adjustable) due to extendable support brackets
- High-quality, sturdy aluminium housing
- Absolutely waterproof (IPx7) and particularly safe due to low-voltage technology
- Bright sunlight (7700 K) and light spectrum matched to aquatic plants (photosynthesis) with high red components
- Promotes healthy growth in plants and animals
- Natural, unadulterated colour rendering
- Beam angle 120°
- Full illumination to the bottom of the aquarium
- Average life min. 35 000 hours (9-10 years at 10 hours/day)
- High energy efficiency and light output (approx. 90 lm/W)

Original EHEIM accessories: classicLED dimmer

- Automatically running sunrise and sunset
- Moonlight
- „Plug & Play“ – The dimmer is inserted between the EHEIM classicLED and the power supply unit.
- Art. No. 4200110

Intensify the colours in your aquarium with the EHEIM powerRGB, a great addition to your aquarium lighting. To use it you need the wireless lighting control RGBcontrol+e, which will enable millions of colour nuances. This allows you - even in sync with standard lighting - to create lighting scenes depending on the time of day, such as letting clouds gather, staging dawn and dusk, simulating atmospheric moonlight with a natural cycle, and much more. There are no limits to your imagination, or configuration.

NEW EHEIM

Digital Family product

LEDcontrol+e

EHEIM LEDcontrol+e allows you to control the brightness level in your aquarium easily without cables.

- Optimised controller with maximum performance, high power, and a stable connection.
- Compatible with all devices of the EHEIM Digital family.
- Control the aquarium lighting - only available with EHEIM powerLED+ luminaires
- Wireless operation via WLAN-capable end devices (smartphone, tablet, PC/Mac).
- Two connections can be controlled separately; allowing two individual lighting scenarios to be used together, i.e., several luminaires can be controlled individually or in synchronicity.
- Simulate the lighting over of the course of the day as in nature.
- Use pre-installed lighting scenarios for different living spaces.
- Use/create individually programmable lighting sequences.
- Create moonlight scenarios with natural moon phases.
- Freely configurable scenarios: sunrise, sunset (each lasting up to 3 hours), cloud effects, moonlight, etc.

EHEIM MADE IN GERMANY

RGBcontrol+e

With the EHEIM RGBcontrol+e you can determine the intense colours and lighting mood in your aquarium - simply from your smartphone, tablet or PC/Mac.

With EHEIM RGB additional lighting, you have an enormous colour spectrum at your disposal. The colours of the fish and plants in your aquarium will gain a fascinating intensity. The colourful splendour of you underwater world will come into its own. With the RGBcontrol+e lighting control, millions of colour nuances are possible. This allows you to create lighting scenarios and moods depending on the time of day - even in sync with standard lighting - to make clouds appear, to stage dawn and dusk, to simulate atmospheric moonlight with a natural cycle, and much more. There are hardly any limits to your im gination, or individual configuration. By the way: The EHEIM incpiriaRGB cabinet lighting can also be controlled and synchronised with your aquarium lighting.

The RGBcontrol+e can be coupled with products of the EHEIM Digital family and is easily controlled via WLAN-enabled end devices (smartphone, tablet, PC/Mac).

NEW Product EHEIM

Technical data **RGBcontrol+e**

Technical data	RGBcontrol+e
Performance W	max. 180
Channels	3
Power supply	24V DC
System requirements	all WiFi devices, smartphone, tablet, PC/Mac
Dimensions WxHxD mm	97x97x27
Art. No.	4200150
EAN 4011708	013724
Packing dim. WxHxD cm	11,1x19x4,4
Master pack quantities pcs.	1

WiFi 2.4GHz – IEEE802.11 b/g/n
Security keys: **WPA, WPA2, WPA/WPA2**

- Individually configurable lighting sequence and control of the red, green and blue colour channels of the EHEIM RGB LEDs
- Also suitable for cabinet lighting EHEIM incpiriaRGB
- Ensures particularly intensive colouring of your animals and plants
- Sunrise and sunset, cloud effects, moonlight with natural cycle and more
- Selectable preset or individual scenarios
- Selectable “expert” mode with additional setting options
- Acclimatisation mode, e.g. when changing light source or setting up a new aquarium
- Manual updates for download from the EHEIM website, as well as automatic updates with an internet connection.
- Can be coupled with products of the EHEIM Digital family
- Wireless operation via WLAN-capable end devices (smartphone, tablet, or PC/Mac)
- Highest safety and reliability – 3 years warranty

Pumps

With EHEIM pumps you can move a lot of things. Reliably, quietly and permanently.

EHEIM Pumps – the product range for every application: for aquariums and ponds, for fresh and salt water, for large and small output requirements – and for air.

In small household and in large aquariums, in garden ponds and breeding plants – but also in water features, wells and fountains: EHEIM pumps are in use everywhere. Everywhere they are moving water, providing air and a clean conditions.

Whether it be for a pump output of 150 or 15.500 l/h, for use in or out of water, for fresh or marine water: there are many different requirements, matched by a comprehensive range of the features and products. The quality upholds the EHEIM promise: innovative technology, the best materials, outstanding workmanship, quiet running and guaranteed reliable continuous performance.

EHEIM compactON

compactON

The compact aquarium pumps with a new design.

The EHEIM compactON aquarium pump range is characterised by its compact design. The accessories included with this versatile pump make it ideal for most applications and the high quality materials make it suitable for both fresh and marine water aquariums. The EHEIM compactON 2100 - 16000 pumps can also be adapted for use both in or out of water.

- Compact aquarium pump
- Attaches to glass using strong suction cups
- Includes suction basket and threaded coupling as accessories
- High pump performance but low energy consumption

MADE IN ITALY

universal

Power for all occasions.

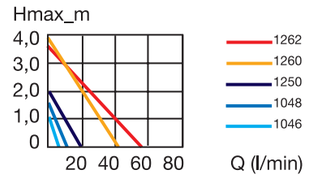

❶ Integrated prefilter
❷ Inlet connector for hose connection
❸ Variable fixing options

EHEIM universal pumps

EHEIM universal pumps offer a large performance spectrum and a wide variety of uses. They are very reliable equipment offering exceptionally long service life. They can be used inside or out of water. The integrated prefilter, safe hose connections, a variety of connections and fixings, but above all their absolute reliability make the EHEIM universal pumps very popular. They are frequently used in a professional environment – e.g. in breeding units and in zoos.

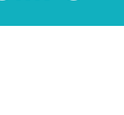

- Durable
- Ceramic shaft
- Designed for continuous use in or out of the water
- Hermetically sealed motor body guarantees continuous operation

EHEIM MADE IN GERMANY

EHEIM streamON+

streamON+

Extra performance and efficiency.

The new EHEIM streamON+ is small, compact and extremely energy efficient. The pump is attached to the aquarium with a magnetic holder and can be easily adjusted on the glass.

- Compact streaming pump (3 models) for aquariums from 35 to 500 l
- Suitable for both marine and fresh water
- Ideal for simulating natural water flow found in rivers and coral reefs, etc.
- Optimal water circulation for a natural, smooth current
- Increases the oxygen content, creating natural living conditions
- Vital for corals in marine water and beneficial for fish in fresh water
- Securely attached with a magnetic holder, can be easily adjusted
- Ball joint allows pump to swivel in all directions (3D function)
- Variable outflow capacity
- Extremely quiet and low-maintenance
- Low power consumption and high energy efficiency
- Integrated cable duct
- Maximum safety and reliability

Customised flow

The control system for circulation and flow pumps to simulate natural water flows in the aquarium.

- Controller for aquarium pumps
- Suitable for circulation and flow pumps
- Dual connector strip (supplied)
- Connection for two (or more) pumps
- Load per socket max. 100 W
- Two different programs:
  a) alternating flow this means the pumps are switched on and off alternately or
  b) synchronous flow – meaning both pumps are switched on and off simultaneously.
- Individually adjustable time intervals from 1 to 60 minutes
- Program runs permanently - for an unlimited period of time
- Break button for feeding (food button)
- Suitable for fresh and marine water
- Highest safety and reliability - 3 years warranty

EHEIM waterrefill

waterrefill

The intelligent automatic refill, that remembers all details. For fresh water and marine water tanks. Especially important during holidays.

With the automatic refill EHEIM waterrefill you can keep your aquarium water always on a healthy level. For certain.

- Automatic refilling of evaporated water.
- Perfect during holidays.
- The sensor with LED display is permanently measuring the water level.
- Fastening of the sensor easily accessible outside of the glass pane of the aquarium – or in case of a marine water tank alternatively at the filter tank in the cabinet (sump).
- Works with most common glass thicknesses 4 - 10 mm.
- Intelligent controller with LED display regulates the refilling. It memorizes the filling quantity and the filling times and this way adapts the water quantity to the tank size and the changes (e.g. seasonal).
- Safety: In case of significant irregularities the refilling process will be stopped and this prevents an overflowing.
- Energy saving low voltage pump (12 V), maintenance-free when operating with ultrapure water (osmosis water).
- Refilling tube and drainage elbow can be securely and easily attached to the aquarium using the holder (holder and clamp included)

8 Watt | 350 l/h | marine freshwater | 3 year guarantee EHEIM

EHEIM MADE IN GERMANY

Skimmer

EHEIM protein skimmer. Effective solution for clean marine water.

The skimmer is the main filter for marine aquariums. It creates air bubbles to which protein molecules adhere through static charging. Organic waste substances - such as uric acid, peptides and protein compounds (i.e. proteins) - are removed from the water before they decompose in the aquarium and lead to water pollution.

How does a skimmer work? The aquarium water is sucked in and swirled with air. A dirt foam (flotate) is formed, which collects in a foam pot. This pot can then simply be removed and emptied. The clean water flows back into the aquarium.

Due to the skimmer removing important substances from the water (e.g. amino acids), the performance should be adapted to the aquarium volume and not oversized.

The two smaller EHEIM skimmers (skimmarine 100 (air driven) and skimmarine 300) are „interior skimmers“ and are simply attached to the aquarium with a magnetic holder. The larger skimmer (skimmarine 600) is an „external skimmer „ and is installed in the filter sump.

EHEIM skimmarine 100 / Nano skimmer

- For small marine water aquariums up to approximately 100 litres
- Small and compact design
- Simple installation
- Can be removed for cleaning
- Silent due to the lime wood diffuser
- Does not disturb the natural plankton in the aquarium

EHEIM skimmarine 300
Motorised mini skimmer for marine aquariums up to 300 litres

- Easily installed using the magnetic holder
- Completely detachable for cleaning
- Silent
- Highly efficient skimmer pump with a needle wheel impeller
- Air intake: Self-priming (Dispersant principle)
- Adjustable air intake
- Low energy consumption
- High skim rate
- Ozone-resistant
- Compact design

Art.No. 3701010
Page 132

Effective solution for clean marine water.

<600 l <158 US gal | marine | 3 year guarantee EHEIM

The EHEIM skimmarine 600 - a high-performance skimmer combined with innovative technology and optimum skimming regulation.

The EHEIM skimmarine 600 is ideal for larger marine water aquariums. It works according to the countercurrent principle and is therefore very efficient. The special needle wheel pump produces an extremely fine-bubble/ air-water mixture. The formation of foam or flotate is correspondingly high and the ceramic axle ensures particularly smooth running and a very long service life.

For optimum skimming, you can adjust and control the air intake, the water level in the reaction chamber and the positioning in the filter sump.

- For marine aquariums up to approx. 600 l
- Skimmer pump with highly efficient needle wheel technology and ceramic axle
- Independent air intake (dispergator principle)
- Quiet operation due to adjustable water outlet
- Flexible silencer

Technical data **skimmarine**

Technical data	skimmarine 600
Aquarium size up to	600
Pump output l/h	480-1900
Air intake l/h	300-540

- Effective 3-way control for optimal skimming:
  1. adjustable air intake at silencer
  2. adjustable water level in the reaction chamber
  3. adjustable positioning (height) in the filter sump
- Small footprint due to internal skimmer pump
- Easy to disassemble for cleaning

Heating & cooling

Very accurate, very convenient handling and with a guarantee for highest quality and safety.

As you know, fish from tropical and subtropical waters require a constant water temperature. Before the engineer Eugen Jäger invented the aquarium adjustable heater some decades ago, there wasn't any really satisfactory solution for controlling the water temperature suitably for specific species. People resorted to complicated and sometimes odd methods. Some put the aquarium in the sun or next to a radiator or an oven.

The obvious ideas are often the best. This also applies to the aquarium heating element. It is simply hung in the water and heats it up. The principle is the same as it was decades ago. But in the meantime the EHEIM controller heater has become an ultra-modern thermal device. The temperature can be set precisely and is measured even more precisely and kept more constant by the electronics. The coating made of special laboratory glass increases the heating surface, serves as a heat shield and ensures even heat emission.

High outdoor temperatures often cause the aquarium water to overheat in summer. This is extremely harmful to fish and all other living creatures. For example if the temperature is too high, corals die in the marine aquarium, and in freshwater aquariums, oxygen deficiency and algae proliferation occur quickly. EHEIM climacontrol+ is the optimal climate control devicefor aquariums. It has low energy consumption and works with environmentally friendly coolant.

EHEIM MADE IN GERMANY

EHEIM thermocontrol e

thermocontrol e

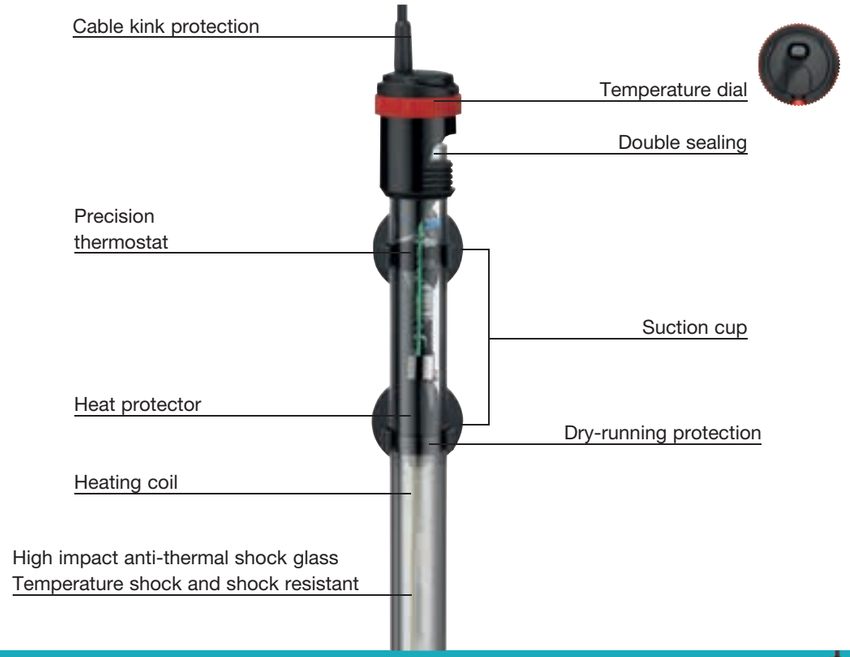

With electronics for a comfortable climate.

With the EHEIM thermocontrol-e heating element your fish get the right temperature even more precisely - in every aquarium.

The obvious ideas are often the best. This also applies to the aquarium heating element. It is simply hung in the water and heats it up. The principle is the same as it was decades ago. But in the meantime the EHEIM controller heater has become an ultra-modern thermal device. The temperature can be set precisely and is measured even more precisely and kept more constant by the electronics. The coating made of special laboratory glass increases the heating surface, serves as a heat shield and ensures even heat emission. And whether you want to heat a 20 or 1200 litres aquarium – you can choose from 10 sizes.

- Precise temperature adjustment from 20 to 32 °C
- No readjustment necessary
- Control accuracy ± 0.5 °C
- The heat is kept constant
- Control lamp indicates the heating function (red: heating up; green: temperature reached)
- Fully submersible (waterproof)

thermocontrol+e

Smart controlled heating.

EHEIM thermocontrol+e – the electronic aquarium heater with integrated WLAN function and digital control via smartphone, tablet or PC/Mac.

EHEIM thermocontrol+e is our first adjustable heater with digital control via WLAN. You can set the precise temperature from 18 to 32 °C via smartphone, tablet or PC/Mac. The selected temperature is accurately measured electronically and kept constant. However, if the temperature deviates by ± 2 °C, you will be notified immediately by e-mail. Automatic synchronisation with filter activity or lighting is also possible, this means you can wirelessly connect to the EHEIM professionel 5e Filter or to the LEDcontrol+e.

The construction of the thermocontrol+e conforms to that of our proven thermocontrol heaters. The combination of the special laboratory glass cover, the flawless finish, the high quality materials and the absolute reliability, provides the ultimate heater. The heaters have a 3-year guarantee and there are 4 sizes to choose from – whether you want to heat a 200 or 1000 litre aquarium.

- Electronic aquarium heater with integrated WLAN function and digital control via smartphone, tablet or PC/Mac.
- Precise temperature setting from 18 to 32 °C
- Control accuracy ± 0,5 °C
- Indicator lights show heating function and operating status
- Notification to stored e-mail address as soon as the temperature deviates by ± 2 °C
- Connection with other devices from the EHEIM.digital WiFi family possible (e.g. lighting control LEDcontrol+e or professionel 5e filter)
- Synchronisation: temperature water flow adjustment or for lowering the set temperature at night, etc.
- If necessary, adjustment with external thermometer (expert mode)
- Waterproof (IPX8) - for optimum wifi signal reception, immerse the heater in water up to the mark
- Dry-run protection (Thermo Safety Control)
- Convenient cable length of approx. 170 cm
- Double suction holder included
- 4 sizes for aquariums from 200 up to 1000 litres
- Suitable for both fresh and marine water
- Highest safety and reliability with a 3 year guarantee.

Adjustment and control
The EHEIM thermocontrol+e aquarium heater is the advanced development of the thermocontrol e heater. In opposite to the predecessor, it is not set manually, but programmed and monitored wirelessly via WLAN and by smartphone, tablet or PC/Mac.

Synchronisation with other devices
A special highlight is that the thermocontrol+e can be synchronised with other devices from the EHEIM Digital family such as the EHEIM professionel 5e filter or the lighting control LEDcontrol+e. You can therefore specify that the set temperature rises or falls when, for example, the filter flow (in bio mode) increases or decreases or the LED lighting is switched off or on.

Example: The filter flow is increased at night and the lighting is switched off. The set temperature is automatically adjusted accordingly: 25 °C during the day; 23 °C at night. (Please note: water is not cooled down – the heater has no integrated cooling).

WLAN-connection
The thermocontrol+e is waterproof and fully submersible. For an optimal WLAN connection, however, the heater may only be immersed up to the "water level" mark.

For the security of your device, every EHEIM thermocontrol+e is encrypted ex works (password can be adjusted). After setting the desired temperature, the wifi network can be switched off.

EHEIM climacontrol+ – is the intelligent climate control device for ma-rine and freshwater aquariums. Environmentally friendly and energy-saving, with the temperature electronically controlled via smartphone, tablet, or PC/Mac.

You can use EHEIM climacontrol+ to cool down the water temperature on hot days or warm it up on cold days, just as your aquarium inhabitants need it.

EHEIM climacontrol+ is our new electronically controlled Climate control de-vice. You simply set the ideal water temperature wirelessly - via smart-phone, tablet, or PC/Mac. If the water is too warm, the unit automati-cally cools down, and if it gets too cold it warms up. The unit monitors and controls everything.

Also, it gives you advanced warning of any problems, such as if the requi-red temperature is exceeded or undershot by 2 °C for more than 5 minu-tes, you receive a warning e-mail.

High outdoor temperatures often cause the aquarium water to overheat in summer. This is extremely harmful to fish and all other living creatures. For example if the temperature is too high, corals die in the marine aqua-rium, and in freshwater aquariums, oxygen deficiency and algae prolifera-tion oc-cur quickly.

EHEIM climacontrol+ is the optimal climate control devicefor aquariums. It has low energy consumption and works with environmentally friendly cool-ant.

There are three climate control devices available: S, M and L - for aquari-ums up to 500, 1000 and 2000 litres and come with a 3-year warranty.

Features of the EHEIM climacontrol+

- Electronically controlled continuous flow climate control devicewith Wi-Fi functionality
- Temperature setting and control over WiFi via smartphone, tablet, or PC/Mac
- Cooling and heating mode
- Constant regulation of water temperature
- Temperature control of water in freshwater and marine aquariums
- Precise temperature detection from 5 °C up to 35 °C
- Switches on automatically above or below a set target temperature
- Warning e-mail if temperature exceeds or falls below 2 °C for more than 5 minutes
- Constantly displays the current water temperature when in operation
- Use in the ambient temperature range from 10 °C to 38 °C
- Very energy-efficient and environmentally friendly climate control de-vicewith ozone-friendly refrigerant (R290)
- To be operated exclusively with clean (filtered) water; i.e. for marine aquariums via separate pump with water from the filter tank or for fresh-water aquariums position behind the external filter (alternatively via sep-arate pump with pre-filter directly from the aquarium)
- There are three climate control devices: S, M and L - for aquariums up to 500, 1000 and 2000 litres
- Made of High quality parts and materials, and comes with 3 years war-ranty

Important for marine water aquariums: Optimum temperature for corals between 24 and 26 °C; above 29.5 °C they die.

Important for fresh water aquariums: The temperature should always be below 30 °C. Above this temperature there is a risk of oxygen deficien-cy, inhibited plant growth, algae prolifer-ation.

CO_2

EHEIM CO_2 fertiliser systems. Healthy plant growth. Simple and reliable.

Aquarium water usually contains too little carbon dioxide (CO_2). In addition to light, nitrogen, phosphate, trace elements etc., CO_2 is the most important nutrient for plants in an aquarium and, when dosed correctly, CO_2 can regulate the pH value.

The stronger and healthier the plants are, the more oxygen they produce (which the fish need to breathe) and the less chance algae has to grow.

With three complete sets, EHEIM offers the ideal CO_2 fertiliser system for aquariums. The “complete set” includes all of the essential equipment and important accessories needed for immediate start up.

CO_2

EHEIM CO2SET with bottle

EHEIM CO2 sets offer a simple and reliable way to supply the correct amount of CO2 into your aquarium for healthy plant growth.

EHEIM CO2 sets are supplied complete and include the CO2 bottle,pressure reducer, diffuser, long term water test and water test strips.

The magnetic valve is not included in all sets and could be purchased separately. This will allow the CO2 to be switched off overnight, saving up to 50% carbon dioxide.

EHEIM CO2-fertiliser unit (incl. bottle)

CO2SET 200 incl. bottle	Art. No. 6063200
EAN 4011708006856	PK 1

CO2 fertiliser system – a complete set for aquariums up to 200 litres.

- CO2 disposable bottle (500 g) with integrated stand
- Precision pressure reducer for disposable systems with precision dosing valve
- Hose connection – rotates 360°
- CO2 special safety hose, pressure resistant, 3m, ø 4/6 mm
- CO2 safety diffuser up to 400 l including bubble counter and non-return valve for effective CO2 dosing.
- CO2 long-term test and indicator liquid for constant direct monitoring of the CO2 content in the aquarium
- 5 x water test strips for analysis of the initial water values
- Safe and tool free installation
- Optional accessory (not included): CO2 magnetic valve (night shut-off)

CO2SET 400 incl. bottle	Art. No. 6063400
EAN 4011708006863	PK 1

CO2 fertiliser system – a complete set for aquariums up to 400 litres.

- CO2 reusable bottle (500 g) with bottle holder
- CO2 precision pressure reducer with manometers for reusable systems and a precision dosing valvel
- Hose connection – rotates 360°
- CO2 special safety hose, pressure resistant, 3m, ø 4/6 mm
- CO2 safety diffuser up to 400 l including bubble counter and non-return valve for effective CO2 dosing.
- CO2 long-term test and indicator liquid for constant direct monitoring of the CO2 content in the aquarium
- 5 x water test strips for analysis of the initial water values
- Bottle with standardised connection for refilling (at the specialist dealer or at an appropriate CO2 refilling station)
- Safe and tool free installation
- Optional accessory (not included): CO2 magnetic valve (night shut-off)

Not EHEIM CO2SET200

EHEIM CO2 – set with magnetic valve for night shut-off included

CO2SET 600 incl. bottle	Art. No. 6063600
EAN 4011708006870	PK 1

CO2 fertiliser system – a complete set for aquariums up to 600 litres.

- CO2 reusable bottle (2000 g)
- CO2 Precision pressure reducer with manometers for reusable systems and a precision dosing valve
- CO2 special safety hose, pressure resistant, 3m, ø 4/6 mm
- CO2 safety diffuser up to 600 litres including bubble counter and non-return valve for effective CO2 dosing
- CO2 long-term test and indicator liquid for constant monitoring of the CO2 content in the aquarium
- 5 x water test strips for analysis of the initial water values
- Bottle with standardised connection for refilling (at the specialist dealer or at an appropriate CO2 refilling station
- Safe and tool free installation
- Optional accessory (not included): CO2 magnetic valve (night shut-off)

CO2SET 400 incl. bottle, with night shut-off	Art. No. 6064214
EAN 4011708008225	PK 1

CO_2 control

Monitoring and readjusting the pH value in your aquarium.

EHEIM
pHcontrol+e
Page 164

NEW EHEIM

Digital Family product

pHcontrol+e

The smart controller for monitoring and readjusting the pH value in your aquarium.

With the EHEIM pHcontrol+e you can easily monitor and optimize the pH in your aquarium via a smartphone, tablet, or PC/Mac simply via a WiFi connection and your web browser. A pH sensor measures the current pH value of the water, and the pHcontrol+e automatically provides the necessary CO_2 supply. By controlling the magnetic valve connected in series to the CO_2 system it adds as much CO_2 as required until the desired pH value is reached.

To achieve this you must connect your CO_2 system, i.e., a CO_2 bottle via pressure reducer as well as magnetic valve (see the EHEIM CO_2 sets) and a CO_2 diffuser. The pHcontrol+e has a day/night control and can be linked to the lighting control EHEIM LEDcontrol+e (see the EHEIM Digital family).

In addition to light, nitrogen, phosphate, trace elements, etc., the plants in your aquarium need CO_2 above all as an important nutrient. The better they thrive, the more oxygen they release, which the fish need to breathe. Thus, the EHEIM pHcontrol+e indirectly provides oxygen and the optimal pH value for your fish by adding CO_2. This is usually between pH 6 and pH 8; pH 7 is considered a neutral value for reference.

Note:

The basis for measuring and stabilising the pH value is the carbonate hardness („KH“) of the water. Therefore, the EHEIM pHcontrol+e (in Smart mode) initially queries the KH value. Because KH, CO_2 and pH value influence each other.

Features of the EHEIM pHcontrol+e

- A smart controller for monitoring and controlling the pH value in the aquarium by regulating the addition of CO_2
- Includes Wireless WiFi connection with a WLAN-enabled end device (smartphone, tablet, PC/Mac)
- Has connection and compatibility with devices of the EHEIM Digital family
- Measures the pH value through the pHsensor (measuring range: pH 0 to pH 14)
- Control range of the controller pH 6 to pH 9.
- Needs to be coupled via pressure reducer with CO_2 bottle (EHEIM CO_2SET)
- Electronically controls addition of CO_2 through interposed magnetic valve
- Adjusts CO_2 addition by linking with LEDcontrol+e (day/night control) in smart mode or simple and extended bio mode with own day/night control
- Queries the KH value (carbonate hardness) in advance
- Sets water test and calibration reminders
- Guided calibrations of the pH sensor
- Sends warning for deviation of pH value (up/down)
- Notes if EHEIM pH sensor needs to be replaced
- Provides best performance, high power, stable connection, and large memory capacity through new improved chip generation
- Highest safety and reliability - 3 years warranty

EHEIM CO2 accessories

CO2 bottle

It is advisable to always have a spare CO2 bottle in reserve so that you can simply exchange the empty bottle for a full one. This is a simple procedure with no tools required.

CO2 pressure reducer

The pressure reducer reduces the cylinder pressure from 64 bar to an operating pressure of 1.5 to 2 bar, depending on the room temperature.

The quality of the pressure reducer determines the precision and reliability of the CO2 fertilisation. The required amount of CO2 (number of bubbles) is set using the bubble counter.

EHEIM CO2 bottle

CO2 disposable bottle 500g	Art. No. 6063000
EAN 4011708006887	PK 1

CO2 disposable bottle 500g

Recyclable, disposable bottle for the complete EHEIM CO2SET200 fertiliser system – suitable for aquariums up to 200 ltrs. TÜV-tested. The empty disposable bottle is recyclable and can be disposed of in a recyclable waste container or bin or at a household rubbish tip. Your aquatic retailer may also take the empty bottles back for recycling.

CO2 reusable bottle 500g, with bottle holder	Art. No. 6063010
EAN 4011708006894	PK 1

CO2 reusable bottle 500g, with bottle holder

Refillable bottle for the complete EHEIM CO2SET400 fertiliser system – suitable for aquariums up to 400 ltrs. CO_2 bottle with safety guard (pressure and valve protection) and handle. 250 bar TÜV-tested.

Height: 440 mm (with safety guard), diameter: 61 mm.

CO2 reusable bottle 2000g	Art. No. 6063020
EAN 4011708006900	PK 1

CO2 reusable bottle 2000g

Refillable bottle for the complete EHEIM CO2SET600 fertiliser system – suitable for aquariums up to 600 ltrs. CO2 bottle with safety guard (pressure and valve protection) and handle. 250 bar TÜV-tested.

Height: 455 mm (with safety guard), diameter: 120 mm

The CO2 reusable bottle is made of high-quality steel and complies with all German and European safety regulations.The empty CO2 bottle can be refilled by your (approved) specialist dealer or an appropriate CO2 refilling station.

EHEIM CO2 pressure reducer

CO2 pressure reducer – Disposable system	Art. No. 6063040
EAN 4011708006801	PK 1

CO2 pressure reducer – Disposable system

- Precision pressure reducer for disposable bottles
- Suitable for the complete EHEIM CO2SET200 fertiliser system
- EHEIM fine dosing valve for precise and continous CO2 dosing
- 360° rotating hose connection
- Tool free assembly

CO2 pressure reducer with manometer – Reusable system	Art. No. 6063050
EAN 4011708006825	PK 1

CO2 pressure reducer with manometer – Reusable system

- Precision pressure reducer for reusable systems
- Suitable for complete EHEIM CO2SET400 and EHEIM CO2SET600 fertilizer systems
- 2x manometers for working (system) pressure and for cylinder pressure
- EHEIM fine dosing valve for precise and continous CO2 dosing
- 360° rotating hose connection
- Tool free assembly
- Replacement seal included

MADE IN GERMANY — Not CO2 disposable bottle 500g

EHEIM

Zubehör Accessories ORIGINAL EHEIM Accessoires

EHEIM CO_2 magnetic valves (night shut-off)

The magnetic valve enables you to switch off the CO_2 supply in the aquarium if necessary – e.g. to regulate the pH or overnight. Up to 50% of CO_2 can be saved by switching of the supply at night as photosynthesis only takes place in daylight where plants absorb carbon dioxide and release oxygen. At night or without light, the plants consume oxygen, therefore CO_2 fertilisation would not be beneficial.

EHEIM CO_2 diffuser

The CO_2 gas is atomized into many bubbles by the diffuser. The bubbles create a larger contact surface enabling the CO_2 to dissolve quickly in the aquarium water.

The bubble counter visually controls the dosing of the CO_2. As a rough rule of thumb: approx. 20 mg CO_2 per litre. This corresponds to about 10 bubbles per minute per 100 litres of water.

EHEIM CO_2 night shut-off

CO_2 night shut-off 230V	Art. No. 6064210
EAN 4011708006917	PK 1

The magnetic valve operates with a 230V alternating current and works best when connected to the aquarium light timer. This allows the magnetic valve to be switched off at the same time as the lights.

- Maintenance free
- Silent operation
- Includes non-return valve
- Includes 1.5m cable

CO_2 night shut-off 24V with connection to LEDcontrol+e & pHcontrol+e	Art. No. 6064380
EAN 4011708006924	PK 1

This solenoid valve is specially developed for the EHEIM LEDcontrol+e lighting control as well as the EHEIM pHcontrol+e. If it is connected to the EHEIM powerLED+ lighting and LEDcontrol+e, the supply of CO2 switches off overnight and is only reactivated during the day. If, on the other hand, the solenoid valve is connected to the pHcontrol+e, the latter regulates the addition of CO2 independently based on the desired pH value. The solenoid valve can also be operated with a separate power supply unit (EHEIM powersupply) via a timer (sold separately).

- Can be coupled with EHEIM LEDcontrol+e and pHcontrol+e
- Maintenance free
- Silent operation
- Includes non-return valve
- Includes 1.5m cable
- Made in Germany
- 3 year guarantee

CO_2 diffuser 400l	Art. No. 6063060
EAN 4011708011072	PK 1

For small and medium aquariums up to 400 l.

- Small, space-saving device
- Highly efficient diffuser
- Bubble counter for visual control of CO_2 dosing
- Non-return valve prevents water returning to the CO_2 system
- Powerful suction holder

CO_2 Set long-term test with indicator liquid and 3 test stripes	Art. No. 6063090	EAN 4011708006832	PK 1
CO_2 test indicator liquid (30ml)	Art. No. 6063105	EAN 4011708015971	PK1

EHEIM CO_2 diffuser 600l + bubble counter

CO_2 diffuser 600l + bubble counter with non-return valve	Art. No. 6063080
EAN 4011708006955	PK 1

For larger aquariums up to 600 l.

- User-friendly device with large diffuser area
- Optimum distribution of CO_2 bubbles in large aquariums
- Separate bubble counter for visual control of CO_2 dosing
- Integrated non-return valve prevents water returning to the CO_2 system
- Safe hose connection
- Space-saving corner mounting with two powerful suction holders

EHEIM MADE IN GERMANY

Cleaning & Maintenance

You can completely rely on original EHEIM accessories – in every respect.

EHEIM accessories – a well-balanced range of useful and functional products. They all meet the highest standard of quality, reliability and functionality.

Whether you need a useful and perfectly functional helper for maintaining your aquarium or whether you are just looking for the right maintenance spray for care of your com-ponents like shut-off taps…

You can be sure of one thing: with original EHEIM accessories, we offer you well thought out, cleverly constructed, extensively tested and guaranteed high quality products. Made by EHEIM.

skim350

The micro surface skimmer for smaller aquariums up to 350 l.

Simple, quick and easy to set up. For alternate use in different aquariums. Ready for immediate use.

- Small surface skimmer for aquariums up to 350 l
- Removes dirt residue and microorganisms from the water surface (surface scum)
- This promotes natural gas exchange
- Practical for constant or intermittent use
- Quick set-up – easy to attach to the tank glass with suction cups
- For use when necessary – also adaptable to a range of different aquariums (be careful that no algae spores etc. are transferred)
- Connector for outlet hose
- Only 5 W energy consumption

Quick Vac pro

The battery operated gravel cleaner is used to clean the gravel substrate and can also be used between water changes. The power of the cleaner is designed to remove dirt without disturbing the gravel and the purifying bacteria. The mesh filter compartment retains the dirt while letting the filtered water straight back into the aquarium. The filter compartment is simple to remove and easy to clean. Not suitable for sand.

- Batteries included

EHEIM MultiBox

MultiBox

The EHEIM MultiBox is a multi-purpose container designed to hook on to the aquarium for hands free maintenance.

The simplest ideas are often the best. Where would you normally put your tools such as scissors, tweezers, glass scraper, plant tongs, etc., whilst doing maintenance work on your aquarium? Where do you put your plants and utensils for aquascaping? What do you do with dripping internal filters, plant residue and waste? Where do your new aquarium inhabitants get used to their new environment? Where is your quarantine or treatment area? The EHEIM MultiBox is the perfect solution for organising your work area – simply hang it on the aquarium glass or cabinet door. The hanging bracket, tool holder, lid and overall dimensions have all been skilfully designed for convenience and practicality.

marine freshwater

EHEIM MultiBox	Art. No. 4001010	EAN 4011708 402009	PK 1

Dimensions (WxHxD): 310x101x187 mm.,
the box can be filled with up to 2.5 l of water.

- Practical, hook-on container for maintenance work and aquascaping
- Compartment for plant remains, algae and other waste
- Can be used to transport wet items (internal filters) to the sink or waste to the bin
- Compartment for acclimatising new inhabitants to a different or new environment
- Can be used for quarantine and/or treatment
- Two-part lid prevents fish from jumping out
- Easy to hang over the aquarium glass or (if the aquarium cover does not permit it) on the cabinet door
- Hanger adjustable from 4 mm (aquarium glass) to 20 mm (cabinet door)
- Spacers for vertical adjustment
- 6 eyelets for hanging tools (tweezers, scissors, fish net, etc.)

Gravel cleaner set

Gravel cleaner set	Art. No. 4002510
EAN 4011708 401651	PK 3

The perfect tool for the convenient and safe cleaning of the aquarium substrate while doing a partial water change. A number of new functions and fittings have improved use, safety and convenience.

- Integrated priming support for a convenient and hygienic start to the process
- Quick stop button, stalls the water flow immediately
- The hose clip ❶ (also available separately, Art. no. 4002520) safely attaches the hose to the bucket
- Supplied complete with EHEIM quality hose and hose clip. Length 492 mm, can be extended with installation SET accessories
- Rounded triangular shape enables optimum cleaning in all areas of the tank base and guarantees easy access to corners

Plant tongs

Plant tongs 40 cm	Art. No. 3590050	EAN 4011708 350096
Plant tongs 60 cm	Art. No. 3590000	EAN 4011708 350089

EHEIM Plant tongs

Our plant tongs enable you to work in your aquarium without having to roll up your sleeves. You can place, move or remove plants and other items in the bottom of the tank and even difficult to reach become accessible. Dead leaves or plant stems can be cut off in exactly the right place and removed from the water.

Aquarium maintenance spray	Art. No. 4001000	EAN 4011708 723920

EHEIM Water-neutral aquarium maintenance spray

CFC-free, does not contain solvents or oils, free from environmentally toxic substances and harmless to fish. Moving filter parts which are subjected to aquarium water regularly tend to get tight or seize up entirely after some time. Just apply the spray to the part concerned and it soon becomes loose again. Supplied with spray tube for inaccessible areas. Particularly recommended for ball valves, taps, hose adapter, sealing rings and much more.

EHEIM automatic fish feeders. The best care for your fish.

In nature, fish spend almost all day looking for food and are constantly consuming it in small quantities and, depending on the available food, they can adapt themselves to the conditions better than mammals. If there is not much food about, their metabolisms will slow down, making the fish less hungry.

Feed 2 or 3 times a day but only with as much food as will be consumed in two minutes (you could use the EHEIM automatic feeder + the EHEIM feeding station). Never make all the food available at once! Provide a bit of variety and occasionally (once a week) feed live or natural food (ideally frozen animal, vegetable or mixed food obtained from a specialist aquarium dealer).

Digital Family product

EHEIM autofeeder

autofeeder

The best care for your fish.

If you don’t always have time an automatic fish feeder is ideal. Also when on holiday. You can easily programme the feeding times as well as the amount of food and the fish feeder ventilates the food at precisely the correct time into the water. With a simple press of a button “snacks” are also possible at any time.

~100 ml capacity | marine freshwater | 2 year guarantee EHEIM

autofeeder

EHEIM autofeeder	Art. No. 3581000	EAN 4011708 350102	PK 5

Compact autofeeder with a rotating feeding chamber – mainly for flake food.

- Easy to understand programming, includes batteries
- An additional programme for double feeding
- Actively aerated food chamber
- Capacity approx. 100 ml
- Additional “snacks“ possible at the touch of a button
- Function keys are splash resistant
- Warning system quickly indicates low battery level
- Including bracket for mounting on an open-top aquarium or terrarium

EHEIM TWINfeeder

TWINfeeder

2x80 ml capacity | multi food | marine freshwater | 3 year guarantee EHEIM

TWINfeeder

EHEIM TWINfeeder	Art. No. 3582000	EAN 4011708 350171	PK 1

Automatic feeder with 2 separate chambers for different types of food.

- For granules, sticks, pellets, flakes
- Drums can be programmed individually
- Random dosing for natural feeding
- Both drums are aerated
- 2 types of food can be fed in parallel; the advantage of this is a food supply for all livestock in the swimming zones
- Large display
- Warning system quickly indicates low battery level
- Includes batteries
- Made in Germany

EHEIM MADE IN GERMANY

autofeeder+

Smart controlled feed supply.

With the EHEIM autofeeder+ we offer you the smart version of our (basic version) autofeeder with additional functions and advantages.

The EHEIM autofeeder+ is our intelligent automatic feeder with digital control via WLAN. All functions can be programmed and monitored via smartphone, tablet or PC/Mac. You can set both feeding times and quantities individually and generate a fasting day. There is protection against overfeeding and you will also receive an email message when the food in the drum is running low. In addition, synchronisation with other devices from our EHEIM.digital WiFi family is also possible. For example, when linked to the EHEIM thermocontrol+e aquarium heater, you will be warned by email before feeding if the water temperature is too high and, when linked to the EHEIM professionel 5e external filter, the flow rate can be automatically reduced or increased for 10 minutes during feeding.

EHEIM autofeeder+ has a power supply unit so it is not battery operated like the standard autofeeder. Maximum safety and reliability are a matter of course and the feeder comes with a 3-year guarantee.

- Electronic feeder with integrated WLAN function; programming and control via smartphone, tablet or PC/Mac
- No need to install an app
- Integration with a home WLAN network is possible
- Programming of different feeding times and feed quantities
- Optional; one randomly generated fasting day per week
- Overfeeding protection can be switched on to prevent accidental overdosing
- A new type of slider on the feed drum makes it possible, for example, to supply even fish fry with very small amounts of feed.
- Query of the current feed level
- Predicting the range of the residual feed
- Notifications by e-mail as soon as the fill level falls below 30 % – also as soon as the feed drum is empty
- Smart linking with other electronically controlled devices: When feeding, for example, the flow rate of a linked EHEIM professionel 5e external filter can be reduced or increased for 10 minutes.

~125 ml capacity | 3 Watt max. | marine freshwater | multiscreen | Digital Family product | 3 year guarantee EHEIM

EHEIM autofeeder+	Art. No (Europe) 3583220 Art. No (UK) 3583340
	PK 1

MADE IN ITALY

- Various devices from our EHEIM.digital WiFi family can be grouped together, either by aquarium, room, family member or similar.
- Protection against oxygen deficiency and tipping of the water quality: If the water temperature exceeds 30 °C, a warning is sent by e-mail providing the EHEIM thermocontrol+e aquarium heater is linked.
- Feeding stops during water changes or maintenance: If the linked filter is not running, no feeding takes place.
- Actively vented feed chamber
- Capacity approx. 125 ml
- All functions and the WLAN network can be switched on and off at any time
- Manual feed programming is also possible at any time
- Operated with a safety power supply unit with protective extra-low volt-age (not battery operated)
- Convenient cable length approx. 200 cm
- Incl. bracket for mounting on open aquariums or terrariums
- High safety and reliability plus a 3-year warranty

WiFi 2.4GHz – IEEE802.11 b/g/n

feedingSTATION

EHEIM feedingSTATION	Art. No. 4001020
EAN 4011708 402030	PK 1

Platform for EHEIM autofeeders

Universal clamp for attachment to frames, glass brace bars and centre support bars, **Feeding cylinder** (without platform) also suitable for the feeder opening in EHEIM Varilux aquarium covers. Can also be used without the autofeeder (for manual feeding). Feeding cylinder can also be used to thaw out diced frozen food.

- Less food loss as food doesn't disperse
- Less water pollution (nitrates and phosphates)
- No oxygen depletion from bacterial decomposition
- Less expense due to less wastage
- All fish gather in one place so ideal for visual inspection of livestock

InstallationsSET

The EHEIM InstallationsSETs allows you to decide about the water flow in your aquarium.

Where should the inlet for the water be situated? How should the outlet work? What kind of tubes, hoses, nozzles etc. should be used? Our InstallationsSETs are a modular range of accessories. They consist of a wide range of matching components, with which you can configure and extend your water flow connectors to suit your own personal requirements. The sets can be attached to all EHEIM external filters. InstallationsSET 1 is designed for the inlet side and InstallationsSET 2 for the outlet side.

InstallationsSET 1 (suction/inlet side)

Hose diameter 12/16 mm	Art. No. 4004300	EAN 4011708 401378	PK 1
Hose diameter 16/22 mm	Art. No. 4005300	EAN 4011708 401361	PK 1

Modular installation set for easy connection to all external filters. Safe and water tight connection to hose. (The hose can be easily cleaned without removing the connection hose.) The inlet pipe can be lengthened or shortened as required. Safe and permanent fixing in the tank with EHEIM quality suction cups.

InstallationsSET 2 (pressure/outlet side)

Hose diameter 12/16 mm	Art. No. 4004310	EAN 4011708 401392	PK 1
Hose diameter 16/22 mm	Art. No. 4005310	EAN 4011708 401385	PK 1

Ideal for the customised design of the outlet. Safe and water tight connection from the hose to InstallationSET 2. The hose can be easily cleaned without disconnecting the kit.

EHEIM MADE IN GERMANY

Accessories for InstallationsSET

There is a wide range of clever accessories for the installationsSETs 1 + 2. They can be used to create different water movements and flow possibilities in the aquarium.

Diffusor

Works with a filter to give a measured supply of oxygen into the aquarium (recommended only for aquariums with little plant growth or high fish stocking levels).

Undergravel filter

Reverse flow principle ①	Art. No. 3540000	EAN 4011708 350034
Suction principle ②	Art. No. 3541000	EAN 4011708 350041

Accessories

Extension set for undergravel filter (6 plates)	Art. No. 3545000	EAN 4011708 350065

Undergravel filter

Reverse flow principle
The purified water is taken up through the gravel floor and the floating particles of dirt are then taken to the priming area of the filter.

Suction principle
It works the opposite way round, operating as an additional biological filter. It is particularly suitable for marine water aquariums and tanks without plants.

EHEIM flowpipe

EHEIM flowpipe	Art. No. 4005730	EAN 4011708 402061

EHEIM flowpipe

Natural flow pipe
- Gentle water flow
- Appropriate for fish preferring calmer water with plant growth
- Variable outlet direction

Double tap - quick release

With a flick of the wrist, you can disconnect and connect the hose safely, cleanly and without water backflow. With EHEIM quality hoses, they make safe and functional hose connections. Available in different sizes and types.

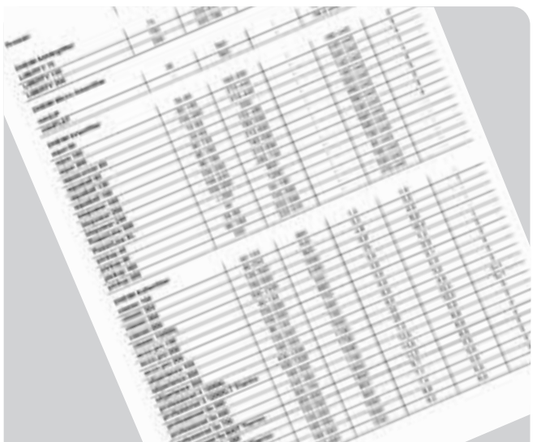

Wide-jet pipe and outlet pipe

The wide-jet nozzle with its flat outlet ensures high surface movement. There is less movement with the outlet pipe but the direction of flow can be adjusted as required.

EHEIM Shop Design – Modular solutions for pet shops

Animals and pets in general generate emotions in all of us. Emotions will generate sales. EHEIM shopDesign provides you with the right displays and where necessary can help create a real world of senses.

EHEIM shopDesign is your one stop partner. Get everything from a single source. Technology is manufactured by EHEIM in Germany and the units are individually planned by our CAD designers. If need be an interior designer can suggest a theme which meets desires and budgets. The close cooperation with BNA the federation for nature and protection of species guarantees that EHEIM shopDesign is always up-to-date in animal welfare. Our own installation engineers ensure a clean, fast and precise installation on site.

EHEIM shopDesign

Sales-effective shop fittings in experience-led design.

Experience-oriented worlds

From dream to reality

No matter what you are looking for whether it be a Maya temple, a jungle book inspired theme, a Roman building or a Mediterranean feeling, we can do it for you. Just provide us with a key word – and we get started. **EHEIM shopDesign** is the ideal partner at your side from the first sketches to the finished installation in your pet shop.

Sales psychology included.

Fittings

The equipment of your salesrooms gives an overall impression of your pet shop and therefore weighs significantly on the success of your pet shop area. Do you want to emphasize your professional competence? Do you need a counter where you can give your customers professional advice? Or are you looking for a practical packing table, lighting, shelving systems and a promotional presentation system? EHEIM shopDesign always has the right solutions ready.

Please contact us at:
phone +49 6361 - 9216 - 0
More information: www.eheim-shopdesign.de

Animal Sales Displays

Irrespective of the model you choose, being professional or basic, the fish racks from **EHEIM shopDesign** are all based on modular systems. Detailed advice and concrete proposals for the installation are all part of the service.

You select the size and the equipment as well as the desired trusted EHEIM mechanical and biological filtration technology ... and we do the rest.

You will find detailed information in the shopDesign catalogue
Art. 7990220
or as download:

EHEIM shopDesign

Quality
By using high-quality materials and guaranteeing high manufacturing and assembly precision, the highest standards are met. The sophisticated technology and many years of experience ensure the smooth operation of the system.

Safety
All electric connections and cables have been manufactured in accordance with the VDE (German Association of Electrotechnical Engineers) recommendations. The units are earthed. Even with water installations and aquariums, safety is assured.

Maintenance
By providing technically advanced systems and intelligent construction, we help to keep care and cleaning time to a minimum.

Expert planning
We plan everything for you right down to the very last detail. Comprehensive offers, expert CAD drawings, installation plans and personal visits are all part of our normal sales presentation.

Species-friendly husbandry
The best sales argument is healthy and lively animals. For this reason, we are mindful of species-appropriate husbandry and we adhere strictly to all rules and regulations of the TVT (German Veterinary Animal Welfare Association).

Design, colour and decor
The units can be designed according to your specific wishes. The surfaces can be swapped and customised at any time. The unit surfaces can be styled individually and can be replaced at any time. This way, a new ambience is created in your showroom again and again in a fast and uncomplicated way.

EHEIM shopDesign

Carefully thought of, practical, species and maintenance friendly.

Are you looking for a perfect way to show your fish?
EHEIM shopDesign has a vast selection of standard racks in its portfolio whether it be for the individual pet shop or the large retail chain. EHEIM shopDesign can make your wishes come true. Possibilities are endless with the reputation of EHEIM technology coming as a standard.

Exoticism, thrill and amazement are key words in the vocabulary of reptiles enthusiasts.
These sensations can be duplicated and brought forward to your customers with the high-quality reptile units from EHEIM shopDesign. Even the most unusual and demanding species will thrive in a carefully studied environment finished in a contemporary and stylish look.

The rodent area is simply the most magical attraction for all kids and adults alike.
EHEIM shopDesign provides ideal habitats for hamsters and other rodents. Spacious glass surfaces offer a perfect view and also keeps the small curious hands at bay. Easy-to-clean materials are the best prerequisites for hygienic conditions.

The bird installation is a unique, acoustic, and visual addition to any pet shop.
EHEIM shopDesign not only designs and builds practical bird cages and aviaries but also takes important details into considerations to ensure the wellbeing of your birds (such as pivoting food and water bowls for stress free feeding).

The aquatic plant sales unit is a real eye catcher in any aquatic department.
EHEIM shopDesign is the ideal partner by your side to advise you to choose the right unit for a flourishing plant display. Perfectly coordinated tank heights for the different kind of plants, suitable lighting and the legendary EHEIM filtration technology.
