Shading Systems

Designer Series Open Roll Shade System

Part No. Designer-Series

The Legrand Shading Systems Designer Series open roll roller shade bracket system has options for motorized operated shades, manually operated shades, and convertible manual to motorized (MTM) operated shades. The brackets come in three sizes and can support shades up to 15 feet wide by 20 feet tall with up to 6 shade bands per motor. There are color coordinated bracket covers provided with each shade that match the metal color options and finish the installation. The DLM/QIS shade motors have a unique counter-balance spring design that allows shade to use less energy and for extremely quite operation. This patented design also allows the shades to be manually pulled into position using the hembar. This feature is unique to the Legrand system.

Features & Benefits

Unique Manual-to-Motorized (MTM) system allows for manual shades to be field upgraded to motorized

Options for manual, motorized, and coupled shades

Seamless integration with Wattstopper Lighting Control Systems for seamless daylighting and automaton control. Allows shades to join the BMS system using BacNet over IP

Covered by Legrand Shading systems standard 25 year warranty

Open roll bracket system for small to large shades

Use DLM or QIS motors and control systems

Steel brackets in 5 colors to match windows and decor
