DIABLO®

## HardieBlade®

Traditional blades that are not designed for cutting James Hardie products may generate excessive dust, cut slowly or exhibit premature wear. The HardieBlade® saw blade is a unique circular saw blade designed to generate less respirable dust than a tradition saw blade or continuous rim diamond blade. The HardieBlade® can also be used to cut the full line of James Hardie products. The only approved PCD tipped HardieBlade developed by James Hardie & Freud Diablo.

Check out **www.DiabloTools.com** for a large selection of informative videos!

## Fast... Faster... Fastest!

***Gauge and install fiber-cement siding up to 48% faster* with the Gecko Gauge.***

***30% faster*** *than Overlap Gauge with Lap Gauge combo*

***36% faster*** *than Break-away clips*

***48% faster*** *than lines on a wall*

### SS404 Fiber-Cement Siding Shear

Our "tough as nails" contractor shears

- Cuts fiber-cement siding up to 5/16" thick
- Smooth, fast cuts with no airborne dust
- Heavy-duty 1/2" spindle
- Powerful 6.5 amp motor

### SA905 Siding Face Gauge

- Handy, economy-minded tool keeps siding reveals accurate
- The adjustable slider shoe allows 1/8" - 9" (.5-23.5cm reveals)
- Hook-shaped handle for sure grip and solid support
- Convenient compass for circular cuts or scribing lines

### RS501 Roof Snake

- Replaces shngles easily and accurately
- Nail-slot feature ensures proper 1" nail offset
- Nailing-pulling end replaces flat bar

### SA904 Gable Scribe

- Capture gable angles quickly and easily
- 30" edge with integral shear guide
- Durable aluminum and steel construction

### SS211 Manual Fiber-Cement Shear

- Cuts 12" wide material with adjustable fence, or any width plus angle cuts without fence
- Hardened tool-steel blade for extended blade life
- For fiber-cement products up to 5/16" thick

CHAMPION CUTTING TOOL CORP

Your Source for Innovative Cutting Tools

**MFG# Twister-XL28-15**

- High performance in both fixed & portable drilling
- NOMO (Nitride on Margin Only) increases surface hardness & extends tool life
- Recommended for tough applications & materials including stainless steel
- Waterproof case
- 15pc 1/16"-1/2"

**HSS Annual Cutters**

- High speed annual cutters (M2) which features Champion's exclusive Plus 20 surface treatment
- Provides cleaner cuts
- Positive slug ejection & longer tool life
- 2" & 3" cutting depth

**MFG# XLUB16**

- Formulated to extend tool life & reduce chip welding
- Provides a precision finish with closer tolerances on finished work
- Clings to tools for a continuous shield against friction & heat
- Effective on stainless steel, aluminum & exotic alloys
- 17oz cutting wax

**XL86 & HX80**

- Designed for aligning & enlarging holes in structural steel, bridge & ship building
- Hex Shank is engineered to enable use in impact socket
- heavy duty reaming of off-size, misshapen & misaligned holes
- Hand car reamers available

DRILLCO Cutting Tools

Stocking a wide range of cutting tools:

**General Purpose HSS Jobber Length Drill Bits**

- Fractional 1/16 to ½" 118 degree black
- Number Sizes for Taps

**Nitro Heavy Duty Mechanic Length**

- 1/16" to ½" with 3 milled flats
- Black and Gold Surface Treatment
- Used on Hard Metals and Stainless Steels
- Also available in Stubby Lengths

**HSS Hand Taps-Plug Style**

- 6-32,8-32,10-24,12-24,1/4-20 and 3/8-16
- Other sizes available upon request

**Silver & Deming Bits**

- 1/2" to 1-1/2" with 1/2" Shank
