DIAMANT

Key Features

- Unique PID Technology for temperature control of each group
- Multi Boiler technology
- Special Non return valve to ensure no milk goes into the boiler through steam vent
- Unique Display for valuable information as well as individual settings
- Digital Brew time control

Diamant is equipped with an advanced system of temperature control, through PID technology, which results in an extremely precise control of temperature and an absolute stability.

It's a espresso coffee machine specially suitable for the most demanding barista. The 2group model has 3 boilers: the main boiler for system, hot water and pre-heating of the water, and two secondary independent 1.7 lt. boilers, one for each brewing group. The 3group 4 boiler model is unique in the market.

G-10

Key Features

- Electronic Management of each group
- Independent 1.7 lts Boiler per group
- Independent temperature control of each group
- Special non return valve to ensure no milk goes into the boiler through steam vent

G 10 is equipped with the most advanced electronic system, which means an extremely precise control and an absolute stability.

Discover one of the more precise coffee machines in the market. A machine that excels for its design, high technology and simple functionality. All in one, a delicious precision for all type of establishment.
