AUTOMATED TANK GAUGING SYSTEM

Made in JAPAN

SKK DSV ATG System

- Eliminates manual Dipping
- Save cost on Product finding paste
- Accurately measures Oil Level in underground tank
- Will still work during power interruptions (UGT Meter)
- Simple and effective mechanical design
- Heavy duty explosion proof housing
- Built in Thermal Printer
- Minimal installation on existing pavement
- POS ready communication
- Very low power requirement for the Control panel
- With Alarm and light indicator for low and high oil level

Thermal Printer

Sensor Probe
(other brand)

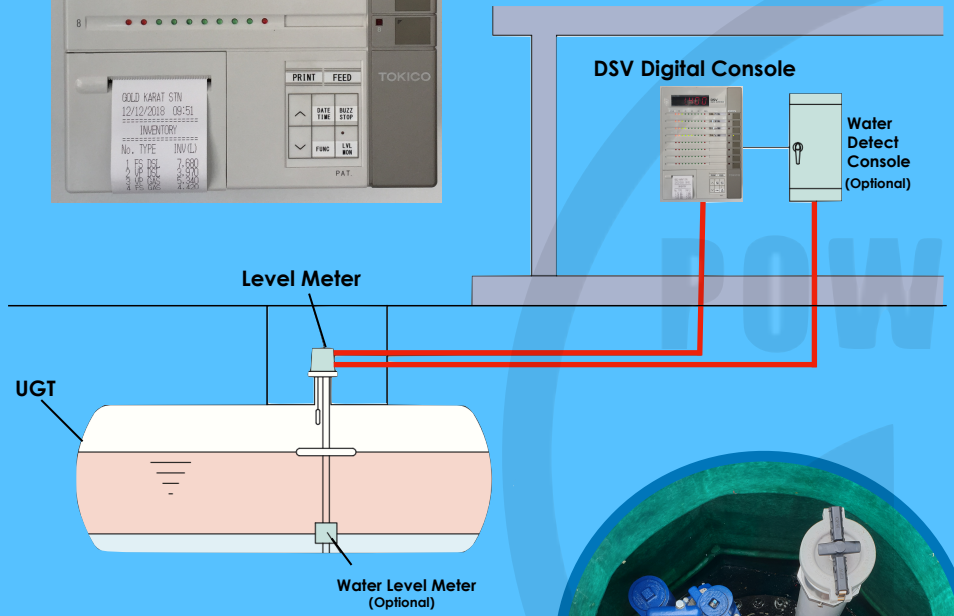

VS

Sensor Float with Meter Tape for Manual Reading
(SKK DSV-S)

Model	DSV-HC (Digital Console unit)/ DSV-S (Level meter above tank)
Number of measurable tank	Up to 8 Tanks
Measurement Method	Voltage Method
Precision	Less than ±1% (Compared with Total Volume)
Measurable Liquid	Petrol, Diesel, Kerosene, Heavy oil, Waste Oil, other liquid
Direct Reading Monitor	Level meter above tank
Indicator	Volume Indicator: 7 Segment LED 5 digits
	Bar graph indicator: Simultaneous indication for all tanks
High/Low Warning	Buzzer/ Bar Graph Blinking /Non-Voltage Contactor
	Adjustable Warning Level
Abnormal/Delivery Confirmation Warning	Buzzer/ Lamp Blinking/ Warning Printing
Printer	Thermal Type
POS Communication	SS-LAN
Explosion Proof Structure	Intrinsically safe explosion Proof Structure IA2G4
Power Supply	AC100V~240V 50/60Hz
Power consumption	Less than 25VA (Without Optional Equiptment)
Area of Installation	Digital Console Unit: Indoor non-hazardous area
	Level Meter: Hazardous Area (Above Tank)
Operable Temperature	Digital Console Unit: 0~+40 C (Without dew condensation)
	Level Meter: -2~+40 C
Dimension	Digital Console Unit: 323 (H) x 230 (W) x 70 (D)
	Level Meter: 114 (H) x 180 (W) x 162 (D)
