alexa built-in

Alexa Built-in Quick Start Guide for Volvo Trucks

When you activate Alexa Built-in voice technology in your Volvo Truck vehicle, you can ask to play music, listen to audiobooks, hear the news, check the weather, control smart home devices, get directions*, make phone calls, and more—all with your voice, and all while you keep your hands on the wheel and eyes on the road. The more you talk to Alexa, the more she adapts to your personal speech patterns, vocabulary, and preferences. This tutorial will explain how to enable Alexa Auto features in your Volvo Truck.

Start Using Alexa in Your Volvo Truck

You will need a smartphone and Internet connection. Please make sure that your phone is connected to the truck with Bluetooth . Connect the truck to Internet by connecting the truck to a WiFi network. Once set up, users can use the voice controls in their vehicle to activate Amazon Alexa content using their Volvo Truck multimedia dashboard display and the voice recognition system in their vehicle.

1 Go into **My Apps** on your Volvo Truck multimedia dashboard and select the **Alexa App** and choose **Get started** in the next window.

2 For this next step you need an Amazon account. If you don't have an amazon account please create one. If you already have an Amazon account proceed with entering the URL **amazon.com/code** into the browser of your smartphone and enter the 6 digit-code you see on your dashboard. Press **Continue** on your smartphone Alexa will now connect to your vehicle and a new window on the dashboard display will appear.

3 You can now create a local profile so Alexa remembers you when you enter the truck again with your Bluetooth device (e.g. Smartphone). For this press the option **Remember.** Choose your Bluetooth device on the dashboard display and create a 4-digit PIN Code to insure safety. You can now interact with Alexa, simply short press the Push-to-talk button on the steering wheel keypad and ask: „Alexa, play a Happy Monday Playlist“

OR

You can choose **Skip** to access Alexa directly and ask right away „Alexa, how is the weather in Göteborg?“

Required Equipment

- NFOMED, NFONAV, INFODF, INFONDF

How to Log Out of Alexa Voice Services in Your Volvo Truck

- On dashboard display: Open **My Apps > Alexa > Sign Out**

*POI databases and street names are only available within supported countries (UK, FR, ES, DE, IT, AT, IRE).
