All figures are based on a standard specification. The choice of additional factory options may affect CO_2 emissions and corresponding Road Fund Licence. The indicated values were determined according to the prescribed measurement method – Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. Figures shown are for comparability purposes; only compare with other vans tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load.

Further information about the test used to establish fuel consumption and CO_2 figures can be found at https://www.mercedes-benz.co.uk/vans/en/WLTP
