600 Series (**7702569** (600-100MF))

High Flow Manual Dispense Valve

Nordson EFD Products have expanded their line of two component dispense valves to include the Model 600 “MEGA” Valve.

This valve was specifically designed to be used with the Nordson EFD 162A Series disposable 3/4” diameter static mixer. The “MEGA” 600 allows the user to handle both high flow and high viscosity materials easily. The A & B components are separately ported through the valve body and do not combine until they meet inside the static mixer.
