PHILIPS

Highlights

Ambisound
Ambisound technology produces truly embracing multi-channel surround sound from fewer speakers. It delivers an immersive 5.1 sound experience without the constraints of sitting position, room shape or size, and without the clutter of multiple speakers and cables. Through the combined effect of psychoacoustic phenomena, array processing and precisely angled driver positioning, Ambisound delivers more sound from fewer speakers.

SoundBar
The SoundBar is a complete all-in-one home theater solution that delivers superb 5.1 surround sound for an immersive movie experience. Integrating speakers, amplifiers and DVD player, the SoundBar is all you need below your television. It lets you keep your living room the way you want it, yet delivers an amazing multichannel sound experience - for movie moments shared with friends and family.

Dock your iPod
The docking station, included with your home theater system, lets you play music from your iPod. What's more, you can control the iPod with the home theater system's remote. The docking station brings portable entertainment into your living room - with absolute convenience.

1080p HDMI
1080p HDMI upconversion delivers images that are crystal clear. Movies in standard definition can now be enjoyed in true high definition resolution - ensuring more details and more true-to-life pictures. Progressive Scan (represented by "p" in "1080p') eliminates the line structure prevalent on TV screens, again ensuring relentlessly sharp images. To top it off, HDMI makes a direct digital connection that can carry uncompressed digital HD video as well as digital multichannal audio, without conversions to analog - delivering perfect picture and sound quality, completely free from noise.
