BASIC TROUBLESHOOTING

My HEOS device won't connect to my network using the audio cable

- Make sure your mobile device is connected to your wireless network before setting up your HEOS device.
- Alternatively, you can connect your HEOS device to your network router using the included Ethernet cable. Once connected via Ethernet, the HEOS by Denon App should recognize the HEOS device and you can manually move it to your wireless network using *Settings/My Devices/Device_Name/Advanced/Network Settings*.

Music cuts out or delays sometimes

- Make sure your Internet connection is operating correctly.
- If you are sharing your network with other users or devices, they may be using most of your bandwidth (especially if they are streaming video).
- Make sure your HEOS devices are within range of your wireless network.
- Make sure your HEOS devices are not located near other electronic devices that could interfere with it's wireless connectivity (like microwave ovens, cordless phones, TVs, etc...).

Cannot pair a Bluetooth device with the HEOS device

1. Activate the Bluetooth setting on your mobile device.
2. Press and hold the Play/Pause button located on the remote control unit for 3 seconds and release the button when you see a pattern of two green flashes on the status LED.
3. Select "Denon DHT-S716H" from the list of available Bluetooth devices.

Connecting to a network using WPS

If your wireless router supports WPS (Wi-Fi Protected Setup™) your HEOS wireless device can optionally connect to your network using the "Push Button" method by following these steps:

1. Press the WPS button on your router.
2. Within 2 minutes, Press and Hold the Connect button on the rear panel of the HEOS device for 5 seconds.
3. The LED on the front of the HEOS device will flash green for several seconds as it connects to your router.
4. When the connection is complete, the LED on the front of the HEOS device will turn solid blue.

Resetting your device

Resetting your HEOS device will clear out the wireless network settings, EQ, and name but retain it's current software.
You will have to use Settings->Add Device to reconnect the device to your home network before it can be used.

To reset your HEOS device, press and hold the Connect and Bluetooth buttons located on the HEOS device for 5 seconds until the front LED begins to flash amber.

CAUTIONS

When mounting the speakers on a wall

- The speakers can be mounted on a wall using the keyhole hook on its rear panel.
- When you mount the speakers, be sure to install them properly and securely.

1. Screw in one self-tapping screw (commercially available, 0.2 inch / 5 mm to 0.24 inch / 6 mm diameter) into a wall that has sufficient strength to support the weight of the speaker, or into reinforcing material on the wall.
2. Hook the keyhole hook on the back of the speaker onto the head of the self-tapping screw.

- Check that the head of the self-tapping screw inserts securely into the keyhole hook hole.
- Do not attempt to install this product onto a wall made of material that may crumble easily, such as mortar or decorative plywood. Doing so may result in the screw pulling out and speaker falling, causing damage to the speaker or injury.
- Do not install the speaker using other methods such as nails or double-sided tape. The nails may become loose due to vibration or the double-sided tape may peel off due to prolonged use, causing the speaker to fall.
- Be sure to fix the cables in place so that they cannot be pulled or tripped over by accident.
- Be sure to check that the product is safe after installation. Please note that we cannot accept any liability for accidents, etc. that occur as a result of where or how the product is installed. If you are unsure of how to install the product safely, request a professional contractor do the installation work.
