Precautions

Notes on the Bluetooth function

- Bluetooth wireless technology allows connection at a distance of up to about 10 m. However, the effective range may vary depending on obstructions (people, metals, walls, etc.) or signal status.

- Because Bluetooth and wireless LAN (IEEE802.11b/g) devices use the same frequency (2.4 GHz), signal interference may occur, resulting in communication speed decrease, noise, or inability to connect, if Bluetooth communications are used near a wireless LAN device. In such cases, take the following measures.
 - Perform Bluetooth communications at least 10 m away from the wireless LAN device when connecting your Walkman and a Bluetooth device.
 - Place your Walkman and the Bluetooth device as close together as possible.
 - Turn off the wireless LAN device when performing Bluetooth communications within about 10 m of a wireless LAN device.
- Radio waves emitted from a Bluetooth device may affect the operation of equipment such as electronic medical devices. Turn off your Walkman and other Bluetooth devices in the following locations as failure to do so may cause an accident.
 - In hospitals, near priority seats on trains, in airplanes, in places such as gasoline stations where flammable gases are present, near automatic doors or fire alarms

Notes on handling your Remote Commander

- Keep new and used batteries away from children.
- If the battery compartment does not close securely, stop using the product and keep it away from children.
- If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.
- Be sure to follow the precautions below. Failure to do so may cause malfunction.
 - Do not subject the Remote Commander to excessive shock nor drop it.
- Do not place or leave the Remote Commander in the following locations.

- Locations on an unstable surface or in an inclined position
- Locations subject to vibration
- Locations subject to high humidity such as bathrooms
- Locations close to magnetic objects such as magnets, speaker boxes, or TV sets

- If your Remote Commander causes interference to radio or television reception, turn the Remote Commander off and move it away from the radio or television.
- Be sure to follow the precautions below when using your Remote Commander. Failure to do so may warp the casing or cause the Remote Commander to malfunction.
 - Do not sit down with your Remote Commander in your back pocket.

- Please note that water doesn't splash, this product is not waterproof specification. Be sure to follow the precautions below.
 - Be careful not to drop your Remote Commander into a sink or other container filled with water.
 - Do not use your Remote Commander in humid locations or wet weather such as rain or snow.
 - Do not use your Remote Commander in situations where you will sweat. If you touch the Remote Commander with wet hands or put the Remote Commander in the pocket of sweaty clothes, the Remote Commander may get wet.
