ANTI-DECUBITUS PVC WATER MATTRESS

• 28499 WATER MATTRESS
It is made in PVC with a stabilising inflatable external structure to prevent excessive water "wave motion" and of 3 independent units.
The water mattress distributes the total pressure on the whole supporting surface, making this less than the average arterial pressure, avoiding the exposure of the skin to pressure risk.
Easy to use, it is placed over the usual mattress and it is washable. It is sold with a manual pump, 2 disinfectants and an inflation tube.
Size: 190x85 cm. Weight 4 kg. PVC thickness 0,4 mm

ANTI-DECUBITUS CUSHION - MADE IN FRANCE

28530

28534 28538

PREVENTION FOR LOW DECUBITUS RISK

The Gima line of seat cushions ranges from Gel to Foam Cushions designed to support patients on wheelchair or permanently on chairs.
All cushions are supplied with a PU cover (made of waterproof urethane) with zipper and handle.
Made in France.

- **28530 BULGEL CUSHION 41x41x3 cm**
- **28531 BULGEL CUSHION 43x43x3 cm**

This anti-decubitus cushion is made of a flame-resistant pocket including a PE foam core covered by an aqueous gel.

PREVENTION FOR HIGH DECUBITUS RISK

- **28534 VISCO-MOUSS CUSHION 41x41x6 cm**
- **28535 VISCO-MOUSS CUSHION 43x43x6 cm**

Visco Mouss is a pre-shaped moulded cushion made of viscoelastic foam with memory effect. Memory foam is pressure sensitive and moulds quickly to the shape of a body pressing against it, returning to its original shape once the pressure is removed. When the patient moves, the material reacts very quickly to match the new position. Anatomical shape with raised lateral edges and front-back slope improves positioning, stability and comfort when seated.

PREVENTION FOR HIGH TO VERY HIGH DECUBITUS RISK

- **28538 GEL AIR 2D CUSHION 41x41x7.5 cm**
- **28539 GEL AIR 2D CUSHION 43x43x7.5 cm**

The Gel Air 2D cushion is made of a contoured moulded viscoelastic foam base (i.e. Visco Mouss') connected to a polyurethane gel insert. The viscoelastic fluid gel (blue pad) ensures maximum pressure relief of vulnerable bony areas while the regular gel and the foam increase the contact surface and maximize pressure relief. The cushion's shape ensures a good posture while seating and prevents from sliding forward.
