BJP1-BALL JOINT PRESS MASTER SET

Item No.	Part No.	Description
1	BJP1-1A	SLEEVE ADAPTER
2	BJP1-2	PRESSURE SCREW
3	BJP1-3A	LARGE FACED (BALL JOINT) PRESSURE PAD
4	BJP1-4A	SMALL FACED (UNIVERSAL JOINT) PRESSURE PAD
5	BJP1-5A	ADAPTER
6	BJP1-6A	ADAPTER/EXTENSION
7	BJP1-7A	ADAPTER
8	BJP1-8A	ADAPTER
9	BJP1-9A	ADAPTER: ANGLE
10	BJP1-10A	ADAPTER: ANGLE
11	BJP1-11A	ADAPTER
12	BJP1-12A	ADAPTER
13	BJP1-13B	ADAPTER
14	BJP1-14A	ADAPTER
15	BJP1-16A	ADAPTER
16	BJP1F	PRESS FRAME
17	BJP1-17	GREASE FITTING
18	ME9A34	STEEL BALL
19	ME7A207	RETAINING RING
20	ME7A208A	LARGE SNAP RING (11 RINGS REQ'D.)
21	ME7A209A	SMALL SNAP RING
22	PAKPB061	CARRYING/STORAGE CASE

(Some component assembly required. See component assembly sections.)

Visit the Snap-on web site, www.snapon.com, for vehicle application information and complete listing of available adapters.

SAFETY INFORMATION

IMPORTANT SAFETY INSTRUCTIONS

This manual contains important safety and operating instructions for the Snap-on® Ball Joint Press Master set. Refer to the information in this manual as required for safe operation.

READ ALL INSTRUCTIONS

Read all the instructions in this manual. Read, understand and follow all safety messages and instructions in this manual, and on all ball joint press part components. Safety messages in this section contain a signal word, a three-part message, and in some cases, an icon. Safety symbols, when present, give a graphical description of the potential hazard or how to avoid potential hazard.

WARNING

- **Wear safety goggles, user and bystander.**
- **Be sure all adapter-to-adapter connections are secure.**
- **Avoid misalignment of ball joint press assembly when tightening pressure screw on ball joint and control arm. If misalignment occurs, ***STOP*** tightening screw. Unthread screw until assembly is loose. Properly realign press assembly on ball joint and control arm.**

WARNING

Refer to manufacture's service manual for properly supporting and raising of vehicles in a safe and secure manner.

Ball Joint Press Component Assembly

Insert steel ball (ME9A34) into opening of pressure screw (BJP1-2) as shown in FIG. Secure steel ball inside screw by inserting small snap ring (ME7A209A) into internal snap ring groove of screw as follows:

1. Place snap ring partially into groove while compressing ring so that the ends overlap as shown in FIG. 1.
2. Press ring into screw opening until ring snaps securely into groove.

WARNING

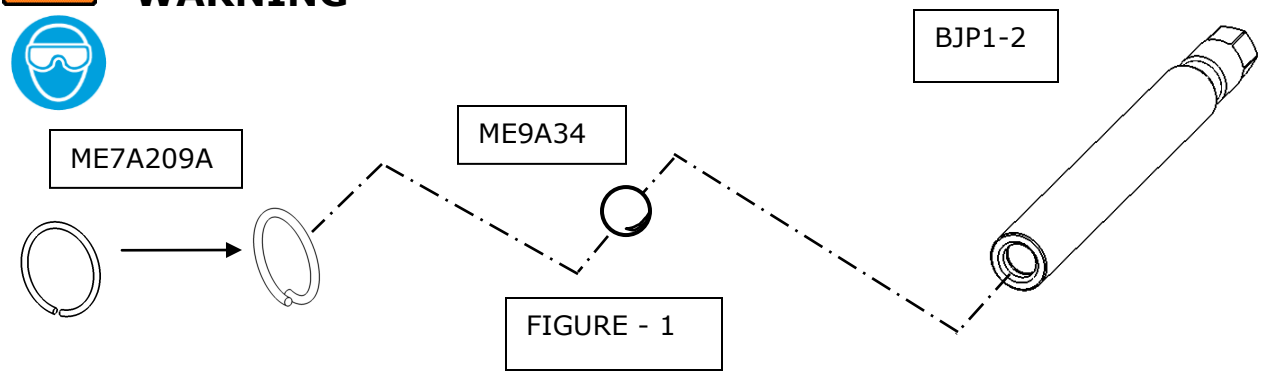

FIGURE - 1

Insert large snap ring (ME7A208A) into internal snap ring groove of each of the (11) adapters in the parts list on page one (adapters BJP1-5A through BJP1-16A) as follows:

1. Place snap ring partially into groove while compressing ring so that the ends overlap as shown in FIG. 2.
2. Press ring into adapter opening until the ring snaps securely into groove.

WARNING

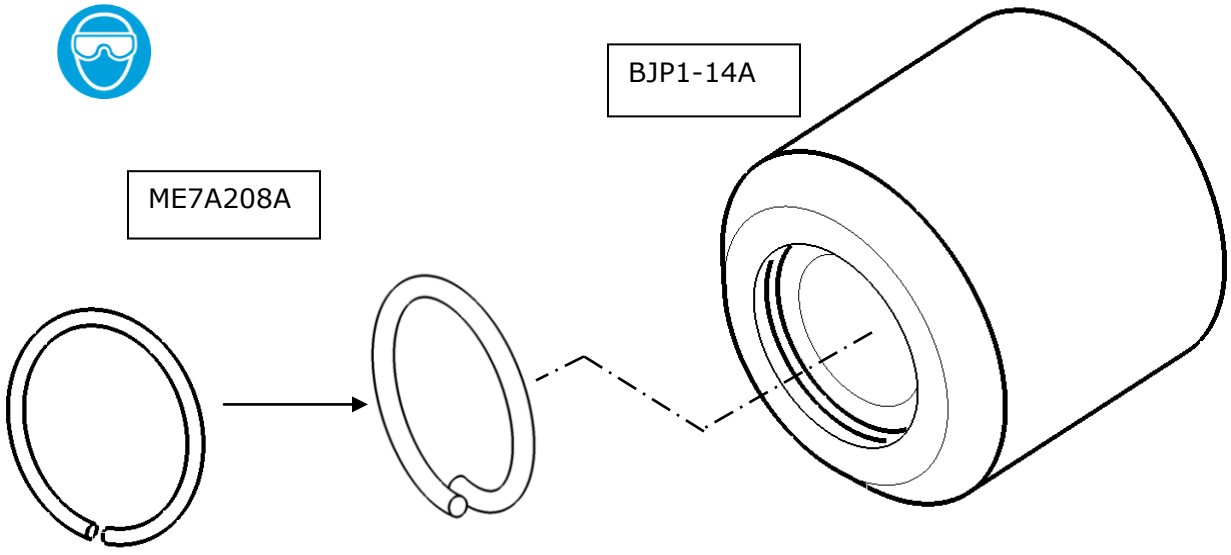

FIGURE - 2

Ball Joint Press Component Assembly

Slide sleeve adapter (BJP1-1A) into hole of press frame (BJP1F) and secure with retaining ring (ME7A207) as shown in FIG. 3. Use snap ring pliers with proper tip size. Thread grease fitting (BJP1-17) into tapped hole of press frame as shown using 5/16" socket.

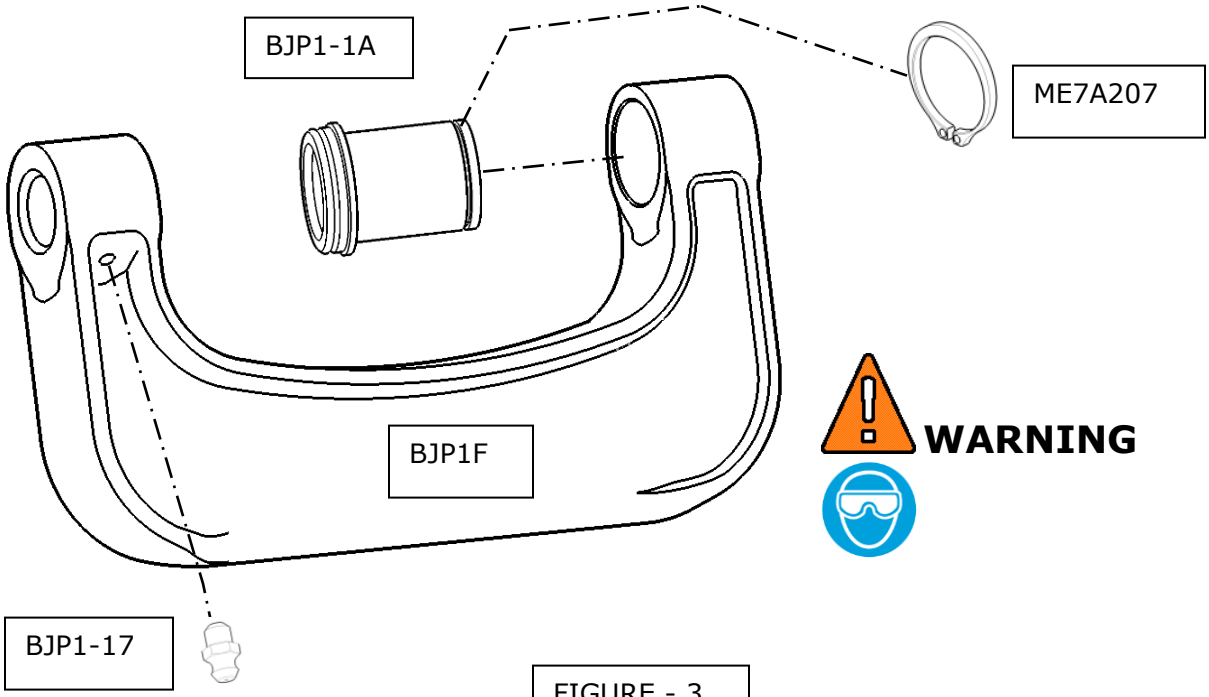

FIGURE - 3

Maintenance

The pressure screw threads need to be wiped clean and re-lubricated with chassis grease on a regular basis. Use grease fitting (installed on screw side arm of frame) to apply grease to the screw threads.

BJP1 - Operating Information

The BJP1 ball joint master set is designed to be used without removing the control arm from the vehicle on most cars and trucks that have press-fit type ball joints.

NOTE: Some vehicles have the upper ball joint spot-welded to the control arm. The weld must be cut before attempting to remove the ball joint.

Operating Instructions

Ball Joint Removal

(Refer to the safety information section for required safety instructions.)

1. Refer to the proper automotive service manual used for repair procedures on the specific vehicle being serviced. Follow indicated procedures for removing all suspension components to obtain clear access to the vehicle's ball joint and control arm.
2. Refer to application chart to select the proper adapters for removing most types of ball joints on most vehicle makes and models.
3. Thread pressure screw (BJP1-2) into end of frame. Insert ball joint pressure pad (BJP1-3A) into pressure screw. (Force pressure pad completely down into pressure screw.)
4. Snap the selected adapters onto adapter sleeve (BJP1-1A) and ball joint pressure pad as shown in FIG. 4.
5. Position press assembly over ball joint and control arm, as shown in FIG. 4.
6. Tighten pressure screw until removal adapters are snug against ball joint and control arm. Check that the entire assembly is properly aligned. If not, STOP tightening screw, then loosen assembly and re-align.
7. Apply torque to pressure screw until ball joint has been pressed out of control arm and into receiving adapter.

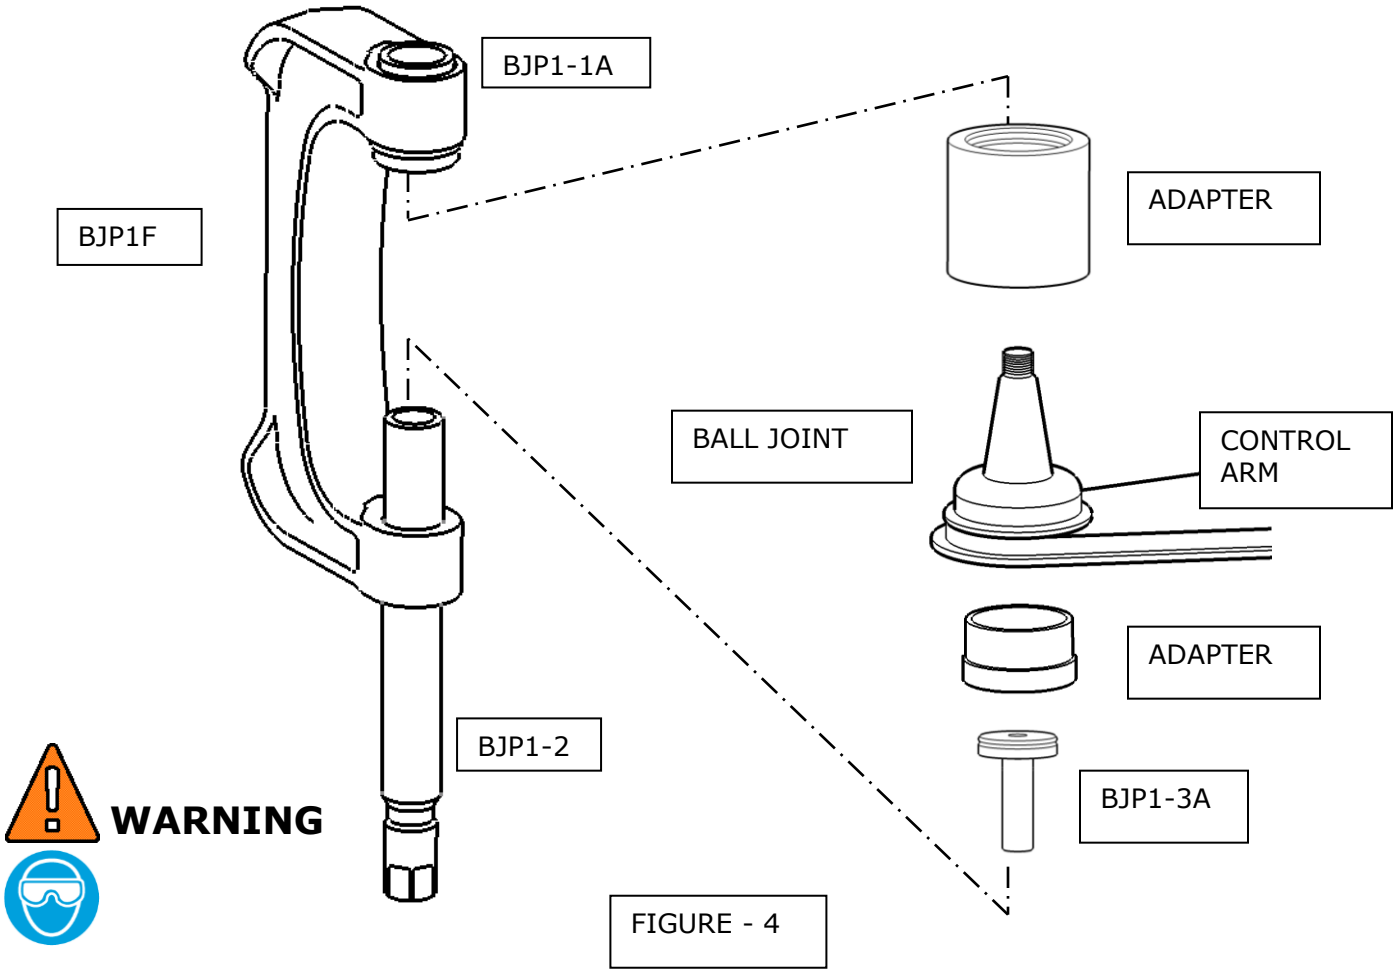

FIGURE - 4

WARNING

Operating Instructions

Ball Joint Installation

(Refer to the safety information section for required safety instructions.)

1. Clean knuckle and control arm. Coat bore of control arm with a suitable lubricant.
2. Insert replacement ball joint into control arm bore as straight as possible and align properly in bore.
3. Refer to application chart to select the proper adapters for replacing most types of ball joints on most vehicle makes and models.
4. Snap selected adapters into place in the same manner as in the ball joint removal procedure. Use adapter BJP1-6A between pressure pad (BJP1-3A) and adapter if additional length is needed, as shown in FIG. 5.
5. Position press assembly over ball joint and control arm, as shown in FIG. 5.
6. Tighten pressure screw until installation adapters are snug against ball joint and control arm. Check that the entire assembly is properly aligned. If not, STOP tightening screw, then loosen assembly and re-align.
7. Apply torque to pressure screw until the ball joint flange is securely seated against face of control arm bore

WARNING

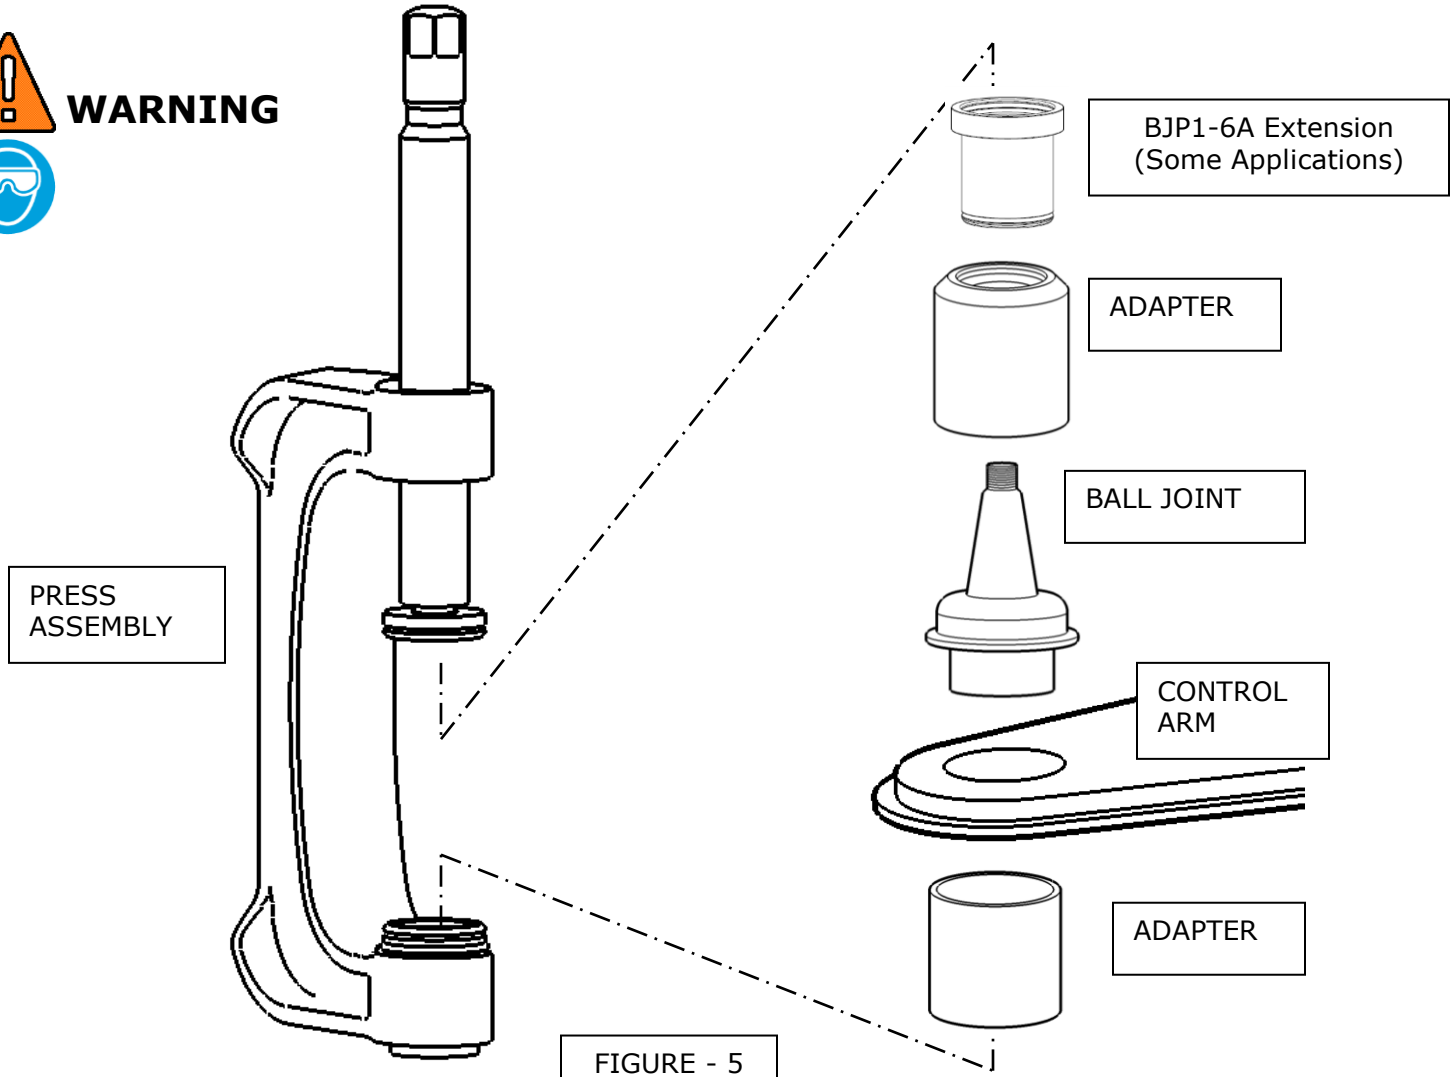

FIGURE - 5

UJP1 - Operating Instructions

The UJP1 universal joint set is designed to replace U-joints, either on or off the vehicle, on most cars and trucks.

Universal Joint Removal

(Refer to the safety information section for required safety instructions.)

1. If necessary, remove ball joint pressure pad from pressure screw. Then insert universal joint pressure pad (BJP1-4A) into pressure screw. (Force pressure pad completely down into pressure screw.)
2. Securely support the drive shaft yoke assembly. Remove all external and/or internal locking rings.
3. If necessary, select one or a combination of adapters (BJP1-1A, BJP1-7A, BJP1-8A) to assist in U-joint replacement.
4. Position press assembly around drive shaft yoke and align pressure pad with face of needle bearing caps, as shown in FIG. 6 and FIG. 7.
5. Tighten pressure screw until one side of U-joint has been pressed completely out of yoke assembly.
6. Reposition press assembly, in the same manner as step-4, and tighten screw to remove the remaining U-joint.

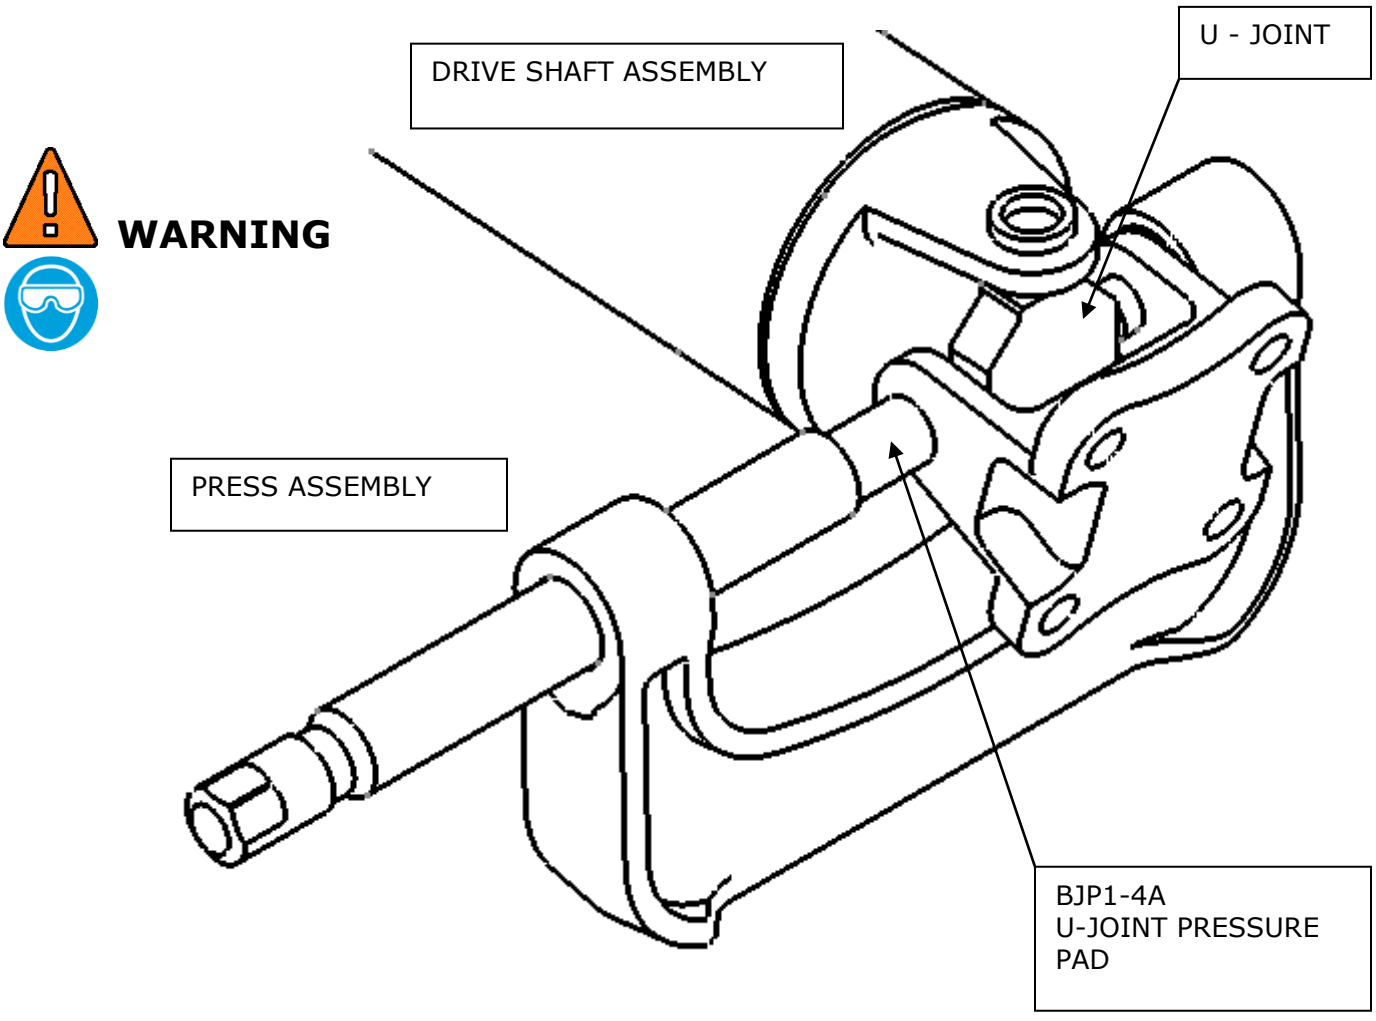

FIGURE - 6

UJP1 - Operating Instructions

Universal Joint Installation

(Refer to the safety information section for required safety instructions.)

1. Securely support the drive shaft yoke assembly.
2. If necessary, select one or a combination of adapters (BJP1-1A, BJP1-7A, BJP1-8A) to assist in replacing the new U-joint.
3. Carefully follow the manufacture's instructions for lubrication of the new U-joint.
4. Position press assembly around drive shaft yoke and align pressure pad with face of needle bearing caps, as shown in FIG. 7.
5. Tighten pressure screw until one side of U-joint has been completely pressed into assembly.
6. DO NOT OVER TIGHTEN. Damage to U-joint and reduced service life may occur.
7. Reposition press assembly, in the same manner as step-4, and tighten screw until the other side of the U-joint has been completely pressed into yoke assembly.
