Manual

INSTALLATION INSTRUCTIONS

- The appliance should be installed, connected and tested by a qualified electrician and in accordance with local regulations and AS/NZS3000.

- Make sure adequate fixings are used to support the fitting.

- When installing the fitting, always take care to support the weight of the LED while connected to the power supply.

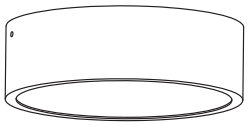

- Do not connect/reconnect the appliance to a driver that is powered or has been powered within 5 minutes or directly to the power supply if no driver is connected.
