SIZING / FIT

HOW TO MEASURE YOUR TORSO FOR YOUR PACK

FARPOINT - MEN'S SIZING

TORSO o/s 17-21" / 43-53 cm

FAIRVIEW - WOMEN'S SIZING

TORSO o/s 15-19" / 38-48 cm

WOMEN'S - SPECIFIC FIT

+ Shorter torso length
+ Narrower, shorter harness with curves designed to accommodate most women's necks, shoulders and chests
+ A hipbelt designed to wrap naturally around the curves of a woman's hips, offering better load stabilization and support

HARNESS FIT

The harness straps should wrap fully around your shoulders with no gaps between the pack and your back. The padded part of the harness straps should end 1 in./2.5 cm. -2 in./5 cm. below the armpits and the sternum strap adjusted to approximately 2 in./5 cm. below the collarbone.

ADJUSTING THE HARNESS

+ Unzip and stow the back panel cover.
+ Try the pack on, adjusting the shoulder straps and hipbelt snugly.

+ Based on shoulder strap comfort, remove pack and raise or lower the harness by loosening the lower tri-glides, moving the harness cross member to a more comfortable location and re-tightening the lower webbing to secure harness in place. This can be done as often as needed to achieve the best fit.
+ Connect load lifters and adjust to desired fit.

Dual front compression straps secure loads and add stability to the pack when not fully loaded.
