

Nokia Bluetooth Headset BH-607

with My own key

DataSheet

Product Overview

- Nokia Bluetooth Headset BH-607 empowers people in their busy lives, making a contribution to the daily success. It is designed for every day use with natural comfort and ease of use in mind.
- The headset presents My own key – a configurable key to maximize the multi-tasking capacities. My own key can be pre-programmed with up to three predefined functions which can be accessed and performed easily whilst doing other tasks – like e-mailing or navigating. Multitasking is further enhanced by the advanced multipoint connection enabling simultaneous access to 2 devices, including concurrent call handling.
- Nokia Bluetooth Headset BH-607 provides outstanding audio with advanced digital signal processing (DSP), dual microphones and new wind noise reduction technology for interference-free conversation in any environment.

Key Features

My own key: personalize to perform up to 3 of your favorite functions

- Listen unread sms
- Call to predefined number
- Reject call and send predefined sms
- Speak current time
- Mute

Noise-free communication

- Advanced noise cancellation with 2 built-in microphones for capturing speech
- Acoustical wind noise reduction
- Advanced digital signal processing for clear audio quality
- Call management features: answer/end, redial, voice dial

Advanced multipoint

- Handle two devices simultaneously:
- Stay connected to two devices at the same time, e.g. phone and VOIP
- Handle simultaneously two calls from different devices, by putting one on hold when answering another

Comfortable wearing

- Curved form
- Two sets of different types and sized changeable ear plugs (6 pcs)
- Adjustable ear loop
