

Dial Gauge Base
Magnetic Base DG 1030

This dial gauge base has an articulated polished aluminium alloy arm, which can be easily locked in any position using the single central locking knob. Plunger and lever indicators are attached using the $\frac{3}{16}$ in/8mm stem or dovetail fitting system. The arm is mounted on a powerful 80 kilo switchable magnetic base by 8mm x 1.25mm thread. Arm dimensions: lower 110mm, upper 102mm, gauge holder 46mm.
