TCL-USB (8) User's Manual

TCL-USB(8)

USER'S MANUAL

Version 1.0

Contents

Thanks for your usage of TCL-USB (8) network telephone. This manual offers you with detailed installation information, which is convenient for your operation.

TCL Communication Equipment (Huizhou) Co. Ltd possesses both the name and brand of this product. TCL Communication Equipment (Huizhou) Co. Ltd reserves all the correlated rights.

Microsoft Windows 95/98/Me and Microsoft Windows NT/2000/XP are all the brands of Microsoft Corporation or registered trademark in America. Other brands and registered trademarks are possessed by other related co-operations.

Chapter One- Brief introduction of TCL-USB (8)

TCL-USB (8) is a high capability network phone with USB port and lattice LCD.

It supports multi-language display, such as Chinese, English, and Spanish etc. It also support incoming and outgoing calls display function, redial and call back functions. It can be operated with IM software, such as SKPYE, MSN, and QQ, etc.

1.1. Product's specification

- Expediently dial PC-to-PC and PC-to-Phone;
- X Simple installation, friendly interface, convenient operation
- Complies with the criterion of USB1.1 and 2.0 interface, supports plug and play, no need of external power source
- X Supports lattice LCD screen display
- * Echo cancellation and noise suppressor technology
- Support incoming and outgoing calls display function; support to overview the contact list and dial out functions
- ※ Displays the online status of the contact persons

- * Call out directly from the contact list or the history record of calls
- X Support muti-language display
- ※ Support redial and call back functions

1.2. System requirement

- Microsoft Windows 2000/XP OS or above
- 64 MB or above memory
- 100 MB or above hard disk capacity
- Supports USB ports

Chapter Two- Installation of product

In this part, mainly introduce how to install the drivers and connect TCL-USB (8) with Skype.

SKYPE Installation

TCL-USB (8) can combine Skype software for working; however, we should install SKYPE software on your PC first before using it. Please download detailed information on the official website: http://www.skype.com.

2.1 Drivers Installation

- a. During the process of driver's installation, don't insert TCL-USB (8) into the USB port of computer.
- b. Run the TCL_USBDriver.exe document in the attached CD. (Instead of hardware driving procedure, this driver software is specially designed for SKYPE. Under the operation system WIN2000 and above, we do not need to install hardware drivers, while it is necessary for us to install hardware drivers under WIN98 operation system. Vide "WIN98 drivers' Installation Guide for USB Phones". Show as Figure one, and click "Next".

APPENDIX: Trouble shooting

1. We can receive the voice from the others, while the others cannot get ours.

Troubleshooting:

- a. Check the transmitter of the phone through WINDOWS "recorder"
- b. Check whether transmitter of the phone is in mute mode. Press "MUTE" to turn the mute mode off.
- **c.** Check whether the voice in-out equipment of SKYPE software has been set to connect with USB phone. Refer "Part Four.1"

2. With both key volume and LCD displays, but keypad is out of usage

Troubleshooting:

a. If LCD displays "refuse to access SKYPE", please enter SKYPE's "tool" --> "options"--> "privacy"--> "Manage other program's access to SKYPE". Show as follows. Set USB Driver as "allow to use Skype for this session".

614	Name: TALKANDWRITE.EXE	
	Allowed to use Skype for this session Remove	
	Name: SKYPEPHONE.EXE	
	Allowed to use Skype for this session	
	Name: USB DRIVER.EXE Publisher: TCL COMMUNICATION EQUIPMENT(HUIZHOU) CO. Allowed to use Skype for this session	

b. If LCD displays "SKYPE is off line", it means there is something wrong with the network, or you haven't logged on yet. Please check the network and whether SKYPE has been logged on.

3. No LCD displays, but with key tone

Troubleshooting:

- a. Check whether USB Driver runs normally.
- b. Check whether the LCD contrast has been adjusted properly. Please refer to "Part Four, 2"
- c. If the LCD is faulty, please deliver it to manufactory for maintaining.

Thanks for your reading this menu. Welcome any precious suggestion for our products.
