

DIPLOMAT Accessories: Horizontally hinged front panels

KM6-II HORIZONTALLY HINGED PANEL

Typically used in situations where quick access is needed to equipment, but it is not desirable to remove the panel completely - e.g. as a socket mounting or display panel.

A range of aluminium panels is supplemented by a 3U, 84HP smoked transparent version for use where it is necessary to view instruments or indicators.

Standard kits are supplied with plastic hinges. A die-cast metal hinge kit is available separately as an accessory to replace the plastic type.

Version 1 has anodised front and rear faces. The method of manufacture produces cut edges which are invisible in normal use. The kit includes plastic retaining inserts and plastic hinges as standard. Both plastic inserts and hinges can be replaced by metal versions.

Version 3 is a decorative panel, being entirely anodised after manufacture. It is supplied in kit form with plastic inserts and hinges as standard. These inserts and hinges can be replaced with metal versions.

Contents of kits
