Special Features

Detect mode:

Auto face:

There are two choices available:

- *Single face* which means just one frame will appear and the camera will track the face within his field of view
- *Multi face* which means it can track up to 4 different face in the same windows

If auto zoom is enabled, it will make a digital zoom on the face

By label

User select an area and draw a frame which will be the detect label area 1 or maximum 4 area. Each label owns single detect mode, face or motion. Motion and face detect only available on frame window of lens view.

Sensitivity

Motion or face threshold. Lower figure means detection is more sensitive.

Alarm setup

To active alarm relay when face or motion is detected. Can be set to normally open or normally close. Example it can be connected to a buzzer or light for immediate action
