SLOS069A - FEBRUARY 1971 - REVISED MAY1999

- Short-Circuit Protection
- Wide Common-Mode and Differential Voltage Ranges
- No Frequency Compensation Required
- Low Power Consumption
- No Latch-Up
- Designed to Be Interchangeable With Motorola MC1558/MC1458 and Signetics S5558/N5558

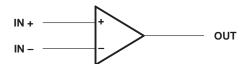

description

The MC1458 and MC1558 are dual general-purpose operational amplifiers, with each half electrically similar to the µA741, except that offset null capability is not provided.

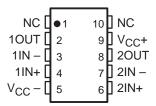

The high-common-mode input voltage range and the absence of latch-up make these amplifiers ideal for voltage-follower applications. The devices are short-circuit protected and the internal frequency compensation ensures stability without external components.

The MC1458 is characterized for operation from 0°C to 70°C. The MC1558 is characterized for operation over the full military temperature range of –55°C to 125°C.

AVAILABLE OPTIONS

| | | | | PACKAGE | | | |
|----------------|--------------------------------|-------------------------|-------------------------|------------------------|-----------------------|-----------------------------|--|
| TA | V _{IO} max AT 25°C | SMALL OUTLINE (D) | CHIP CARRIER (FK) | CERAMIC DIP (JG) | PLASTIC DIP (P) | CERAMIC FLAT PACK (U) | |
| 0°C to 70°C | 6 mV | MC1458CD | _ | | MC1458CP | _ | |
| -55°C to 125°C | 5 mV | _ | MC1558MFK | MC1558MSG | _ | MC1558MU | |

The D packages are available taped and reeled. Add the suffix R to the device type (i.e., MC1458DR)

schematic (each amplifier)

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

| | MC1458 | MC1558 | UNIT | | |
|--|-------------------|-----------|---------------------------|----|--|
| Supply voltage (see Note 1) | V _{CC} + | 18 | 22 | V | |
| Supply voltage (see Note 1) | V _{CC} – | -18 | -22 | V | |
| Differential input voltage (see Note 2) | | ±30 | ±30 | V | |
| Input voltage at either input (see Notes 1 and 3) | | ±15 | ±15 | V | |
| Duration of output short circuit (see Note 4) | | unlimited | unlimited | | |
| Continuous total dissipation | | See Diss | See Dissipation Rating Ta | | |
| Case temperature for 60 seconds: FK package | | | 260 | | |
| Lead temperature 1,6 mm (1/16 inch) from case for 60 seconds | JG or U package | | 300 | °C | |
| Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds | D or P package | 260 | | °C | |
| Storage temperature range | | 65 to 150 | -65 to 150 | °C | |

NOTES: 1. All voltage values, unless otherwise noted, are with respect to the midpoint between V_{CC} + and V_{CC} -.

- 2. Differential voltages are at IN+ with respect to IN-.
- 3. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 V, whichever is less.
- 4. The output can be shorted to ground or either power supply. For the MC1558 only, the unlimited duration of the short circuit applies at (or below) 125°C case temperature or 70°C free-air temperature.

^{*}On products compliant to MIL-PRF-38535, this parameter is not production tested.

[†] All characteristics are specified under open-loop operating conditions with zero common-mode input voltage unless otherwise specified. Full range for MC1458 is 0°C to 70°C and for MC1558 is -55°C to 125°C.

NOTE 5: This typical value applies only at frequencies above a few hundred hertz because of the effect of drift and thermal feedback.

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used.
