Introduction

Congratulations on your selection of the CASIO TK-2200 electronic cash register. This ECR is the product of the world's most advanced electronic technology, for outstanding versatility and reliability.

The TK-2200 is programmed at the factory with the most standard operating features and functions. Your local business requirements, however, may call for other functions or a totally different keyboard layout.

This manual explains the different functions available, as well as the procedures that you can use to tailor the cash register to specific needs. Programming is simplified through the use of worksheets for each function, and step-by-step flow charts that walk you through each procedure.

Important

- Be sure to perform the machine initialization operation prior to operating the TK-2200 for the first time (see page 3).
- Some options may not be available in certain geographic areas.

Worksheets

The worksheets included in this manual for **PROGRAM 3**, **PROGRAM 2**, and **PROGRAM 1** help to make your programming simple and accurate. We recommend that you fill out the pertinent worksheet before attempting actual programming.

1. Carefully read each definition and specify a selection.

*Each definition is followed by a **Specification** column which contains numeric values (usually to indicate a simple YES or NO answer). Determine the correct value according to your needs and enter it in the **Selection** column to the right.*

2. Total each set of selections to calculate each program code digit.

*Three selections (a, b, c) make up a set. Add up each set of selections and fill in the totals in the **Program Code** column for data items D₁₀ through D₁.*

3. Program the feature or function.

Be sure that you have filled in all of the selections and program code digits for the entire worksheet, and follow the procedure noted for the feature or function you are programming.

4. Check the printed program receipt against the worksheet.

*You can use each **PROGRAM** mode to print a readout of settings which you have programmed, to check them against the worksheet. We recommend that you do so and keep a copy on record for reference should it become necessary for you to change the program.*

1. Machine Initialization and Program Auto-loading	3
2. Memory Capacity and the Availability of Functions	6
3. Setting the Proper Mode for Programming	7
4. PROGRAM 4	9
4- 1 Programming Numeric Functions	10
4- 2 Selecting the Programmable Functions	11
4- 3 Programming the Function of Each Key	12
5. PROGRAM 3	14
5- 1 Programming X ₁ Mode and X ₂ /Z ₂ Mode Secret Codes	14
5- 2 Programming the Store/Machine Number	15
5- 3 Programming General Machine Features	16
5- 4 Programming Tax Calculations	22
5- 5 Setting the Drawer Open Alarm	26
5- 6 Assigning Drawer Numbers and Clerk Secret Numbers to Clerks	26
5- 7 Programming Commission Rates for Each Clerk	28
5- 8 Programming Random PLU Codes for Format 2 PLUs	30
5- 9 Programming Set Menus	32
5-10 Programming PLU Links for Format 2 PLUs and Flat-PLU Keys	35
5-11 Programming Minimum Stock Quantities for Format 2 PLUs and Flat-PLU keys	37
5-12 Programming Features for Each Department Key, PLU Number and Flat-PLU key	38
5-13 Programming Function Key Features	54
5-14 Programming the Arrangement Key Functions	68
5-15 Presetting the Starting Time Period for Hourly Sales Report Printing	70
6. PROGRAM 2	71
6- 1 Using the Character Keyboard	72
6- 2 Programming Descriptors for Department and Function Keys	73
6- 3 Programming Descriptors for PLUs	76
6- 4 Programming Descriptors for Flat-PLU Keys	78
6- 5 Programming Descriptors for Groups	79
6- 6 Programming Descriptors for Fixed Totalizers	80
6- 7 Programming Descriptors for Clerk ID's	83
6- 8 Programming the Receipt Message and Check Endorsement	85
6- 9 Programming Text for the TEXT RECALL key	86
7. PROGRAM 1	88
7- 1 Setting the Time and Date	88
7- 2 Programming Unit Prices to Department Keys	89
7- 3 Programming Unit Prices to PLUs	90
7- 4 Programming Unit Prices to Flat-PLU Keys	93
7- 5 Programming Prices or Rates to Function Keys	95
7- 6 Programming Exchange Rates to Currency Exchange Keys	96
8. Program Load/Save	97
