# Notice

English

Thank you for purchasing a HUMAX product. Please read this user's manual carefully to be able to safely install, use and maintain the product at maximum performance. Keep this user's manual next to your product for future reference. The information in this user's manual is subject to change without notice.

## **Copyright (Copyright © 2009 HUMAX Corporation)**

Not to be copied, used or translated in part or whole without HUMAX's prior consent in writing except approval of ownership of copyright and copyright law.

## **Warranty**

The warranty does not cover parts which may become defective due to misuse of the information contained in this manual.

## **Meaning of Symbols**

To reduce the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel.

This symbol indicates dangerous voltage inside the product that presents a risk of electric shock or personal injury.

This symbol indicates important instructions accompanying the product.

## **Warnings, Cautions and Notes**

Throughout the whole manual, pay special attention to the following marks that indicate hazardous situations.

### **Warning**

Indicates a hazardous situation which could result in serious injury.

### **Caution**

Indicates a situation which could damage the equipment or other apparatus.

### **Note**

Indicates additional information to make the user aware of possible problems and information of any importance to help understand, use and maintain the installation.

# Notice

---

## **'WEEE' Instructions**

This product should not be disposed with other household wastes at the end of its working life. Please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. This will prevent possible harm to the environment or human health from uncontrolled waste disposal.

### **Domestic users:**

Please contact either the retailer where you purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling.

### **Business users:**

Contact your supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

## **Trademarks**

- Viaccess is a trademark of France Telecom.
- CryptoWorks is a trademark of Irdeto Access B.V.
- Irdeto is a trademark of Irdeto Access B.V.
- Nagravision is a registered trademark of KUDELSKI S.A.
- Conax is a trademark of Telenor Conax AS.
- Manufactured under license from Dolby Laboratories.  
Dolby and the double-D symbol are trademarks of Dolby Laboratories.

This product incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. Use of this copyright protection technology must be authorized by Macrovision, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision. Reverse engineering or disassembly is prohibited.

## Inserting Batteries

1. Press the hook upward and lift the battery cover off.
2. Insert the batteries (supplied) matching the plus(+) and minus(-) at each end.
3. Close the cover.

# Quick Start Guide

## 3. Connections

This section describes how to connect your product to match your particular devices setup and to gain optimum signal quality. The product provides various interfaces to connect to the TV, VCR or other devices. Select the most appropriate procedure depending on the device you have.

**Note:** If you encounter any problems setting up your product, please contact your local retailer or Humax Customer Helpline.

# Quick Start Guide

English

## Connecting the Antenna

### ❶ Connecting to Two Satellites;

Connect the two RF cables from your satellite dish to the LNB 1 IN and LNB 2 IN connectors.

**Note:** This connection will allow you to view different channels while recording or record two channels at the same time.

### ❷ Connecting to Single Satellite;

1. Connect an RF cable from your satellite dish to LNB 1 IN connector.
2. Connect the LNB 1 OUT and LNB 2 IN connectors using a loop through RF cable.

**Note:**

- When using this connection, the specified functions for 2 tuners will be not available.
- When using a Motorised System or SCD Antenna (also known as Unicable), connect the RF cable only to LNB 1 IN connector.

# Quick Start Guide

## Connecting the TV

### ❶ TV with the HDMI connector;

For the best picture quality, connect the product and TV using an HDMI cable.

### ❷ TV with the DVI connector;

For very good picture quality, connect the product and TV using an HDMI cable and an HDMI-to-DVI converter for video and an RCA cable (Audio L/R) for audio.

### ❸ TV with the SCART connector;

For good picture quality, connect the product and TV using a SCART cable.

### ❹ VCR with the SCART connector;

To output video and audio, connect the product and VCR using a SCART cable.

## Note:

- When using the digital audio system, connect the product and the digital audio system using an S/PDIF cable for audio.
- Programmes restricted by DRM (Digital Rights Management) may not be viewed via the HDMI cable. Connect using the SCART or composite cable.
- Connecting your TV directly to the audio/video output of the product will assure a more vivid picture and enhance your viewing enjoyment.

# Quick Start Guide

English

## Connecting the Network

### ❶ Connecting to the LAN;

Connect one end of the Ethernet cable to the recorder and the other end to the LAN router.

### ❷ Connecting to the Wi-Fi (Wireless LAN);

You can connect the network via the Wi-Fi access point or DSL/cable modem.

1. Plug in the wireless USB dongle to the USB port.
2. Set the options for the Wi-Fi.
  - **Network Name (SSID):** Select the network name of your Wi-Fi access point from the list.
  - **Security Type (WEP):** This product supports WEP 40/128bit ASCII and WEP 40/128bit HEX. The security type of the Wi-Fi and the receiver shall be set the same.
  - **Password:** When using the security type, you must set the password. Enter the same password in the Wi-Fi setting menu.
3. After completing the Wi-Fi access point setting, make sure the settings in **Installation Wizard** or **System>Network>Configure Wi-Fi** are the same.

#### Note:

- Make sure the distance between the Wi-Fi access point and the receiver is not too far away. This may lower the quality of service.
- It is recommended to purchase a wireless USB dongle distributed by HUMAX. Other products may not function or respond.

### ❸ Using HUMAX Powerline AV Adaptor;

You can connect to the network using the HUMAX Powerline AV Adaptor. Connect one end of the Ethernet cable to the recorder and the other end to the adaptor. Plug the HUMAX Powerline AV Adaptor to a wall outlet. (Separate purchase required)

**Note:** HUMAX recommends the network connection over a direct LAN or the HUMAX powerline AV adaptor.

# Quick Start Guide

## 4. Powering On

1. Connect the power cord of the product to a wall outlet.
2. Ensure the ON/OFF switch at the rear of the product is switched to ON.
3. Power on by pressing the **STANDBY** button on the remote control or the **STANDBY** button at the front of the product.

## 5. Installation Wizard

When powering on your product for the first time after purchase or performing the factory default in menu, the installation wizard will operate automatically.

**Note:** If you exit the installation wizard without fully completing the channel searching procedure, you may not have all of the channels available. In this case, you can use the **Settings > Installation** menu to search for more channels.

### 1. Language

Select your language.

### 2. Display

Set the video output to your TV.

### 3. Time Zone

Select your country to determine your time zone.

# Quick Start Guide

## 4. Search Channels

Select the type of channel search.

- **Quick Search:** Default channels of ASTRA1 (19.2E) will be applied without searching channels.
- **Automatic Search:** Search all channels of ASTRA1 (19.2E) and HOT BIRD (13.0E) automatically.
- **Skip:** If you have SCD or motor antenna, skip the search process and go to **Installation** in **Settings**.

**Note:** **Quick Search** appears only in Germany or Austria.

## 5. Automatic Search

Channel search will begin automatically. Save the found channels when the search is complete.

## 6. Ethernet Setting

Make sure that the LAN cable is connected to the Ethernet port or the wireless USB adaptor is enabled. Configure the network setting.

## 7. Result

The result of the Installation Wizard is shown. Select **Finish** to exit the wizard.

## How to Navigate

Displays the Menu OSD

Selects (Enters) a menu or confirms a selection

Goes back to the previous screen

Exit all On-Screen

Moves among menus or options

Changes or adjusts the option

Enters the number (0~9)

# Basic Operation

## Changing Channels

You can change the channels in several ways.

- ❖ Press the **P▲/P▼** button.
- ❖ Enter the channel number directly. **(0-9)**
- ❖ Go to the channel list or TV guide and select a channel.

### Note:

- Press the **TV/RADIO** button to switch between TV and radio channels.
- Press the **BACK** button to return to the previous channel.

## Volume / Mute / Audio

- ❖ To adjust the audio volume, press the **▲+ / ▼-** button.
- ❖ To mute the audio temporarily, press the **MUTE** button.

### Setting Audio Options

Audio options are available only when the programme supports multiple audio languages.

1. Press the **AUDIO** button.
2. Select the audio language.
3. Select the audio direction.
4. Press the **OK** button.

### Note:

- The mute function remains set while you change channels.
- You cannot set the audio direction when the programme is broadcast in Dolby Digital.

# Basic Operation

English

## Display Format / Resolution

### Setting Display Format

Press the **WIDE** button to set the display format according to the screen ratio.

Each time you press this button, the value changes.

- Screen ratio 4:3: **Auto** – **Letterbox** – **Centre**
- Screen ratio 16:9: **Auto** – **Pillar Box** – **Zoom**

**Note:** Refer to *Display Format* for details.

### Setting Resolution

Press the **V-FORMAT** button to set the resolution of the screen.

Each time you press this button, the value changes.

- **576i - 576p - 720p - 1080i - Original**

**Note:** When connected with an HDMI cable, you can only change to resolutions the TV supports.

# Basic Operation

## Programme Information (i-plate)

The i-plate is an information banner that is displayed for a certain period of time whenever you change channels. Press the **i** button while watching a programme to display the i-plate. Press the **EXIT** button to hide.

### ➤ Viewing detailed programme information

Press the **i** button again while the i-plate is displayed.

### ➤ Viewing previous/next programme information

Press the **◀/▶** button while the i-plate is displayed. Press the **OK** button to set reminders or recordings for future programmes.

### ➤ Viewing programme information of other channels

Press the **▲/▼** button while the i-plate is displayed. Press the **OK** button to change to the selected channel.

## Icons

The icons represent the information and services provided.

	Locked programme		Teletext
	Scrambled programme (CAS icons)		Resolution
	Parental level (minimum age for viewing)		HD programme
	Scheduled programme (Red: Record, Blue: Reminder)		Multiaudio
	Subtitle		Dolby Digital audio
			Dolby Digital Plus audio

**Note:** Programme information is not displayed when there is no programme information.

# Basic Operation

English

## Sleep Timer

Press the **SLEEP** button to set the automatic turn off time.  
Each time you press this button, the value changes.

➤ 10 - 20 - 30 - 60 - 90 - 120 minutes

SLEEP

Display

## Subtitle

You can select the subtitle language when subtitle information is provided.

1. Press the **SUBTITLE** button.
2. Select the subtitle language.
3. Select **Off** to make the subtitle disappear.
4. Press the **OK** button.

**Note:** You can choose to always display the subtitle when available.

# Channel List

The channel list will help you find the channel you want to watch quickly and easily.

You can access the channel list in several ways.

- ❖ Press the **LIST** button.
- ❖ Press the **MENU** button and select **Channel List**.

## Changing Channels

Select the channel you want to watch and press the **OK** button. The displayed channel will change.

### Note:

- : Locked channel, : Scrambled channel (CAS icons)
- Press the **i** button to view the detailed programme information.
- Press the **LIST** or **EXIT** button to exit.

## Advanced Options

### Changing Group

You can display the list of the selected channel group.

➤ **TV, HDTV, Radio, Favourite 1~5, Recent**

1. Press the **▶** button.
2. Select a channel group.
3. Press the **OK** button.

**Note:** Press the **TV/RADIO** button to switch between TV and Radio groups.

### Sorting Channels

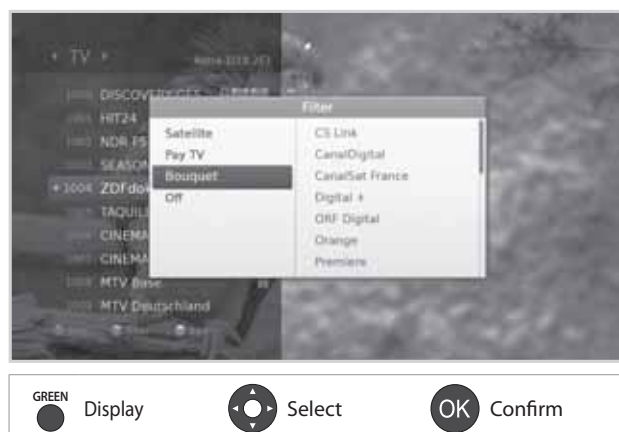

Press the **RED** button to sort the list in numerical or alphabetical order.

### Filtering Channels

You can filter the channels according to channel type in TV or Radio list.

1. Press the **GREEN** button.
2. Select the channel type.
  - **Satellite, Pay TV, Bouquet, Off**
3. Press the **OK** button.

**Note:** Select **Off** to cancel filtering.

# Channel List

English

## Editing Channels in Channel List

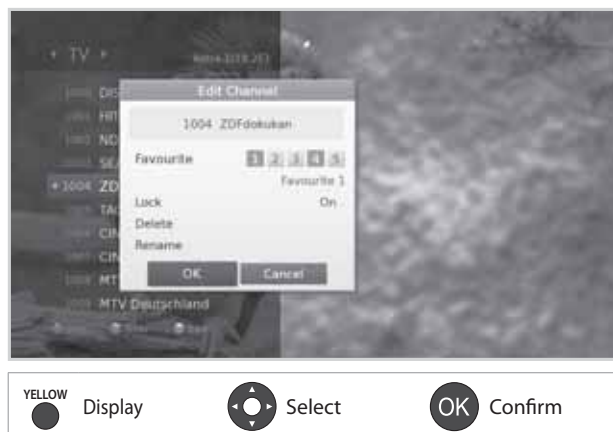

You can lock, delete or rename each channel in the channel list, as well as in menu. To edit the multiple channels, go to the **Settings > Edit Channels** menu.

### Locking / Deleting / Renaming Channels

1. Select a channel you want to edit and press the **YELLOW** button.
2. Select an option.
  - **Lock:** Select **On** or **Off**.
  - **Delete:** Press the **OK** button.
  - **Rename:** Press the **OK** button and enter the name in the keyboard.
3. Select **OK** to save and exit.

#### Note:

- Refer to **Edit Channels** for details
- The default password is 0000. If you have forgotten the password, please contact your local TV distributor.

### Setting Favourite Channels

You can select your favourite channels and include them in the five favourite groups.

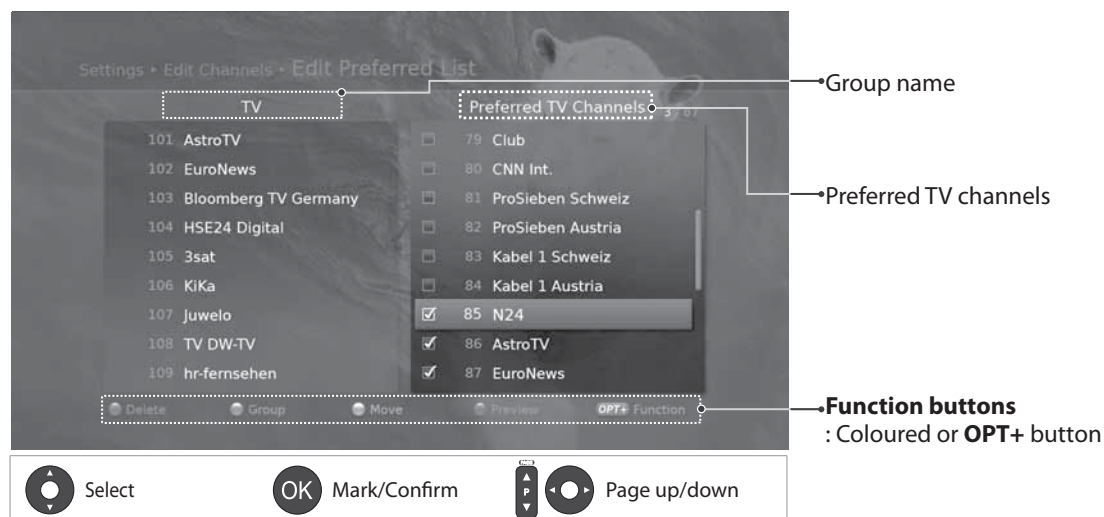

1. Select a channel and press the **YELLOW** button.
2. Select **Favourite**.
3. Select a favourite group you want to include the channel in and press the **OK** button.  
To remove a channel from a favourite group, select the group and press the **OK** button again.
4. Select **OK** to save and exit.

# Channel List

## Edit Preferred List

The **Edit Preferred List** menu will help you manage the channels 1~99 in the preferred list.

**MENU → Settings → Edit Channels → Edit Preferred List**

**Note:** Press the **MENU** or **EXIT** button to exit. Press the **BACK** button to return to the previous screen.

## Adding/Removing Preferred Channels

1. To add channels to the preferred list, select the channels you want to add using the ▲/▼ and **OK** button in the left column and then press the **RED** button. The added channels will appear in the right column.
2. To remove channels from the preferred list, select the channels you want to remove in the right column and then press the **RED** button.

## Moving Channels

1. Select the channels using the ▲/▼ and **OK** button.
2. Press the **YELLOW** button.
3. Move the selected channels to the location you want using the ▲/▼ and **OK** button.

**Note:** You can move the channels in the right column only.

## Advanced Options

# TV Guide

English

The TV guide is an on-screen guide of grid type which displays the programme information of channels in time and date order.

You can access the TV guide in several ways.

- ❖ Press the **GUIDE** button.
- ❖ Press the **MENU** button and select **TV Guide**.

**Note:** Press the **GUIDE** or **EXIT** button to exit. Press the **BACK** button to return to the previous screen.

The screenshot shows the TV Guide interface. At the top left is a preview of the selected program. To its right is the program title and details. At the top right is the current time and date. Below this is a grid of programs for the current day and the following day. At the bottom are function buttons: Guide, Find, Schedule, Highlights, and Group. A legend at the bottom explains the navigation buttons: a directional pad for 'Select', an 'OK' button for 'Tune/Reserve', and a '+' button for 'Page up/down'.

Annotations on the right side of the screenshot:

- Preview
- Current time and date
- Information of the selected programme: channel number & name, programme name, simple information, favourite group, network type, and icons
- Time bar
- Function buttons : Coloured or **OPT+** button

**Note:**

- Press the **i** button to view the detailed programme information.
- : Scheduled programme (Red: Recording, Blue: Reminder), : Recording programme, : Present time, : DRM(Digital Rights Management) icon

## Watching Programmes

1. Select a programme and press the **OK** button. The programme will be displayed in the preview.
2. Press the **OK** button again to exit the TV guide and watch the programme.

# TV Guide

---

## Setting Reminders or Recordings

1. Select a future programme and press the **OK** button.
2. Select **Reminder** or **Recording** and press the **OK** button.
3. Press the **OK** button again to cancel the reservation.  
The reserved programmes will be added automatically in **Schedule**.

### **Note:**

- If the programme is overlapped with another programme, adjust the reservation appropriately.
- If the channel is locked, you will be prompted to enter your password before watching.  
The default password is 0000. If you have forgotten your password, please contact your local distributor.
- In standby mode, the TV will turn on when a scheduled reminder starts.
- You can reschedule reminders or recordings. (Refer to **Scheduling Reminders and Recordings**.)

## Advanced Options

### Quick Navigation

Press the ◀/▶ button to move to the previous/next page.

Press the ◀◀/▶▶ button to jump back/ahead two hours.

Press the ◀◀◀/▶▶▶ button to move to the previous/next day.

### Changing Group

To list the channels of other groups, press the **OPT+** button and select a group you want.

### **Note:**

- Press the **TV/RADIO** button to switch between TV and Radio groups.
- To search specific programmes, go to **Find Programmes** by pressing the **GREEN** button. (Refer to **Finding Programmes**.)

## Finding Programmes

**Find Programme** will help you find the programmes more specifically using the keyword or genre.

### By Keyword

1. Press the **GREEN** button.
2. Select **Keyword** and press the ► button.
3. Select a keyword and press the **OK** button.

**Note:** To enter a new keyword, select **New Keyword**.

### By Genre

1. Press the **GREEN** button.
2. Select **Genre** and press the ► button.
3. Select a genre and press the **OK** button.
4. Select the specific genre and press the **OK** button. (if provided)

### Note:

- Press the **i** button to view the detailed programme information.
- Press the **OK** button to watch a found programme. (Refer to **Changing Channels**.)
- You can set reminders or recordings for future programmes. (Refer to **Setting Reminders or Recordings**.)

# TV Guide

## Scheduling Reminders and Recordings

**Schedule** lists reminders or recordings and will help you manage them in more detail.

1. Press the **YELLOW** button.
2. You can add, edit or delete your reminders or recordings.
  - To add, select **New Reservation** and press the **OK** button.
  - To edit, select a reservation and press the **OK** button.
  - To delete, select a reservation and press the **OPT+** button.
3. **Reminder** will pop up. You can change the options you want using the **▲/▼/◀/▶**, **NUMERIC(0~9)** and **OK** buttons.
4. Select **OK** to save and exit.

### Note:

- Press the **i** button to view the detailed programme information.
- You can easily set reminders or recordings in TV guide, Find Programmes or i-plate navigation mode. (Refer to **Setting Reminders or Recordings**, **Find Programmes**, or **Programme Information**)

## Highlights

**Highlights** display the highlights and detailed programme information of each channel based on the time, date or topic. You can look up programmes up to a week in advance and set reminders or recordings with ease.

This service is available only when TVTV EPG is provided.

1. Press the **BLUE** button.
2. Select a programme and press the **OK** button. You can set a reminder or recording.
3. Press the **OPT+** button to sort the programmes in time or alphabetical order.

### Note:

- Press the **i** button to view the detailed programme information.
- You can choose to update the TVTV EPG during standby or select the update time in **Settings > System > TVTV EPG**.

# Personal Video Recorder

English

You can record programmes in the built-in hard disk and view the recorded programmes whenever you want.

## Recording

You can record up to two programmes at the same time. Ensure that there is enough free space before recording. If the space on the hard disk drive is insufficient, recording will stop. The space necessary for recording a one-hour programme may differ.

**Note:**

- You can record radio programmes also.
- Pressing the **STANDBY** button while recording will not stop the recording. The product will go to standby mode after completing the recording.
- Press the **i** button to view the recording information. Press the arrow key in the i-plate to hide the recording information.

## Instant Recording

To record the current programme you are watching, press the **REC** button.  
When the programme information is available, only the current programme will be recorded. However, if the programme ends in less than ten minutes, the next programme will be recorded also.  
When no programme information is available, the recording will continue for two hours.

# Personal Video Recorder

## Scheduled Recording

Scheduled recordings will start and end according to the scheduled time. You can schedule recordings in TV Guide. Go to **MENU > TV Guide**

## Setting Start/End Padding Time

**MENU → Settings → Preferences → Recording**

You can set the recording padding time in case the recording starts earlier or ends later than scheduled.

- **Start Padding Time:** Additional time before the recording starts.
- **End Padding Time:** Additional time after the recording ends.

## Recording Conflict

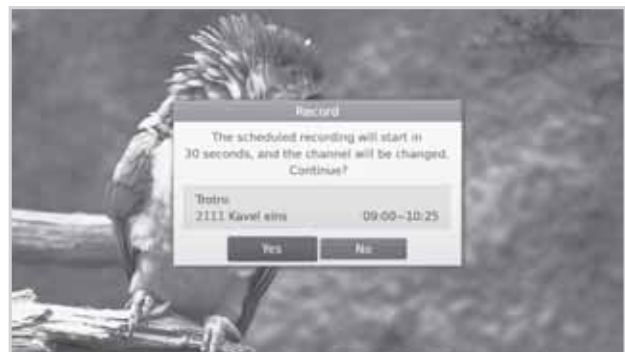

### Current recording + scheduled recording

When a programme is being recorded and a second recording is about to start while watching a different channel, you will be prompted to select **Yes** or **No**.

- **Yes:** The channel will change and the scheduled recording will start.
- **No:** Scheduled recording will be canceled.

If no selection is made, the channel will change automatically and the recording will start.

**Note:** This message will not appear if the two recordings start at the same time. In this case, the channel will change automatically.

# Personal Video Recorder

English

## Instant recording + scheduled recording

When instant recording conflicts with one of the two scheduled recordings, you can have the recording duration modified automatically or cancel either of the scheduled recordings.

## New recording + two scheduled recordings

When a new recording conflicts with one of the two scheduled recordings, you will be prompted to select the recording(s) you want to continue.

## Editing Recording Time

1. To edit the recording time, press the **REC** button while recording.
2. Set the recording time manually or record till the end of the current programme or the next.

If the changed recording time conflicts with another scheduled recording, you can cancel changing the recording end time or cancel either of the scheduled recordings.

# Personal Video Recorder

When recording two programmes, a conflict may occur before a scheduled recording starts. You will be prompted to select two of the programmes and cancel the remaining.

**Note:** When programme information is provided, each programme will be recorded separately in the media list.

## Playback

You can access the recorded file list easily and play the recorded programmes.

- ❖ Press the **MEDIA** button.
- ❖ Go to **MENU > Video**.

You can perform fast rewind, fast forward, slow motion and pause while playing back a recorded file from the media list.

Press the **PLAY** button while watching a recording to display the playbar.

**Note:** The playbar is also displayed when pressing the **FF, FB, SLOW** or **PAUSE** button.

To move the play pointer to a certain time point, press the ◀▶ button while playing back to play the programme from the specified time point.

Press the **STOP** button to stop the current file and go to live TV.

▶	Playback
▶▶	Fast Forward
◀◀	Fast Backward
⏮	Watch the recording in slow video. (1/2, 1/4, 1/8,...)
⏸	Pause the scene. Press the <b>PAUSE</b> button again to go back to play mode.
⏮⏮	Move to the previous chapter and replay the scene. (Move to the previous chapter if the playbar is displayed.)
⏭⏭	Move to the next chapter and skip scenes. (Move to the next chapter if the playbar is displayed.)
◀▶	Jump to the previous or next scene.

**Note:** Chapters are made by dividing the recorded programme into eight portions.

# Personal Video Recorder

## Setting Bookmark

You can place bookmarks in your favourite scenes and jump to them directly. Up to four bookmarks can be used and the bookmarks remain unless they are deleted.

**Note:** Bookmarks are available for recorded files only.

### Adding a bookmark,

Press the **Add Bookmark** button while watching a recording.  
To delete the bookmark, go to the bookmark and press the **Add Bookmark** button again.

### Moving to a bookmark,

Press the **Go to Bookmark** button while watching a recording. The play pointer will move to the nearest bookmark. If you press the **Go to Bookmark** button on the last bookmark, the play pointer will move to the first bookmark.

**Note:** Fast forwarding and jump may not function in programmes restricted by DRM.

## Time Shifted Recording (TSR)

The recorder automatically saves the programmes you watch to the built-in hard disk drive temporarily. This enables you to pause the current broadcast and play, rewind or forward live TV. TSR lasts for 90 minutes.

### To pause the programme you are watching,

Press the **PAUSE** button. Press the **PLAY** button to return. Pause makes a time gap between the live broadcasting point and watching point. The time gap is equivalent to the period the programme has been paused.  
Press the **STOP** button to close the time gap and go to live programme.

### To rewind and watch missed scenes,

Press the **FB** button. Press the **PLAY** button at the point where you want to start watching. You can pause, rewind or fast forward within the programme.  
You can fast rewind back to the start point. If you reach the start point while rewinding, the programme is automatically played at normal speed.

### To fast forward and skip scenes,

Press the **FF** button. You can fast forward only when there is a time gap between the current watching point and the live broadcasting point caused by pause, slow motion or fast rewind. You can fast forward up to the current broadcasting point. If you reach the live broadcasting point while fast forwarding, the programme is automatically played at normal speed.

**Note:** Fast forwarding and jump may not function in programmes restricted by DRM.

# Media List

You can playback recordings, music files or photo files.

- ❖ Press the **MEDIA** button.
- ❖ Go to **MENU ▶ Video/Music/Photo**.

## Switching Storage

1. Press the **BLUE** button to display the type of storage.
2. Select the storage type and press the **OK** button.
  - **HDD**: Displays the internal HDD.
  - **USB**: Displays each partition of the USB.
  - **Network**: The DLNA server is searched. Select the type of the server.

### Note:

- Only one USB icon will appear even when there are more than one USB.
- The network icon is displayed only when the network has been connected.

## Switching Media

1. Press the **YELLOW** button to switch the media.
2. Select the media type and press the **OK** button.
  - **Video, Music, Photo**

## Using the DLNA Server

You can have access to DLNA servers such as the PC or NAS (Network attached storage) and play the video, music, or photo files. To connect to a DLNA server, the receiver must be connected to the local network.

## Playing Video Files in Network

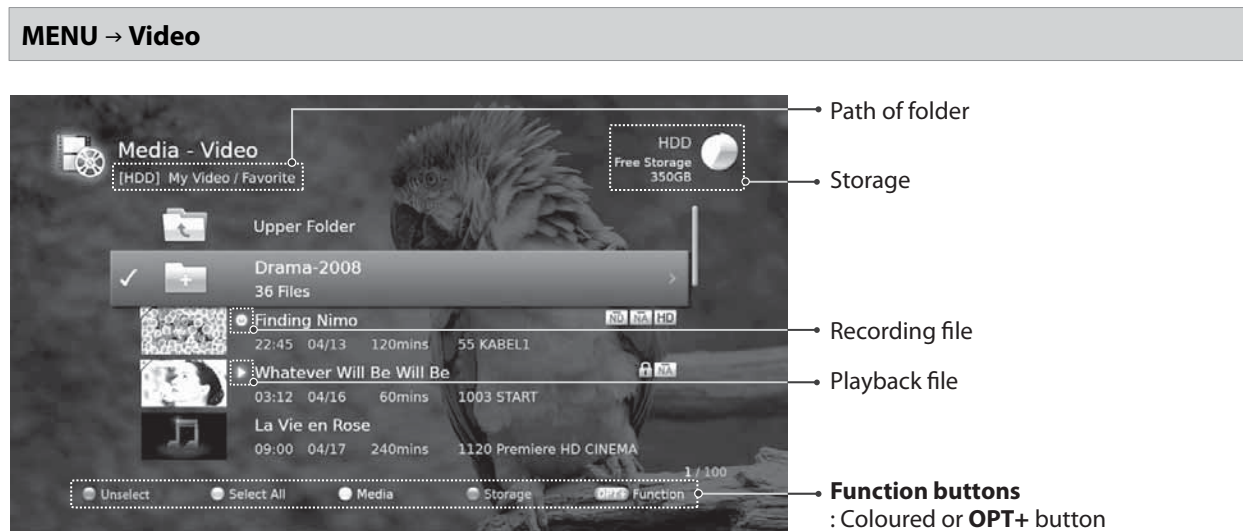

1. Go to **MENU>Video**.
2. Press the **BLUE** button and select **Network**.
3. Select the DLNA server from the list and select the folder the video file is located in.
4. Select the video file and play the file.

### Note:

- Playing music files and photo files is similar as playing video files.
- You can download DLNA tools such as Media Server 11 (<http://www.microsoft.com/windows/windowsmedia/de/player/11/default.aspx>) and XBMC (<http://www.xbmc.org>). The software can be downloaded and updated in each website.

# Media List

## Using Video List

## Playing Files

Select a file and press the **OK** button. Playback will start from the recently viewed point.  
To select multiple files, select the files and press the **RED** button.

### Note:

- If a folder is selected, the file within the folder will not play unless it is selected.
- You will be prompted to enter the password when playing locked files.
- You can view Xvid files also.
- Files with DRM (Digital Rights Management) expiration dates may expire if not watched before the written date.

## Editing Files

### Sorting Files

Press the **OPT+** button. Select **Sort** and press the **OK** button. The files will be sorted in alphabetical order.  
To sort the files in time order, repeat the procedure.

**Note:** Sorting files is available for video files only.

### Deleting Files

1. Select the file(s) you want to delete and press the **OPT+** button.
2. Select **Delete** and press the **OK** button.
3. Select **Yes** and press the **OK** button.

**Note:** When deleting a locked file, you will be prompted to enter the password.

# Media List

English

## Locking Files

1. Select the file(s) you want to lock and press the **OPT+** button.
2. Select **Lock** and press the **OK** button.
3. To unlock, press the **OPT+** button again and select **Unlock**.
4. Enter the password.

## Moving Files

1. Select the file(s) you want to move and press the **OPT+** button.
2. Select **Move** and press the **OK** button.
3. Select the folder or storage you want to move the file to and press the **OK** button.
- **Moving the file within the same storage:** Select the folder you want to move the file to and press the **OK** button.
- **Copying the file to another storage:** Select the storage and then select the folder to copy the file to. Press the **OPT+** button to rename the folder.

### Note:

- When moving a locked file, you will be prompted to enter the password.
- When moving the file to a different storage, it will be copied. However, video files cannot be copied to other storages.

## Renaming Files

1. Select the file you want to rename and press the **OPT+** button.
2. Select **Rename** and press the **OK** button.
3. Enter the name of the file in the keyboard and press the **YELLOW** button.

## Creating Folder

1. Press the **OPT+** button.
2. Select **New Folder** and press the **OK** button.
3. Enter the name of the file in the keyboard and press the **YELLOW** button.

## Editing Files

Go to **Editing Files** in **Using Video List**.

## Slide Mode

1. Press the **OPT+** button.
2. Select **Slide Mode** and press the **OK** button.
  - **Display Time:** The duration the photo is displayed
  - **Music Play:** Determines whether to play music file during slideshow or not
  - **Folder:** The folder the music file is located in. Press the **OK** button to display the list of music files and select a folder.

## HUMAX TV Portal

### MENU → HUMAX TV Portal

**HUMAX TV Portal** is a web service portal which allows you access to TV catch-up, YouTube, VOD, Internet Radio, and HUMAX support. You can also view past programmes using this service. You can access HUMAX TV Portal in several ways.

- ❖ Go to **MENU > HUMAX TV Portal**.
- ❖ Press **TV Portal** while watching a programme.

#### Note:

- If you press **TV Portal** while playing back a TSR recording or a currently recording programme, the screen will jump to live TV and then move to the TV Portal screen.
- If you press **TV Portal** while playing back a video, music or photo file, you will be prompted to stop playback and go to the TV Portal screen.
- Press the **EXIT** button to exit HUMAX TV Portal.

## TV Catch-Up

Connects to the TV Catch-Up website.

## YouTube

Connects to the YouTube website.

## Internet Radio

Displays the radio station list. You can view your favourite radio channels, list the radio channels according to category or country, search radio channels or view your recent channels.

## HUMAX Support

Provides FAQs, glossary and service related information. Software update through the network is also possible if the network is connected through the LAN.

# HUMAX TV Portal

## Interactive Service

To have access to various interactive applications, make sure that the product is connected to the internet.

Interactive service is provided via the network and can be accessed using the colour buttons on your remote control.

**Note:** The type of interactive service may vary.

# Preferences

English

In this chapter you can set options for parental control, language, time, video, audio and others.

**Note:** Press the **MENU** or **EXIT** button to exit. Press the **BACK** button to return to the previous screen.

## Parental Control

**MENU** → **Settings** → **Preferences** → **Parental Control**

You will be prompted to enter the password to access this menu.

**Note:** The default password is 0000. If you have forgotten your password, please contact your local distributor.

### Changing Smartcard PIN-Code

You can change the current Smartcard PIN-Code.

1. Select **Change Smartcard PIN-Code**.
2. Enter the new Smartcard PIN-Code.
3. If you enter the wrong Smartcard PIN-Code three times, the receiver will lock for 10 minutes.

**Note:** You must enter the Smartcard PIN-Code to watch programmes blocked by the age limit during the hours below.

- **6:00~22:00:** PIN-Code is required if the programme is for 16+.
- **22:00~6:00:** PIN-Code is required if the programme is for 18+.

### Changing STB Password

You can change the current password. This password is prompted every time a password blocked menu is accessed.

1. Select **Change STB Password**.
2. Enter the new STB password.
3. Enter the new STB password for verification.

# Preferences

## Language Setting

**MENU → Settings → Preferences → Language**

1. Select **System Language**, **Audio Language** or **Subtitle Language**.
2. Select the language.

**Note:**

- If you select **Off** in subtitle language, the subtitle will not be displayed.
- You can change the audio or subtitle language by pressing the **AUDIO** or **SUBTITLE** button while watching a programme.

## Setting Power On/Off Timer

**MENU → Settings → Preferences → Time**

1. To turn on the product automatically, select **Power On Timer** and select **Set Timer**.
2. Enter the time.
3. Set the options for the power on timer.
  - **Channel:** Select the channel to be displayed when powering on.
  - **Volume:** Adjust the volume of the audio when powering on.
  - **Repeat:** Select the repeat mode of the power on timer.
4. To turn off the product automatically, select **Power Off Timer** and select **Set Timer**.
5. Enter the time.

**Note:**

- The power on time and power off time should be set different from each other.
- The TVTV EPG update time and power on time should be set different from each other.

Video Setting

MENU → Settings → Preferences → Video

Setting TV Screen Ratio

You can select the screen ratio of your TV.

- 1. Select **Screen Ratio**.
- 2. Select an option.
  - **16:9 - 4:3**

Setting Display Format

You can select the display format according to the screen ratio of your TV.

- 1. Select **Display Format**.
- 2. Select an option.
  - Screen ratio 4:3: **Auto - Letterbox - Centre**
  - Screen ratio 16:9: **Auto - Pillar Box - Zoom**

**Note:** You can set the display format by pressing the **WIDE** button while watching a programme. Refer to *Display Format / Resolution*.

Screen ratio	Display Format		
4:3	 Auto	 Letterbox	 Centre
	 Auto	 Pillar Box	 Zoom

Setting Letter and Pillar Box Colour

You can set the colour for the margin space according to the display format.

- 1. Select **Letter & Pillar Box Colour**.
- 2. Select an option.
  - **Black - Gray**

Setting TV SCART / VCR SCART

You can select the video signal output option for the TV SCART or VCR SCART.

- 1. Select **TV SCART** or **VCR SCART**.
- 2. Select an option.
  - TV SCART: **CVBS – S-Video – RGB**
  - VCR SCART: **CVBS – S-Video**

# Preferences

## Audio Setting

**MENU → Settings → Preferences → Audio**

### Setting Digital Audio Output

You can select the digital audio signal output of your product.

1. Select **Digital Audio Output**.
2. Select an option.
  - **Stereo - Multi-channel**

### Setting Lip-Sync

You can adjust the sound difference of audio and video.

1. Select **Lip-Sync**.
2. Adjust the lip-sync using the ◀/▶ button.  
Pressing the right button increases the audio speed and pressing the left button decreases it.

## Screen Display

MENU → Settings → Preferences → Screen Display

### Setting Info Display Time

You can set the duration the information box is displayed every time the channel is switched.

- 1. Select **Info Display Time**.
- 2. Select an option.
  - **Off - 1~20 sec**

### Setting Transparency

You can set the transparency of the On-Screen Display.

- 1. Select **Transparency**.
- 2. Select an option.
  - **Off - 25% - 50% - 75%**

### Setting Subtitle Font

You can adjust the subtitle font.

- 1. Select **Subtitle Font**.
- 2. Select an option.
  - **Variable - Fixed**

# Installation

**Installation** menu allows you to configure your antenna and search the available TV and radio channels. You can configure the fixed antenna, SCD antenna or motor antenna with this receiver. LCN channels update, software update and default setting are also available in this section.

**MENU → Settings → Installation**

**Note:**

- You will be prompted to enter the password to access this menu. The default password is 0000. If you have forgotten your password, please contact your local distributor.
- Press the **BACK** button to save the changes and return to the previous screen. Press the **MENU** or **EXIT** button to exit.

## Changing Antenna Type

1. Press the **RED** button.
2. Select your antenna type.
  - **Fixed Antenna**
  - **SCD Antenna**
  - **Motor Antenna**
3. Select **OK** to save and exit.

**Note:** All channels will be deleted when the antenna type is changed.

## Search Channels [Fixed Antenna]

**MENU → Settings → Installation → Search Channels**

You can search channels by selecting the switch type and setting the required satellite.

**Note:** If the antenna is not properly set, channel search cannot be activated which means you cannot watch any of the programmes on air.

### Using LNB Switch Only

You can either connect to a single satellite (loop through) or two satellites.

When connecting loop through, the specified functions for 2 tuners will be not available.	This connection will allow you to view different channels while recording or record two channels at the same time.
	

# Installation

1. Select **Switch Type** and select **LNB Only**.
2. Select the satellite to configure the satellite setting options.
  - **Satellite:** Select the satellite. Select **User Define** to enter the options directly.
  - **LNB Frequency:** Set the LNB frequency.
  - **Test Transponder:** Configure the transponder setting.
3. Select **OK**.
4. Select **Search** and press the **OK** button.
5. Select **Save** and press the **OK** to save the results.

## Note:

- Select **Stop** and press the **OK** button to stop the channel search.
- Transponder is activated only when the satellite has been selected.

English

## Using DiSEqC Switch

You can either connect to a single satellite (loop through) or two satellites.

When connecting loop through, the specified functions for 2 tuners will be not available.

This connection will allow you to view different channels while recording or record two channels at the same time.

1. Select **Switch Type** and select **DiSEqC**.
2. Select the satellite to configure the satellite setting options.
  - **Satellite:** Select the satellite. Select **User Define** to enter the options directly.
  - **LNB Frequency:** Set the LNB frequency.
  - **22kHz Tone:** Select **On** when using two antennas connected to a 22kHz tone switch box.
  - **DiSEqC:** Select the DiSEqC switch.
  - **Test Transponder:** Configure the transponder setting.
3. Select **OK**.
4. Configure the next satellite if you have more than one satellite.
5. Select **Search** and press the **OK** button.
6. Select **Save** and press the **OK** to save the results.

### Note:

- Select **Stop** and press the **OK** button to stop the channel search.
- Transponder is activated only when the satellite has been selected.

# Installation

## Transponder List

The transponder setting is normally fixed. Change only when necessary.

1. Select **Transponder** in **Search Channels** to display the transponder list. You can also select **Test Transponder** in **Satellite Setting**.
2. Select the transponder option. Select **User Define** to enter the transponder setting options directly.
  - **Frequency:** Enter the frequency of the transponder.
  - **Polarisation:** Select the polarisation of the transponder.
  - **Symbol Rate:** Enter the symbol rate of the transponder.
  - **Transmission:** Select **DVB-S2** for HD broadcasts.
  - **Modulation:** Select **QPSK** or **8PSK** when selecting **DVB-S2** in **Transmission**.
  - **FEC:** Select the FEC of the transponder.
3. Select **OK**.

**Note:** Transponder is activated only when the satellite has been selected.

## Setting Search Options

1. Press the **OPT+** button.
2. Set the search options.
  - **Network Search:** Search transponders of all network
  - **Scrambled Search:** Free channel, CAS or all channels
  - **Channel Type:** TV, radio or all channels
3. Select **OK**.

## Search Channels [SCD Antenna]

**MENU → Settings → Installation → Search Channels**

**Single Cable Distribution** enables the delivery of broadcast programming over a single cable to multiple users eliminating the numerous cables required to support other electronics devices. If you are using more than one satellite receiver, set one receiver at a time and turn off the others while setting. Refer to the satellite antenna manual for details.

### Using SCD Antenna

1. Select **SCD Setting** and press the **OK** button.
  - **Tuner1:** Select from Channel 1~8.
  - **Frequency:** The frequency is set based on the channel of tuner1.
  - **Tuner2:** Select from Channel 1~8.
  - **Frequency:** The frequency is set based on the channel of tuner2.
2. Select **OK**.
3. Select the satellite to configure the satellite setting options.
  - **Satellite:** Select the satellite. Select **User Define** to enter the options directly.
  - **LNB Frequency:** Select the LNB frequency.
  - **Test Transponder:** Configure the transponder setting.
4. Select **OK**.
5. Select **Search** and press the **OK** button.
6. Select **Save** and press the **OK** to save the results.

# Installation

## Note:

- The channel and frequency of tuner1 and tuner2 should be different from each other.
- Select **Stop** and press the **OK** button to stop the channel search.
- Transponder is activated only when the satellite has been selected.
- Go to **Transponder List** for details in transponder setting.

## Setting Search Options

1. Press the **OPT+** button.
2. Set the search options.
  - **Network Search:** Search transponders of all network
  - **Scrambled Search:** Free channel, CAS or all channels
  - **Channel Type:** TV, radio or all channels
3. Select **OK**.

## Search Channels [Motor Antenna]

**MENU** → **Settings** → **Installation** → **Search Channels**

You can set the position of the satellites when using a motor antenna for efficient channel search.

### Motor Setting

1. Select **Motor Setting** and press the **OK** button.
2. Select **Motor Type**.
  - **DiSEqC1.2**: General motor antenna using DiSEqC 1.2
  - **USALS**: Motor antenna using USALS
3. Select **My Longitude** and enter the longitude and direction.
4. Select **My Latitude** and enter the latitude and direction.
5. Select **LNB Frequency** and enter the LNB frequency.
6. Select **OK**.

#### Note:

- When **Motor Type** is set as **DiSEqC 1.2**, both **My Longitude** and **My Latitude** are inactivated.

### Edit Satellite Data

You can set the position of the satellite that the motor antenna is pointing to.

1. Select **Edit Satellite Data** and press the **OK** button.
2. Select the satellite the motor antenna is pointing to.
3. When selecting **User Define**, enter the **Longitude** and **Direction**.
4. Press the **BACK** button to save and return.

**MENU** Menu On/Off

**Select**

**OK** Confirm

**Enter 0~9**

# Installation

## Position Setting

1. Select **Position Setting**.
2. Select **Satellite** and select the satellite.
3. Select **Transponder** and select the transponder.
4. Select **Motor Driving** and select the motor driving option.
  - **Continuous, Step, Time**

Select the **Driving Size** from **1~127** when choosing **Step** or **Time**.
5. Select **Go to Stored Position** to make the antenna turn toward the position of the selected satellite.
6. Select **Store Current Position** to save the adjusted position.
7. Select **Recalculate** to recalculate the position of the satellite based on one satellite.

## Limit Setting

Set the default setting and operation limit for the motor antenna.

1. Select **Limit Setting**.
2. Select **Limit Position** to set the limit position to East or West.
3. Select **Set Limit** to move the antenna to East or West.
4. Select **Reset Position** to restore the position saved at the motor antenna to the factory default.

## Setting Search Options

1. Press the **OPT+** button.
2. Set the search options.
  - **Network Search:** Search transponders of all network
  - **Scrambled Search:** Free channel, CAS or all channels
  - **Channel Type:** TV, radio or all channels
3. Select **OK**.

# Installation

English

## Search

1. Select **Search** and press the **OK** button.
2. Select **Save** and press the **OK** to save the results.

### Note:

- Select **Stop** and press the **OK** button to stop the channel search.
- Transponder is activated only when the satellite has been selected.

## Update LCN Channels

**MENU → Settings → Installation → Update LCN Channels**

### Updating LCN channel list

1. Select **Update LCN Channel List**.
2. The LCN channel list will be updated. If there is no channel to update, a message will appear.

### Changing LCN channel list

1. Select **Change LCN Channel List**.
2. The **LCN Channel List** will appear. Select the LCN channel list you want to apply.

## Software Update

**MENU → Settings → Installation → Software Update**

1. Select **Software Update**.
2. Select **Automatic Update** if you want to update the software according to the saved transponder.
3. Select **Manual Update** if you want to update the software by entering the options manually.
  - **Satellite**: Select the satellite. Select **User Define** to enter the options directly.
  - **Frequency**: Enter the frequency of the transponder.
  - **Polarisation**: Select the polarisation of the transponder.
  - **Symbol Rate**: Enter the symbol rate of the transponder.
  - **FEC**: Select the FEC of the transponder.

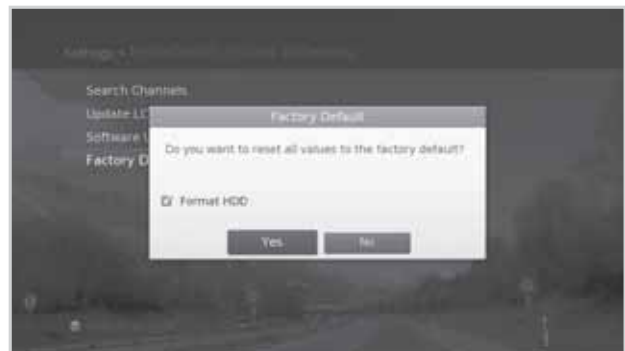

## Factory Default

**MENU → Settings → Installation → Factory Default**

1. Select **Factory Default**
2. A popup will appear. Select **Yes**.
3. You will be prompted to enter the password. Enter the password.

**Note:** To format the HDD, mark **Format HDD**.

## OTA (Over the Air)

In order to maintain proper performance of the product, it is essential to have the most up-to-date software. Visit the Humax website to check the latest news and newly released software versions. (<http://www.humaxdigital.com>) It is recommended that you periodically check for the availability of software update.

OTA, an abbreviation of **Over-the-Air**, is a standard for the transmission of software through a broadcast system. OTA is simply an alternative method for downloading software versions. However, the manufacturers reserve the right for deciding the release of the software for their products by beaming the latest software versions over the air via satellite. Note that OTA is only limited to certain geographical regions mainly due to different antennas having different footprints (area where the signal can be received). The software update via satellite will only occur under the following circumstances.

1. The equipment should have the appropriate loader software.

**Caution:** Please note that if the normal loader software is not equipped, the product may not be updated or operate properly after software update.

2. The manufacturer decides to release the software via a designated satellite.
3. The equipment must be tuned properly to the same antenna equivalent to that of the manufacturer.
4. Update software when the signal strength and quality is high. If the weather is not favorable, and the signal strength and quality are not recommendable, perform the software update later.

**Caution:**

- Please be careful to keep the power on and the power cord plugged in during software update. If the power is off during software update, fatal damage may be caused to the product.
- Please be careful not to pull out the signal line (LNB cable) during software update. Update may be interrupted and the product may not operate.

**Note:**

- It may take 5~10 minutes to update software.
- Other functions will not activate while software update takes place.
- You cannot schedule programmes during software update.

## Updating New Software

When new software is detected, you can choose to download the software immediately or later.

- **Yes:** Update the software now.
- **No:** Ignore the message.
- **Later:** Message will reappear next time you power on.

If you select **Later**, you can have the software downloaded during standby. Note that all functions will be disabled during software update.

# System

In **System**, you can view the information of the system, signal detection, Smartcard, CI-Module and data storage. Power management, TVTV EPG and network options are also available in this section.

**Note:** Press the **MENU** or **EXIT** button to exit. Press the **BACK** button to return to the previous screen.

## System Information

**MENU → Settings → System → System Information**

The system information is displayed.

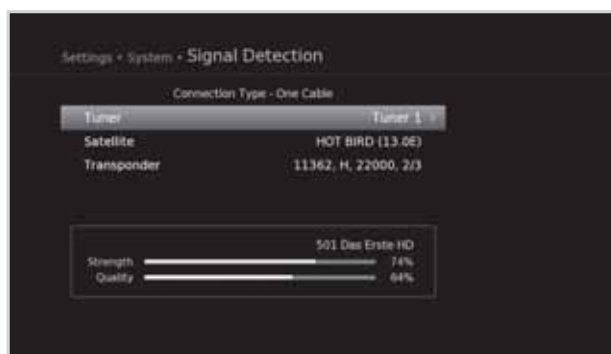

## Signal Detection

**MENU → Settings → System → Signal Detection**

You can check the signal strength and quality of the searched channels.

Select a tuner, satellite or transponder you want to check.

**Note:** This menu will not activate while recording.

## Power Management

**MENU** → **Settings** → **System** → **Power Management**

You can minimise the standby power consumption to below 1W.

Select **On** to turn off the LCD and minimise the power consumption.

## TVTV EPG

**MENU** → **Settings** → **System** → **TVTV EPG**

You can choose to receive the TVTV EPG data.

- 1 Select **TVTV EPG** and select **On**.
- 2 Select **Update Time**.
- 3 Select an option.
  - **Standby**: The TVTV EPG data is updated during standby.
  - **Set Timer**: Enter the specific update time manually

### Note:

- The TVTV EPG update time and power on time should be set different from each other.
- Go to **TV Guide > Highlights** for details.

# System

## Common Interface

**MENU → Settings → System → Common Interface**

The common interface information is displayed.

## Smartcard

**MENU → Settings → System → Smartcard**

The smartcard information is displayed.

## Data Storage

**MENU** → **Settings** → **System** → **Data Storage**

You can check the size of the internal HDD or external USB storage device.

- 1 Select **Internal HDD** or **USB** to display the details for each storage.
- 2 To format the selected storage, select **Format Storage**. If you select **Yes**, you will be prompted to enter the password.

### Note:

- The default password is 0000. If you have forgotten your password, please contact your local distributor.
- Features according to USB format
  - **EXT3**: Record, ready, copy(MP3, JPEG, Xvid)
  - **FAT**: Read, copy (MP3, JPEG, Xvid)
  - **NTAS**: Read, only (MP3, JPEG, Xvid)

Menu On/Off

Select

Confirm

Enter 0~9

# System

## Network

**MENU → Settings → System → Network**

### Configuring Wi-Fi (wireless)

1. Select **Configure Wi-Fi**.
2. The wireless LAN network list will appear. Select your Wi-Fi network and press the **OK** button.
3. If your Wi-Fi network is not listed, select **Input network name** and enter the name in the keyboard.
4. Configure the Wi-Fi setting options.
  - **Network Name:** The Wi-Fi network name
  - **Security Type:** The Wi-Fi security type
  - **Password:** The Wi-Fi password.

### Configuring IP (LAN)

1. You can configure the Ethernet setting options.
  - **DHCP:** Apply the options according to the DHCP.
  - **Manual:** Enter the options manually,

Select **Apply** and press the **OK** button.

#### **Note:**

- When entering the IP address manually, enter 3 digits in a row.
- The network is connected by LAN when both WiFi and LAN are activated.
- HUMAX recommends the network connection over a direct LAN or the HUMAX powerline AV adaptor.

## Specification

Tuner & Channel	
No. of Tuners	2
Input Connector	F-Type, IEC 169-24, Female
Frequency Range	950MHz to 2150MHz
Signal Level	-25 to -69dBm
LNB Power & Polarisation	Vertical : +13.5V (+14.5V at high voltage) Horizontal : +18.3V (+19V at high voltage) Current : Max. 500mA (Overload protection)
22KHz Tone	Frequency : $22 \pm 4$ KHz Amplitude : 650mV $\pm$ 250mV
DiSEqC Control	Version1.0, 1.2, USALS
Audio/Video Decoding	
Audio Decoding	MPEG/MusiCam Layer I & II, Dolby Digital, Dolby Digital Plus
Audio Mode	Single channel/Dual channel/Joint stereo/Stereo
Video Decoding	MPEG-2 ISO/IEC 13818 H.264 AVC Transport Stream Specification
Video Format	4:3, 16:9
Video Resolution	1080i, 720p, 576p, 576i
Memory	
Flash Memory	32MB
RAM	320MB
EEPROM	8KB
Audio/Video In/Out	
Video	TV-SCART, VCR-SCART, RCA, HDMI/HDCEP
Audio	TV-SCART, VCR-SCART, Audio L/R, S/PDIF (Digital Audio Output)
Data In/Out	
USB	USB 2.0 Host (5 V = 500, 250mA Max.)
RJ-45	Ethernet 10/100Mbps
Hard Disk	
HDD	320/500/1024GB

# Appendix

---

Power Supply	
Input Voltage	90-250V a.c., 50/60Hz
Type	SMPS
Power Consumption	Max. 50W (Standby: Max.1W)
Protection	Separate internal fuse. The input should be protected against lightning.
Physical Specification	
Size (w/h/d)	380mm×55mm×252mm
Weight	3.55kg
Operating Temperature	0 °C to +45 °C

**Note:** The specifications are subject to change without notice.

## Service and Support

Information concerning troubleshooting, software upgrade and product support is provided in the following websites and call centers. Should your product require warranty service, please contact HUMAX to obtain the appropriate authorization.

## Safety Warning

This product has been manufactured to comply with international safety standards. Please read the following safety precautions carefully.

### Safety Instructions and Precautions

#### 1. MAINS SUPPLY

- Operate this product only from the type of power supply indicated on the marking label. If you are not sure of the type of power supplied to your home, consult your local power company.
- Disconnect the product from the mains before you start any maintenance or installation procedures.

#### 2. OVERLOADING

- Do not overload a wall outlet, extension cord or adapter as this may result in electric fire or shock.

#### 3. LIQUID

- The product should not be exposed to liquid of any kind. In addition, no objects filled with liquid should be placed on the apparatus.

#### 4. CLEANING

- Disconnect the product from the wall outlet before cleaning.
- Use a light damp cloth (no solvents) to dust the product.

#### 5. VENTILATION

- The slots on top of the product must be left uncovered to allow proper airflow into the unit.
- Do not stand the product on soft furnishings or carpets.
- Do not stack electronic equipments on top of the product.

#### 6. ATTACHMENTS

- Do not use any unsupported attachments as these may be hazardous or cause damage to the product.

#### 7. LIGHTNING, STORM OR NOT IN USE

- Unplug the product from the wall outlet and disconnect the antenna during a thunderstorm or when left unattended and unused for long periods of time. This will prevent damage to the unit due to lightning and power-surges.

#### 8. EXTRANEIOUS OBJECTS

- Do not insert anything through the openings in the unit, where they can touch dangerous voltage points or damage parts.

#### 9. REPLACEMENT OF PARTS

- When replacement of parts is required, be sure the service technician uses replacement parts specified by the manufacturer or those that have the same characteristics as the original part. Unauthorized substitution may result in additional damage to the unit.

#### 10. CONNECTION

##### [Satellite] CONNECTION TO THE SATELLITE DISH LNB

- Disconnect the product from the mains before connecting or disconnecting the cable from the satellite dish. Failure to do so can damage the LNB.

##### [Cable] CONNECTION TO THE CABLE TV SIGNAL

- Connect all components before plugging any power cords into the wall outlet. Always turn off the product, TV and other components before you connect or disconnect any cables.

##### [Terrestrial] CONNECTION TO THE AERIAL

- Disconnect the product from the mains before connecting or disconnecting the cable from the aerial. Failure to do so can damage the aerial.

## 11. CONNECTION TO THE TV

- Disconnect the product from the mains before connecting or disconnecting the cable from the TV. Failure to do so can damage the TV.

## 12. EARTHING

[Satellite] The LNB cable must be earthed to the system earth for the satellite dish.

## 13. LOCATION

- Place the product indoors to avoid exposing it to lightning, rain or sun. Do not place it near a radiator or heat register.
- We recommend that the product has 10 cm clearance from any other appliances susceptible to electromagnetic influences, such as a TV or a VCR.
- Do not block the openings with any object, and do not place the product on a bed, sofa, rug, or other similar surface.
- If you place the product on a rack or a bookcase, ensure that there is adequate ventilation and that you have followed the manufacturer's instructions for mounting.
- Do not place the product on an unstable cart, stand, tripod, bracket, or table where it can fall. A falling product can cause serious injury to a child or adult, and serious damage to the appliance.

## Warning

### 1. To avoid damage of the power cord or plug;

- Do not modify or process the power cord or plug arbitrarily.
- Do not bend or twist the power cord.
- Make sure to disconnect the power cord holding the plug.
- Keep heating appliances as far as possible from the power cord in order to prevent the cover vinyl from melting.
- The mains plug, as a disconnection device, shall remain readily accessible by the user.

### 2. To avoid electrical shock;

- Do not open the main body.
- Do not insert metal or inflammable objects inside the product.
- Do not touch the power plug with wet hands.
- Disconnect the power cord in case of lightning.

### 3. To avoid damage of product;

- Do not use the product when it is out of order. If you continue to use the product when defective, serious damage can be caused. Make sure to contact your local product distributor if the product is out of order.
- Do not insert metal or alien substance into the slots for the modules or Smartcards. (where applicable) It may cause damage to the product and reduce its life span.

### 4. To avoid damage of the hard disk drive (PVR only)

- Do not move the product or turn the power off suddenly while the hard disk drive is running.
- The company shall not be liable for any corruption of data on the hard disk drive caused by carelessness or misuse.

# Appendix

---

## Trouble Shooting

Before contacting your local service centre, please read the tips below carefully. If the problem persists after completing the following procedure, please contact your local product distributor or service centre for further instructions.

### 1. No message displayed on the front display. (The product will not switch on.)

- Check the main power cable and make sure it is plugged into a suitable power outlet.
- Check that the mains supply is switched on.
- Connect the power cable to a different power outlet.
- Check that the power switch is on at the rear of the product. (where applicable)

### 2. No picture

- Make sure that the product is powered on and in operation mode. (Press the **STANDBY** button)
- Make sure that the AV cable is firmly connected to the TV.
- Make sure that the antenna cable is properly connected to the product.
- Be sure to activate channel search.
- Check the brightness level of the TV.
- Check if the channel is currently on air. Contact the broadcaster to ensure that the channel is running.
- Press the SOURCE button if the product is in external input mode. (where applicable)
- **Satellite:** Make sure that the antenna setting in the menu is correct.

### 3. Poor picture/sound quality

- Install the antenna in an obstacle-free place.
- Make sure there is no mobile phone or microwave oven near the product.
- Keep the power and the antenna cables apart from each other.
- Check the signal levels and adjust your antenna if the level is too low. The signal level may be affected by weather conditions.

**Note:** If the antenna is covered with snow or the RF is weakened by heavy rain, the condition of the sound and picture may temporarily be poor. However, the poor sound and picture quality due to weather conditions cannot be accepted as a malfunction of product.

- **[Satellite]** Check that your dish alignment is correct.
- **[Satellite]** Change the satellite dish for a larger one as this will increase the signal levels received.
- **[Satellite]** Replace the LNB with a lower noise factor in cases where the noise factor is too high.
- **[Satellite]** Replace the LNB with a new one in case it is damaged or out of order.
- **[Terrestrial]** Adjust the antenna direction to get a better picture.
- **[Terrestrial]** Set the antenna power in menu to On, if you use the active antenna to improve the reception. (where applicable)

### 4. No or poor sound

- Check that your AV cable is connected correctly.
- Check the volume levels of your TV set and the product.
- Check if the product or TV is on mute.
- Check audio type or soundtrack option in the AV menu. (where applicable)

### 5. Remote control does not operate.

- To control the product, the top end of the remote control should point directly towards the receiving part of the product.
- Remove and reinsert the batteries in the remote control.
- Replace the batteries in the remote control for a new set.
- Set the remote control to STB or PVR mode, if you are using the universal remote control. (where applicable)

## **6. Cannot make reservations.**

- Check that no previous reservations are conflicting with the new reservation.

## **7. No password information is given.**

- The default password is always **0000**.

## **8. Channel search does not work.**

- **Satellite:** Make sure that the antenna setting in the menu is correct.
- **Terrestrial:** Make sure that the antenna is connected correctly.
- **Terrestrial:** Use the appropriate antenna capable of receiving VHF or UHF channels for your area.

## **9. Cannot update new software.**

- You can get an update. If the product does not show a message requesting update, this means no software is available.

## **10. Cannot watch scrambled channels.**

- Check that you have the appropriate Smartcard or CI-Module. Reinsert the Smartcard or CI-Module and make sure it initialises correctly.
- Check in the menu that the product is detecting the Smartcard or CI-Module.
- Check in the menu that you have a valid and working subscription to the channels you wish to view.
- Ensure that the Smartcard or CI-Module is not damaged.

## **11. Cannot watch pay channels.**

- Check in the menu that you have a valid and working subscription to the channels you wish to view.
- Contact your network operator for more information.

## **12. The product makes a humming noise.**

- The noise is from the fan; the hard disk is operating normally. This kind of noise is inevitable but seldom noticeable.

## **13. Cannot record programmes. (PVR only)**

- The hard disk is full. Delete unnecessary programmes and make space for new recording.
- Check if recording is overlapped with another channel. Stop the current recording or wait until the recording is finished.
- Check that the product is switched on when recording starts.

## **14. Cannot operate TSR (Time Shifted Recording). (PVR only)**

- TSR may not be available during recording. Wait until recording is finished.
- Delete unnecessary programmes and make space for new recording.

## **15. Cannot playback. (PVR only)**

- To playback the recorded file of a scrambled channel, use the Smartcard. In case it has been a long time since you last recorded, this may not work. Contact the product distributor.
- The signal during recording may be weak or the hard disk too full.

## **16. Cannot change channels while recording. (PVR only)**

- Certain channels may not be changed due to restriction of the tuner or connection type.

# Appendix

## Error Message

Error message	Possible causes	What to do
<b>No or bad signal [Satellite]</b>	The satellite dish is not pointing at the satellite.	Adjust dish alignment.
	Signal is too weak.	Increase the LNB voltage or connect a signal amplifier.
	Satellite dish is too small.	Change to a larger dish.
	Problem with LNB.	Change the LNB.
	Wrong antenna setting.	Set the antenna correctly.
<b>No or bad signal [Cable]</b>	The cable is not connected.	Make sure the cable is connected correctly.
	The cable may be damaged or defective.	Exchange the cable.
	The channel is not broadcasting.	Exchange the cable.
<b>No or bad signal [Terrestrial]</b>	The aerial is not pointing properly.	Adjust aerial. Check the cable from the aerial. If you cannot resolve the problem, you may need to have your aerial and installation tested by a professional.
<b>The channel is scrambled or not available.</b>	The channel has a signal, but no audio or video.	Confirm if the channel is currently on air.
	The channel has been deleted by the broadcasting company.	Check if the channel is currently on air
	The channel is for data broadcasting.	Remove the channel from the channel list and check for new transponder details.
<b>The audio is not available.</b>	The channel has a video signal, but no audio.	Press the audio button to confirm that the channel has audio options.
<b>No access</b>	No access	Make sure you are subscribed to the channel.
	No authorization.	If the product has been turned off for a long time (standby or power off), please wait for authorization. It may take up to 60 minutes.
<b>No card inserted.</b>	Smartcard is not inserted.	Insert Smartcard.

# Appendix

English

Error message	Possible causes	What to do
<b>Incorrect card</b>	Wrong Smartcard is inserted.	Insert the correct Smartcard.
	Smartcard is not inserted correctly.	Remove the Smartcard and reinsert it.
	Smartcard is damaged.	Contact your Smartcard retailer or channel broadcaster for a Smartcard replacement.
<b>CI-Module not installed.</b>	CI-Module is not inserted.	Insert CI-Module.
	CI-Module is not inserted correctly.	Remove the CI-Module and reinsert it.
	CI-Module is not recognized.	Insert a different CI-Module to check if your existing module is working.
<b>Invalid CI-Module</b>	Wrong CI-Module.	Insert the correct CI-Module.
	CI-Module is damaged.	Replace the CI-Module.
<b>Short LNB [Satellite]</b>	LNB cable is short.	Replace LNB cable.
	LNB is internally short.	Replace LNB.
	Alien substance is inserted in the LNB IN port. The port may be damaged.	Remove the alien substance and contact the local service centre in case damaged has occurred.

# Appendix

---

## Glossary

### **CVBS (Composite Video Baseband Signal)**

A technology for transmitting video signals via a cable. Mixes luminance (brightness) and the chrominance (colour) signals together.

### **DiSEqC (Digital Satellite Equipment Control)**

A DiSEqC compatible receiver relies on a switching box which detects the 22kHz tone pulsing rapidly on and off. In this way, a specially designed receiver can control numerous LNBs through a DiSEqC switching box.

### **Dolby Digital**

An encoding system that digitally compresses up to 5.1 discrete channels of audio (left front, centre, right front, left surround, right surround) into a single Bitstream. A low frequency effect (LFE) channel is included providing the sound needed for special effects.

### **DVB (Digital Video Broadcasting)**

Set of standards that define digital broadcasts using satellite, cable or terrestrial systems.

### **EPG (Electronic Programme Guide)**

An electronic equivalent to a printed television listings magazine; it is an application used with digital set-top boxes and digital television sets to list current and scheduled programs that are or will be available on each channel, including a short summary or commentary for each program. The information supplied in the EPG is sent and updated by the channel broadcaster.

### **FEC (Forward Error Correction)**

A technique for error control of data transmission.

Frequency

The property of a signal measured in cycles per second (=Hz).

### **FTA (Free- To-Air)**

An unscrambled broadcaster allowing customers to view channels or services without paying any subscription.

### **HDD (Hard Disk Drive)**

The primary computer storage medium, which is made of one or more aluminum or glass platters, coated with a ferromagnetic material.

### **Hi-Fi (High Fidelity)**

The characteristics of audio devices that can play back all the audio frequencies a person can detect, which is the range of 16Hz-20KHz. Sometimes it is used to indicate good quality of audio devices such as stereo tape recorders.

### **LNB (Low Noise Block)**

A device that is mounted on an arm facing your satellite dish, focusing on satellite signals. A LNB converts signals received from satellite to a lower frequency and sends them to a satellite receiver via coaxial cable.

### **NVOD (Near Video On Demand)**

A technology that allows customers to view the start of popular programmes or films within a short period from the time they make their selection. This is possible as the broadcaster sends multiple copies with staggered start times.

### **OSD (On Screen Display)**

OSD displays the basic information necessary for the users to configure monitor or TV settings. OSD information may include brightness, contrast, tuning, RGB adjustment, and screen size and position.

### **OTA (Over the Air)**

A standard for the transmission of software for equipment, through a broadcast system. Manufacturers reserve the right for deciding the release of the software for their products.

### **PID (Packet Identifier)**

A set of numbers identifying stream packets contained within a single data stream.

### **PIP (Picture In Picture)**

A function that allows you to display two different TV channels (or TV inputs) on a single screen.

**Polarisation**

The direction of the electrical and magnetic fields of a signal. Satellites use both vertical and horizontal polarisation. Means that a frequency can be used twice.

**PVR (Personal Video Recorder)**

Video recorder that can record and playback programmes directly using the embedded hard disk drive(s).

**QPSK (Quaternary Phase Shift Keying)**

Digital modulation technique in which the carrier phase can have one of four possible values.

**RF (Radio Frequency)**

Television signals are modulated onto RF signals and are then demodulated by your television's or STB's tuner.

**RF Modulator**

Enables you to output the receiver's digital signals to a TV's RF (Aerial) input, allowing you to connect the receiver to a TV set without a SCART connection.

**RGB (Red – Green – Blue)**

A technology for transmitting video signals via a cable. RGB is a system to represent red, green, and blue colours on a TV or monitor display. Red, green, and blue can be combined in various proportions to obtain any colour.

**RS-232C**

A connection to allow you to connect to a PC to update receiver's software.

**SCART**

A 21-pin connector standard to connect two pieces of Audio-Visual equipment such as a TV and a VCR. Each device will have a 21-pin female connection; a cable with male connection at both ends is used for connecting the devices.

**Smartcard**

A credit card sized card that contains updateable chip memory. It is used for accessing Pay TV (encrypted) channel or services when inserted into an appropriate receiver.

**S/PDIF (Sony/Philips Digital Interface format)**

A standard format for the transfer of digital audio signals. It allows the transfer of digital audio between two devices without any conversion to and from analogue, which could degrade the signal quality.

**S-Video (Super-Video)**

Sometimes referred to as Y/C video; a technology for transmitting video signals via a cable. It is a video signal transmission in which the luminance (brightness) and the chrominance (colour) signals are transmitted separately to achieve superior picture clarity.

**Transponder**

A satellite is divided up in parts called transponders. A transponder is one distribution section of the satellite. Each transponder can be used for distribution of several channels or services.

**Trick-Play**

Pause, Fast Forward/Fast Rewind, Slow Motion, Instant Replay, Commercial Skip, Repeat A-B.

**TSR (Time Shifted Recording)**

A function that records the present programme temporarily to support trick-play.

# Appendix

## Remote Control Code List

### Using the Universal Remote Control

1. Select the mode(PVR, TV, DVD, AUDIO) you want to set by pressing the corresponding button on the remote control. The button will blink once.
2. Keep pressing the button for 3 seconds until the button lights on.
3. Enter the 4-digit code. Every time a number is entered, the button will blink. When the fourth digit is entered, the button will blink twice.
4. If a valid 4-digit code is entered, the product will power off.
5. Press the **OK** button and the mode button will blink three times. The setup is complete.
6. If the product does not power off, repeat the instruction from 3 to 5.

**Note:**

- When no code is entered for one minute the universal setting mode will switch to normal mode.
- Try several setting codes and select the code that has the most functions.

### Remote Control Function List

The keys on the remote control function as in the list below.

**Note:** Some keys may not function depending on the product.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things. To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
  - a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
  - b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
  - c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:
  - a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
  - b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
  - c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they

# Appendix

do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the “copyright” line and a pointer to where the full notice is found.

One line to give the program’s name and a brief idea of what it does.

Copyright (C) yyyy name of author

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items- whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

## **GNU Lesser General Public License (LGPL)**

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

### **Preamble**

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a

# Appendix

combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the “Lesser” General Public License because it does Less to protect the user’s freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users’ freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a “work based on the library” and a “work that uses the library”. The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called “this License”). Each licensee is addressed as “you”.

A “library” means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The “Library”, below, refers to any such software library or work which has been distributed under these terms. A “work based on the Library” means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term “modification”.)

“Source code” for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library’s complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
  - a) The modified work must itself be a software library.
  - b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
  - c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
  - d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library,

and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a “work that uses the Library”. Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a “work that uses the Library” with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a “work that uses the library”. The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a “work that uses the Library” uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a “work that uses the Library” with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer’s own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable “work that uses the Library”, as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user’s computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

# Appendix

---

For an executable, the required form of the “work that uses the Library” must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:
  - a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
  - b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.
8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.
10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.
11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.> Copyright (C) year name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.
