把洗衣機放置在適當的安裝地方。

- Make adjustment according to the following steps if the washing machine is not put on a flat horizontal surface or there's gap under the leg:
  如果洗衣機放置得不平、機腳下有間隙，可按照下述步驟調節：
- Heighten the adjustable leg till no gap exists at its side.
  可調機腳一側有間隙時，調高可調機腳，消除間隙。
- If there's gap opposite to the adjustable leg, make the rear leg stand closely on the ground, and insert proper plank between the front leg and the ground to fill up the gap.
  可調機腳的對面一側有間隙時，讓後側的腳著地，用適當的板材鋪墊在前側的腳與地面之間，消除間隙。

2 Check the bubble location on the horizontal indicator.
檢查水平指示器的氣泡位置。

- No leg adjustment is required if the bubble is right at the circle center.
  如果氣泡正好在圓圈的中央，腳就不需要調節。

The following cases are not the failures
以下現象並非故障

| Case 現象		Cause 原因
About the water charging **關於供水**	Supply water during the course of washing 洗衣過程中供水	• Supply water automatically if the water level drops during the course of washing. 洗衣過程中若水位下降，便會自動補水。
	The water can no be charged when starting washing form rinse. 從沖洗開始洗衣時，無法供水	• The rinse water can only be charged after drainage and spinning. 排水和脫水之後才開始進沖洗用水。
	After connecting the water supply pipe, water will come in from the water supply opening if turning on the tap 供水管連接後，打開水龍頭，有水從供水口處流出	• With the application of decompression valve, the close of valve needs certain duration. 由於採用了減壓閥，閥門關閉需要一定的時間。
	The pulsator stop rotating during the charging for about 1 minutes. 供水過程中攪拌翼停止旋轉，供水停止約1分鐘	• It may be influenced by outside interference, and it takes some time for the sensor to detect the interference. 可能受到了外來乾擾的影響，而傳感器檢測乾擾需要一定時間。
About the sound **關於聲音**	"Rustle" happens as rotating the washing basket by hand 用手轉動洗衣槽，發出"沙沙"聲音	• The sound comes from the water flow in the liquid balance used to relieve the spinning vibration. 這是降低脫水振動的液體平衡器中水流的聲音。
	It sounds "Karcha" at the beginning of washing or spinning. 洗衣或脫水開始時發出"卡嚓"聲音	• That is generated during the mode switch of the clutch (the strength of the sound varies with the sound duration) 這是離合器進行模式切換時的聲音。 (聲音大小隨發生時間而變化)
	It buzzes during the operation. 運轉過程中發出"嗡—"或"嗡嗡"聲音	• That is the electromagnetic sound of the motor switched on and off. 這是電機通斷電或電閘的電磁音。
	It buzzes or sounds "Hoola, hoola" during the high-speed washing or spinning. 高速洗滌或脫水過程中發出"嗡—"或"嘩啦嘩啦"聲音	• That is the electromagnetic sound of the motor switched on and off to control the rotating speed. 這是爲了控制脫水轉速而給電機通斷電所發出的聲音。
About the rinse **關於沖洗**	Saving sprinking rinsing turns into water storing rinse. 慳水噴淋沖洗變爲儲水沖洗	• It is because the clothes oblique cause the action of the security switch. 由於衣物偏斜導致安全開關動作的緣故。
	When the washings is not much, water can't be poured over the clothes in economy sprinking rinising mode. 洗衣量較少時，慳水沖洗無法將水澆到衣物上	• It doesn't matter that the water is hard to be poured over the clothes since there are not much washings. 洗衣量較少時，雖然難以將水澆到衣物上，但沖洗功能並無問題

Case 現象		Cause 原因
About the spinning 關於脫水	Supply water during the course of spinning 脫水過程中供水	• The security switch acts as the laundry declines. Change automatically to the next rinsing. 由於衣物偏斜導致安全開關動作的緣故。 直接進入下一次沖洗。
	Supply water and start rinsing during the course of spinning 脫水過程中開始供水並沖洗	• The security switch acts as the laundry declines. Start spinning and agitating after rinsing, and the spinning will go on after clearing the laundry declination. 由於衣物偏斜導致安全開關動作的緣故。 沖洗後進行脫水和攪拌運轉，消除衣物偏斜後還會繼續脫水。
	Spin intermittently after start spinning 脫水開始後，間歇性地脫水	• It is because the sensor control the spinning times to improve the efficiency of spinning. 這是為提高脫水效率，由於傳感器控制脫水次數的緣故。
	The lid can't be opened even when the suspend button is pressed during the spinning. 脫水過程中，即使按下暫停按鈕也無法立即打開機蓋	• When the power supply is cut off, the basket stops completely, and the lid lock will be unlocked. 當斷開電源，脫水槽完全停止下來後，機蓋鎖定將被解除。
	The power supply switch won't work right away even when the ON/OFF button is pressed during the spinning. 脫水過程中即使按下電源開關按鈕，電源開關也不會立即起作用	• The power supply switch won't work until the basket stops the inertial rotation. 直到脫水槽的慣性旋轉停止後，電源開關才會起作用。
About the water drainage pump 關於排水泵	During the period of water drainage, the water drainage pump start to work, and there is water drained out from the water drainage hose. 供水過程中，排水泵開始工作，排水管中有水排出	• This is to prevent overflow. The water drainage pump starts automatically when the preset alarming level is exceeded. 這是為了防止溢水。 當超過設定的預警水位時，排水泵自動啟動。
	It sounds like asthma when the water drainage pump start to work. 排水泵排水時，有類似哮喘的聲音	• This is because the water in the washer is going to to be drained off, resulting in the entry of air into the chamber of the water drainage pump. 這是因為洗衣機中的水即將排完，使空氣進入了排水泵的腔體內。
About the water level 關於水位	Relatively low water level compared with the washings load 水位相對於洗衣量較低	• The setting of the water level is based on the extent of the washings in the washing machine emerging out the water surface and the ability of the clothes roll up and down in the washing machine. 洗衣機以衣物稍微露出水面為依據設定水位，由攪拌翼攪拌衣物可以上下翻動。 • Since the clothes of chemical fiber is comparatively light, the water level is set accordingly low. 由於化學纖維、聚脂纖維等衣物較輕，因此水位設定也較低。
	Relatively high water level compared with the washings load 水位相對於洗衣量較高	• The water level will rise during washing if the clothes being washed have been drenched or water has been charged in advance. 洗滌已濕透的衣物或洗衣槽中事先放了水時，洗衣時水位會較高。
About the lint filter 關於棉絮過濾器	There are much floss 棉絮較多時	• If there is much floss in "NORMAL" mode, the efficiency of the floss filtering can be improved by increasing the water consumption, extending washing time and setting rinse for twice. 標準程序中出現較多棉絮時，可用提高水位，延長洗衣時間和設定2次沖洗等方法提高過濾棉絮的效率。
About the washing duration 關於洗衣時間	Washing doesn't finish beyond the predefined time 超過設定時間洗衣仍未結束	• The washing time may exceed predefined time in case of extremely small amount of charged water. 供水位很少的情況下，洗衣時間有可能超過預約時間。

| Case 現象		Cause 原因
About the drying time 關於乾燥時間	Spinning doesn't finish beyond the predefined time 超過設定時間乾燥仍未結束	• The predefined time is the time for drying spinning, and the actual operation time need to plus the clothes dressing and oblique correction time, which, in aggregation, will be longer than the predefined time by 5~30 minutes. 設定時間是進行乾燥脫水的時間，實際運轉時間還要加上理順衣物和糾正衣物偏斜的時間，大概比設定時間延長5至30分鐘。
About the final drying 關於最後乾燥	Insufficient drying 乾燥不充分	• The dried level varies with the change of the quantity of the clothes, air temperature, seasons and installation environment. 乾燥量隨衣物的量和種類、氣溫濕度、季節和安裝環境等因素變化而改變。
About the power switch 關於電源開關	The power supply switch won't work right away when transferred from switched-off to switched on. 電源開關由"斷開"轉換到"接通"時，可能不會立即起作用	• The power supply switch doesn't work from the cutoff of the switch to the extinguishment of the mode LED. If the power supply is to be switched on again, please press the switch after the LED extinguish. 從切斷電源開關到程序指示燈熄滅爲止，電源開關不起作用。若要再次接通電源，請待指示燈熄滅後再按下電源開關。
	The indicating LED won't light right away when the power supply switch is switched on. 電源開關"接通"後，指示燈不會立即點亮	• The washing machine sound "Hoola, hoola" after the power supply is switched on. About 1 second later, the LED light. (since the software switch is used, the microcomputer need time for internal treatment. 接通電源開關後，洗衣機發出"嗶嗶"的聲音，大約1秒鐘後指示燈點亮。(由於使用軟件開關，而微電腦進行內部處理需要時間)
	Four modes LED light after the power supply switch is switched off. 電源開關"斷開"後，4個程序指示燈點亮	• When switching off the power supply with the drainage valve opened, the drainage valve is closed, and the mode LED light. 排水閥開啟狀態下切斷電源開關時，排水閥關閉，同時程序指示燈點亮。
	It buzzes after the power supply switch is switched off. 電源開關"斷開"後，發出"嗡嗡"的聲音	• The operation stops after the power supply is switched off during the spinning, and it buzzes. That's the sound generated during switching of the modes by clutch. 脫水過程中切斷電源開關後，運轉停止並發出"嗡嗡"聲。這是離合器進行模式切換時的聲音。
About the lid lock 關於機蓋鎖定	The lid can't be opened even when the suspend button is pressed during the spinning. 脫水過程中，即使按下暫停按鈕也無法立即打開機蓋	• After the power supply is cut off, the spinning basket stops completely, and the lid lock will be unlocked. 當斷開電源，脫水槽完全停止後，機蓋鎖定將被解除。
About the flavor 關於氣味	Odor of msulating varnish smells in the beginning of use. 初期使用時有氣味	• This is the odor of the insulating varnish of the motor in the beginning of use. The odor exists only at the early stage, and will dissappear about 1 week after put into application. 這是初期使用時從電機中的絕緣漆產生的氣味。該異味僅存在於初期，使用約1周後氣味會自動消失。
	It smells at the time of spinning 脫水時有氣味	• Adverse drainage condition or excessive foams (due to excessive detergent) may cause too much spinning load and make the smell even more intensive. 排水條件惡劣或泡沫過多(因放入過多洗衣劑等)會造成脫水負荷過大，使得氣味更加強烈。
Others 其他	Pulsator rotates but does not display the washings load and water quantity after pressing the start button. 按下啟動按鈕後，攪拌翼轉動但沒有顯示洗衣量和水位	• This is because the sensor can not successful detect due to the foreign interference. At that time, the power supply can be cut off and the washing machine is to be restarted. 這是由於外來乾擾的影響而導致傳感器無法正確檢測造成的。此時可切斷電源，然後再次啟動。
	No reaction after starting 啟動後無動作	• This is because the washing machine is waiting for detergent or is switching the clutch. 這是由於洗衣機在等待放入洗衣劑或正在進行切換離合器。
	There are detergent residue remained on the detergent dispenser. 洗衣劑殘留在洗衣劑加入盤	• When the body is excessive oblique, the detergent may remain on the dispenser. Please check the obliquity of the body. 當機體過度傾斜時，洗衣劑可能會殘留在洗衣劑加入盤。請檢查機體的傾斜程度。
