## JABRA GN9350e

Pure wireless freedom.  
Dual function.

The Jabra GN9350e is the ultimate example of wireless headset functionality. This headset has several industry firsts: the first to offer

full convergence between traditional and IP telephony, the first to provide DSP enhanced sound clarity and the first to offer IP telephony with wideband audio. The dual-function Jabra GN9350e wireless headset provides high performance in both traditional and PC-based telephone environments. That means you can expand – or even change – your telephone system without having to purchase new headsets.

The new GN9350e offers an improved microphone that reduces wind noise to enhance call clarity and new materials provide a more comfortable fit. It expands your communications potential with a wireless range of up to 350 feet and conference call capability. The GN9350e provides all the benefits of hands-free mobility in a lightweight headset and helps “future proof” your business.

## JABRA GN9330e

Talking has never  
sounded this good.

The GN9330e wireless office headset is designed to enhance the way you work. Free yourself from your desk, and experience greater comfort and increased productivity.

Headsets have never been so easy to use. The Jabra GN9330e headset connects effortlessly and quickly to your telephone. Intuitive headset controls make it easy to operate. With an enhanced design, improved materials and weighing less than an ounce, the GN9330e is so comfortable you'll forget you are even wearing it.

With a range of up to 325 feet, you can take your calls throughout your office. The Jabra GN9330e allows you to escape the limitations set by your conventional telephone handset, providing hands-free mobility, all-day comfort and superb sound clarity.

# Office

MORE PRODUCTIVITY, MORE RESULTS,  
IN COMFORT AND STYLE.

## JABRA GN9120-EHS

Freedom and productivity.

The Jabra GN9120-EHS is a wireless headset that works the way today's in-office professionals work. Offering an unbeatable range of personal mobility in the office, a robust talk time and a host of innovative features and benefits, the revolutionary Jabra GN9120-EHS gives complete wireless freedom in the office.

The unique four-way conference call feature lets you hold fully mobile, secure conference calls. You are not restricted to a meeting room and not subjected to the distortion of speaker phones. And, the GN9120-EHS comes with a choice of three different boom arms, equipped with different microphones to suit quieter or louder office environments.

The GN9120-EHS is also available with dual ear pieces, making it ideal if you work in an open, noisy office. It covers both ears, allowing you to focus on your conversations.

## JABRA GN1000 RHL

Pick up – hang up away from your desk

Add the Jabra GN1000 Remote Handset Lifter (RHL) to your Jabra wireless headset system, and you're completely free to roam. With the Jabra GN1000 RHL, you can answer calls, and end them, from wherever your wireless headset takes you.

## JABRA EHS ADAPTER

Polycom Electronic Hookswitch adapter.

The Jabra Electronic Hookswitch (EHS) with Jabra GN9350e and Jabra GN9120-EHS wireless headsets and selected Polycom SoundPoint IP phones, enables you to hear ring tones, answer and end calls, adjust the volume or even mute the call up to 300 feet away from your desk.

## JABRA EHS ADAPTER

Avaya Electronic Hookswitch adapter.

The Jabra Electronic Hookswitch (EHS) adapter is a plug-and-play interface that features full E-Hook functionality. Both hook status as well as incoming call signaling with ring tone detection making this adapter an ideal hands-free solution when used with a Jabra GN9350e or Jabra GN9120-EHS wireless headset and Avaya phone systems.

AVAYA EHS-1 Answer remote call with incoming call signaling with ring tone detection.

AVAYA EHS-2 AND EHS-5 Remote answer/end with no ringtone detection.

## JABRA HHC ADAPTER

Headset Hookswitch Control for Cisco phones.

The Jabra HHC Adapter enables remote Headset Hookswitch Control (HHC) with Jabra GN9350e and Jabra GN9120-EHS wireless headsets and the latest generation of Cisco Unified IP Phones. You can answer and end calls up to 300 feet away from your desk.

## JABRA DHSG CABLE

Siemens Electronic Hookswitch.

The Jabra DHSG cable with Jabra GN9350e and Jabra GN9120-EHS wireless headsets and selected Siemens phones, enables you to hear ring tones and answer/end calls 300 feet away from your desk.

## JABRA DHSG CABLE

Alcatel-Lucent Electronic Hookswitch.

The Jabra DHSG cable with Jabra GN9350e and Jabra GN9120-EHS wireless headsets and selected Alcatel-Lucent phones, enables you to hear ring tones and answer/end calls 300 feet away from your desk.

## JABRA T5330M MULTIUSE

Discover freedom in the office.

Multi-tasking is essential for today's professionals and phone calls limit your ability to get things done. Move freely around your working environment and increase productivity with hands-free communication. Achieve more with the simple, effective and very affordable – T5330M.

With a full 33 foot wireless range, the T5330M unties you from the restrictions of the phone cord, allowing you to move freely around the office while taking and making calls. Additionally, you can pair your cell phone to the headset, allowing you to answer your cell phone with the T5330M.

Ergonomically designed for all-day comfort, the T5330M, complete with a desktop charging cradle, is an advanced cordless headset that helps you increase your productivity and optimize your business success. Once again, Jabra delivers on its promise of industry-leading performance, easy operation and state-of-the-art design.

## JABRA M5390 MULTIUSE

Wireless freedom and wideband sound – anywhere, anytime.

The Jabra M5390 Multiuse headset is a Bluetooth® headset that connects simultaneously to cell phones and desk phones – or to cell phones and PC softphones.

Jabra M5390 Multiuse headset combines the sound and range performance known from office headsets with the convenience of a mobile headset. Based on next generation Bluetooth technology, it offers true wideband audio. And the extended wireless range allows users to answer calls up to 200 feet from their desks.

For optimum call clarity in loud office environments, the microphone is placed close to the users mouth and features noise canceling technology. When out of the office, the Jabra M5390 seamlessly connects to the users cell phone or PC based softphone.

## JABRA JX10 SERIES II with the A7010 MULTIUSE

Two connections –  
One pure design.

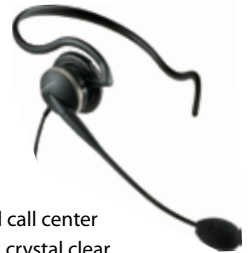

For many professionals, the desk and the cell phone both get a lot of use. Both phones could even be used in the office. So it makes sense to have a headset that connects with both, and that's exactly what the JX10 Multiuse with A7010 now provides. No more hassle changing headsets – the JX10 Multiuse with A7010 fits both needs.

## JABRA GN2100

Ultralight design.  
Unsurpassed quality.

The Jabra GN2100 is the state-of-the-art, professional headset for today's office and call center delivering unsurpassed sound quality and crystal clear conversation. The Jabra GN2100 is available in multiple wearing styles, allowing each user to select from the popular lightweight headband, the comfortable neckband, the adjustable FlexLoop, or the SureFit earhook. Plus, you get the microphone style that's just right for your work environment, be that quiet or loud.

## JABRA GN2000

Designed to perform –  
Built to last.

The Jabra GN2000 Series lets you hear every detail, the first time. With models for both PC-based IP telephony and traditional telephony applications, the Jabra GN2000 is the ideal headset for the busy and noisy environment to ensure exceptional sound quality on every call.

From its sturdy rubber-plastic composite to all-metal boom pivots and impact resistant headbands, every detail of the Jabra GN2000 Series has been designed with durability in mind – making it the perfect choice for even the most demanding call centers.

# Multiuse

BLUETOOTH® HEADSETS FOR SWITCHING BETWEEN ENABLED DEVICES.

## MULTIUSE SOLUTIONS

One headset for all your needs.

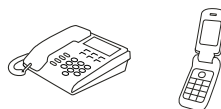

Jabra Multiuse is a new range of Bluetooth® headsets from GN that can switch seamlessly between cell phones, desk phones and PC softphones. Before Jabra Multiuse headsets you needed separate headsets for separate phones. Now you can simplify your work life. With a Jabra Multiuse headset it does not matter which device you use to make or answer calls. With a Multiuse headset, you can switch effortlessly between any two devices.

A Jabra Multiuse solution consists of a headset that can switch seamlessly between any two Bluetooth devices and a Bluetooth enabler that connects your desk phone or personal computer with your Jabra Multiuse headset.

You can choose from several Jabra Multiuse headsets – each with its own unique design, wearing style and features. What's more, you'll save money because your personal Multiuse headset is a mobile headset, computer headset and desk phone headset all in one.

The Jabra Bluetooth enablers can be used again, if you decide to upgrade to a new headset in the future.

Application uses for Jabra's multiuse headset solutions.

BT5020 Multiuse

BT8040 Multiuse

JABRA A7010 MULTIUSE

Bluetooth® enabler  
for desk phones.

With the Jabra A7010 Bluetooth hub you can connect wirelessly to your cell phone and simultaneously to your corded desk phone. So now you need just one headset for your phone calls. The Jabra A7010 Bluetooth hub is compatible with most standard corded desk phones: analog, digital, PBX and IP. Designed for easy set up, you simply need to connect your desk phone to the Bluetooth hub and the hub to your telephone plug.

JABRA A330 MULTIUSE

Bluetooth® adapter for  
PC based IP telephony.

With the Jabra A330 Bluetooth adapter you can connect any Jabra Multiuse headset to your personal computer and with your cell phone. The Jabra A330 Bluetooth adapter is compatible with Windows 2000, Windows XP and Windows Vista. It is easy to set up, and you do not need any drivers. Simply plug the adapter into a USB port and start your IP telephone call. In addition, the Jabra A330 supports SKPE and Cisco softphone applications, with remote answering functionality, on a Jabra Multiuse headset.

JABRA JX10 SERIES II  
with the A7010 MULTIUSE

Two connections – One pure design.

For many professionals, the desk and the cell phone both get a lot of use. Both phones could even be used in the office. So it makes sense to have a headset that connects with both, and that's exactly what the JX10 Multiuse with A7010 now provides. No more hassle changing headsets – the JX10 Multiuse with A7010 fits both needs.

World-renowned Danish designer Jacob Jensen designed the JX10 Bluetooth® headset, with style being the operative word. The result is uncompromising design – the perfect fusion of function and form.

JABRA JX10 SERIES II MULTIUSE

Superior design.

The distinctively styled Jabra JX10 Multiuse headset is designed by world-renowned Danish designer Jacob Jensen. It connects wirelessly to your Bluetooth cell phone and simultaneously to your corded desk phone with a discreet Bluetooth hub or to your personal computer via a Bluetooth adapter – with none of the hassle of changing headsets.

JABRA BT8040 MULTIUSE

Packed with audio power.

The Jabra BT8040 looks good and sounds even better - a small headset that makes a big design statement. The BT8040 connects wirelessly to your Bluetooth cell phone and simultaneously to your corded desk phone with a discreet Bluetooth hub or to your personal computer via a Bluetooth adapter.

JABRA BT5020 MULTIUSE

All day comfort.

The Jabra BT5020 Multiuse headset is designed with a rotating earpiece that allows you to wear it on either ear for ultimate comfort. The BT5020 connects wirelessly to your Bluetooth® cell phone and simultaneously to your corded desk phone with the Bluetooth hub or to your PC via the USB Bluetooth adapter for convenience and ease of use.

*Available Q2 2008*

JABRA M5390 MULTIUSE

For mobile the office worker.

The first wireless headset to follow you anywhere. The M5390 Multiuse supports you on the road, in your hotel room or in your office. It works with your cell phone, IP softphone and desk phone applications using just one headset. With up to 200 feet of wireless range in the office, you have the flexibility to roam and stay connected.

## Call Center

THE BEST PRODUCTS FOR HANDS-FREE  
CALL CENTER SOLUTIONS.

### JABRA GN2100

Ultralight design.  
Unsurpassed quality.

The Jabra GN2100 is the state-of-the-art, professional headset for today's office and call center delivering unsurpassed sound quality and crystal clear conversation. The headset's lightweight, sleek styling enhances one's professional image and comfort – as well as productivity.

The Jabra GN2100 is available in a variety of wearing styles and microphones. The attractive 4-in-1 design takes personal comfort to a new level, allowing each user to select the most comfortable wearing style – the comfortable neckband, the popular lightweight headband, the adjustable FlexLoop, or the SureFit earhook. For those who know which style best suits their needs, headband and earhook models can be ordered individually. Plus, there is a microphone style that's just right for your work environment, be that quiet or loud.

### JABRA GN2000

Designed to perform –  
Built to last.

The Jabra GN2000 Series lets you  
hear every detail, the first time.  
For PC-based IP telephony, the GN2000

IP supports the full IP network bandwidth for applications such as speech recognition, voice-over-IP calling and computer-based training. For traditional telephone applications, the Jabra GN2000 is the ideal headset for the busy and noisy environment, utilizing the full frequency of the telephone network to ensure exceptional sound quality on every call.

From its sturdy rubber-plastic composite to all-metal boom pivots and impact resistant headbands, every detail of the Jabra GN2000 Series has been designed with durability in mind – making it the perfect choice for even the most demanding call centers.

## JABRA GN9120-EHS DUO

Twice the clarity.  
Exceptional wireless range.

The wireless Jabra GN9120-EHS DUO headset sets new standards for professional communication in noisy office environments and call centers. The DUO version of the award-winning Jabra GN9120-EHS Series

true wireless freedom combined with superior comfort and great sound quality.

The wireless Jabra GN9120-EHS DUO headset is the professional choice for wireless hands-free telephony. Giving you up to 300 feet of range, up to 8 hours talk time plus a host of innovative features, the Jabra GN9120-EHS DUO lets you get more done.

The Jabra GN9120-EHS DUO is reliable and designed for demanding environments. PeakStop™ eliminates overly loud sounds, and the headset is compatible with virtually any telephone. The Jabra GN9120-EHS DUO helps you excel by giving you the freedom to work your way.

## JABRA GN405

Robust versatility  
and customization.

The versatile GN405 is the lightest professional-class headset, offering an unbeatable array of customization options. It's the cost-effective, yet robustly customizable solution that can be deployed across any enterprise to maximize employee productivity and comfort.

The three-in-one GN405 offers customization options thanks to its three interchangeable wearing styles: earhook, earloop and headband. If you're in an especially busy and active work environment, you can even choose the ultra noise-canceling microphone.

## JABRA GN1200

Simple connectivity.  
Greater convenience.

The GN1200 cord is the solution to a common problem of not being

able to connect headset and telephone. Even though most things have been standardized, the cord connecting the phone with the handset or headset is anything but standard as each telephone manufacturer has its own wiring code.

Now, the GN1200 universal "smart" cord will work with virtually any phone providing greater convenience. Just connect the GN1200 and headset through the Quick Disconnect plug and adjust the slider from one position to the next until a dial tone is heard. It's as simple as that!

## JABRA GN8210

Great sound quality.  
Digital acoustic protection.

The completely digital Jabra GN8210 amplifier utilizes state-of-the-art, Digital Signal Processor (DSP) technology throughout to provide a flexible, customizable amplifier that gives the best sound quality with the highest degrees of protection against acoustic exposure and shock. Its incoming volume adjustment feature

automatically keeps the volume of all incoming calls at the same user-set level.

## JABRA GN8000

Professional quality.  
Multipurpose solution.

The Jabra GN8000 multipurpose amplifier connects a headset to virtually any phone. It enhances the quality of calls by reducing background noise and providing a consistent, volume level for calls. It also provides advanced hearing protection, and comes with headset/handset switch to easily direct your calls.

## WHICH HEADSET IS RIGHT FOR YOU?

Four steps is all it takes to simplify the purchase decision and discover the best combination of headset options for your business. Although we have an exceptionally wide range of solutions, please note that not all combinations are possible. For example, if you want a headset with stereo sound, you need to use a headset with two ear pieces. Follow the four steps and check the comparison chart on the following pages to see which headset best fits your needs.

### 1) Wireless or corded?

Wireless headset solutions are ideal if you:

- want the freedom to work at your desk and move about the office. Grab a cup of coffee or go and consult with a colleague without missing a call
- want a sleek, attractive headset design without cords
- may have a need for multi-unit conferencing capability

Corded headset solutions are suitable if you:

- work only at your desk
- want the best possible inbound sound quality in one or both ears
- want Hi-Fi stereo quality

### 2) Working in normal or noisy environment?

Two different business-grade microphones are available to ensure your voice is transmitted clearly, no matter which environment you work in.

- Omnidirectional microphone – Ideal for use in most normal office environments
- Noise-canceling microphone – Great for use in noisy, open office environments

### 3) Want sound in one or both ears? (monaural or binaural)

Do you want to hear sound in one ear or two?

Do you want stereo sound, or is mono sufficient?

- Sound in one ear (monaural) – Ideal if you like to be aware of what's going on around you during a phone call
- Sound in both ears (binaural) – Ideal if you only want to hear the caller's voice and not be distracted

### 4) What's your preferred wearing style?

Select the headset solution with the wearing style that's right for you. Many Jabra headset solutions even offer interchangeable wearing styles, letting you switch styles at any time

- Headband  
Fully adjustable, over-the-head wearing solution

- Earhook  
Flexible earhook that gently and comfortably holds the receiver to your ear

- Behind-the-neck  
Wearing style worn discreetly behind the neck

- Interchangeable: 2-in-1  
Offers you two wearing styles in one headset: headband and earhook

- Interchangeable: 4-in-1  
The 4-in-1 offers you the three following wearing styles: headband, neckband, earhook or earloop

- Behind-the-ear  
Wearing style worn on and behind the ear

- In-the-ear  
In your ear wearing style, with or without hook

## IP Telephony

GET THE MOST FROM YOUR PC, AT  
WORK, ON THE ROAD OR AT HOME.

## JABRA GN9330e USB

Wireless IP telephony.  
Wideband sound.

The Jabra GN9330e USB Headset is among the first wireless office headsets to offer true wideband audio. VoIP with an enhanced design, improved materials and weighing less than an ounce, the GN9330e USB is so comfortable you'll forget you are even wearing it..

The Jabra GN9330e USB wireless headset has an audio bandwidth of 6.8 kHz, which is more than twice that of conventional telephony. Not only does this give users the feeling of a true "face-to-face" conversation. Enhanced noise-canceling microphone technology together with refined wind noise reduction ensures your voice is always transmitted clearly, no matter where you are in the office.

With a range of up to 325 feet, the Jabra GN9330e USB headset makes it possible to take calls throughout an office. And with 6 hours of talk time — and around-the-clock talk time with optional, hot-swappable interchangeable battery — a day's business can be conducted without recharging.

## JABRA GN9350e

Dual function.  
Desk and IP telephony.

The Jabra GN9350e is the ultimate example of wireless headset functionality. This headset has several industry firsts: the first to offer full convergence between traditional and IP telephony, the first to provide DSP enhanced sound clarity and the first to offer IP telephony with wideband audio. The dual-function Jabra GN9350e wireless headset provides high performance in both traditional and PC-based telephone environments. That means you can expand – or even change – your telephone system without having to purchase new headsets.

The new GN9350e offers an improved microphone that reduces wind noise to enhance call clarity and new materials provide a more comfortable fit. It expands your communications potential with a wireless range of up to 350 feet and conference call capability. The GN9350e provides all the benefits of hands-free mobility in a lightweight headset and helps "future proof" your business.

## JABRA GN2000 USB

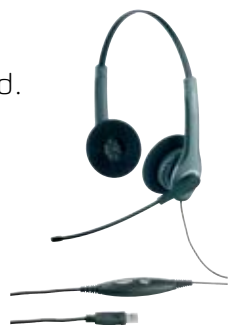

True wideband stereo sound.

For exceptional IP softphone performance, cost-effectively, nothing beats the GN2000 USB. With wideband stereo sound that lets you hear every detail and extra-thick, pivoting ear cushions to keep you comfortable and focused, all day long.

Complete with in-line sound controls, the Jabra GN2000 USB is a true plug-and-play product that is Microsoft Windows® certified.

JABRA GN2000 IS AVAILABLE WITH TWO DIFFERENT MICROPHONES

Get the microphone style that's just right for your work environment, be that quiet or loud. The Jabra GN2000 is available with a noise-canceling microphone – which is perfect for noisy working environments and sound tube that is ideal for quieter offices.

## JABRA GN2100 USB

Hardwired USB cord.  
Superb HiFi stereo sound.

The Jabra GN2100 USB is part of our award winning headset series for business and call center professionals using IP telephony. In fact, many users say that its excellent sound quality gives them the feeling they're having a "face to face" conversation. Moreover, the headset's sleek profile and lightweight, ergonomic design provide a unique combination of style and comfort.

This headset is a 100% plug-and-play, Microsoft Windows® certified headset. It comes complete with in-line sound controls for use with PC-based IP telephony. Our outstanding flex boom arm and a noise-canceling microphone that eliminates unnecessary background noises. It is ideal if you want the highest quality sound for your IP softphone, as well as for music and other multimedia applications. Its ultra-comfortable stereo speakers block out distractions while giving you true high-fidelity sound quality.

## JABRA GN8120 USB

Powerful Digital Voice System

The Jabra GN8120 USB is a digital USB-to-headset adapter that delivers superior audio quality and simplicity for your VoIP softphone. Convenient in-line

softphone controls mean you can enjoy optimized use of your softphone application immediately.

Digital Signal Processing (DSP) and SmoothStream™ technologies remove impurities from the call signal and improve the performance of even the most demanding VoIP applications.

With a simple button press, users can answer/end calls, put calls on hold, use speed dial, increase/decrease call volume and mute the microphone\*. LED indicators quickly alert users to incoming calls as well as onhook/offhook, hold and mute status and new voice messages.

## JABRA GN8110 USB

Plug-and-play installation.  
CD-quality sound.

Professional quality headset system that dramatically improves performance for any PC voice application. With the GN8110 USB<sup>®</sup>, you can connect your Jabra brand headset directly to your PC's USB port. Bypassing the sound card and virtually eliminating sound card compatibility problems.

Certified for use on Windows® 98 SE, 2000, ME and XP (as well as Mac OS 9.04 or greater), the Jabra GN8110 USB is a true plug'n' play adapter. There's no software to install. Just plug your Jabra brand headset into the adapter, and plug the adapter into your PC's USB port. You get clean, distortion free SmoothStream™ digital audio, without the distracting echo effect common to IP Telephony. In fact, any voice-driven application will benefit from the crisp, highly intelligible, "direct-to-digital" sound quality of the Jabra GN8110 USB.

## MICROSOFT® OFFICE COMMUNICATOR 2007

GN has collaborated with Microsoft to integrate Jabra's wideband headsets with Office Communicator 2007 so it's simply plug-and-play. The result is a seamless integration of software and headsets that provides users with superb call clarity and a hands-free, wireless work experience.

The quality of a headset used in a real-time VoIP or video call has a significant impact on the quality of the call. While other so-called "wideband" headsets cut-off around 4,000 Hz, Jabra USB headsets provide a full frequency response up to 6,800 Hz for optimum call clarity resulting in shorter calls and crystal clear communication. You can hear every detail of every conversation. In addition, our PeakStop™ technology protects users against sudden noise spikes.

### JABRA GN2000 USB

OPTIMIZED FOR  
Microsoft®  
Office Communicator

Corded USB headsets that provide day-after-day durability at an affordable price. Available for quiet (SoundTube) and noisy (noise-canceling) environment.

## JABRA JX20 PURA

Power and elegance.

New, elegant headset design from renowned designer, Jacob Jensen. Crafted from premium Titanium metal, with unmatched functionality. Features sculpted moving mechanics for simple, intuitive use and allows up to 6 hours talk time with up to 200 hours standby. Includes a stylish desk charger with intelligent LED battery status and sophisticated necklace to hold JX20 when not in use.

The JX20 is equipped with new multipoint functionality software that allows connection with as many as 8 devices (connects to 2 devices at one time). With Active Noise Reduction, the sound quality is enhanced on the transmitted, as well as, the received audio and Intelligent Volume Settings equalizes incoming audio volume – amplifying a quiet voice, reducing a noisy one. Also, to protect the ear from loud sudden noises, the JX20 features Acoustic Shock Protection.

## JABRA JX10 SERIES II

A pure design attitude.

The sleek, compact design makes JX10 Series II among the smallest and lightest Bluetooth headsets available – but there is no compromise on the prize-winning functionality and performance for which Jabra is famous and now you have a choice of stylish new color options.

Every aspect of the JX10 Series II is designed to perfection. Pairing to your cell phone is simple with the intuitive one-touch button. The JX10 Series II is equipped with new multipoint functionality software that allows connecting to as many as 8 devices (active connections to two devices without the need to “pair”). Even recharging is simple with the elegant desktop charging cradle or use the included car charger. Automatic volume control elevates sound level and quality to match your environment – and active noise cancellation through DSP (Digital Signal Processing) technology reduces background noise significantly for better sound quality.

## JABRA JX10 CARA

Indulge your senses in a timeless masterpiece that is crafted out of stainless steel. The JX10 Cara is simply the most elegant way to talk wirelessly on your cell phone.

## JABRA BT8040

Packed with audio power.

The Jabra BT8040 looks good and sounds even better - a small headset that makes a big design statement. The BT8040 combines the latest technologies to offer true audio excellence.

With Active Noise Reduction, the sound quality is enhanced on the transmitted, as well as, the received audio and Intelligent Volume Settings equalizes incoming audio volume – amplifying a quiet voice, reducing a noisy one. Also, to protect the ear from loud, sudden noises the BT8040 features Acoustic Shock Protection and e-SCO improves voice transfer from headset to phone.

On the move or in the office; Jabra BT8040 plays music from cell phones, media players and PC's\*. Listen to pod-casts or internet radio via A2DP - no need for headphones.

The BT8040 also features a unique wearing style – no hook. The third generation Jabra ear gel comes in three sizes, keeping ear and headset in perfect harmony.

## JABRA BT5020

Extreme comfort –  
Exquisite style.

Imagine a headset so comfortable that even after wearing it all day long, you can hardly feel it. And so discreet that you and those around you hardly notice it. Micro ear gels are included to ensure a custom fit. The BT5020 Bluetooth® headset gives you that dream combination.

We've made the dream come true by making a headset which is small, light and comfortable. The BT5020 packs a lot of features into its slender shape: multipoint connections (active connections to two phones without the need to "pair"), wind noise reduction, visual and vibrating alert of incoming calls\*\*, battery status indicator, up to 10 hours of talk time and up to 300 hours standby – an ideal mix for hard-working people.

## JABRA BT3010

Designed by you!

Just think – what if you had a headset that matched your outfit one day and your mood the next? Or looked like the feathers on your pet parrot? What about one with your name

on it? Or your picture? Why put up with the same design every day, when you can create your own? Now, Jabra lets you customize your own covers – and only your imagination sets the limits.

This small Bluetooth headset comes with 33 creative cover designs – including several designed by Jabra users. What's more, you can create endless new versions at [jabra.com](http://jabra.com). In short, the Jabra BT3010 not only gives you the freedom to change things the way things look, it also changes your view of hands-free communication.

The new Jabra BT3010 is much more than an innovative design system. With its discreet earpiece and optional ear hook, you'll enjoy great stability and a secure fit. On top of that, you get up to eight hours of talk time and the uncompromising quality of a Jabra headset.

## JABRA BT2010

Reach further.

It feels good to be on top of things – getting your work done, keeping in touch, making everything come together. Whether you are on the road, at the office, or tackling projects around the house, now you can keep everything under control. That's because Jabra has created a wireless headset designed to help you make a hectic lifestyle a little less hectic.

In good company Jabra BT2010 is the smart way to talk. This discreet headset provides true hands-free convenience and exceptional ease-of-use so you can accomplish other important things while you're on the phone. Not only is the new Jabra BT2010 the perfect state-of-the-art companion for your cell phone, but when it comes to intuitive operation, optimized sound quality, and comfortable fit, you'll find it's the perfect solution for busy people, too. If you want a wireless headset that's practical, intuitive, and delivers great value for the money, you can trust the Jabra BT2010 to deliver.

## JABRA BT2020

Extreme comfort.

Are you chasing down important clients? Or tackling projects around the house? No matter where you are, with Jabra, your headset will remain comfortable even if your day is hectic. Featuring an innovative, streamlined design, plus superb ergonomics, your Jabra headset just might become your most valuable asset.

The Jabra BT2020 is as stable as it is stylish, distributing its weight evenly across your ear. Jabra's design gives you a secure, discreet fit so it won't fall off – even when you're running to your next meeting. And when you talk for hours on end, Jabra provides the comfort you need to continue calling hands-free throughout the day. Not only is the Jabra BT2020 a pleasure to wear, Jabra also offers exceptional features like superior sound quality and intuitive operation.

## JABRA BT2040

Affordable hands-free performance.

The new Jabra BT2040 is ideal for anyone who needs to talk hands-free when they're on the road. Thanks to Bluetooth® technology, there are no wires to get tangled up. What's more, it's probably the most convenient headset on the market – Jabra BT2040 never needs charging. It lets you talk for up to 8 hours and will stay on standby for 6 months on just one battery.

The new Jabra BT2040 is also the most affordable headset in the Bluetooth category. And if you've never had a headset before, you'll find it's also one of the easiest to operate! Best of all, Jabra provides superb quality, comfort, and functionality – all in a single attractive design.

## JABRA BT125

Get more done.

The BT125 – a discreet wireless headset for Bluetooth® cell phones. The headset lets you get on with your talking and keep both hands free for whatever else you need them for.

## JABRA SP5050

As mobile as you.

The Jabra SP5050 is the perfect combination of stylish design and excellent performance. Ideal for use in the car, office or home - the Jabra SP5050 is a lightweight Bluetooth speaker that can be as mobile as you are. The ultra thin design

and simple visor clip makes the Jabra SP5050 a nice companion to those on the move seeking hands free communication. By using the Jabra SP5050 while driving, you are free to make and receive calls safely. Thanks to the Bluetooth technology, you can keep your hands on the wheel and your mind on driving.

The Jabra SP5050 is simple to use - with no installation necessary; simply clip onto to the sun visor. Auto pairing makes connection to your cell phone hassle free and easy to manage. Charging is simple with the supplied in-car charger. For optimum safety, the Jabra SP5050 comes with 'Night Driving Mode', reducing distractions while concentrating on the road.

## JABRA C500

The mini boom headset that's comfortable, clear and discreet.

The Jabra C500 is a stylish, lightweight, behind-the-ear headset with built-in miniature microphone boom for optimal voice pick-up. Listening quality is optimized by the high-sensitivity miniature speaker and Jabra MiniGel™, which channels sound into your ear.

Every conversation becomes an enjoyable experience with this contoured earpiece that fits discreetly behind either ear for a comfortable and secure fit.

Answering and ending calls is convenient too, with the 'Answer'/'End' button located right at your fingertips on the microphone boom.\* Also includes the handy mute switch on the boom that is great if your on conference calls.

## JABRA BT3030

Music meets  
the streets!

Bluetooth just got cool thanks to the Jabra BT3030. Not only does it look good, it sounds great. Finally a product that lets you listen to music from your mobile - without damaging your style!

Jabra BT3030 plays music from any enabled device such as mobile phone and Mp3 player. Play, pause, skip - remote control your music without touching your mobile.\* That's right - no wires!

No need for phone envy - keep it in your pocket! When a call comes in, your tune pauses and the call connects. A microphone in the dog tag picks your voice up, loud and clear. No hands, no missed calls.

The dog tag design keeps the wearing style simple. But if it doesn't fit your wardrobe, use the optional clip. Your belt, your bag, your pants - you choose the look, you choose the style.
