BATTERY INSTALLATION

- The battery compartment is located on the back of the unit.
- Unscrew and lift the cover away from the battery compartment.
- Insert 3 “AA” batteries as shown.
- For longest life and best performance use only alkaline batteries.
- Replace the battery compartment cover.

BATTERY SAFETY INFORMATION

In exceptional circumstances batteries may leak fluids that can cause a chemical burn injury or ruin your toy (product). To avoid battery leakage;

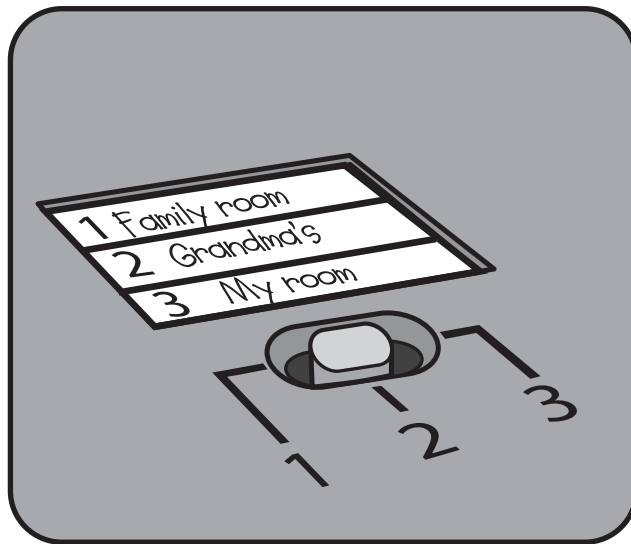

- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the product before being charged (if designed to be removable).
- Rechargeable batteries are only to be charged under adult supervision (if designed to be removable).
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Do not mix old and new batteries.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the product.
- The supply terminals are not to be short-circuited.
- Dispose of battery(ies) safely.
- Do not dispose of this product in a fire. The batteries inside may explode or leak.

NOTE:

- *If your DVD player does not respond properly to the controller, you may have to replace the batteries.*
- *After replacing the batteries, you do **NOT** have to re-program the codes into your controller - the codes you programmed will be automatically saved.*

3-POSITION MEMORY SWITCH

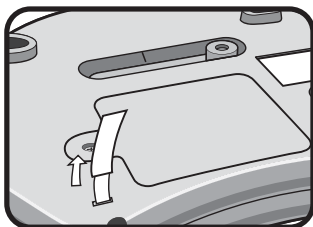

Your InteracTV unit can be set-up to be played with 3 different DVD players. There is a 3-position memory switch and a blank label located on the back of the unit to indicate which DVD player you want to program.

Before programming the unit slide the switch to position 1, 2, or 3. Don't forget to mark the label for easy reference. Remember - you must perform the following steps for each DVD player you wish to use with the controller.

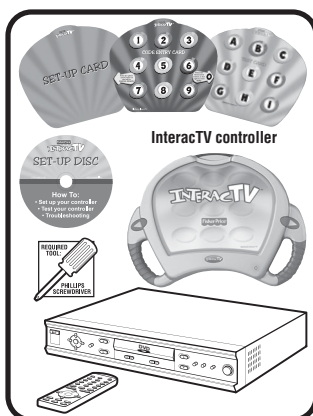

Now you are ready to program the controller.

There are 3 methods that can be used to set-up the controller for each DVD player. Begin with method 1.

SETTING UP THE CONTROLLER

BEFORE YOU BEGIN: Make sure you have removed the TRY ME pull-tab from the back of the InteracTV controller.

WHAT YOU'LL NEED TO SET UP THE CONTROLLER

To set up the InteracTV controller to work with your DVD Player, you will need the following:

- The InteracTV controller
- A DVD player
- Your DVD Player's remote control
- SET-UP disc
- SET-UP card
- CODE ENTRY card
- TEST card

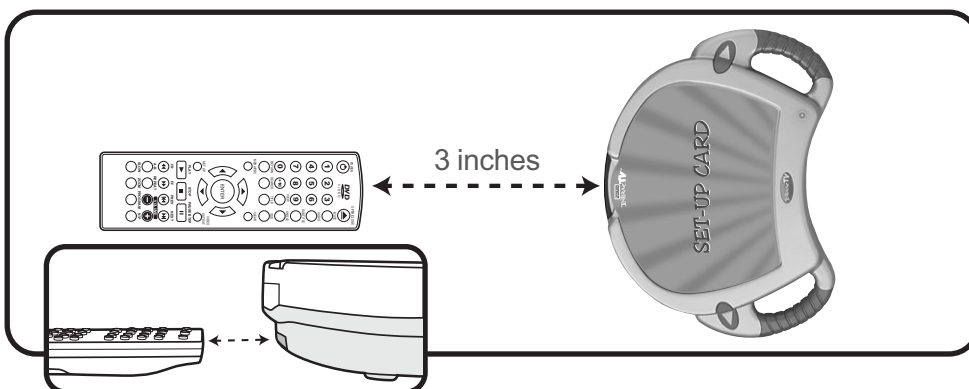

METHOD 1 - PROGRAMMING THE UNIT USING THE REMOTE LEARNING METHOD

This method is the same method of programming that is described in your DVD tutorial and on the QUICK SET-UP INSTRUCTIONS.

1. Make sure your DVD player is turned off while programming your InteracTV controller.
2. Set the 3-position switch on the back of your InteracTV controller to the desired setting.
3. Insert the SET-UP card into your InteracTV controller. When the card is properly inserted, the light on the bottom of your controller will blink twice.

4. Place the InteracTV controller on a flat surface facing your DVD Player's remote, approximately 3 inches apart.

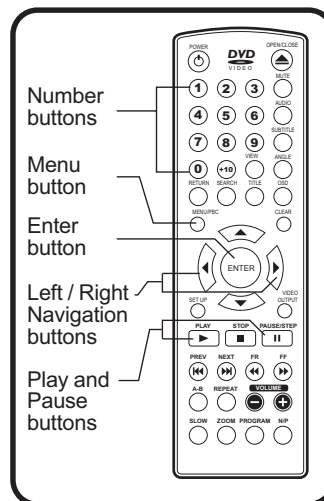

NOTE: Always be sure your hand is not covering the red window on the front of the controller.

5. Follow the step-by-step audio instructions from the InteracTV controller, pressing the buttons on your DVD player's remote when prompted by the voice from the controller.

When pressing the buttons on your DVD player's remote, make sure you press each button firmly, and hold until the green light goes off on the controller.

If you hit the wrong button on your DVD player's remote during the SET-UP procedure, simply begin the SET-UP procedure again by removing the SET-UP card and re-inserting it again. This resets the controller back to the beginning of programming mode. Begin the REMOTE LEARNING METHOD again starting from step 4.

NOTE:

- DVD remote controls can vary. On some remotes, both the **PLAY** and **PAUSE** functions are dedicated to one button. If your DVD player's remote uses the same button for both **PLAY** and **PAUSE**, simply press this same button at both prompts during the **SET-UP** procedure.
- If your DVD player's remote control does not have all of these buttons, refer to the two alternate methods for programming your InteracTV controller.

6. Once you've entered all the buttons as instructed, remove the SET-UP card and test that the controller is programmed properly by proceeding to the **TESTING YOUR CONTROLLER** section of this manual.

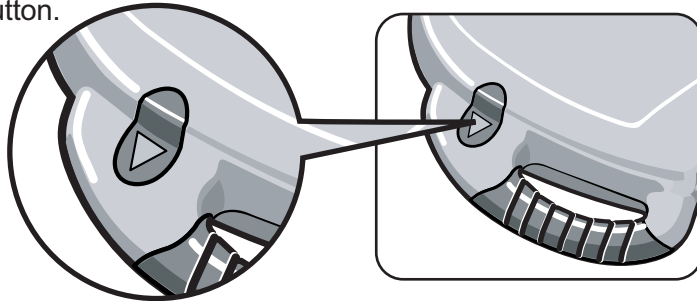

METHOD 2 - PROGRAMMING THE UNIT USING THE MANUFACTURER CODES

1. Insert the CODE ENTRY card into your InteracTV controller. When the card is properly inserted, the light on the bottom of your controller will blink twice.
2. Look up the manufacturer's code for your DVD player in the back of this USER'S MANUAL. If there are multiple codes for a particular manufacturer, start with the first code.
3. Enter the first code number using the number buttons on the InteracTV controller.
4. After the 4th digit is pressed, the Green LED light will display a long blink.
5. Remove the CODE ENTRY card from the InteracTV controller and test that the controller is programmed properly by proceeding to the TESTING YOUR CONTROLLER section of this manual.
6. If all nine letter buttons and both arrow buttons do not light up on your TV screen properly during the TEST, begin the SET-UP procedure again from STEP 1 of this method using the next manufacturer's code listed for your DVD player.
7. If you have tried all the codes for your manufacturer and all the buttons still do not light up on your TV screen properly during the TEST, try programming the unit using the next method.

METHOD 3 - PROGRAMMING THE UNIT USING MANUAL SEARCH

1. Turn off the power to your DVD player.
2. Insert the CODE ENTRY card into your InteracTV controller. When the card is properly inserted, the light on the bottom of your controller will blink twice.
3. Point the controller directly at the DVD player and begin pressing the Backwards Arrow Button.

The green LED will blink a short blink each time the Backwards Arrow Button is pressed. As you press the Backwards Arrow Button, your controller will search through all its codes to find a proper code for your DVD player.

4. Continue pressing the Backwards Arrow Button SLOWLY until the power to your DVD player turns ON. When the power goes on, the controller has found a code that should work. Stop pressing the Backwards Arrow Button and remove the CODE ENTRY card.

NOTE: THIS STEP MAY TAKE SEVERAL MINUTES - PLEASE BE PATIENT.

5. Test that the controller is properly programmed by proceeding to the TESTING YOUR CONTROLLER section of this manual.
6. If all nine letter buttons and both arrow buttons do NOT light up on your TV screen properly during the TEST, begin the MANUAL SEARCH procedure again from STEP 1.
7. If you have manually searched through all the DVD codes, the Green LED button will no longer blink. To start over, remove and re-insert the CODE ENTRY card. This resets the controller back to the beginning of programming mode. Try the MANUAL SEARCH method again starting from step 3.

IMPORTANT!

If you continue to experience trouble programming your InteracTV controller, DO NOT RETURN THE PRODUCT TO THE STORE. We're just a phone call away. Call our consumer affairs hotline toll free at 1-800-432-5437 or visit us online at service.fisher-price.com.

TESTING YOUR CONTROLLER

1. Turn your DVD player on and insert the Set-Up disc.
2. Using your DVD player's remote, select "Test Your Controller" from the main menu.
3. Insert the TEST card into your InteracTV controller and follow the "Test Your Controller" instructions to make sure your InteracTV controller has been set up correctly.
4. If all nine letter buttons and both arrow buttons light up on your TV screen properly during the TEST, then your controller is now set up for this DVD player and you're ready to play!
5. If all nine letter buttons and both arrow buttons do NOT light up on your TV screen properly during the TEST, begin the SET-UP procedure again.
6. If after a second attempt all nine letter buttons and both arrow buttons do NOT light up on your TV screen properly during the TEST, refer to one of the other two methods for setting up your InteracTV controller.

NOTE:

- During the TEST procedure and when you are playing InteracTV, your controller should always be pointed directly at your DVD player.
- During the TEST procedure and when you are playing InteracTV, make sure there are no objects between your controller and your DVD player.
- During the TEST procedure, always make sure you press all nine letter buttons and both arrow buttons on your controller one at a time, and then wait a moment for the corresponding letter or arrow button to light up on your TV screen.

HOW TO PLAY

To play InteracTV you will need your InteracTV Controller, an InteracTV disc, and one of the InteracTV Activity Cards.

- Insert the InteracTV disc into your DVD player.
- Insert an Activity Card, picture side up, into the slot on the face of the InteracTV controller. When the Activity Card is properly inserted, the light on the bottom of the controller blinks twice and the show begins! The game displayed on your TV should be the same as the card you just inserted.
- There are key points throughout the show that will prompt your child to respond to interactive questions. When your child is asked a question, various answers -- including the correct one -- appear on the screen.
- Your child selects an answer by pressing the picture or symbol on the Activity Card that corresponds with the same picture or symbol on screen. InteracTV is so simple to use, that after a little help from you, your child will be able to play for hours.
- At any time, your child can replay or skip sections using the controller's arrow buttons.

InteracTV turns television from an inactive to an *inter-active* experience!

FCC NOTE (UNITED STATES ONLY)

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.

Note: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

FISHER-PRICE and MATTEL shall not be liable for operational, technical, or editorial errors/omissions made in this manual.

The information in this manual may be subject to change without prior notice.
