

Land safely
at your new
location

Count on Agilent to **streamline** your move

When you're relocating your instruments, every move you make is critical. So whether you need to relocate a single instrument or your entire lab, choosing Agilent should be the first move you make.

We'll put our 40 years of experience in instrument design and laboratory processes to work to plan and execute your entire move. Then we'll guarantee that all your instruments perform as well after the move as they did before.

It doesn't matter if the instruments you're moving were manufactured by Agilent or another vendor. Our highly-trained personnel have exceptional experience working in multi-vendor environments, so all your equipment will receive the care and consideration you deserve.

You'll have a single point of contact for your entire move, so you'll avoid the problems of dealing with multiple vendors and schedules. You'll avoid costly mistakes and unexpected downtime because experienced Agilent personnel handle every aspect of your move from de-installation to configuration testing and requalification.

Whether you are relocating across the hall or across the country, count on Agilent Relocation Services to provide a worry-free move that minimizes disruption and maximizes uptime.

"As always, the service received by our lab from Agilent was excellent, which is one reason why I prefer to buy Agilent products."

Vic Sterup, Criminalist Supervisor
Nebraska State Patrol Satellite
Crime Laboratory

Mr. Sterup gave Agilent Relocation Services high satisfaction ratings for:

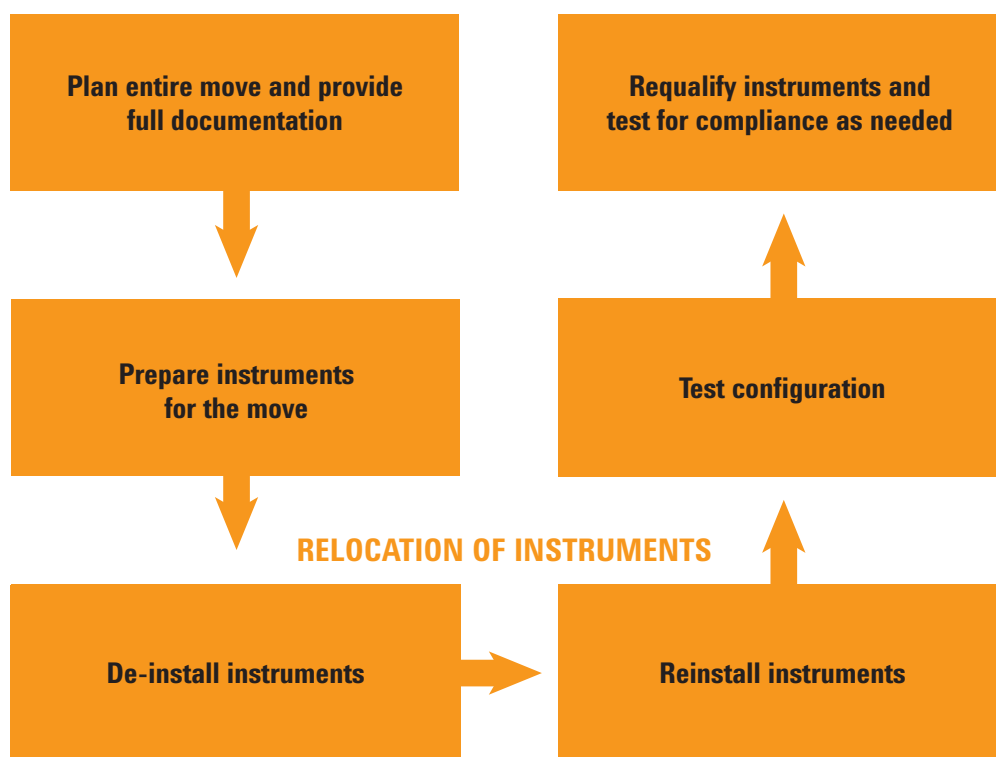

- **Definition:** Defining project scope and providing clear and concise documentation
- **Quality:** Meeting all expectations

Your Move: Managed efficiently and expertly

Your advantage:
Minimum disruption — maximum uptime
