

## Training Program for Regulatory Compliance in the Pharmaceutical Industry

Agilent Technologies provides carefully planned, effective training courses in using Agilent chemical analysis hardware and software products. These courses make it easier for you to qualify and document the performance of your Agilent chemical analysis instruments and systems, ensure that your Agilent instruments are performing to appropriate specifications, verify that your methods are up date and suitable for your purposes, and provide traceable chains for a complete record of your laboratory analyses.

**You can register by:**

- Logging on to [www.agilent.com](http://www.agilent.com) and go to the Education link under chemical/biochemical.
- Calling toll-free: 1-800-227-9770 in the U.S and Canada.

Course Title	Course No.	No. of Days	Description
Instrumentation Qualification	H1183A	1	Teaches operating principles as well as validation and qualification approaches, including Design Qualification, Installation Qualification, Operational Qualification and Performance Verification for LC, GC, GC/MS, IR and U-Vis chemical analysis instruments in pharmaceutical laboratories.
Method Validation	H1184A	2	Covers why an analytical method should be validated and which parameters must be validated for pharmaceutical applications.

Information, descriptions, and specifications in this publication are subject to change without notice.

Not every course is available in every area worldwide. For detailed information on course availability, please call your Agilent chemical analysis representative.
