
Analog Pigtailed PIN Photodiodes

Technical Data

Features

- **Variety of Flange/Pinout Options**
- **Compact Package**
- **High Reliability Planar InGaAs PIN Photodiode**
- **High Responsivity**
- **High Linearity**
- **Low Back Reflection**
- **High Bandwidth >1.5 GHz**
- **-40°C to +85°C Operating Temperature Range**

Applications

- **CATV/CCTV**
- **Fiber in the Loop (FITL)**

Description

The PDA range of products includes a variety of compact fiber pigtailed devices designed for wide operating temperature, low cost applications such as fiber in the loop. The planar InGaAs photodiodes are manufactured using MOVPE growth technology and give low leakage and high responsivity performance with excellent reliability.

The construction of the devices includes a hermetically sealed photodiode and an actively aligned fiber pigtail and is designed to be compatible with the environmental requirements of the Bellcore TA-NWT-000983 document.

The product range includes a variety of pinout, fiber type, and package mounting bracket

PDA2446

options, designed to match the majority of offerings in the marketplace. If the specific arrangement or performance you require is not listed, please contact Hewlett-Packard. High flexible design and manufacturing processes allow both physical and electro-optic customization to suit your needs.

PDA Pigtailed Photodiode Specifications

Absolute Maximum Ratings

Absolute maximum limits mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided that each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.

Parameter	Symbol	Minimum	Maximum	Units
Reverse Voltage	V _r	-	20	V
Reverse Current	I _r	-	1	mA
Forward Voltage	V _f	-	1	V
Forward Current	I _f	-	5	mA
Power Dissipation	-	-	50	mW
Operating Temperature	T _c	-40	+85	°C
Storage Temperature	T _s	-40	+85	°C
Soldering – 10 seconds	-	-	+260	°C
Fiber Pull	-	-	10	N

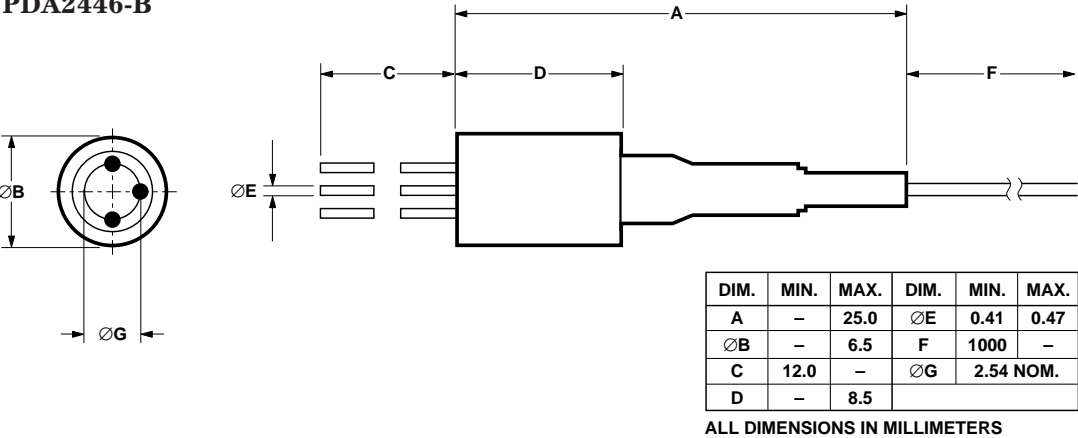

Performance Specifications

Parameter	Symbol	Test Conditions: Unless Otherwise Stated V _r = 5 V, T _c = +25°C	PDA2446		Units
			Min.	Max.

Connector Type:

AP = Angle Polished FC/PC

AS = Angle Polished SC/PC

US = Ultra Polished SC/PC

SF = Super Polished FC/PC

Flange Type:

B = Barrel

D = 2 hole PCB mount, 12.7 mm between centers

Additional options are available to meet your specific needs. Please contact your local representative for details.

Discrete Pin-Preamplifiers

Preliminary Technical Data

**PPA0052, PPA1052
PPA0155, PPA1155**

Features

- **Integrated InGaAs PIN and GaAs Preamplifier**
- **FC or SC Receptacle or Fiber Pigtailed**
- **Compact Package**
- **High Reliability Planar InGaAs PIN Photodiode**
- **High Responsivity**

Applications

- **SONET/SDH**
- **Instrumentation**
- **O-E Converters**
- **Single and Multimode Fiber Communications Systems**
- **Data Communication Receivers**
- **FDDI**

Description

The PPA*052 and PPA*155 are compact connectorized or pigtailed InGaAs photodiodes with preamplifier designed for wide operating temperature range, low cost applications such as SONET/SDH and Fiber in the Loop. The planar InGaAs photodiodes are manufactured using MOVPE growth technology which gives low leakage and high responsivity performance with excellent reliability. The wide dynamic range GaAs IC pre-amplifier ensures compliance with SONET/SDH standards.

The construction of the devices includes a hermetically sealed photodiode and amplifier actively aligned within a receptacle housing or to a fiber pigtail and is designed to be compliant with Bellcore TA-TSY-000983.

Preliminary Product Disclaimer

This preliminary data sheet is provided to assist you in the evaluation of engineering samples of the product which is under development and targeted for release during 1997. Until Hewlett-Packard releases this product for general sales, HP reserves the right to alter prices, specifications, features, capabilities, function, manufacturing release dates, and even general availability of the product at any time.

Performance Specifications

Absolute Limiting Ratings

Absolute (limiting) ratings mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided that each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.

Parameter	Symbol	Minimum	Maximum	Units
Supply Voltage	V _{DD}	-	5.5	V
Photodiode Voltage (Negative)	V pin	-	-7	V
Power Dissipation	-	-	350	mW
Operating Temperature	T _c	-40	+85	°C
Storage Temperature	T _s	-40	+85	°C
Soldering – 10 seconds	-	-	+260	°C
Fiber Pull	-	-	10	N

Performance Specifications^[1]

Parameter		Minimum	Maximum	Units
Responsivity		0.75	-	A/W
Sensitivity ^[2]	52 Mb/s 155 Mb/s	-39 -36	-	dBm
Overload ^[2,3]		-7	-	dBm
Bandwidth	52 Mb/s 155 Mb/s	35 90	-	MHz
Output Impedance		30	60	ohms
V _{DD} Supply Voltage		4.75	5.25	V
V _{DD} Supply Current		-	50	mA
Photodiode Supply		-7	-4.5	V

Notes:

1. Measured over the operating temperature range and power supply tolerance.
2. Measured at the data rate specified for 1×10^{-10} using an infinite extinction ratio laser source modulated with a 2^{23-1} PRBS pattern.
3. Higher overload performance available. Contact your local Hewlett-Packard Components representative for details.

Fiber Pigtail: Tight jacketed, self-mode stripping, multimode

Parameter	Minimum	Maximum	Units
