

Plasma Display with Media Station

Owner's Instructions

Before operating the unit, please read this manual thoroughly, and retain it for future reference.

REMOTE CONTROL ON-SCREEN MENUS PICTURE IN PICTURE TELETEXT

- Do not place the PDP on an unstable cart, stand, tripod, bracket, table, or floor where it can fall.
- Do not expose the PDP to extreme temperature conditions or to extreme humidity conditions.
- Do not expose the PDP to direct sunlight and other sources of heat.
- Do not expose the PDP to any liquids.
- Never put objects of any kind into the television, and do not place a water-containing vessel on the PDP.
- During a storm conditions (especially when there is lightning) unplug the PDP from the mains socket and aerial.
- Do not step on or twist the power cord.
- Do not overload wall outlets or extension cords as this can result in a risk of fire or electric shock.
- Please use a soft and dry cloth (not containing volatile matter) when you clean the PDP.
- If the PDP is broken, do not try to repair it yourself. Contact qualified service personnel.
- If the remote control is not used for a long period of time, remove the batteries and store it in a cool, dry place.
- Do not drop the remote control.

User Instructions

• Screen Image retention

Do not display a still image (such as on a video game or when hooking up a PC to this PDP) on the plasma monitor panel for more than 2 hours as it can cause screen image retention. This image retention is also known as "screen burn". To avoid such image retention, reduce the degree of brightness and contrast of this screen when displaying a still image.

Cell Defect

The plasma display panel consists of fine cells. Although the panels are produced with more than 99.9 percent active cells, there may be some cells that do not produce light or remain lit.

• Height

The PDP can normally operate only under 2000m in height. It might abnormally function at a place over 2000m in height and do not install and operate there.

Warranty

2

- Warranty Period: One year starting from the purchase of your PDP.
- Warranty does not cover any damage caused by image retention.
- Burn-in is not covered by the warranty.

Caution

The lightning flash and arrow head within the triangle is a warning sign alerting you of "dangerous voltage" inside the product.

The exclamation point within the triangle is a warning sign alerting you of important instructions accompanying the product.

The main voltage is indicated on the rear of the PDP and the frequency is 50 or 60Hz.

WARNING: TO PREVENT DAMAGE WHICH MAY RESULT IN FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

Checking Parts

- Owner's Instruction
- Remote Control / 2 Batteries (AAA)

- Video Cable (DVI)
- 2 Power Cords
- 3 Ferrite Cores

 ➤ 720p and 1080i are not available in DVD mode. For further details, refer to "Preset Signals" on page 51.
- e) SURROUND OUT Surround amplifier (S-L/S-R) or powered speaker (CENTER/SUB-WOOFER) connection to take full advantage of the surround sound effect.

7

Remote Control Buttons

It is possible that the work of the transmitter is dull or not operated normally if the light of the Bulb is on around the PDP.

8

Inserting the Batteries in the Remote Control

You must insert or replace the batteries in the remote control when you:

- Purchase the PDP
- Find that the remote control is no longer operating correctly
- 1 Remove the cover on the rear of the remote control by pressing the symbol downwards and then pulling firmly to remove it.
- **2** Insert two R03, UM4, "AAA" 1.5V or equivalent batteries taking care to respect the polarities:
 - on the battery against on the remote control
 - + on the battery against + on the remote control
- **3** Replace the cover by aligning it with the base of the remote control and pressing it back into place.
 - > Do not mix battery types, i.e. alkaline and manganese.

9

Installing the Display on the Wall Attachment Panel

> Wall attachment panel is sold separately. Check with your dealer.

Installation Notes

- Do not install the PDP on any place other than vertical walls.
- To protect the performance of the PDP and prevent troubles, avoid the followings:
 - Do not install next to smoke and fire detectors.
 - Do not install in an area subjected to vibration or high voltage.
 - Do not install on the wall.
 - Do not install near or around any heating apparatus.
- Use only recommended parts and components.

continued ...

Installing the Display on the Wall Attachment Panel

11

Separating the Display from the Wall Attachment Panel

After lifting the PDP up, pull it forward and remove it from the wall attachment panel.

ENG

12

Connecting Speakers

Connecting PDP and Speakers

Fix the bracket onto the guide pole located on the rear of speaker and fasten the screws. After removing the three screws on the PDP, clamp the speaker and the PDP together and fasten the screws.

Connecting Stand and Speakers

When moving your PDP, do NOT hold the speaker connected to your PDP. It may damage the bracket clamping the speaker and your PDP together and result in a drop of your PDP and a risk of personal damage and injury.

Connect the speaker audio cable to the external speaker output jack on the rear of the Media Station matching the "+" and "--" ends of the cable with the diagram on the Media Station.

- The speakers MUST have more than 15watts rating (impedance 8Ω).
 - The ferrite cores are used to attenuate undesired signals. When you connect the speaker wire to the EXTERNAL SPEAKER OUT (8Ω) connector, bind the speaker wire round the ferrite core to secure it.

Connecting to an Aerial (or Cable Television Network)

14

To view television channels correctly, a signal must be received by the set from one of the following sources:

- An outdoor aerial
- A cable television network
- A satellite network

1 In the first three cases, connect the aerial or network input cable to the 75Ω coaxial socket on the rear of the Media Station.

2 If you are using an indoor aerial, you may need to turn it when tuning your television until you obtain a picture that is both sharp and clear.

For further details, refer to:

- "Storing Channels Automatically" on page 20 "Storing Channels Manually" on page 22 ٠
- ۲

Switching On and Off

- 1 Plug the mains lead of the PDP and Media Station into an appropriate socket.
- 2 Connect the video cable between the **DISPLAY SIGNAL IN** on the rear of the PDP and the **DISPLAY SIGNAL OUT** on the rear of the Media Station.
- **3** Press the **POWER** button on the front panel of the Media Station or remote control to switch the display on.

- If you have purchased this PDP in the United Kingdom, refer to page 57 for further instructions on plug wiring.
 - Do not connect the power cord between PDP and Media Station. Otherwise, the EMI characteristic will become worse because power input and output signals interrupt each other.
 - The ferrite core is used to attenuate undesired signals. When you connect the power cord to the **POWER IN** connector on the rear of the Media Station, bind the power cord round the ferrite core to secure it.

If your Media Station isn't turned on when the power button is pressed, please check if the "TV" mode has been chosen by pressing the "Select" button.

15

Becoming Familiar with the Remote Control

16

The remote control is used mainly to:

- Change channels and adjust the volume
- Display the on-screen menu system

The following table presents the most frequently used buttons and their functions.

Button	Viewing Function	Menu Function
∧ ₽	Used to display the next stored channel.	-
₽ ✓	Used to display the previous stored channel.	-

	Used to decrease the volume.	-
Mute ⊄⊀	Used to switch the sound off te To turn the sound back o press the – or + button.	mporarily. n, press this button again, or
Menu⊞	Used to display the on-screen menu system.	Used to return to the previous menu or normal viewing.
	-	 Used to: ◆ Display a submenu containing selections for the current menu option ◆ Search forwards/ backwards manually for channels ◆ Increase/decrease a menu option value
C	-	Used to confirm your choice.

Setting up your Remote Control

1 Turn off your VCR, Cable box, or DVD.

2 Press the Select button repeatedly to activate another component (VCR, Cable, DVD).

Example: If you want to program the remote control to operate your VCR, make sure that the VCR LED is illuminated.

- 3 Press the **Power** button on the remote control. The component you select should turn on. If it turns on, your remote control is now set correctly.
- 4 Once your remote control is set up, press the **Select** button any time you want to use the remote control to operate your VCR, Cable box, or DVD.
 - When your remote control is in the VCR, Cable, or DVD mode, the volume buttons still control your Media Station's volume.
 - When your remote control is in the TV or Cable mode, the VCR control buttons (PLAY, PAUSE, etc.) still operate your VCR.

17

Plug and Play

When the Media Station is initially powered ON, several basic customer settings proceed automatically and subsequently. The following settings are available.

- 1 If the Media Station is in Standby mode, press the **Power** button on the remote control.
 - <u>Result</u>: The message **Plug & Play** is displayed. It flickers for a little while, and then the **Language** menu is automatically displayed.
- 2 Select the appropriate language by moving the joystick left or right. Press the **MENU** button.
 - Result: The message Antenna input check is displayed. It flickers for a little while, and then the Country menu is displayed. Make sure that the antenna is connected to the Media Station.
- **3** Select your country by moving the joystick left or right.
 - Result: The following countries are available.

Austria - Belgie - Croatia - Denmark -Finland - France - Deutschland - Iceland -Ireland - Italia - Nederland - Norway -Poland - Espania - Sverige - Schweiz -Türkiye - UK - Others

- If you have selected the Others option but do not wish to scan the PAL frequency range, store the channels manually (see page 22).
- 4 To start the store, press the joystick button.
 - <u>Result</u>: The search is start. During searching, the status bar is displayed and the search will end automatically.
 - To stop the search before it has finished or return to normal viewing, press the MENU button.
- 5 When it has finished, the message **Enjoy your watching** is displayed, and then the channel which has been stored will be activated.

Choosing Your Language

When you start using your PDP for the first time, you must select the language which will be used for displaying menus and indications.

1	Press the	MENU button.
	Result:	The main menu is displayed.
2	Move the j	oystick up or down until the Function is selected.
	<u>Result</u> :	The options available in the Function group are displayed.
3	Press the	joystick button.
	Result:	The Language is selected.
4	Select the right.	appropriate language by moving the joystick left or

Storing Channels Manually

22

You can store up to television channels, including those received via cable networks.

When storing channels manually, you can choose:

- Whether or not to store each of the channels found
- The programme number of each stored channel which you wish to identify

1	Press the MENU button. <u>Result</u> : The main menu is displayed.
2	Move the joystick up or down until the Channel is selected. <u>Result</u> : The options available in the Channel group are displayed.
3	Press the joystick button.
4	Move the joystick up or down until the Manual Store is selected. Press the joystick button. <u>Result</u> : The options available in the Manual Store group are displayed with the Program No. is selected.
5	To assign a programme number to a channel, find the correct number by moving the joystick left or right.
6	Move the joystick up or down until the Colour System is selected Select the broadcasting system required by moving the joystick left or right. <u>Result</u> : The following colour systems are available. <u>Auto - PAL - SECAM - NTSC4.43</u>
7	Move the joystick up or down until the Sound System is selected. Select the sound system required by moving the joystick left or right. <u>Result</u> : The following sound systems are available. B/G - D/K - I - L
8	For all the channels to move to the required channel numbers, repeat steps 5 to 7 after selecting the Program No. by moving the joystick up or down.

continued ...

Storing Channels Manually

9 If you know the number of the channel to be stored...

- Move the joystick up or down until the Channel No. is selected. Move the joystick right.
- Select the c (Air channel) or s (Cable channel) by moving the the joystick up or down. Move the joystick right.
- Select the required number by moving the the joystick up or down.
 - If no sound or abnormal sound, re-select the sound system required.
- 10 If you do not know the channel numbers, select the Freq. Search by moving the the joystick up or down. Move the joystick right to start the search.

<u>Result</u>: The tuner scans the frequency range until the first channel or the channel that you selected is received on your screen.

- 11 To store the channel and associated programme number, select the **store** by moving the the joystick up or down. Set to **oK** by moving the joystick left or right.
- 12 Repeat Steps 9 to 11 for each channel to be stored.

Channel mode

- ◆ P (Programme mode): When completing tuning, the broadcasting stations in your area have been assigned to position numbers from P00 to max P99. You can select a channel by entering the position number in this mode.
- C (Real channel mode): You can select a channel by entering the assigned number to each air broadcasting station in this mode.
- S (Cable channel mode): You can select a channel by entering the assigned number for each cable channel in this mode.

You can select these options by simply pressing the**P.STD** (Picture Standard) button on the remote control.

Adjusting the Picture Settings

_

26

Your PDP has several settings which allow you to control picture quality.

1	Press the I <u>Result</u> :	MENU button. The Picture menu is displayed.
2	Press the j	oystick button to enter the picture menu.
3	Select a op	tion to be adjusted by moving the joystick up or down.
4	To adjust t Tint (NTS	he Contrast, Brightness, Sharpness, Colour, or C only), move the joystick left or right.
	<u>Result</u> :	The horizontal bar is displayed. Move the joystick left or right until you reach the setting.
		 In the PC mode, you can not adjust the Colour and Tint,
5	To adjust t	he Colour Tone, move the joystick left or right.
	Result:	The following options are available. Normal - Cool 1 - Cool 2 - Warm 2 - Warm 1

If you make any changes to these settings, the picture mode is automatically switched to the Custom.

Changing the Picture Size

You can select the picture size which best corresponds to your viewing requirements.

1	Press the	MENU button.
	Result:	The main menu is displayed.
2	Move the	joystick up or down until the Function is selected.
	<u>Result</u> :	The options available in the Function group are displayed.
3	Press the	joystick button.
4	Move the	joystick up or down until the Size is selected.
5	Select a y <u>Result</u> :	our required size by moving the joystick left or right. The following modes are available depending on the input source.
		 Auto Wide - Wide - Panorama - Zoom 1 - Zoom 2 - Stretch - 14:9 - Normal
		 Standard - Full - Normal (PC or DVI Mode)

- You can select these options by simply pressing the
 P.Size (Picture Size) button on the remote control.
 - If you watch a still image or the 4:3 mode for a long time, image may be burned onto the screen, view the PDP in Wide or Panorama mode as possible.

Freezing the Current Picture

Press the "Still" button to freeze the current picture. To return to normal viewing, press it again.

In the PIP mode, the main and sub pictures are stilled at the same time.

27

	Move	🛃 Enter	🖽 Menu	

30

The sound settings can be adjusted to suit your personal preferences.

1	Press the MENU button. <u>Result</u> : The main menu is displayed.
2	Move the joystick up or down until the Sound is selected.Result:The options available in the Sound group are displayed.
3	Press the joystick button.
4	Move the joystick up or down until the Equalizer is selected. Press the joystick button.
5	Select a your required option by moving the joystick left or right.
6	Move the joystick up or down until you reach the setting.
≽	 If you make any changes to these settings, the sound

mode is automatically switched to the Custom.

Adjusting the Volume Automatically

Each broadcasting station has its own signal conditions, and so it is not easy for you to adjust the volume every time the channel is changed. This feature lets you automatically adjust the volume of the selected channel by lowering the sound output when the modulation signal is high or by raising the sound output when the modulation signal is low.

1	Press the MENU button.			
	Result: The main menu is displayed.			
2	Move the joystick up or down until the Sound is selected.			
	Result: The options available in the sound group are displayed.			
3	Press the joystick button.			
4	Move the joystick up or down until the Auto Volume is selected.			
5	Select on by moving the joystick left or right.			

31

Selecting the Sound Mode

Depending on the particular program being broadcast, you can display and control the processing and output of the audio signal. When power is switched on, the mode is automatically preset to either "Dual-I" or "Stereo", depending on the current transmission.

1	Press the MENU button.			
	Result: The main	menu is displayed.		
2	Move the joystick up	or down until the sound is selected.		
	Result: The optio	ns available in the Sound group are displayed.		
3	Press the joystick button.			
4	Move the joystick up or down until the Sound Mode is selected.			
5	Select the required sound mode by moving the joystick left or right.			
	Type of broadcast On-screen indication			
	(FM) Mono	Mono		
	(FM) Stereo	Stereo - Mono		
	(FM) Dual	Dual I - Dual II		
	NICAM Mono	NICAM Mono - Mono		
	NICAM Stereo	NICAM Stereo - Mono		

You can select these options by simply pressing the **S.Mode** (Sound Mode) button on the remote control.

>

>

- If the receiving conditions deteriorate, listening will be easier if the mode is set to the **Mono**.
 - If the stereo signal is weak and an automatic switching occurs, then switch to the Mono.
 - When receiving a mono sound in the AV mode, connect to the "AUDIO-L" input connector on the panel of the television. If the mono sound comes out only from left speaker, press the S.Mode button.

Setting the Dolby Surround

This feature allows you enjoy Dolby Pro Logic surround effect fully with only surround speakers are connected to the Media Station.

This allows various modes for the main, center, surround and woofer speakers to be selected.

1	Press the MENU button.			
	Result: The main menu is displayed.			
2	Move the joystick up or down until the Sound is selected.			
	<u>Result</u> : The options available in the Sound group are displayed.			
3	Press the joystick button.			
4	Move the joystick up or down until the Dolby Surround is selected. Press the joystick button.			
	Result: The options available in the Dolby Surround group are displayed with the Mode is selected.			
5	Select the Pro Logic in the Dolby Surround mode by moving the joystick left or right.			
	Result: The following modes are available. Off - Virtual - Pro Logic			
	When you select the Pro Logic , the following settings can be adjusted.			
	 For further details of sound output depending on the each options, refer to page 34. 			
6	Move the joystick up or down until the Mode is selected in the Pro Logic menu.			
7	Select the required mode by moving the joystick left or right			

Result: The following modes are available. Normal – Phantom – Wide

Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic", and the double-D symbol are trademarks of Dolby Laboratories.

Teletext Feature

44

Most television channels provide written information services via teletext. Information provided includes:

- Television programme times
- News bulletins and weather forecasts
- Sports results
- Travel information

This information is divided into numbered pages (see diagram).

Part	Contents
А	Selected page number.
В	Broadcasting channel identity.
С	Current page number or search indications.
D	Date and time.
Е	Text.
F	Status information. FASTEXT information.

Teletext information is often divided between several pages displayed in sequence, which can be accessed by:

- Entering the page number
- Selecting a title in a list

• Selecting a coloured heading (FASTEXT system)

When a Teletext signal is present, the display panel (VFD) on the front of Media Station will show "TTX ON".

Displaying the Teletext Information

You can display Teletext information at any time on your PDP.

- For Teletext information to be displayed correctly, channel reception must be stable; otherwise:
 - Information may be missing
 - Some pages may not be displayed
- 1 Select the channel providing the Teletext service by pressing the $P \land$ or $P \checkmark$ button.
- 2 Press the **Text/Off** button to activate the teletext mode. <u>Result</u>: The contents page is displayed. It can be redisplayed at any time by pressing the (index) button.
- 3 Press the **Text/Off** button again. <u>Result</u>: The screen will be split into two. This Double Teletext feature lets you view the actual broadcast and teletext information separately on the screen.
- 4 If you wish to display the actual broadcast and teletext information on a single screen, press the **Text/Off** button again.
- 5 To exit from the teletext display, press the **Text/Off** button again.

Selecting Display Options

46

When you have displayed a Teletext page, you can select various options to suit your requirements.

To display	Press the
 Hidden text (answers to quiz games, for example) 	트 (reveal)
The normal screen	[] (reveal) again
• A secondary page by entering its number	≣ ● (Time/Subcode)
• The broadcast when searching for a page	🖾 (cancel)
The next pageThe previous page	티 (page up) 덴 (page down)
 Double-size letters in the: Upper half of the screen Lower half of the screen 	E€ (size) • Once • Twice
The normal screen	Three times

Selecting a Teletext Page

You can enter the page number directly by pressing the numeric buttons on the remote control.

- 1 Enter the three-digit page number given in the content by pressing the corresponding numeric buttons.
 - Result: The current page counter is incremented and the page is then displayed. If the selected page is linked with several secondary pages, the secondary pages are displayed in sequence. To freeze the display on a given page, press the E€ (hold). Press the E€ (hold) again to resume.
- 2 If the FASTEXT system is used by the broadcasting company, the different topics covered on a Teletext page are color-coded and can be selected by pressing the coloured buttons on the remote control. Press the coloured button corresponding to the topic that you wish to select; the available topics are given on the status line. <u>Result</u>: The page is displayed with other colored information
 - tesult: The page is displayed with other colored information that can be selected in the same way.
- **3** To display the previous or next page, press the corresponding coloured button.
- 4 To display the subpage, see the following steps.
 - Press the (Time/Subcode) button.
 <u>Result</u>: The available subpages appear.
 - ◆ Select the required sub-page. Sub-pages can be scrolled by using the ftell or En button.

 Although a channel is changed by connecting an external device, the information about the previous channel may be displayed.

47

Connecting to the External Devices

Connecting to the DVD Input

Connecting to the Audio Output

The "SURROUND OUT" and "AUDIO OUT" connectors are used for equipment, such as an audio system or external amplifier (to take full advantage of the Surround sound effect).

Rear of the Media Station

50

Connecting to the DVI Input

Connecting to the PC Input

Our adoption of the new VESA[®] Plug and Play solution eliminates complicated and time consuming setup. It allows you to install your monitor in a Plug and Play compatible system without the usual hassles and confusion. Your PC system can easily identify and configure itself for use with your display. This monitor automatically tells the PC system its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols.

On the windows screen, select in the following sequence: Start \rightarrow Settings \rightarrow Control Panel.

When the control panel screen appears, click on **Display** and a display dialog-box will appear.

Select the Settings tab in the display dialog-box.

The two key variables that apply the Media Station-PC interface are "Resolution" and "Colors". The correct settings for these two variables are:

- Size (sometimes called "Resolution") 1024 x 768 pixels.
- Color

24-bit color (might also be expressed as "16 million colors") Shown at left is a typical screen for "Display" dialog box.

If a vertical-frequency option exists on your display settings dialog box, the correct value is **60** or **60 Hz**. Otherwise, just click **OK** and exit the dialog box.

		72.8	37.9	N	N
		59.9	31.5	N	N
	720 x 400	70.1	31.5	Р	N
SVGA	800 x 600	85.1	53.7	Р	Р
		75.0	46.9	Р	Р
		72.2	48.1	Р	Р
		60.3	37.9	Р	Р
		56.3	35.2	Р	Р
XGA	1024 x 768	85.0	68.7	Р	Р
		75.0	60.0	Р	Р
		70.1	56.5	N	N
		60.0	48.3	N	N
WVGA	848 x 480	85	42.9	Р	N
		75	37.5	Р	N
		72	36.1	Р	N
		70	35.0	Р	N
		60	29.8	Р	N

Both screen position and size will vary depending on the type of PC monitor and its resolution. The table below shows all of the display modes that are supported:

• The interlace mode is not supported.

(N: Negative / P: Positive)

• The PDP might operate abnormally if a non-standard video format is selected.

The 4:3 mode does not work with input signals from "720 x 400".

◆ The DVI mode does not support "1024 x 768" (85Hz).

Notes

- The text quality of PC screen is optimum in the VGA mode (640 x 480), the full size displayed PC mode is optimum in the SVGA mode (800 x 600).
- When this PDP is used as a PC display, 24-bit color is supported (over 16 million colors).
- Your PC display screen might appear different depending on the manufacturer (and your particular version of Windows). Check your PC instruction book for information about connecting your PC to a PDP.
- If a vertical and horizontal frequency-select mode exists, select 60Hz (vertical) and 31.5kHz (horizontal). In some cases, abnormal signals (such as stripes) might appear on the screen when the PC power is turned off (or if the PC is disconnected). If so, press the **Source** button to enter the Video mode. Also, make sure that the PC is connected.
- When connecting a notebook PC to the PDP, make sure that the PC screen is displayed through only the PDP monitor (Otherwise, random signals might appear).
- When horizontal synchronous signals seem irregular in PC mode, check PC power saving mode or cable connections.

Pin Configurations

SCART Connector (AV1/AV2/AV3)

Pins 5, 7, 9, 11, 13, 15 and 16 are used for RGB processing and are only wired on the AV1 or AV3 connector.

Pin	Signal	Pin	Signal
1	Audio output R	12	-
2	Audio input R	13	Video chassis return (RGB red)
3	Audio output L	14	-
4	Audio chassis return	15	RGB red input
5	Video chassis return (RGB blue)	16	Blanking signal (RGB switching)
6	Audio input L	17	Video chassis return
7	RGB blue input	18	Blanking signal ground
8	Switching voltage	19	Video output
9	Video chassis return (RGB green)	20	Video input
10	AV-Link (Ext 1)	21	Screening/chassis return
11	RGB green input		-

Care and Maintenance

With proper care, your PDP will give you many years of service. Please follow these guidelines to get the maximum performance from your PDP.

• Identifying Problems

- Do not put the PDP near extremely hot, cold, humid or dusty places.
- Do not put the PDP near appliances that create magnetic fields.
- Keep the ventilation openings clear.
- Do not place the PDP on a rough and slanted surface, such as cloth or paper.

Liquids

- Do not handle liquids near or on the PDP.

Cabinet

- Never open the cabinet or touch the parts inside.
- Wipe your PDP with a clean, dry cloth. Never use water, cleaning fluids, wax, or chemicals.
- Do not put heavy objects on top of the cabinet.

♦ Temperature

- If your PDP is suddenly moved from a cold to a warm place, unplug the power cord for at least two hours so that moisture that may have formed inside the unit can dry completely.

Troubleshooting

Before contacting Service Personnel, perform the following simple checks. If you cannot solve the problem using the instructions below, note the model and serial number of the PDP and contact your local dealer.

No sound or picture	 Check that the mains lead has been connected to a wall socket. Check that you have pressed the Power button. Check the picture contrast and brightness settings. Check the volume.
Normal picture but no sound	 Check the volume. Check whether the MUTE button has been pressed.
No picture or black and white picture	 Adjust the colour settings. Check that the broadcast system selected is correct.
Sound and picture interference	 Try to identify the electrical appliance that is affecting the Media Station, then move it further away. Plug your television into a different mains socket.
Blurred or snowy picture, distorted sound	 Check the direction, location and connections of your aerial. This interference often occurs due to the use of an indoor aerial.
Remote control malfunctions	 Replace the remote control batteries. Clean the upper edge of the remote control (transmission window). Check the battery terminals.
The power indicator is amber blinking.	 The monitor is using its power management system. Check the power management utility on your computer.

Wiring the Mains Power Supply Plug (UK Only)

◆ IMPORTANT NOTICE

The mains lead on this equipment is supplied with a moulded plug incorporating a fuse. The value of the fuse is indicated on the pin face of the plug and, if it requires replacing, a fuse approved to BSI1362 of the same rating must be used. Never use the plug with the fuse cover omitted if the cover is detachable. If a replacement fuse cover is required, it must be of the same colour as the pin face of the plug. Replacement covers are available from your dealer. If the fitted plug is not suitable for the power points in your house or the cable is not long enough to reach a power point, you should obtain a suitable safety approved extension lead or consult your dealer for assistance. However, if there is no alternative to cutting off the plug, remove the fuse and then safely dispose of the plug. Do NOT connect the plug to a mains socket as there is a risk of shock hazard from the bared flexible cord.

IMPORTANT

The wires in the mains lead are coloured in accordance with the following code:

BLUE - NEUTRAL BROWN - LIVE

As these colours may not correspond to the coloured markings identifying the terminals in your plug, proceed as follows:

The wire coloured BLUE must be connected to the terminal marked with the letter N or coloured BLUE or BLACK. The wire coloured BROWN must be connected to the terminal marked with the letter L or coloured BROWN or RED.

Memo

- AFTER SALES SERVICE

 Do not hesitate to contact your retailer or service agent if a change in the performance of your product indicates that a faulty condition may be present.
