Important Warranty Information Regarding Television Format Viewing

Standard screen format televisions (4:3, the aspect ratio of the screen width to height) are primarily designed to view standard format full-motion video. The images displayed on them should primarily be in the standard 4:3 ratio format and constantly moving. Displaying stationary graphics and images on screen, such as the dark top and bottom letterbox bars (wide screen pictures), should be limited to no more than 15% of the total television viewing per week.

Wide screen format televisions (16:9, the aspect ratio of the screen width to height) are primarily designed to view wide screen format full-motion video. The images displayed on them should primarily be in the wide screen 16:9 ratio format, or expanded to fill the screen if your model offers this feature, and constantly moving. Displaying stationary graphics and images on screen, such as the dark side-bars on non-expanded standard format television video and programming, should be limited to no more than 15% of the total television viewing per week.

Additionally, viewing other stationary images and text such as stock market reports, video game displays, station logos, web sites or computer graphics and patterns, should be limited as described above for all televisions. *Displaying any stationary images that exceed the above guidelines can cause uneven aging of picture tubes (CRTs) that leave subtle, but permanent burned-in ghost images in the television picture. To avoid this, vary the programming and images, and primarily display full screen moving images, not stationary patterns or dark bars.* On television models that offer picture sizing features, use these controls to view the different formats as a full screen picture.

Be careful in the selection and duration of television formats used for viewing. Uneven CRT aging as a result of format selection and use, as well as other burned-in images, is not covered by your Samsung limited warranty.
Safety Instructions

◆ *Do not expose the television to extreme temperature conditions or to extreme humidity conditions.*

◆ *Do not expose the television to direct sunlight and other sources of heat.*

◆ *Do not expose the television to any liquids.*

◆ *Never put objects of any kind into the television, and do not place a water-containing vessel on the television.*

◆ *During a storm conditions (especially when there is lightning) unplug the television from the mains socket and aerial.*

◆ *Do not step on or twist the power cord.*

◆ *Do not overload wall outlets or extension cords as this can result in a risk of fire or electric shock.*

◆ *Please use a soft and dry cloth (not containing volatile matter) when you clean the TV.*

◆ *If the television is broken, do not try to repair it yourself. Contact qualified service personnel.*

◆ *If the remote control is not used for a long period of time, remove the batteries and store it in a cool, dry place.*

◆ *Do not drop the remote control.*

☞ *Displaying any stationary images that exceed the long time, it can cause uneven aging of picture tubes that leave subtle, but permanent burned-in ghost images in the television picture. To avoid this, vary the programming and images, and primarily display full screen moving images, not stationary patterns or dark bars.*

This device is not for use in industrial environments.

Caution

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO PREVENT ELECTRICAL SHOCK, DO NOT REMOVE REAR COVER, NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

WARNING: TO PREVENT DAMAGE WHICH MAY RESULT IN FIRE OR SHOCK HAZARD. DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

The lightning flash and arrow head within the triangle is a warning sign alerting you of "dangerous voltage" inside the product.
The exclamation point within the triangle is a warning sign alerting you of important instructions accompanying the product.

☞ *The main voltage is indicated on the rear of the TV set and the frequency is 50 or 60Hz.*

➢ *The performance of the remote control may be affected by bright light.*

Inserting the Batteries in the Remote Control

You must insert or replace the batteries in the remote control when you:

◆ *Purchase the television*

◆ *Find that the remote control is no longer operating correctly*

1 Remove the cover on the rear of the remote control by pressing the symbol (▼) downwards and then pulling firmly to remove it.

2 Insert two R03, UM4, "AAA" 1.5V or equivalent batteries taking care to respect the polarities:
◆ **+** on the battery against **+** on the remote control
◆ **−** on the battery against **−** on the remote control

3 Replace the cover by aligning it with the base of the remote control and pressing it back into place.
Connecting to an Aerial or Cable Television Network

To view television channels correctly, a signal must be received by the set from one of the following sources:

◆ *An outdoor aerial*

◆ *A cable television network*

◆ *A satellite network*

1 In the first three cases, connect the aerial or network input cable to the 75Ω coaxial socket on the rear of the television.

2 If you are using an indoor aerial, you may need to turn it when tuning your television until you obtain a picture that is both sharp and clear.
For further details, refer to:
◆ "Storing Channels Automatically" on page 19
◆ "Storing Channels Manually" on page 20

Switching Your Television On and Off
The mains lead is attached to the rear of your television.

☛ If you have purchased this television in the United Kingdom, refer to page 55 for further instructions on plug wiring.

1 Plug the mains lead into an appropriate socket.

➤ The main voltage is indicated on the rear of the television and the frequency is 50 or 60Hz.

2 Press the " **I** " button (On/Off) on the front of the television.

Result: The Standby indicator on the front of the television lights up.

3 Press the **POWER** (⏻) button on the remote control to switch the television on.

Result: The programme that you were watching last is re-selected automatically.

➤ If you have not yet stored any channels, No clear picture appears. Refer to "Storing Channels Automatically" on page 18 or "Storing Channels Manually" on page 21.
4 To switch your television off, press the " **I** " button (On/Off) again.

Placing Your Television in Standby Mode

Your television can be placed in Standby mode, in order to reduce the power consumption.

The Standby mode can be useful when you wish to interrupt viewing temporarily (during a meal, for example).

1 Press the **POWER** (⏻) button on the remote control.

Result: The screen is turned off and the Standby indicator on the front of the television lights up in red.

2 To switch the television back on, simply press the **POWER** (⏻) button again.

➤ You can also switch on by pressing the **P** ⌃ or ⌄ button.

☛ Do not leave your television in Standby mode for long periods of time (when you are away on holiday, for example). Turn your television off by pressing the " **I** " button (On/Off) on the front of the television. It is best to unplug the set from the mains and aerial.
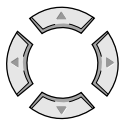

Becoming Familiar with the Remote Control

The remote control is used mainly to:

◆ *Change channels and adjust the volume*

◆ *Set up the television using the on-screen menu system*

The following table presents the most frequently used buttons and their functions.

Button	Viewing Function	Menu Function
︿	Used to display the next stored channel.	–
﹀	Used to display the previous stored channel.	–
0 to 9	Used to display the corresponding channels. ➢ For double digit channels, the second digit must be pushed immediately after the first. Failure to do this will result in a single digit channel being displayed.	
-/--/---	Used to select a channel numbered ten or over. Press this button, and the "**--**" or "**---**" symbol is displayed. Enter the two or three-digit channel number (depending on the model).	
PRE-CH	Press the **PRE-CH** button. The TV will switch to the last channel viewed. To quickly switch between two channels that are far apart, tune to one channel, then use the number button to select second channel. Then, use the **PRE-CH** button to quickly alternate between them.	
⊕	Used to increase the volume.	–
⊖	Used to decrease the volume.	–
MUTE	Used to switch the sound off temporarily. ➢ To turn the sound back on, press this button again, or press the ⊕ or ⊖ button.	
MENU	Used to display the on-screen menu system.	Used to return to the previous menu or normal viewing.
(arrows)	–	Used to: ◆ Display a submenu containing selections for the current menu option ◆ Increase/decrease a menu option value
ENTER	–	Used to confirm your choice.
TV	Used to switch the television on when it is in Standby mode.	Used to exit from the menu system and return to normal viewing directly
EXIT	–	Used to exit from the menu system and return to normal viewing directly.

To become familiar with the various menus provided by your television, you can view the inbuilt demonstration.
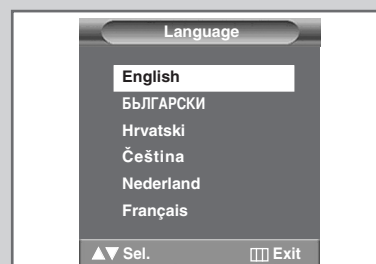

1 Press the **MENU** button.

<u>Result</u>:   The main menu is displayed.

2 Press the ▼ or ▲ button to select **Setup**.

<u>Result</u>:   The options available in the **Setup** group are displayed.

3 Press the ↵ button.

4 Press the ▼ or ▲ button to select **Demonstration**. Press the ↵ button.

<u>Result</u>:   Each of the menu options is displayed in turn.

➢   When you wish to exit from the demonstration, press the **MENU** (▥) button on the remote control.

Adjusting Convergence

If the color appears spread out or "smeared" on the screen, the convergence probably needs alignment. Be sure to use the remote control for the convergence adjustments. (The Convergence Adjustment can not be made by using the control buttons on the front panel.)
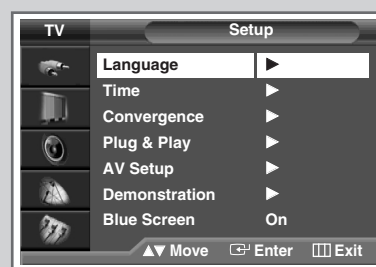

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select `Setup`.

Result: The options available in the `Setup` group are displayed.

3 Press the ⏎ button.

4 Press the ▼ or ▲ button to select `Convergence`. Press the ⏎ button.

Result: The options available in the `Convergence` group are displayed with `Red` is selected.

5 Press the ⏎ button again.

Result: A crosshair pattern is appeared.

6 Adjust convergence by using your remote control.

◆ Use the ▼/▲/◄/► buttons to all directions for select the position.

◆ Press the "**0**" button to select red or blue convergence.

◆ To move the line so that it is superimposed on the horizontal or vertical center-line, use the ⊕, ⊖, ⌃, ⌄ buttons (i.e., make a signal horizontal or vertical line that is as white as possible).

◆ Press the **MENU** (▥) button to exit.

You can adjust convergence automatically for the optimum in the factory.

7 Select `Perfect Focus` in the `Setup` group, then press the ⏎ button.

Result: Perform Perfect Focus in the following sequence: green ➜ red ➜ blue.

After the cursor flickers for one second, the perfect focus feature ends.

➤ When the size of the sub picture is selected to the "`12 PIP`" or "`3 PIP`" mode, the Perfect Focus feature does not work.

Use the remote control to switch between viewing signal from connected equipment, such as VCR, DVD, Set-Top-boxs and the TV source (broadcast or cable)

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select **Input** .

Result: The options available in the **Input** group are displayed.

3 Press the ◪ button.

4 Press the ▼ or ▲ button to select **TV/Video List**. Press the ◪ button.

Result: The options available in the **TV/Video List** group are displayed.

5 Press the ▼ or ▲ button to select signal source, then press the ◪ button.

➢ When you connect equipment to the TV, you can choose between the following sets of jacks : **EXT1**, **EXT2** or **EXT3** on the TV's rear panel, and **EXT4** or **S-Video** on the TV's side panel.

6 Press the **MENU** button.

Result: The main menu is displayed.

7 Press the ▼ or ▲ button to select **Edit Name** .

Result: The options available in the **Edit Name** group are displayed.

8 Press the ◪ button.

9 Press the ◀ or ▶ button to select external device :
VCR – DVD – Cable STB – HD STB – Satellite STB – AV Receiver – DVD Receiver – Game – Camcorder – DVD Combo – PC.

10 Set other signal sources (**EXT2**, **EXT3**, **EXT4**, **S-Video**) using the same method as listed above.

Storing Channels Automatically

You can scan for the frequency ranges available to you (and availability depends on your country). Automatically allocated programme numbers may not correspond to actual or desired programme numbers. However you can sort numbers manually and clear any channels you do not wish to watch.

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select `Channel`.

Result: The options available in the `Channel` group are displayed.

3 Press the ⏎ button.

Result: The `Country` is selected.

4 Press the ⏎ button again. Select your country by pressing the ▼ or ▲ button.
The countries are displayed in the following order:
`Belgium – Germany – Spain – France – Italy – Netherlands – Swizerland – Sweden – United Kingdom – East europe – Others`.

➢ If you have selected the `Others` option but do not wish to scan the PAL frequency range, store the channels manually (see page 22).

5 Press the **MENU** button.

Result: The options available in the `Channel` group are displayed again.

6 Press the ▼ or ▲ button to select `ATM`. Press the ⏎ button.

7 Press the ⏎ button again to start the search.

Result: The channels are stored in an order which reflects their positions in the frequency range. Finally, the search will end automatically.

➢ To stop the search before it has finished, press the **MENU** (▥) button.

8 When the channels have been stored, you can:
◆ Sort them in the order required (refer to page 20)
◆ Assign a name to the stored channels (refer to page 21)
◆ Clear a channel (refer to page 24)
◆ Fine tune channel reception if necessary (refer to page 23)
◆ Activate the Digital Noise Reduction feature (refer to page 27)

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select **Channel**.

Result: The options available in the **Channel** group are displayed.

3 Press the ↵ button.

4 Press the ▼ or ▲ button to select **Ch. scan**. Press the ↵ button.

Result: You can view every memorized channel in order.

Assigning Names to Channels

Channel names will be assigned automatically when channel information is broadcast. These names can be changed, allowing you to assign new names.

1   Press the **MENU** button.

   Result: The main menu is displayed.

2   Press the ▼ or ▲ button to select `Channel`.

   Result: The options available in the `Channel` group are displayed.

3   Press the ⊡ button.

4   Press the ▼ or ▲ button to select `Name`. Press the ⊡ button.

   Result: The `Name` menu is displayed with the current channel automatically is selected.

5   If necessary, select the channel to be assigned to a new name by pressing the ▼ or ▲ button. Press the ◄ or ► button.

   Result: Arrow indications are displayed around the name box.

6   Press the ▼ or ▲ button to select a letter (A~Z), a number (0~9) or a symbol (–, space). Move on the previous or next letter by pressing the ◄ or ► button.

7   When you have finished entering the name, press the ⊡ button to confirm the name.

8   Repeat Steps **5** to **7** for each channel to be assigned to a new name.

You can store up to 100 television channels, including those received via cable networks.

When storing channels manually, you can choose:

◆ *Whether or not to store each of the channels found*

◆ *The programme number of each stored channel which you wish to identify*
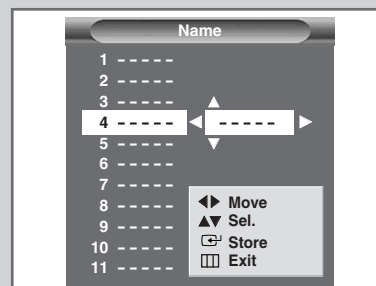

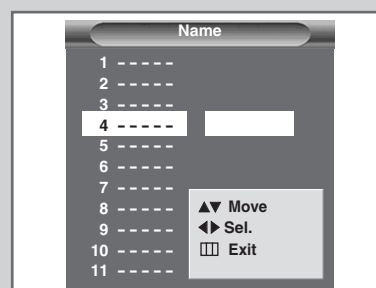

---

1 Press the **MENU** button.

Result: The main menu is displayed.

---

2 Press the ▼ or ▲ button to select `Channel`.

Result: The options available in the `Channel` group are displayed.

---

3 Press the ⏎ button.

---

4 Press the ▼ or ▲ button to select `Manual Store`. Press the ⏎ button.

Result: The options available in the `Manual Store` group are displayed with `Color system` is selected.

---

5 Indicate the broadcasting standard required by pressing the ◀ or ▶ button repeatedly.

Result: The colour standards are displayed in the following order:
`AUTO – PAL – SECAM – NTSC4.43`.

---

6 Press the ▼ or ▲ button to select `Sound system`. Select the sound standard required by pressing the ◀ or ▶ button repeatedly.

Result: The sound standards are displayed in the following order:
`BG – DK – I – L`.

Storing Channels Manually (continued)

7 If you know the number of the channel to be stored, see the following steps.

- ◆ Press the ▼ or ▲ button to select **Channel**.
- ◆ Press the ► button.
- ◆ Press the ▼ or ▲ button to select **C** (Air channel) or **S** (Cable channel).
- ◆ Press the ► button.
- ◆ Press the ▼ or ▲ button to select indicate the required number.

➤ If no sound or abnormal sound, re-select the sound standard required.

8 If you do not know the channel numbers, select **Search** by pressing the ▼ or ▲ button. Press the ◄ or ► button to start the search.

Result: The tuner scans the frequency range until the first channel or the channel that you selected is received on your screen.

9 If reception is weak, you can fine tune a channel manually. Press the ▼ or ▲ button to select **Fine tune**. Press the ◄ or ► button until the picture and sound are both clear and sharp.

➤ ◆ You can ignore any changes made and return to the previous setting by pressing the Green (**S.MODE**) button.

◆ If you are unable to fine tune a channel, check that the **Color System** and **Sound System** settings are correct.

10 To assign a programme number to a channel, select **Prog.No** by pressing the ▼ or ▲ button. Press the ◄ or ► button to find the correct number.
11 To store the channel and associated programme number, press the ⏎ button.

12 Repeat Steps **7** to **11** for each channel to be stored.

☞ *Channel mode*

- ◆ **P** (Programme mode): When completing tuning, the broadcasting stations in your area have been assigned to position numbers from P00 to max P99. You can select a channel by entering the position number in this mode.

- ◆ **C** (Real channel mode): You can select a channel by entering the assigned number to each air broadcasting station in this mode.

- ◆ **S** (Cable channel mode): You can select a channel by entering the assigned number for each cable channel in this mode.

◆ *Activating the child lock*

This feature allows you to lock the television so that it cannot be switched on via the front panel. It can, however, still be switched on via the remote control. Thus, by keeping the remote control away from unauthorised users, such as children, you can prevent them from watching unsuitable programme.

◆ *Skipping unwanted channels*

You can exclude the channels of your choice from the channel scan operation. When you scan through the stored channels, those that you have chosen to skip are thus not displayed. All channels that you do not specifically choose to skip are displayed during scanning.

---

1 Press the **MENU** button.

<u>Result</u>:   The main menu is displayed.

---

2 Press the ▼ or ▲ button to select `Channel`.

<u>Result</u>:   The options available in the `Channel` group are displayed.

---

3 Press the ↵ button.

---

4 Press the ▼ or ▲ button to select `Channel Edit`. Press the ↵ button.

<u>Result</u>:   The `Channel Edit` menu is displayed with the current channel automatically is selected.

---

5 Press the ▼ or ▲ button to select the number of the programme to which the channel is to be locked. Press the ▶ button.

---

6 Press the ▶ button.

---

7 To lock or unlock the channel, select `On` or `Off` by pressing the ▼ or ▲ button. Press the ↵ button to confirm.

---

8 Press the ▶ button.

---

9 To erase or add the channel, select `Erased` or `Added` by pressing the ▼ or ▲ button. Press the ↵ button to confirm.

---

10 Repeat Steps **5** to **9** for each channel to be edited.

Selecting a Channel by Informations

You can display the list of stored channels.

1   Press the **CH INFO** button.

<u>Result</u>:   A list is displayed with the first 13 channels. Two text boxes to the right of the list indicate:

◆   Whether the Teletext feature is available.

◆   Which sound mode is being used.

2   **To...**   **Then...**

Scroll through the   Press the ▼ or ▲ button.
stored channels   <u>Result</u>:   The corresponding channel is displayed.

Select a specific   Press the **TV** (⬜) button.
channel   <u>Result</u>:   The corresponding channel is displayed and the **Information** box disappears.

➤   ◆   External inputs can be displayed and scrolled through in the same way.

◆   You can display the name of the channel or input by pressing the **CH INFO** button.

Changing the Picture Standard

You can select the type of picture which best corresponds to your viewing requirements.

1   Press the **MENU** button.

<u>Result</u>:   The options available in the **Picture** group are displayed.

2   Press the ⏎ button.

<u>Result</u>:   The **Mode** is selected.

3   Select the required picture effect by pressing the ◀ or ▶ button repeatedly.

<u>Result</u>:   The following picture effects are available:
Standard – Movie – Custom – Dynamic.

➤   You can also set these options simply by pressing the **P.MODE** (Picture Mode) button.

Your television has several settings which allow you to control picture quality.

1 Press the **MENU** button.

Result: The options available in the **Picture** group are displayed.

2 Press the ↵ button.

3 Press the ▼ or ▲ button to select **Adjust**. Press the ↵ button.

Result: The options available in the **Adjust** group are displayed with **Color Tone** is selected.

4 Press the ◀ or ▶ button to select the option (**Cool2**, **Cool1**, **Normal**, **Warm1**, **Warm2**).

5 Press the ▼ or ▲ button to select the option (**Contrast**, **Brightness**, **Sharpness**, **Color** or **Tint**-NTSC only) to be adjusted. Press the ◀ or ▶ button.

Result: The horizontal bar is displayed. Move the horizontal bar's cursor left or right by pressing the ◀ or ▶ button.

➤ If you make any changes to these settings, the picture standard is automatically switched to **Custom**.

Freezing the Current Picture
You can freeze the picture when watching a television programme simply by pressing the "STILL (▾)" button.

➤ To return to normal viewing, press this button again.

Extra Picture Settings

◆ *Scan Mode*

You will normally find that scan mode is best set to **Natural** to reduce any slight picture flicker. However, it is possible that some occasional broadcasts (NTSC-M) may benefit by changing the scan mode. **Auto**, **Natural**, **Digital** and **Progressive** modes are available.

◆ *Digital NR*

If the signal received by your television is weak, you can activate this feature to reduce any static and ghosting that may appear on the screen.

◆ *LNA*

This feature is very useful in the situation that the TV is used in a weak signal and amplifies the TV signal in the weak signal area, but not noise.

This feature is working only in a weak signal condition, and that is memorized on current channel, additional.

|	
1	Press the **MENU** button.
	Result: The options available in the **Picture** group are displayed.
2	Press the ⏎ button.
3	Select the required option (**Scan Mode**, **Digital NR** or **LNA**) by pressing the ▼ or ▲ button.
4	Press the ◄ or ► button to change the setting.

This feature allows you can adjust to suit your personal preferences when the equipment with output is connected to the television.

1 Press the **MENU** button.

<u>Result</u>: The main menu is displayed.

2 Press the ▼ or ▲ button to select `Sound`.

<u>Result</u>: The options available in the `Sound` group are displayed.

3 Press the ⊕ button.

4 Press the ▼ or ▲ button to select `Audio Out`.

5 Select the required option (`Volume` or `Standard`) by pressing the ◀ or ▶ button

◆ If you want to adjust the volume level with the volume control on the TV or external amplifier, set to `Volume`.

◆ If you set to `Standard`...

– You can adjust the volume level with the volume control on the audio amplifier.

– The volume control buttons (**MUTE**, ⊕ or ⊖) of the television and remote control do not work.

6 Press the ▼ or ▲ button to select `Int. mute`.
If you set to `On`, no sound output of internal speaker.

Selecting the Sound Mode (depending on the model)

The "DUAL I-II" button displays/controls the processing and output of the audio signal. When power is switched on, the mode is automatically preset to either "Dual-I " or "Stereo", depending on the current transmission.

	Type of broadcast	On-screen indication
NICAM Stereo	Regular broadcast (Standard audio)	**Mono** (Normal use)
	Regular + NICAM Mono	**Mono** ↔ **Mono** **Nicam** (Normal)
	NICAM Stereo	**Stereo** ↔ **Mono** **Nicam** (Normal)
	NICAM Dual-I/II	**Dual-I** → **Dual-II** → **Mono** **Nicam** **Nicam** (Normal)
A2 Stereo	Regular broadcast (Standard audio)	**Mono** (Normal use)
	Bilingual or Dual-I/II	**Dual-I** ↔ **Dual-II**
	Stereo	**Stereo** ↔ **Mono** (Forced mono)

➢ ◆ If the receiving conditions deteriorate, listening will be easier if the mode is set to the **Mono**.

◆ If the stereo signal is weak and an automatic switching occurs, then switch to the **Mono**.

◆ When receiving a mono sound in the AV mode, connect to the "AUDIO-L" input connector on the panel (front or side). If the mono sound comes out only from left speaker, press the **DUAL I-II** button.

Setting the Sleep Timer
You can select a time period of between 30 and 180 minutes after the television automatically switches to Standby mode.

1 Press the **SLEEP** (☻) button.

Result: The **Sleep timer** menu is displayed.

◆ If the sleep timer is not yet set, **Off** is displayed. If the sleep timer is already set, the screen displays the remaining time and then before the television will be placed in standby mode.

2 Press the **SLEEP** (☻) button repeatedly and cycle through the preset time intervals (30, 60, 90, 120, 150, 180).

Result: The television automatically switches to standby mode when the timer reaches 0.

3 To cancel the sleep timer feature, press the **SLEEP**(☻) button repeatedly and select **Off**.

Setting and Displaying the Current Time
You can set the television's clock so that the current time is displayed by pressing the "INFO (▭)" button. You must also set the time if you wish to use the automatic on or off timers.

➢ When pressing the " I " button (On/Off) on the front of the television, the clock setting will be reset.

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select **Setup**.

Result: The options available in the **Setup** group are displayed.

3 Press the ↵ button.

4 Press the ▼ or ▲ button to select **Time**. Press the ↵ button.

Result: The options available in the **Time** group are displayed with **Clock** is selected.

5 Press the ◄ or ► button to move to the hour or minute. Set the hour or minute by pressing the ▼ or ▲ button.

6 When you have finished, press the **TV** button to exit.

7

Switching the Television On and Off Automatically

You can set the On/Off timers so that the television will:

◆ *Switch on automatically and tune to the channel of your choice at the time you select*
◆ *Switch off automatically at the time you select*

➤ The first step is to set the television's clock (refer to "Setting and Displaying the Current Time" on the previous page).

You can display a sub picture within the main picture of TV program or external A/V devices such as VCR or DVD. In this way you can watch TV program or monitor the video input from any connected devices while watching TV or other video input.
1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select **Picture**.

Result: The options available in the **Picture** group are displayed.

3 Press the ⊡ button.

4 Press the ▼ or ▲ button to select **PIP**. Press the ⊡ button.

5 Press the ◀ or ▶ button again to set **On**.

Result: The options available in the **PIP** group are displayed.

6 Press the ▼ or ▲ button to select **TV/Video**. Find a source of the sub picture by pressing the ◀ or ▶ button.

Result: The sources are displayed in the following order:

TV – Ext1 Video – Ext2 Video – Ext3 Video – Ext4 Video – S–Video.

7 Press the ▼ or ▲ button to select **Prog.No**. If you watching TV program, select the channel that you want to view through the sub picture by pressing the ◀ or ▶ button.

➢ When the source of the sub picture (**TV/Video**) is set to **TV**, you can select the channel of sub picture.

8 Press the ▼ or ▲ button to select **Size**. Select a size of the sub picture by pressing the ◀ or ▶ button.

Result: The sizes are displayed in the following order:

Double – Large – Small – 12 PIP – 3 PIP .

➢ ◆ **12 PIP :** You can view up to 12 memorized channels on the sub picture spontaneously.

◆ On the **12 PIP** or **3 PIP** mode, it is impossible to execute swap and position.

Viewing the Picture In Picture (PIP) (continued)

9 Press the ▼ or ▲ button to select **Position**. Select a position of the sub picture by using the ⊡ button.

➤ The **Position** is avaialble in **Large** or **Small**.

Easy functions of remote control

Buttons	Feature
PIP ON	Used to activate or deactivate the PIP function directly.
SWAP	Used to interchange the main picture and the sub picture. ➤ When the main picture is in the Video mode and the sub picture is in the TV mode, you might not hear the sound of main picture when pressing the **SWAP** (⊡) button after changing the sub picture channel. At this time, reselect the channel of main picture.
P ⌃ / ⌄	Used to select the channel of sub picture.
Teletext Feature
Most television channels provide written information services via teletext. Information provided includes:

- ◆ *Television programme times*
- ◆ *News bulletins and weather forecasts*
- ◆ *Sports results*
- ◆ *Travel information*

This information is divided into numbered pages (see diagram).

Part	Contents
A	Selected page number.
B	Broadcasting channel identity.
C	Current page number or search indications.
D	Date and time.
E	Text.
F	Status information. FASTEXT information.

➤ Teletext information is often divided between several pages displayed in sequence, which can be accessed by:

- ◆ Entering the page number
- ◆ Selecting a title in a list
- ◆ Selecting a coloured heading (FASTEXT system)

Displaying the Teletext Information

You can display Teletext information at any time on your television.

☛ For Teletext information to be displayed correctly, channel reception must be stable; otherwise:

◆ Information may be missing

◆ Some pages may not be displayed

1 Select the channel providing the Teletext service using the **P** ⌃ or ⌄ button.

2 Press the **TTX/MIX** (▤⃒▨) button to activate the teletext mode.

Result: The contents page is displayed. It can be redisplayed at any time by pressing the ▤ⅰ (index) button.

3 Press the **TTX/MIX** (▤⃒▨) button again.

Result: The screen will be split into two. This Double Teletext feature lets you view the actual broadcast and teletext information separately on the screen.

4 If you wish to display the actual broadcast at the same time as the teletext page, press the **TTX/MIX** (▤⃒▨) button again.

5 Press the **TV** (▭) button again to exit from the teletext display.
Selecting Display Options
When you have displayed a Teletext page, you can select various options to suit your requirements.

To display...	Press the...
◆ Hidden text (answers to quiz games, for example)	🗐? (reveal)
◆ The normal screen	🗐? (reveal) again
◆ A secondary page	🗐 (sub-page)
◆ The broadcast when searching for a page	🗐 (cancel)
◆ The next page	🗐 (page up)
◆ The previous page	🗐 (page down)
◆ Double-size letters in the: • Upper half of the screen • Lower half of the screen	🗐 (size) • Once • Twice
◆ Normal screen	• Three times

➤ To return to the normal display after using the reveal or size feature, press the **TV** (☐) button again.

Selecting a Teletext Page

You can enter the page number directly by pressing the numeric buttons on the remote control.

1 Enter the three-digit page number given in the content by pressing the corresponding numeric buttons.

Result: The current page counter is incremented and the page is then displayed. If the selected page is linked with several secondary pages, the secondary pages are displayed in sequence. To freeze the display on a given page, press the ▤ (hold). Press the it again to resume.

2 If the FASTEXT system is used by the broadcasting company, the different topics covered on a Teletext page are colour-coded and can be selected by pressing the coloured buttons on the remote control.
Press the coloured button corresponding to the topic that you wish to select; the available topics are given on the status line.

Result: The page is displayed with other colored information that can be selected in the same way.

3 To display the previous or next page, press the corresponding coloured button.

4 To display the subpage, see the following steps.

◆ Press the ▤ (sub-page) button.
Result: The available subpages appear.

◆ Select the required sub-page. Sub-pages can be scrolled by pressing the ▤ or ▤ button.

5 When you have finished, press th **TV** (☐) button to return to your normal broadcast.
Storing Teletext Pages
You can store up to four teletext pages to display them later at leisure.

1 Select the LIST mode using the ▤ button.

Result: Four 3-digit numbers are displayed in different colours.

➤ The ▤ button is used to switch between the LIST and FLOF modes.

2 Press the coloured button corresponding to the page that will be replaced.

3 Enter the new page number using the numeric buttons.

4 Repeat steps **2** and **3** for each page to be stored, using a different coloured button each time.

5 Press the ▤ (store) button until the corresponding blocks blink.

Connecting to the External Input/Outputs

Viewing Pictures From External Sources
Once you have connected up your various audio and video systems, you can view different sources by selecting the appropriate input.

1   Check that all the necessary connections have been made.

2   Switch your television on, then press the **VIDEO** (⊡) button repeatedly.

Result: The input sources are displayed in the following order:
          TV – EXT1 – EXT2 – EXT3 – EXT4 – S-Video.

➤   Depending on the source selected, the pictures may appear automatically.

➤   To watch television programmes again, press the **TV** (▭) button and select the number of the channel required.

Redirecting an Input to the External Output

Your television enables you to choose which audio/video signals are output to the external connector.

1 Press the **MENU** button.

Result: The main menu is displayed.

2 Press the ▼ or ▲ button to select `Setup`.

Result: The options available in the `Setup` group are displayed.

3 Press the ⊡ button.

4 Press the ▼ or ▲ button to select `AV Setup`. Press the ⊡ button.

Result: The options available in the `AV Setup` group are displayed.

5 Select the required output (`EXT1`, `EXT2` or `EXT3`) by pressing the ▼ or ▲ button.

6 Select the source to be directed to the output by pressing the ◄ or ► button.

➤ `EXT1`, `EXT2` : Default
   `EXT3` : Variable

Programming the Remote Control for Other Components
This TV's remote control can operate VCR, CATV , DVD, or Set-top box (STB), in addition to controlling the TV.

➤ The remote control might not be compatible with the TV manufactured by another company.

1 Turn off your VCR, Cable box, DVD or STB.

2 Press the **SELECT** button. Mode is changed whenever **SELECT** button is pressed.

3 Press the **SET** button.

4 Use the numeric buttons to enter the code by manufacturer. Each code must be three digits long.

Example: To enter the code "6", press 0, 0, and 6.
To enter the code "76", press 0, 7, and 6.

➤ See the remote control code tables to find the appropriate code for your particular component. If more than one code is listed, try each one separately until you find the one that works.

5 Press the **POWER** (⏻) button on the remote control.
The component you select should turn on. If it turns on, your remote control is now set correctly.

➤ If it does not turn on, repeat steps above, but try one of the other codes listed for the brand of particular yours.

6 Once your remote control is set up, press the **SELECT** button any time you want to use the remote control to operate your VCR, Cable box, DVD or STB.

➤ ◆ When your remote control is in the **VCR**, **CATV**, **DVD** or **STB** mode, the volume buttons still control your television's volume.

◆ When your remote control is in the **TV** or **Cable** mode, the VCR or DVD control buttons (PLAY, PAUSE, etc.) still operate your VCR or DVD.

19	Video output
20	Video input
21	Screening/chassis return

➤ Pins 5, 7, 9, 11, 13, 15 and 16 are used for RGB processing and are only wired on the EXT1 or EXT3 connector.

Troubleshooting: Before Contacting Service Personnel

Before contacting Samsung after-sales service, perform the following simple checks.

If you cannot solve the problem using the instructions below, note the model and serial number of the television and contact your local dealer.

No sound or picture	◆ Check that the mains lead has been connected to a wall socket.
	◆ Check that you have pressed the " **I** " button (On/Off) and the **POWER** (⏻) button.
	◆ Check the picture contrast and brightness settings.
	◆ Check the volume.
Normal picture but no sound	◆ Check the volume.
	◆ Check whether the **MUTE** (⊄) button on the remote control has been pressed.
No picture or black and white picture	◆ Adjust the colour settings.
	◆ Check that the broadcast system selected is correct.
Sound and picture interference	◆ Try to identify the electrical appliance that is affecting the television, then move it further away.
	◆ Plug your television into a different mains socket.
Blurred or snowy picture, distorted sound	◆ Check the direction, location and connections of your aerial. This interference is often occurs to the use of an indoor aerial.
Remote control malfunctions	◆ Replace the remote control batteries.
	◆ Clean the upper edge of the remote control (transmission window).
	◆ Check the battery terminals.

Wiring the Mains Power Supply Plug (UK Only)

IMPORTANT NOTICE

The mains lead on this equipment is supplied with a moulded plug incorporating a fuse. The value of the fuse is indicated on the pin face of the plug and, if it requires replacing, a fuse approved to BSI1362 of the same rating must be used.

Never use the plug with the fuse cover omitted if the cover is detachable. If a replacement fuse cover is required, it must be of the same colour as the pin face of the plug. Replacement covers are available from your dealer.

If the fitted plug is not suitable for the power points in your house or the cable is not long enough to reach a power point, you should obtain a suitable safety approved extension lead or consult your dealer for assistance.

However, if there is no alternative to cut off the plug, remove the fuse and then safely dispose of the plug.

Do NOT connect the plug to a mains socket as there is a risk of shock hazard from the bared flexible cord.

IMPORTANT

The wires in the mains lead are coloured in accordance with the following code:

BLUE - NEUTRAL   BROWN - LIVE

As these colours may not correspond to the coloured markings identifying the terminals in your plug, proceed as follows:

The wire coloured BLUE must be connected to the terminal marked with the letter N or coloured BLUE or BLACK.

The wire coloured BROWN must be connected to the terminal marked with the letter L or coloured BROWN or RED.

WARNING: **DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL, WHICH IS MARKED WITH THE LETTER E OR BY THE EARTH SYMBOL ⏚ , OR COLOURED GREEN OR GREEN AND YELLOW.**

− **AFTER SALES SERVICE**

− Do not hesitate to contact your retailer or service agent if a change in the performance of your product indicates that a faulty condition may be present.
